HON. GLENN M. ANDERSON, *President*
and Members of the Senate

Gentlemen :

The Senate Factfinding Committee on Agriculture, created by the provisions of Senate Resolution No. 145 of the 1963 Regular Session, submits a report in two parts.

Part A of the report consists of a Department of Finance summary of agricultural operations at state institutions. This summary was prepared at the request of the committee. The figures in the summary relating to the Departments of Mental Hygiene and Youth Authority are for the 1963-64 fiscal year, while those for Correctional Industries are for the 1963 calendar year.

Part B of the report outlines in some detail committee recommendations relating to capital outlay expenditures in the 1964-65 State Budget for agricultural structures and facilities at the various state institutions including state colleges conducting farm operations. These items were reviewed by the committee at a meeting held on the Chico State College campus on September 15, 1964, and a report of the committee's findings and recommendations was submitted to the Department of Finance under date of October 15, 1964. This review function is conducted by the Senate Factfinding Committee on Agriculture functioning pursuant to the provisions of Senate Resolution 145. This resolution provides in part that, "Any state agency which proposes the expenditure of any state funds for capital outlay providing for plans, specifications, construction or purchase of new facilities which are to be used for agricultural purposes shall first submit such proposals to the Factfinding Committee on Agriculture to enable such committee to review and inspect such facilities, equipment or items and to report thereon to the Director of Finance. The Department of Finance shall consider the recommendations of the committee in approving or disapproving any such expenditures in order that any resulting economies may be reflected as soon as practicable."

Respectfully submitted,

VIRGIL O'SULLIVAN, *Chairman*

AGRICULTURAL OPERATIONS REPORT ON AGRICULTURAL
PROGRAMS AT VARIOUS STATE INSTITUTIONS FOR
THE 1963 CALENDAR YEAR AND THE
1963-1964 FISCAL YEAR

DEPARTMENT OF FINANCE

SACRAMENTO

September 3, 1964

HON. VIRGIL O'SULLIVAN, *Chairman*
Senate Factfinding Committee on Agriculture
State Capitol, Sacramento, California

Dear Senator O'Sullivan:

This summary of the agricultural operations in state institutions has been prepared for your committee pursuant to recommendations of the Joint Legislative Committee on Agricultural and Livestock Problems in their meeting July 5, 1956.

It includes the calendar year 1963 for Correctional Industries and the 1963-64 fiscal year for Mental Hygiene and Youth Authority farms. Also the comparison of operations of these farms for the last three years is covered.

Respectfully submitted,

ROY M. BELL, *Assistant Director*
Department of Finance

As indicated below, farming operations have been dropped at several institutions and enterprises closed out at others during the three years covered by this report. Records of these discontinued enterprises are deleted from this report but are still included in the totals.

Atascadero State Hospital dropped all farm operations during the 1963-64 fiscal year. All operations at Agnews State Hospital except pork production discontinued during the 1963-64 fiscal year. At Napa State Hospital all operations except poultry and dairy discontinued during the 1963-64 fiscal year. Mendocino State Hospital stopped vegetable production.

Preston School of Industry closed their poultry, slaughterhouse and are now phasing out beef. California Institution for Men removed all their peach trees in 1963. Paso Robles is discontinuing farming.

October 15, 1964

HONORABLE HALE CHAMPION, *Director*
State Department of Finance
State Capitol
Sacramento, California

Dear Mr. Champion:

This is to inform you that the Senate Factfinding Committee on Agriculture, functioning pursuant to the provisions of Senate Resolution 145 of the 1963 Regular Session of the Legislature, approved, with minor changes, the capital outlay items for agricultural structures and facilities appearing in the 1964-65 State Budget as per the attached report, for the following institutions:

CALIFORNIA STATE COLLEGES, BOARD OF TRUSTEES

Fresno State College
California State Polytechnic College, San Luis Obispo Campus
California State Polytechnic College, Kellogg-Voorhis Campus
Chico State College

DEPARTMENT OF CORRECTIONS

California Medical Facility
Deuel Vocational Institute
California Institution for Men
California State Prison, Folsom

Respectfully submitted,

PAUL K. HUFF

1964-65 AGRICULTURAL CAPITAL OUTLAY ITEMS

STATE COLLEGES

FRESNO STATE COLLEGE

1. Farm Fencing—Completion \$12,300.00

Adequate fencing on the college farm is necessary for livestock grazing on the areas to be fenced. This will provide access to stubble, native and planted feeding areas for the beef, sheep and dairy animals. The fenced type proposed has proved very satisfactory on previous installations.

Description:

This farm fencing development program is the balance remaining of the total amount submitted for fencing on new property. This project will include approximately three miles of perimeter fencing and *one loading chute*. The perimeter fence will be a standard 26" wire mesh, 4 strands barbed wire on studded-tee posts and Powder-River Steel stock gates. The plans and specifications will follow amended Division of Highways requirements adapted to the specific conditions. The area to be fenced under this project is described on the attached Fresno State College farm maps. The entire job to be completed under contract.

Cost Estimate Data:

18,150 ft.—26" mesh—4 bb wire fence	
@ \$3,358/mile	\$11,550.00
Portable loading chute	750.00
Total	\$12,300.00

The committee recommends approval.

2. Construct Glasshouse \$13,400.00

This house will serve as an instruction unit for agronomy and viticulture. Classroom materials must be prepared year around and present facilities are utilized by the Ornamental Horticulture Department. The CP 12 vegetable crops class needs space for flatting and planting various vegetable crops in the greenhouse during early winter months for later transplanting for spring classwork.

Description:

One (1) new glasshouse is included in this project. It is to be aluminaum frame type, truss-supported. The house is to be 25' x 30' x 5'. The house will be equipped with heat, humidity control, water and electricity. The unit is to be constructed by contractors. This is the second phase of a three-phase project.

Cost Estimate Data:

Contract estimate obtained from the glasshouse contractors is as follows for above unit completely installed:

One (1) 25' x 30' x 5' glasshouse	\$13,400.00
---	-------------

The committee recommends approval.

3. Dairy Corral Fence—Completion \$3,600.00

The facility is needed to hold dry cows and heifers during the winter months and serves as a dry-feed-lot for young stock. The continued use by cattle in close quarters has caused a complete breakdown of the existing woven wire fence. The new fence will be a more permanent installation with very little maintenance. This project offers excellent work opportunities for our welding students.

Description:

This project was originally submitted in the 1959-60 budget. The first part was constructed in May 1960. This phase will complete the job. Existing wire fence will be removed and replaced with 2" top pipe rail and three 5/8" cables supported by 3" x 7' pipe posts set in concrete. Gates to be made of 2" pipe. Fill dirt has been placed in position as part of the first project. Student labor will be employed to augment the day labor.

Cost Estimate Data:

970' 2" galv. pipe @ \$.65	-----	\$630.00
625' 3" galv. pipe @ \$1.35	-----	845.00
4,003' 5/8" steel cable @ \$.09	-----	400.00
Miscellaneous supplies, rod, bolts, etc.	-----	225.00
Labor for welding, setting cable and posts and removing old fence	-----	1,500.00
Total	-----	\$3,600.00

The committee recommends approval.

4. Construct Hay Shed ----- \$13,400.00

The proposed hay shed will replace hay storage facilities that were lost when they vacated Hammer Field. It was impractical to try to move the old Hammer Field Base Gym (20-year-old frame building) over to present campus. The construction of this new shed will permit all of the hay to be stored at the feed mill (excepting hay stored in dairy feed barn) adjacent to the platform truck scales. This will permit an accurate accounting of all hay used by the various livestock units.

Description:

A pole-type aluminum covered L-shaped hay shed 37' x 60' x 26' x 128' is being requested. This unit is to be constructed south and east of existing feedmill hay storage facilities. An area 65' x 60' of hard-top surfacing will be required. The job will require some fence relocation to provide access by trucks. Extension of lighting and convenience outlet circuits will be necessary. The entire job to be completed under contract.

Cost Estimate Data:

The estimate of the cost of this building is based on a firm bid from the San Joaquin Pole Construction Company, Fresno and the Fresno County Farm Supply Company.

5,340 ft. 2 Pole building @ \$2.25	-----	\$12,000.00
3,900 ft. 2 Black top @ \$.25 ft. 2	-----	900.00
Relocate Fence	-----	150.00
Electrical	-----	350.00
Total	-----	\$13,400.00

The committee recommends approval.

CALIFORNIA STATE POLYTECHNIC COLLEGE SAN LUIS OBISPO CAMPUS

1. Beef Breeding Unit ----- \$112,000.00

The beef breeding unit is designed and planned to aid in care and management of the cow breeding herd at calving time with individual pens and corrals; to provide feeding and pen space to grow out the replacement females, and feed and carry purchased weaner calves for student projects. At present the replacement heifers and weaner calves are carried in small fields and lots, but are not readily available for student instruction because of inadequate space and quarters.

These facilities and corrals will house cattle to be used by students in judging, grading classes, and livestock meetings and/or demonstrations.

This unit will provide a necessary facility to complete the beef cattle instructional units already available or budgeted on the campus. Other elements of this group

are the steer feeding units, the feedmill, slaughterhouse and bull barn. The breeding facility will complete the units necessary to carry on the instructional program which at San Luis Obispo emphasizes breeding and range management. Currently there are over 358 majors in the Animal Husbandry Department with a 1964 enrollment projection of 380 majors. The unit will also serve the needs of students from other departments who are required to take or who elect courses in animal husbandry.

Description:

It consists of 640 square feet of hay and grain storage, a 3,840 square feet of feed alleys, feed troughs and aprons and corrals. The building will be of steel frame, sheet metal covered with concrete floor and drinking troughs. Fencing will be of pipe.

Cost Estimate Data:

Building site. Clearance and preliminary	\$6,000.00	
General building work	45,300.00	
Electrical	3,800.00	
Roads, walks and parking	4,200.00	
External utilities	6,800.00	
Fencing	28,500.00	
Fees and commissions	5,050.00	
Construction, supervision and management	3,800.00	
Contingency	9,100.00	
Total	\$112,550.00	
	Less preliminary plans	550.00
		<u>\$112,000.00</u>

The committee recommends approval.

2. Addition to Insemination Shed—Dairy \$4,000.00

This project was given local approval last year, but was not high enough on the priority list to be financed. This will provide a processing room for the semen gathered where the total process can be handled by students. Under present conditions it is not large enough to work in the area. The equipment for the unit is available. Adequate space is needed to set up the unit for operation. Under present conditions only one or two students can work with the herdsman at one time. This denies other students an opportunity to develop skill in this important field.

Description:

It is proposed to extend to the west side of the insemination shed an additional room approximately 24' x 16' with door connecting to existing building.

Room to be finished off with ceiling—asphalt tile on floor—windows on north side only. Plenty of artificial light. Cabinets to be built along one wall. Electrical outlets on all walls. Sink—backed up to existing sink in present shed.

Cost Estimate Data:

Building materials	\$1,200.00
Paint	70.00
Plumbing materials	100.00
Electrical materials	550.00
Labor: Construction	1,400.00
Painting	240.00
Electrical	200.00
Plumbing	50.00
10% State Employees' Retirement System	190.00
Total	<u>\$4,000.00</u>

The committee recommends approval.

3. Quarantine and Isolation Pens—Cheda \$3,100.00

This will provide a quarantine and isolation area at the Cheda ranch where new or sick animals can be isolated from the main student-owned herd. It can also

be used for dehorning, vaccinating and treatment of animals which must now be performed in the dairy barn.

The San Luis Obispo County milk ordinance prohibits the keeping of any animal closer than 50 feet of milk barn and closer than 100 feet to milk house and storage facilities. This means that the pen now being used for sick cows and maternity cases does not comply with the county ordinance.

Certain tests are required periodically on the dairy cattle to comply with various state animal health regulations. To conduct these tests it is necessary to have the necessary chutes and headgates for confining the animals. The milking barn is not the proper place for conducting such tests and examinations. The very sensitive dairy cows associate this unpleasant experience with the milk barn and as a result are thrown off production whenever they are brought into the barn following such an experience.

In the treatment of many of the common disease conditions of dairy cattle, it is necessary many times to administer the proper drugs directly into the bloodstream. With the changes in the stanchions and feeding equipment in the milk barn, it is impossible to safely administer the various drugs in the manner mentioned above. This safety factor applies not only to the animals but also to the personnel involved in such treatment.

Description:

Construct quarantine and isolation pens consisting of cross fencing, seven gates, two mangers, holding chute with a stanchion, two 10' x 16' cow shelters and install a water trough with a concrete pad around it.

Cost Estimate Data:

Concrete slabs in sheds and at water trough	
20 cubic yards ready-mix concrete @ \$18.00/cu.yd.-----	\$360.00
Material for two cow shelter sheds-----	600.00
13 - 6" x 6" redwood posts - 350 bd. ft. @ \$160.00 -----	56.00
800 bd. ft. D. F. fence rails and gates @ \$120.00 -----	96.00
Material for stanchions and mangers-----	78.00
Gate hinges, latches, bolts and miscellaneous hardware ----	50.00
Paint -----	100.00
Labor—Painter -----	100.00
Labor—Construction -----	1,500.00
10% State Employees' Retirement System-----	160.00
Total -----	\$3,100.00

The committee recommends approval.

CALIFORNIA STATE POLYTECHNIC COLLEGE KELLOGG-VOORHIS CAMPUS

1. Fence Stable Area ----- \$5,500.00

There are considerable improvements that could be effected by a change in these fences. A new fence would greatly enhance the use of the small pastures and new paddocks; this will allow horses to be moved safely from our large pastures into smaller ones or into paddocks without the time consumed in haltering and leading them. This will also provide an area for sale horses so they would be easily accessible to buyers. It will also greatly facilitate the breeding program by allowing mares that are due to foal to be kept in close proximity to the barn so they may be checked periodically by students.

The location of the new dispensary makes a complete relocation of fences necessary in order to bring horses from pastures into the weaning shed area.

At present time, the fences surrounding the stable area are unsafe for valuable animals that are kept on this campus. Construction costs on many different types of fencing were given consideration, but chain link is the safest and most economical.

The most efficient handling of our breeding program affected by the accessibility to the paddocks and stable area will promote a savings in time consumed that in three years will pay the construction costs in full.

Description:

The project involves removal of old wood fence and installation of new chain link fence with six gates—three double and three single.

Cost Estimate Data:

Fencing:

2,200 ft. @ \$2.00 p/ft. -----	\$4,580.00
6-16 ft. gates @ \$60. ea. -----	360.00
8-10 ft. gates @ \$55. ea. -----	440.00
5-4 ft. gates @ \$22.50 ea. -----	120.00

Total ----- \$5,500.00

The committee recommends approval.

2. Fence Citrus Orchard ----- \$5,300.00

Several varieties of citrus fruit have been planted in Citrus Block 110 near the campus entrance off the San Bernardino Freeway. Other varieties have been ordered and will be planted soon. The first planting was made in 1960; therefore, it is coming into production during 1963-64. For security purposes, this block should be fenced in order to maintain production records and field trials. Many of the trees are of a single new hybrid type and must be protected from theft. Loss of trees and fruit has occurred in the past. The chief significance of these losses is that they upset production records and new varietal tree performance. Property and equipment security is of concern in this block, also. There is a small shed on this property that houses many different pieces of hand tools and fittings, valves, etc. Since the planting 12 trees have been stolen. These were new variety and rootstock plantings.

Description:

This project will be to install approximately 2,100 feet of chain-link fence around the new citrus orchard at the fruit and crops unit for purposes of security.

Cost Estimate Data:

2,100 ft. 6-foot chain-link fence with three-barb wire at an angle and without a top rail \$1.80/ft. -----	\$3,780.00
Labor—including concrete—\$.50/ft. -----	1,050.00
2 ea. 15 roller-type access gates (see sketch attached) @ \$200 ----	400.00
1 ea. Walk-through gate (see sketch attached) -----	65.00
Total -----	\$5,295.00

The committee recommends approval.

In the discussion relating to this item, it was pointed out that the citrus orchard proposed to be fenced is within the right of way being purchased by the Division of Highways for a north-south freeway into Orange County. With this information in mind, the committee approved the project with the understanding that the college will not proceed with this fencing project unless it has positive assurance from the Division of Highways that the actual withdrawal of the orchard from California Polytechnic College will not take place for at least three years. This procedure will assure reasonable use of the fence before the college would be required to move it to a new location. (Exhibit A).

CHICO STATE COLLEGE

1. Farm Buildings ----- \$388,200.00

This project involves the construction of four farm buildings together with adjacent site development and utilities extensions. Included is a sheep barn, beef cattle breeding barn, a farm mechanics shop and a field and fruit crops building. All units with toilets, sewer, heating and lighting.

Sheep Barn—Pole type with redwood board and batten siding, composition roof, concrete floor and asphaltic concrete paved pens. Fencing 4" x 4"—8' O. C. posts, three—2" x 6" rails 6" apart and 3 feet high.

Feed storage approximately 1,850 sq. ft. covered pens 7,900 sq. ft. Approximate cost \$5.10 per square foot.

Beef Cattle Breeding Barn—Similar to sheep barn construction. Fence—4" steel pipe posts—8' O.C. rails.

Five—2" x 6" boards (or pipe) 6" apart—5' high. This building is 84' x 114' and costs approximately \$5.30 per square foot.

Farm Mechanics Building—Wood frame building, board and batten, composition roof. Spread footing foundation, walls and floor with reinforced concrete.

Heated and ventilated, sawdust collection system, overhead exhaust system with flex drop connections, etc.

Two-ton electrical hoist and monorail system air compressor. Electrical service 277/480 V 3 phase—underground to panel. Size 58' x 120' and approximately \$10.80 per square foot.

Field and Fruit Crops Building—Standard metal rigid frame, aluminum siding and roofing. Spread footing foundations, walls and floors reinforced concrete. Exterior wall and roofing insulated. Building 40' x 60' approximately and cost \$11.25 per square foot.

Cost Estimate Data: 4 buildings and site development.

Building site preparation	\$6,700.00
Building—general work	214,500.00
a. Heat, ventilation and air conditioning	15,000.00
b. Plumbing	9,500.00
c. Electrical	34,700.00
Site work—roads, walks, etc.	15,600.00
External utilities	36,100.00
Landscaping, sprinklers, etc.	3,900.00
Fees and commission	22,100.00
Construction, supervising and contract management	12,600.00
Contingency	17,500.00

Total \$388,200.00

The committee recommends approval.

2. Provide concrete on two side aisles in Feed Barn on Farm \$1,500.00

The feed barn is about to be constructed on the college farm. However, present plans call for either dirt or gravel aisles. This presents an unsanitary problem, an inconvenient cleaning problem and a costly cleaning problem. If the area can be cleaned often and completely, the chances are better for the controlling of diseases, viruses, fungi, etc. Also, because of the large amount of rain in this area during the wintertime, with the livestock going in and out of the doors, there is a muddy, undesirable condition. With the provision of concrete aisles, the feed barns will be easy to maintain both economically and more thoroughly, and as a result reduce the chances of sickness among the animals.

Description:

This project consists of constructing a concrete slab in the aisles of the feed barn on the college farm.

Cost Estimate Data:

Labor and material \$1,500.00

The committee recommends approval.

3. Install Concrete Pipe Line and Gates to Irrigate Pasture \$20,000.00

The college farm is now completely irrigated from open ditches which are difficult and expensive to maintain, especially in the pasture areas where the cattle and sheep continually walk down the banks. This pipeline would do away with all open ditches in the pasture areas. Also, this would give us a semi-enclosed irrigation system to use in irrigation and soil and farm management instruction. It would conserve a sizeable amount of irrigation water. Some of these lines must be laid before certain buildings are constructed.

Description:

This project consists of installing concrete pipe to distribute irrigation water to various areas of the north section of the college farm.

Cost Estimate for:

6,893' - 18" Concrete pipe	
730' - 24" Concrete pipe	
165 8 x 12 valves	
2 12' x 48" diversion stands	
11 Vents	
4 16" gates	
1 Corner	

Total \$20,000.00

The committee recommends approval.

CORRECTIONAL INSTITUTIONS

CALIFORNIA MEDICAL FACILITY—VACAVILLE

1. Install Irrigation Water Supply Line

\$106,000.00

Contracts have been consummated for the purchase of up to 1,200 acre-feet of water from the Solano Irrigation District. This was done to assure a water supply for developing and using the acreage available on the 925-acre site. Domestic water is being obtained from the City of Vacaville. Water costs are \$54.00 per acre-foot for domestic, \$4.00 per acre-foot for irrigation.

Wells in this area have been failing rapidly and those owned by the institution were having difficulty supplying minimum domestic needs. Plans are being made to build another institution on this property and also move in and expand the San Quentin dairy to meet the needs of these and possibly other nearby institutions.

Until the above program is started, most of the land will be leased to farmers. The project involves cutting into the Putah South Canal and installing a turnout, then installing 6,500 feet of 16-inch concrete (or equivalent) pipe to the institution. Rights-of-way will be secured and also a pumping plant and holding reservoir provided.

Cost Estimate Data: (Division of Architecture)

Contract basis	\$90,210.00
Project basis	106,000.00

The committee recommends approval.

2. Construct Irrigation System

In the 1962-63 budget, \$3,000 was included to irrigate orchards and lawns on the grounds by purchasing 120 acre-feet of water. Now that 1,200 acre-feet have been secured, this will be tied in with the overall plan and be a part of the general distribution system.

The project in this year's budget should complete the system of making water available to all areas of the property. By providing this distribution, irrigated crops will be practical on all reasonably level areas, using both treated effluent and canal water. It will reserve the more expensive domestic water for institution use only.

Work by inmates on training program.

Cost Estimate Data:

4" Orangeburg pipe, 4,600' @ \$.30	\$1,380.00
6" Orangeburg pipe, 4,015' @ \$.63	2,520.00
Tax	155.00
Total	\$4,055.00

The committee recommends approval.

NOTE: In approving these two items, the committee is cognizant of the fact that the department plans to transfer the dairy farm operations at San Quentin State Prison to the California Medical Facility. The committee further understands that a new minimum security facility programmed for the California Medical Facility will be able to provide a force of inmate labor adequate to service this dairy operation.

DEUEL VOCATIONAL INSTITUTE

1. Install Concrete Pipeline

Irrigation water is pumped from the river in a closed pipeline up to the institution property. From that point to the reservoir, it is carried in an open ditch. This project will replace this ditch.

The three-fold purpose is to:

1. Eliminate losses of water through percolation and evaporation and increase efficiency.
2. Reduce water table problems, and
3. Cut down on wasted land and access problems and lower maintenance costs.

Considerable progress has been made in reclaiming and improving the soil on this farm. A series of drain ditches and a sump pump has made a great deal of the

property useable for crops where it at one time was too wet and had excessive salt content.

Additional irrigation distribution lines and tile drains will be requested in the future as a sound investment.

This intake line is the most important for the present and should improve the conditions on the acreage adjacent to it as well as generally on the farm.

Cost Estimate Data:

3,000-24" concrete pipeline contract.....\$9,750.00

The committee recommends approval.

CALIFORNIA INSTITUTION FOR MEN

1. Replace Boiler at Dairy\$8,000.00

The present boiler at the dairy is 24 horsepower capacity and was originally installed prior to the time the dairy was expanded in order to serve such units as the Youth Training School and Metropolitan State Hospital. These additional customers have resulted in our dairy load more than doubling. The existing 24 hp unit simply does not have the capacity to adequately supply steam to the pasteurizing and particularly to the can washing unit.

This project will provide adequate steam for the dairy operations, including pasteurizing and can washing.

A 60-horsepower unit will be obtained on a purchase order with installation by manufacturer.

Cost Estimate Data:

Previous Financing: None

Unit Cost Estimate:

Material cost\$7,500.00

Supervision500.00

Inmate pay—

Guarding—

Total\$8,000.00

Basis of Cost Estimate:

An estimate by Dixon Boiler Works was obtained at \$7,000 for the 60-horsepower boiler. To this figure was added \$500 for miscellaneous electrical and other connecting expenses and \$500 for supervision.

The committee recommends approval.

2. Replace Well No. 4\$20,000.00

This well is to replace existing irrigation well No. 4 located on the property at the corner of Edison and Cypress Avenues. This well provides irrigation for approximately 150 acres of farmland used for vegetable gardening purposes.

Well No. 4 is approximately 60 years old with a 12" casing and 10" bowls set at 100 feet. On 12-2-59 when the water table was probably at a high point, the Southern California Edison Co. ran an efficiency test and obtained a rating of only 875 gpm. Most of the irrigation wells have 14" bowls set at 150 feet. At the rate the water table is descending, these will need to be extended in the very near future. Well No. 4 was extended to its maximum in 1956.

Description:

Drill 16" well approximately 450 feet deep, provide pump, pumphouse and necessary electrical connections. Well to test 1,200 gpm.

Cost Estimate Data:

Unit cost estimate.....\$20,000.00 by contract

Basis of Cost Estimate:

This is the approximate price of a new well drilled on the institution grounds recently.

The committee recommends approval.

FOLSOM

1. Hay and Feeding Barn\$10,000.00

The loss by fire of the hay storage and feeding barn last fall has made it essential to build a new one as soon as possible. There is practically no permanent cover for hay at the institution now and the fire destroyed the only covered feeding stanchions.

Description:

It is planned to construct a pole type building with corrugated metal roofing and sides as needed. The central hay storage will be approximately 30' wide, 20' high and 60' to 80' long with gable roof.

The feeding areas will be 12' deep on each side with shed roofs approximately 7' above the slab. Metal stanchions and concrete slab floor will be installed.

Cost Estimate Data:

Estimated cost of building on contract and floor, etc., by inmate labor--- \$10,000.00

The committee recommends approval.

Exhibit A**CALIFORNIA STATE POLYTECHNIC COLLEGE**

San Luis Obispo, California

October 27, 1964

MR. PAUL K. HUFF

Executive Secretary

Senate Factfinding Committee on Agriculture

Room 409, State Capitol

Sacramento, California 95814

Dear Paul:

Thank you for the five copies of the minutes of the Senate Factfinding Committee on Agriculture meeting of September 15, 1964, and the October 15 letter of transmittal of the minutes to Mr. Champion. I have need for two more copies and would appreciate receiving them if you have additional copies available.

In connection with the condition placed on the approval of our Kellogg Campus item No. 2, fence citrus orchard, I wish to advise you that the college received a letter under date of September 21 from G. L. Russell, Assistant District Engineer for the Division of Highways, which stated that the division does not anticipate the north-south freeway project will be under construction within the next three years. Mr. LaBounty has advised Mr. Harry Harmon, Chief of the College Facilities Planning office of the California State Colleges, and stated in his letter that the college interprets this assurance by the Division of Highways as meeting the condition of approval by the Senate Factfinding Committee on Agriculture and, therefore, was planning to proceed with the fence construction. I trust you concur with the college's action in this regard.

Sincerely yours,

HAROLD O. WILSON
Executive Dean

LETTER OF TRANSMITTAL

CALIFORNIA LEGISLATURE
SENATE FACTFINDING COMMITTEE ON AGRICULTURE

February 15, 1965

HON. GLENN M. ANDERSON, *President*
and Members of the Senate

Gentlemen:

Submitted herewith is a copy of the "Report on Survey of Bureau of Livestock Identification, Department of Agriculture." This contract survey was undertaken for the Senate Factfinding Committee on Agriculture by the management consulting firm of Booz, Allen & Hamilton, Inc., as authorized by the provisions of S.B. 1444 of the 1963 Regular Session.

The Senate Factfinding Committee on Agriculture and the consulting firm were assisted in the conduct of the study by a Cattle Industry Advisory Committee which I was authorized to appoint. This industry committee consisted of the following members of representative industries: range cattle: Brunel Christensen, chairman, Robert O. Johnson and Ward Woody; feeder cattle: Harvey McDougal, John Guthrie and Will Gill, Jr.; dairy cattle: Leonard Gomes, George te Velde and Frank Steiner; meat packers: Norman Maffit; and sales yards: H. C. (Bud) Jackson.

The report is being submitted at this time in order that sufficient copies may be printed and made available to representatives of the cattle industry and to other interested individuals and organizations.

It should be emphasized that while the Senate Factfinding Committee on Agriculture has accepted this report no action has been taken on the recommendations and alternatives for improving the services of the Bureau of Livestock Identification as suggested in the report by Booz, Allen & Hamilton. No action will be taken until such time as the Cattle Industry Advisory Committee, together with representatives of all segments of the industry and others interested have had an opportunity to study the recommendations and alternatives and to present their views to the Senate Factfinding Committee on Agriculture.

Respectfully submitted,

ROBERT J. LAGOMARSINO

**Report on Survey
of
Bureau of Livestock Identification
Department of Agriculture**

**SENATE FACTFINDING COMMITTEE ON AGRICULTURE
STATE OF CALIFORNIA**

BOOZ, ALLEN & HAMILTON, INC.
San Francisco, November 12, 1964

THE HONORABLE VIRGIL O'SULLIVAN, *Chairman*
Senate Factfinding Committee on Agriculture
California Legislature

Dear Senator O'Sullivan:

We are pleased to present herewith our final report on the survey of the organization and operations of the Bureau of Livestock Identification, Department of Agriculture.

The purpose of the survey was twofold: (1) to evaluate the programs and services of the bureau; and (2) to recommend where opportunities are available to improve the bureau's efficiency and effectiveness in fulfilling its objectives under the hide and brand law. As you recall, this survey was to highlight organization, financial support, and possible alternatives to providing livestock identification in the state.

Our approach to the work included four principal phases: (1) survey planning; (2) fact gathering; (3) analysis of data and development of conclusions and recommendations; and (4) preparation and presentation of this report.

We began in mid-July 1964. The initial survey phase—that of planning—was a brief period in which a detailed work plan for conduct of the study was developed. This plan was reviewed with your executive secretary to obtain his views and suggestions.

During the second phase, we reviewed pertinent data, reports, legislation, financial records, and other relevant information regarding the bureau's activities. This fact-gathering period also included more than 85 interviews throughout the state with persons representing various segments of the cattle industry, the insurance industry, bureau executives and personnel, county sheriffs and district attorneys, and members of the Cattle Industry Advisory Committee and the Livestock Identification Advisory Board. Moreover, field visits were made to Texas, New Mexico, Arizona, Nevada, Oregon, and Washington to review at first hand the carrying out of the hide and brand laws of these states.

Various activities of bureau personnel were observed throughout the state at a variety of locations (such as sales yards, feedlots, slaughter plants, and the headquarters office in Sacramento) to evaluate bureau services as they were performed on a day-to-day basis.

These data and information then were analyzed in order to determine improvement opportunities in the bureau. This analysis included an assessment of consensus opinions of various segments of the industry with regard to the value of present services. Thus, practical and attainable conclusions and recommendations were developed.

The fourth and final phase of the survey was preparation and presentation of this report.

Meetings were held with the Cattle Industry Advisory Committee during the course of the work to keep the committee apprised of survey findings and progress and to gain benefit of the committee's experience in the industry. Further, individual members of the committee were consulted at intervals during the work to evaluate specific conclusions and recommendations.

The report is comprised of an introduction and five chapters. The introduction refers to the history of the development of hide and brand laws and their general value to the cattle industry. Data also are presented pertaining to the size and scope of the cattle industry in California today. This is done to provide perspective prior to the detailed evaluation of the bureau. The following four chapters are concerned with the present organization and operations of the bureau, an evaluation of the bureau's program and services, comparison to programs in other states, and recommendations for improvement. Finally, Chapter V spells out a plan of action to guide the Senate factfinding committee in the implementation of recommendations.

Acknowledgment should be made of the cooperative help and objective information provided us by personnel of the Department of Agriculture, Division of Compliance, and the bureau during the survey.

We appreciated the opportunity to conduct this important survey for your committee. Moreover, the study team was indeed impressed with the sincere interest shown by the people of the cattle industry and the bureau itself in having one of the finest livestock identification programs possible.

Very truly yours,

BOOZ, ALLEN & HAMILTON, INC.

INTRODUCTION

The cattle rustler has not disappeared from the American scene. He simply has replaced his horse with a highspeed pickup, thereby gaining wider pastures. But neither has the primary method of preventing cattle rustling—the branding iron—disappeared. Branding, though not required by California's hide and brand law, is widely practiced throughout the industry as the simplest and best method of identifying cattle. Over 33,000 brands are registered in California alone. One brand, the Spanish A of the Trescony Ranch near King City, reportedly dates from the mission era of California history, nearly three centuries ago.

The California state government became the administrative agent of the hide and brand law in 1917. Earlier, the cattle theft and stray problem had contributed to the formation of the cattlemen's associations. The Colorado association was formed as early as 1869, and most western cattle states soon followed in forming similar associations. These groups spearheaded the development of state hide and brand laws and did much to reduce cattle rustling. In summary, these associations took steps to reduce loss by theft and straying by:

- Recommending that state governments maintain registers of brands.
- Promoting the use of brand inspectors to be responsible for establishing ownership of cattle sold or transported.
- Forcing legal action against cattle thieves.

Brand inspectors emerged as the central figures in these programs. The role occupied by the inspector is colorfully illustrated by Oren Arnold and John P. Hale in *Hot Irons*, published in 1940.

“The brand inspector has inevitably emerged as the detective of rangeland fiction, and that's precisely what he is in fact. He must keep ever alert for the brand that has been blotted out and replaced by a new one. He must pounce on rustlers who will sometimes be as clever as sin, collecting evidence with which to convict them and seeing that they are imprisoned. If a case of thievery happens to be particularly flagrant he must act as an intermediary between his own bosses and the established agencies of the law to forestall possible lynching as in the olden days.

“Some of these inspectors develop a truly remarkable memory for cattle brands, holding thousands of them in mind and calling them off at will when riding through a great herd of animals at roundup, or spotting them in pens at shipping or receiving points. Their services are excellent, for instance, in counting animals as well as identification. Modern counting devices are said to be no more accurate than some of the more skilled brand inspectors who can ‘tally’ a big herd and remember exactly how many animals were carrying each of 20 or 30 brands.”

The cattle industry is one of California's most vital growth industries. Beef production alone is valued at close to \$750 million annually—the largest single value of any agricultural commodity in the state. Moreover, all segments of the industry—beef production, dairy, slaughter, processing, and primary market channels—contribute to a conservatively estimated \$3 billion annually to the gross state product.

In the last decade, significant changes have taken place in California's cattle industry that affect the program and services of the bureau. First, the cattle population has increased 21 percent, from 3.9 million head in 1955 to 4.7 million at the present time. Of this total gain, feedlot cattle have shown the sharpest growth rate and have nearly doubled since 1955, from 500,000 to 900,000. Production cattle have shown the greatest absolute increase, up to 2.3 million head compared to 1.9 million head 10 years ago. The dairy industry has indeed felt the benefits of improved herd management as the state's dairy herd has remained at the level of 1.5 million head. The significant growth in feedlot cattle indicates the important part played by the feedlot operator in today's industry. In recent years, the feedlots in the state handled nearly 2 million head and, thus, rank nearly as important as the slaughter plants in the state as "destination" for cattle.

Secondly, California continues to be a large importer of cattle from out of state with shipments reaching 2.3 million head in 1962. Trucks have replaced railroads as the means of transporting cattle; and today they move 80 percent of cattle, whereas 10 years ago railroads moved 65 percent. The opportunity for cattle theft has thereby been increased due to the mobility and speed of trucks to move long distances rapidly.

The producer segment of the industry has grown substantially in number during the last decade. Doctors, lawyers, businessmen—men inexperienced in the cattle industry (the techniques used in production, the industry's problems, how brands are used, and so forth)—have made investments in cattle ranches. The management of their ranches is frequently handled by a "hired hand" who may not take the same pride in operation as the traditional owner-manager. Thus, the need for the professional cattle producer to be assured that rightful ownership is established is of paramount importance.

Finally, California continues to be a leading slaughter state. In 1963, 2.8 million head were slaughtered, almost 1 million over the early 1950 level. Only Iowa, with its "initial kill plants," leads California in the number of cattle slaughtered.

The above factors illustrate the complexity of California's cattle industry and emphasize the need for a dynamic livestock identification program.

I. ORGANIZATION AND OPERATIONS OF THE BUREAU

The California hide and brand law originally was administered by the California cattle protection board, later changed to livestock identification service in 1936, and to the bureau of livestock identification in 1940. The purposes of the original board were to:

- Protect breeders and growers of cattle from theft or stray.
- Provide for registration of cattle brands and licensing of cattle slaughterers and sellers of beef.
- Provide for inspection of cattle and hides for brands and marks.
- Provide for collection of license and cattle protection fund.
- Provide penalites for violation of provisions of the law.

The law provided for establishment of branding districts, registration of cattle brands, licensing of cattle slaughterers, inspection of all cattle for shipment or slaughter, and inspection of hides. The first law did not apply to registered pure bred cattle, or to dairy cows.

The objectives of this initial legislation remain virtually intact today.

The principal features of the present law involve three basic services: (1) brand registration; (2) cattle inspection; and (3) law enforcement.

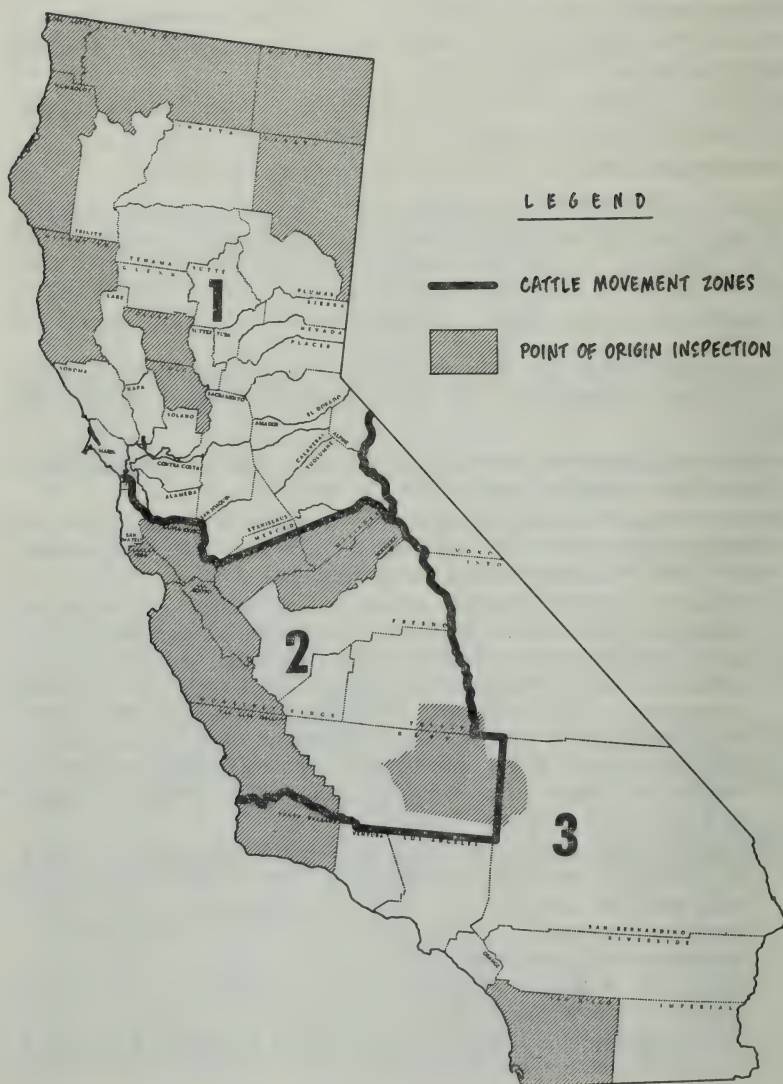

- (1) *Brand registration* provides for exclusive use in the state of a brand in a specified location on the animal.
- (2) *Cattle inspection* in California is based upon local cattle industry election of either "point of origin" or "point of destination" district, usually based on county lines.

—*Point of origin* inspection system requires that (a) cattle be inspected *before transportation* if cattle are leaving the county, or if sold and being transported within the county; (b) if cattle are being transported within the county to a public salesyard, public stockyard, or licensed slaughter plant, they will be inspected at shipment destination; and (c) no inspection is required if no sale is involved and cattle are moving within the county. In common terminology, point of origin is known as a "closed" county or area.

—*Point of destination* inspection system requires that (a) cattle be inspected *prior to transportation* out of the state, or if sold and not destined for a public salesyard, public stockyard, or licensed slaughter plant, or if being transported to another cattle movement zone; (b) if cattle are being transported to a public salesyard, public stockyard, or licensed slaughter plant, they will be inspected at destination; and (c) no inspection is required if no sale or slaughter is involved and cattle are not being transported out of their present zone.

EXHIBIT I
SENATE FACT FINDING COMMITTEE ON AGRICULTURE
STATE OF CALIFORNIA

POINT OF ORIGIN AND
DESTINATION AREAS AND
CATTLE MOVEMENT ZONES
IN CALIFORNIA

The law provides that a county or area can choose the point of origin inspection system if 65 percent of cattle owners present at a public meeting called by the director of the department of agriculture, vote in favor of such a system. Exhibit I, preceding this page, depicts the present point of origin and destination counties and the three cattle movement zones in the state.

- (3) *Law enforcement* provides for penalties, fines, and prison sentences for breaking provisions of the law. Brand inspectors of the bureau are peace officers in carrying out the provisions of the law. Inspectors can issue citations, seize animals, impound illegal or questionable sales fees, investigate cattle theft cases, make arrests, and assist county district attorneys in preparing court cases.

1. THE ADMINISTRATION AND OPERATIONS OF THE BUREAU ARE WITHIN THE STATE DEPARTMENT OF AGRICULTURE

Exhibit II, following this page, presents the organization of the Department of Agriculture and the relative placement of the bureau within the division of compliance of the department.

Exhibit III, following Exhibit II, depicts the organization structure of the bureau. Under this plan, the state is organized into eight inspection districts, each of which has an average of 12 brand inspectors. Each inspection district is headed by a supervising brand inspector who reports to the bureau chief and who is responsible for enforcing the hide and brand law within his district. Supervisors oversee the activities of brand inspectors.

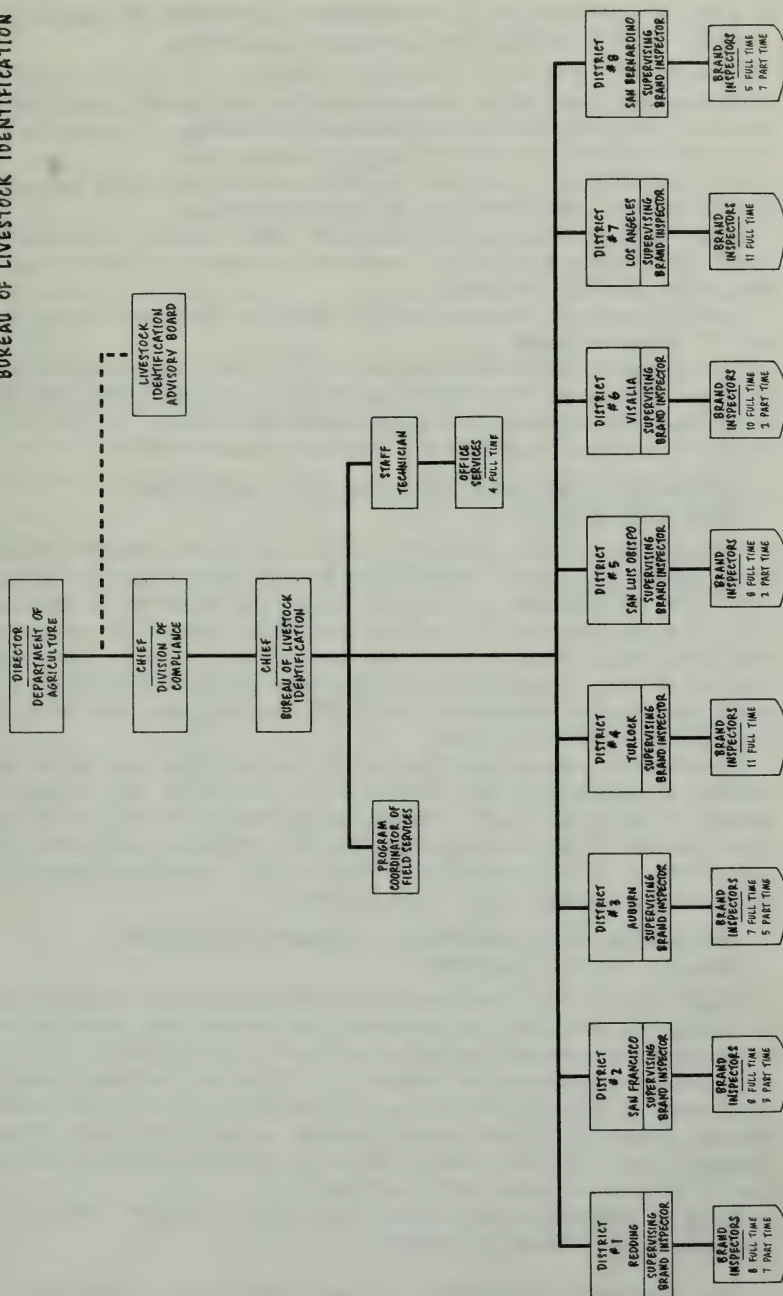

In addition to the chief, the Sacramento headquarters group consists of a program coordinator of field services and a staff technician who heads up the office service personnel. This group maintains all brand records, processes fees, and maintains the bureau's records.

2. CATTLE INDUSTRY'S PARTICIPATION IN BUREAU'S PROGRAM IS ADVISORY ONLY

At present, the director of the Department of Agriculture appoints a five-member advisory board. The appointments are for four years, and membership of the board is comprised of two members engaged in beef cattle; two in dairy; and one in livestock marketing. The duties and responsibilities of the board are to make recommendations regarding:

- Improvements and changes in the administration and enforcement of the hide and brand law.
- Procedures to be followed by the bureau.
- Methods for curbing livestock thefts.
- Legislation designed to improve overall functioning of the bureau.

The board does not, however, establish or approve policy.

PRESENT PLAN OF ORGANIZATION
BUREAU OF LIVESTOCK IDENTIFICATION

3. BUREAU'S OPERATION IS FINANCIALLY SUPPORTED BY SERVICE FEES. CATTLE INSPECTION IS PRIMARY ACTIVITY

Exhibit IV, following this page, presents the bureau's estimated revenues and costs of services during the past fiscal year. Cattle inspection was clearly the major service, generating 85 percent of revenues and accounting for 81 percent of bureau cost.

Brand registration revenue is derived from recording fees—\$3 for annual renewal per brand and \$5 new recordings.

Inspection revenue is derived from fees ranging from \$0.10 per head for moving cattle from pasture to pasture (closed area) to a maximum of \$0.20 per head.

Law enforcement revenues include penalties, fines, and proceeds from sale of estray animals.

The bureau's 1963-1964 budget of \$881,000 included a 6-percent overhead allocation from the Department of Agriculture. It is understood that this allocation is based upon the relation of the bureau's budget to the total budget of the division of compliance.

4. PROGRAM COSTS HAVE NOT CHANGED APPRECIABLY OVER LAST DECADE

The program today costs the cattle and dairy industry \$0.20 per head, based on a total expenditure by the bureau in the fiscal year 1963-1964 of \$881,000, and a cattle and calf inventory in the state in 1963 of approximately 4.5 million head. The cost of the program has remained fairly constant over the last 10 to 15 years. For example, the cost of the program was \$0.19 per head in fiscal 1951-1952. Twenty years ago, during the period 1940-1949, the program cost the industry about \$0.13 to \$0.17 per head.

It should be pointed out that while this program cost index has increased approximately 54 percent since the 1940s, the average farm inventory value per head of cattle has increased 73 percent during the same period. Thus, it appears that the program has been able to contribute to the prevention of cattle theft without appreciable increase in the relative cost to the industry.

5. THE BUREAU ALSO PROVIDES A NUMBER OF NONFEE SERVICES TO THE INDUSTRY

In addition to the three basic fee services of brand registration, cattle inspection, and law enforcement, the bureau also provides several important non-revenue-producing services to the industry. For example, there is no charge for returning strays and estrays (except for feed costs in the latter instance), identifying mortgaged cattle for lenders, processing killed animal reports, or collecting beef promotion charges. Based on 1963 records, about 20 percent of brand inspectors' time is utilized in these nonfee services.

These services are important to the industry and are viewed as basic elements of the bureau's program.

This chapter has described the organization and operations of the bureau. Attention now turns to an evaluation of the bureau's program and activities.

II. EVALUATION OF THE BUREAU'S PROGRAM AND ACTIVITIES

Previous chapters have discussed the background and development of the hide and brand law and the organization and operations of the bureau. Thus, a backdrop for evaluating the program and activities of the bureau was established.

It is clear that the most precise measure of the bureau's effectiveness is whether or not it is doing the job it is supposed to do. Inasmuch as the bureau's main activity is to prevent loss of livestock by theft or stray, the following sections contain quantitative and qualitative measures of the bureau's effectiveness. These measures resulted from evaluation by several sources, including the various segments of the cattle industry.

1. CATTLE LOSSES THROUGH THEFT OR STRAY HAVE BEEN WELL CONTAINED FOR PAST FIVE YEARS

One of the primary quantitative measures of program effectiveness is the level of cattle theft and stray. The table below presents statistical data of theft and stray in the state since 1959.

<i>Year</i>	<i>Reported Missing</i>	<i>Strays returned</i>	<i>Value of animals returned</i>	<i>All cattle on farms and ranches</i>
1959 -----	1,320	1,987	\$286,487	3,933,000
1960 -----	1,121	2,601	310,845	4,121,000
1961 -----	968	1,764	228,683	4,207,000
1962 -----	1,238	1,638	228,896	4,238,000
1963 -----	1,888	2,176	276,316	4,562,000

Several conclusions can be drawn from these data:

- (1) The magnitude of cattle theft is not a major problem; thus, the present program is controlling loss. In fact, the level of losses is a fraction of 1 percent of the total cattle population.
- (2) While the value of animals returned is relatively low, these figures do not include animals returned to owners and not reported by brand inspectors. This latter figure would probably be close to \$1 million annually, according to industry sources.
- (3) Not all missing cattle are reported to the bureau. Based upon bureau estimates, about 50 percent of missing cattle are reported. Significantly, most of the cattle reported missing are branded, thus indicating the basic value of branding.
- (4) Examination of reported theft indicated that individual cases were primarily of one to three heads, usually calves and yearlings.

**2. PRODUCERS ARE STRONG BACKERS OF THE PROGRAM,
PARTICULARLY THOSE OPERATING IN POINT
OF ORIGIN AREAS**

The nature of range cattle operations, where different herds run together on thousands of acres, required a rigid inspection system to be effective. Range cattle, particularly in northern California, move to summer pasture out of the state into Nevada and Oregon. Therefore, the point of origin inspection system was developed to assure that all cattle movements out of the area are closely regulated. Hide and brand legislation was originally sponsored through the efforts of the cattlemen's association. The need for livestock identification was recognized by the producers, and they remain strong backers of the program.

**3. "PROOF OF OWNERSHIP" IS CONSIDERED A NUISANCE BY SOME
DAIRY OPERATORS. THE DAIRY INDUSTRY, HOWEVER,
GENERALLY SUPPORTS THE PRESENT PROGRAM**

The operating characteristics of the dairy segment of the industry differ widely from those of the beef producing segment. Dairies typically operate in more confined, fenced areas. Because most operators today keep excellent herd records on a per animal basis for milk production purposes, the use of branding is not as widely practiced as in the range operations. On the other hand, there is constant "culling" in dairy operations, and sales and auction yards throughout the state are used as a market for these animals. Frequently, these animals are four years or older, and presenting proof of ownership by a "bill of sale" if not branded can cause problems for the seller.

Interviews with dairy operators, however, revealed that they generally support the present inspection program and consider proof of ownership requirements necessary to implement the law.

**4. FEEDLOT OPERATORS ARE CRITICAL OF PRESENT INSPECTION
PROCEDURES AND GENERALLY DO NOT BENEFIT
FROM THE LAW**

Under the present inspection system, cattle are inspected as they move to slaughter rather than as they enter the feedlot. This procedure is criticized by feedlot operators for two principal reasons:

- Unless cattle enter with a straight iron, the feedlot generally will rebrand to identify lots of cattle for control purposes. Thus, the holding iron is the feedlot brand and not the original owner's brand. Consequently, inspection is of little value.
- Inspection of fat cattle as they move to slaughter contributes to shrinkage if the brand inspectors move the cattle to read brands. Since selling price is based on weight, any weight loss is monetary loss to the feedlot operator.

**5. SALES AND AUCTION YARD AND SLAUGHTER PLANT OPERATORS
SEE LITTLE BENEFIT TO THEIR SEGMENTS FROM THE PROGRAM**

The function of the salesyard and slaughter plant is to make a market for cattle. Turnover of cattle is rapid and, in the case of the salesyard, ownership is not involved. Thus, these segments of the industry do not recognize a need for inspection. Further, inspection

fees at salesyards and slaughter plants are charged against the seller, not by the yard or plant.

6. STRONGEST BACKERS OF THE PROGRAM—PRODUCERS—ALSO PAY THE MAJORITY OF COSTS

In order to give proper weight to the consensus opinions of the various segments of the industry, the financial support given the program by each industry segment was determined. The results of this determination are shown in Exhibit V, following this page.

The data reflected in the exhibit are based upon estimated inspections and brand registration by industry segment derived from the following sources:

- (1) Statistics on cattle population, slaughter, and movements as prepared by the California Crop and Livestock Reporting Service, Sacramento, California.
- (2) Brand inspection certificates and salesyards tally sheets on file at the bureau's office in Sacramento.
- (3) Interviews with bureau personnel and industry members.

It is clear that beef producers are the major contributors to the program. In fact, feedlot revenue could also be combined with production revenue as the next sequential step as the cattle move to slaughter. Combined, these two segments contribute an estimated 76 percent of the program cost.

7. REGISTRATION OF BRANDS AT THE STATE LEVEL CONTRIBUTES SIGNIFICANTLY TO FULFILLING THE OBJECTIVES OF THE PROGRAM

In the early days of the industry, brands were the only effective protection against loss by theft or straying. While branding is not compulsory today, its widespread use is recognized as the best, least costly method of protecting against loss. Moreover, the value of brands has been enhanced through their registration at the state level. Thus, owners can have exclusive use of the brand—a legal proof of ownership. As stated previously, more than 33,000 brands are registered in California. Analysis of sample brand certificates and salesyards tally sheets indicated that the majority of animals are branded, as shown below:

<i>Industry segment</i>	<i>Level of branding</i>
Production	80-90%
Feedlots	80-90%
Dairies	45-55%
Salesyards	60-70%
Slaughter plants	70-85%

8. INSPECTION IS USED BY THE BUREAU AS THE PRIMARY MEANS OF PREVENTING LOSS BY THEFT OR STRAY

The major purposes of inspection are to:

- Deny market for stolen cattle.
- Identify strays prior to their being sold or shipped, thus eliminating the problem of transporting cattle back to rightful owners.
- Prevent the sale of stolen cattle in surrounding states by requiring California inspection certificate.

EXHIBIT V

Senate Factfinding Committee on Agriculture
State of California

**ESTIMATED RELATIVE PROGRAM FINANCIAL SUPPORT BY INDUSTRY
SEGMENTS, FISCAL 1963-1964**

Industry segment	Estimated inspections	Estimated inspection revenue ¹	Estimated brand registration revenue	Total revenue contribution	Percent revenue contribution to total
Production-----	\$2,200,000	\$312,000	\$80,000	\$392,000	45
Dairy-----	730,000	102,000	28,000	130,000	15
Feedlot-----	1,860,000	263,000	13,000	276,000	31
Out-of-state-----	590,000	83,000	-----	83,000	9
Totals-----	\$5,380,000	\$760,000	\$121,000	\$881,000	100

¹ Based on (average) \$0.14 inspection fee.

According to the 1963 Agricultural Code of California:

—Cattle shall be inspected in each of the following cases:

Prior to transportation:

- (1) Out of an area having full point of origin inspection.
- (2) Out of the State of California.
- (3) Across an established cattle movement zone line or boundary.
- (4) By or to a new purchaser.

Prior to slaughter.

Prior to release or sale from a public stockyard, public salesyard, or public or private cattle sales market.

Prior to release from a posted stockyard or posted salesyard.

—No inspection is required prior to transportation to a point and from an area designated by the chief as one in which inspection may be made enroute or at destination.

—Proof of ownership (evidence of ownership) is required for each inspection, and inspection applies to all cattle, branded or unbranded. Acceptable evidence of ownership is:

—A recorded brand registered in the name of the person selling or shipping livestock.

—A prior brand inspection on certificate of animals sold or shipped.

—Bill of sale from the owner of the brand on said animal or hide.

Inspection is performed to the "letter of the law" throughout the state. There appears to be no exception to this administrative rule.

Over the last three years more than 5 million inspections were made annually, as indicated below:

<i>Fiscal year</i>	<i>Number of inspections</i>
1961-1962 -----	5,801,955
1962-1963 -----	5,147,264
1963-1964 -----	5,374,568

9. RESPONSIBILITY FOR LAW ENFORCEMENT RESTS PRIMARILY WITH COUNTY SHERIFFS

The bureau has delegated law enforcement pertaining to cattle theft to county sheriffs. Although it does provide assistance to sheriffs, the major focus of the bureau's effort has been upon brand inspection.

Although the bureau has the authority under law to participate actively in law enforcement, it has not chosen to do so. Thus, certain problems have resulted.

(1) Few Counties Employ a Special Cattle Theft Investigator or Deputy

As cattle theft has become less and less a problem and as the statewide crime rate has increased over all, county sheriffs have necessarily directed their resources to other criminal activities. Thus, in only a limited number of counties is the sheriff's office skilled in the investigation of cattle theft cases.

(2) A Number of Cases Require Statewide Investigation

The type and speed of vehicles that can be used to haul cattle make the problem of cattle theft a state problem, since a cattle thief may cross many county lines.

Although county sheriffs can contribute to multicounty work, the initiative to continue the search for stolen cattle at the state level must be assumed by state law enforcement through the bureau.

(3) Only a Limited Number of Men in the Bureau Are Trained or Experienced in Law Enforcement Work

Brand inspection capability is the primary factor in selection of new personnel. Interviews conducted within the bureau revealed that few men are trained or experienced in law enforcement work. None of the inspectors and only half of the field supervisors appear to be qualified. Theft investigation is conducted almost entirely by field supervisors who spend from 25 percent to 50 percent of their time on theft investigation.

(4) Over the Last Five Years an Average of 125 Warning Violations Were Issued Each Year for Various Infractions of the Hide and Brand Law and About 25 Convictions Were Obtained Each Year for Grand Theft

In the process of assisting local law enforcement agencies in the collection of evidence and presentation of court cases involving cattle thefts, the bureau obtains information on the level of law enforcement activity pertaining to cattle theft. The five-year history is indicated in the table on the following page.

	1959	1960	1961	1962	1964
Warning violations issued	178	122	135	149	128
Grand theft cases	46	16	14	4	38
Complaints filed	42	20	12	5	35
Grand theft sentences					
State prison	4	0	0	1	2
County jail	16	2	9	3	17
Probation granted	23	16	12	3	22
Restitution ordered	24	8	2	2	11
Misdemeanor cases					
Complaints filed	39	21	37	14	20
Convictions	26	17	35	10	10
Acquittals	5	2	7	-	8
Fines	\$1,602	\$1,928	\$1,406	\$672	\$475

10. BASED ON THE PRESENT HIDE AND BRAND LAW, THE BUREAU HAS BEEN ABLE TO PROVIDE ITS SERVICES WITHIN ITS PRESENT FEE SCHEDULE

For the last 13 years, the bureau has been able to pay its own way except for the four years from fiscal year 1957-1958 through 1960-1961. The trend in revenues and expenses is indicated in Exhibit VI, following this page. Inspection revenue, representing from 80 percent to 85 percent of the bureau's revenue, has maintained a constant relationship to the total bureau revenue and is directly related to the number of brand inspectors in the field, which today represents 67 full-time inspectors and 25 part-time inspectors.

As shown in Exhibit VI, it appears that the budgeted cost for the fiscal years 1964-1965 and 1966-1967 may exceed forecast revenue based on the historical trend in revenue.

The major reason for the four deficit years was a depressed industry. As indicated by Exhibit VII, following this page, the growth and trend in inspection revenue have closely paralleled the growth and trend in the cattle industry. The present fee schedule has been in use since 1948, with the exception of an increase in inspection fee from \$0.08 to \$0.13 per head for out-of-state cattle moving directly to California salesyards and slaughter plants. Recording fees were increased in 1961: renewal fees from \$2 to \$3 and recording fees from \$2 to \$5.

11. CLOSED COUNTIES APPEAR TO HAVE LESS A PROBLEM OF THEFT OR STRAY THAN OPEN COUNTIES

Based on the analysis shown below, it appears that the closed counties have less a problem of missing cattle and, consequently, cattle theft than open counties.

Selected counties with a relatively high level of missing cattle are:

<i>County</i>	<i>Open or closed</i>	<i>1963 number of cattle and calves on farms and ranches</i>	<i>1963 bureau report of cattle missing</i>		
			<i>Reports</i>	<i>Head</i>	<i>Branded</i>
Los Angeles -----	Open	190,800	35	318	191
Tehama -----	Open	64,500	7	228	228
San Joaquin -----	Open	177,100	12	164	163
Sacramento -----	Open	108,500	28	130	116
San Bernardino -----	Open	105,000	19	114	76

Selected counties with a relatively minor problem of missing cattle:

<i>County</i>	<i>Open or closed</i>	<i>1963 number of cattle and calves on farms and ranches</i>	<i>1963 bureau report of cattle missing</i>		
			<i>Reports</i>	<i>Head</i>	<i>Branded</i>
Fresno -----	Open	271,900	2	2	2
Merced -----	Closed	236,500	13	27	27
Monterey -----	Closed	132,100	1	28	28
Santa Barbara -----	Closed	87,000	1	1	0

12. CLOSED COUNTY INSPECTION SYSTEM DOES NOT PAY ITS WAY

Despite clear indications of the high level of effectiveness of the point of origin inspection system, an analysis of revenues indicates that cost exceeds fee income. Data were analyzed (1) by point of inspection and

EXHIBIT VI
 SENATE FACT FINDING COMMITTEE ON AGRICULTURE
 STATE OF CALIFORNIA
TREND AND FORECAST OF REVENUE AND EXPENSES
BUREAU OF LIVESTOCK IDENTIFICATION
 FISCAL YEARS: 1951-52 TO 1967-68

(2) by selected closed counties. The table below presents the results of inspection point revenue/cost analysis.

Inspection point	Fiscal 1963-1964			
	Estimated revenue		Estimated costs	
Country	\$150,000	20%	\$336,000	47%
Salesyards	175,000	23	240,000	33
Slaughter plants	402,000	53	147,000	20
Out-of-state	33,000	4	-	-
Total	\$760,000	100%	\$723,000	100%

EXHIBIT VII
SENATE FACT FINDING COMMITTEE ON AGRICULTURE
STATE OF CALIFORNIA
**GROWTH IN CALIFORNIA CATTLE INDUSTRY
COMPARED TO INSPECTION REVENUE**
BUREAU OF LIVESTOCK IDENTIFICATION
1951 - 1963

Most significant is the indication that revenue from inspections in the country fall short of covering cost of such inspections. Since this point of inspection is the very basis of the closed county system, selected counties were further analyzed on a revenue/cost basis. Exhibit VIII, following this page, presents the findings of this analysis. Only San Diego County, a closed county, generated revenue sufficient to cover program costs in fiscal 1963. This exception to the general deficit

pattern is probably explained because San Diego County also has several salesyards and slaughter plants which develop fees sufficient to cover the closed inspection system costs.

Slaughter plant inspections.....		956	1,560	11,472
Total.....	\$20,930	\$12,200	\$26,160	\$19,120

13. SEVERAL SIGNIFICANT CONCLUSIONS REGARDING PROGRAM AND ACTIVITY EFFECTIVENESS WERE DEVELOPED

In addition to the foregoing measures of effectiveness, several other conclusions became evident during the survey.

(1) In General, the Industry Is Not Well Informed About the Total Identification Program

Available materials describing the various features of the hide and brand law are difficult to interpret and do not effectively explain the law in operation. Moreover, there is not a clear, concise description of the program and activities of the bureau. Only a limited number of persons contacted during the survey had a complete knowledge of the bureau and its duties and responsibilities.

(2) Role of Livestock Identification Advisory Board Appears to Have Little Value Under Present Arrangement

As indicated previously, the livestock identification advisory board does not approve or establish policy. Rather, it acts in an advisory capacity to the bureau chief. While the law was probably intended to keep the industry in a position of program control, it does not establish a significant set of duties and responsibilities for the board. Consequently, several inefficiencies exist, such as:

—Organizational relationships among bureau chief, division chief, and department director are somewhat diffused by the presence of the board, since the bureau chief can operate somewhat independently of the department.

- The board's agenda is controlled by the bureau chief, and matters brought before the board are primarily for information purposes, not to seek recommendations for program changes.
- Board members are not involved in such policy matters as budget review and performance evaluation. Consequently, many board members feel that they do not have a real board-level job to perform.

(3) Cattle Movement Zones Are Effective as Control of Point of Destination System Shipments

Previous sections of this chapter included measures of the high level of control over theft and stray in closed counties and areas. While the point of destination area does not have such rigid control, the three cattle movement zones, in effect, make the state three closed areas. Cattle cannot be shipped over 400 or 500 miles in the state without being subject to inspection. This requirement adequately supplements the open area system and poses no administrative or operating problems in implementation.

(4) District Boundaries Are Flexible and Can Be Adjusted to Match Workloads

The present district boundaries are only management boundaries and are not integral to the law. Frequent shifts have taken place in years past as supervisory workloads have changed.

(5) District Brand Supervisors Do Not Schedule or Control Brand Inspections in Most Districts

Scheduling and control of brand inspectors are difficult to achieve, particularly in rural locations. The brand inspector is called by the cattle shipper when inspection is required prior to transportation. Thus, the majority of inspection work does not lend itself to supervisory schedule and control. Moreover, in day-to-day operation, the program coordinator and bureau chief have as much contact with brand inspectors as do the supervisors.

(6) Inspection Methods and Techniques Vary Throughout the State Indicating Need for Bureauwide Training

The program coordinator is responsible for seeing that uniformity is achieved in implementing the law in the state. For example, in the conduct of his job he seeks to establish that "proof of ownership" requirements are enforced and that fresh brands are questioned. However, there is no formal training in either brand inspection techniques or in supervising brand inspection. As a result, methods vary throughout the state.

(7) Lack of Specialists in Law Enforcement Hinders Bureau Effectiveness

From 25 percent to 50 percent of supervisors' time is spent in handling missing cattle and theft cases. In addition, brand inspectors also spend about 15 percent to 20 percent of their time on these duties. While the program coordinator does provide an informal source as to interpretation of the law, there is a lack of trained specialists in law enforcement. Consequently, effectiveness in the preparation of cases for prosecution is diminished.

(8) Major Procedural Loophole in Law Appears to Be Lack of Inspection of Cattle Entering Feedlots

Earlier in this chapter it was indicated that feedlot operators were critical of the program because the present procedure called for inspection of fat cattle at the slaughter plant. This procedure also permits the major loophole in the present law—cattle can be consigned to the feedlot and not be inspected, and out-of-state cattle are not inspected as they enter feedlots. Moreover, the feedlot will brand for lot control purposes after the cattle have entered the lots so that the feedlots' iron becomes the holding iron, thus eliminating the value of subsequent inspection.

The next chapter presents a comparison of the California program to programs in other selected states.

III. COMPARISON OF CALIFORNIA PROGRAM TO PROGRAMS IN OTHER SELECTED STATES

Prevention of loss by theft or stray is not limited, of course, to California cattle operators. In order to better evaluate the California program, the hide and brand laws of six other states were compared to that of California. As a result of this comparison, three basic conclusions were developed.

1. CATTLE INDUSTRY IN CALIFORNIA IS MORE DYNAMIC AND COMPLEX THAN IN OTHER STATES EVALUATED. LAW IS CONSEQUENTLY MORE DIFFICULT TO ADMINISTER

The cattle industry in California consists of literally hundreds of range, dairy, salesyard, feedlot, and slaughter plant operations. This is in direct contrast to most other western states where the cattle population, except in Texas, is a fraction of the California herd. In fact, most of the states studied export their range cattle to California's markets. This diversity of activity and scope of operations make the job of administering the hide and brand law in California more difficult than in other states. Additionally, California's population growth has resulted in an ever-expanding cattle industry to meet the demand for beef and dairy products. Thus, the bureau has been faced with a sharply increased workload, coupled with a dual system of inspection.

2. CALIFORNIA PROGRAM DOES NOT EMPHASIZE LAW ENFORCEMENT AS MUCH AS OTHER STATES STUDIED

Each of the programs of the six other states places emphasis on law enforcement as a primary deterrent to cattle theft. For example, in other states, brand inspectors, who are equipped with sirens and flashing lights, carry sidearms, and former police officers are frequently employed as either inspectors or as specialists in hide and brand law enforcement. Most respondents in other states claimed this more rigid police-type operation was necessary to supplement a "looser" inspection system compared to California's.

3. LEVEL OF EFFECTIVENESS IN CALIFORNIA EQUALS OR EXCEEDS OTHER STATES STUDIED. COSTS OF CALIFORNIA PROGRAM ARE IN LOWER RANGE

Exhibit IX, following this page, presents the essential elements of the hide and brand law of seven cattle states, including California. Only New Mexico and Arizona have compulsory branding. Their programs are more complete than California as each is essentially a "closed" state. This higher level of service, however, results in an estimated program cost of \$0.48 per head in Arizona and \$0.31 per head in New Mexico, compared to \$0.20 per head in California. Though incomplete, data regarding loss and stray indicate that California's program is as effective as that of New Mexico and Arizona. It is also of interest to note that only one state studied, Arizona, utilizes general fund moneys to support operations of identification service. The program in Texas operates under the cattlemen's association, with inspectors deputized as Texas Rangers. Inspection in Texas is nominal, and the emphasis is on recording brands involved in transactions as record rather than to establish ownership.

EXHIBIT IX
Senate Factfinding Committee on Agriculture

COMPARISON OF HIDE AND BRAND LAW ELEMENTS OF SELECTED STATES

State	Compulsory branding	Inspection			Law enforcement	Estimated current annual program cost per head	Services and fees	General fund	Cattle tax	Industry associations	Industry assessment of program
		Origin	Destination	Out-of-state							
California.....	No	Limited	Yes	Yes	Not emphasized	20¢	100%	-----	-----	-----	Adequate; level of inspection service questioned
Texas.....	No	No	Sales-yards only	No	Primary effort	6¢	80%	-----	-----	20%	Adequate; several major loopholes
Arizona.....	Yes	Yes	Yes	Yes	Emphasized	48¢	43%	12%	45%	-----	Adequate
New Mexico.....	Yes	Yes	Yes	Yes	Emphasized	31¢	56%	-----	44%	-----	Excellent
Nevada.....	No	Limited	Yes	Yes	Emphasized	29¢	20%	-----	80%	-----	Adequate; fee inspection system difficult to manage
Oregon.....	No	No	Yes	Yes	Emphasized	28¢	100%	-----	-----	-----	Adequate; no inspection prior to shipment
Washington.....	No	No	Yes	Yes	Emphasized	19¢	100%	-----	-----	-----	Adequate; no inspection prior to shipment

IV. RECOMMENDATIONS AND ALTERNATIVES FOR IMPROVING THE SERVICES OF THE BUREAU

Several opportunities exist to strengthen the present operations of the bureau. These include organizational and procedural changes as well as improvements that are available through better management scheduling and control of brand inspection services. The sections which follow present recommendations aimed at achieving greater efficiency and effectiveness in the bureau. The last sections of the chapter consider alternatives to the program and consider utilization of other organizations to replace or supplement bureau activities.

1. MODIFY OR CHANGE THE PRESENT INSPECTION SYSTEMS TO MAKE PROGRAM EITHER MORE EQUITABLE OR EFFECTIVE

The previous chapter presented a number of improvement opportunities available to the bureau to (1) increase program effectiveness, and (2) make the program more equitable to the various industry elements. The following recommendations should achieve these objectives.

(1) Increase Point-of-origin and Country Inspection Fees

The basic fee for point-of-origin inspections should be increased from \$0.20 to \$0.25 per head, and from \$0.13 to \$0.15 in open counties for country inspections. Point-of-origin pasture-to-pasture inspection fees should be increased from \$0.10 to \$0.12 per head. This overall 25-percent increase in fees should result in point-of-origin and country inspection revenues to cover costs of such services.

(2) Inspection at Feedlots Should Be Made on Incoming Cattle for California-fed Cattle

This procedural change should overcome the major loophole in the present law. While fees would be reduced somewhat by cattle entering with inspection certificate, this revenue loss should be offset by the increased fee schedule for point-of-origin and country inspections. Further, a \$0.05 administrative charge should be levied at the slaughter plant for California-fed cattle moving to slaughter with an inbound inspection certificate. This is necessary to support inspection at slaughter plants to verify number of animals shipped to slaughter. Out-of-state-fed cattle would continue to be inspected at slaughter plants as under the present procedure and with no adjustment to the fee schedule.

(3) Proof of Ownership Could Be Eliminated by Licensing Procedure, But This Alternative Is Not Widely Supported

As previously indicated, one disadvantage of the present law is the nuisance factor involved in proof of ownership requirements. This was pointed up by some members of the dairy industry. A licensing procedure could be developed whereby the bureau would sanction the sale of animals by approved operators at selected salesyards subject

to proof of ownership claims at any time. While feasible, this alternative does not appear to have the support of a majority of dairy operators, as do current requirements.

2. STRENGTHEN BUREAU EFFECTIVENESS BY ADDING SPECIALIST IN LAW ENFORCEMENT

According to information gathered from county sheriffs, decreasing emphasis is placed on cattle theft law enforcement. Few sheriffs' offices are manned with personnel qualified in this field. Moreover, as previously indicated, the law enforcement effort of the bureau itself is not well defined.

It is recommended, therefore, that law enforcement specialists be employed by the bureau to handle all cattle theft cases. It is further suggested that two specialists be retained at first, and that personnel be added based upon caseloads. Exhibit X, following this page, indicates the new positions reporting to the bureau chief. These men should have a background in law enforcement and should be trained by appropriate state-level law enforcement agencies. These specialists should handle all cases, and would be aided, as necessary, by field personnel. In all cases, however, the specialists should coordinate with the district supervising brand inspectors and not directly with brand inspection except with knowledge of the supervisor.

3. DELEGATE MORE AUTHORITY TO DISTRICT SUPERVISORS AND MAKE PROGRAM COORDINATION RESPONSIBILITY OF BUREAU CHIEF

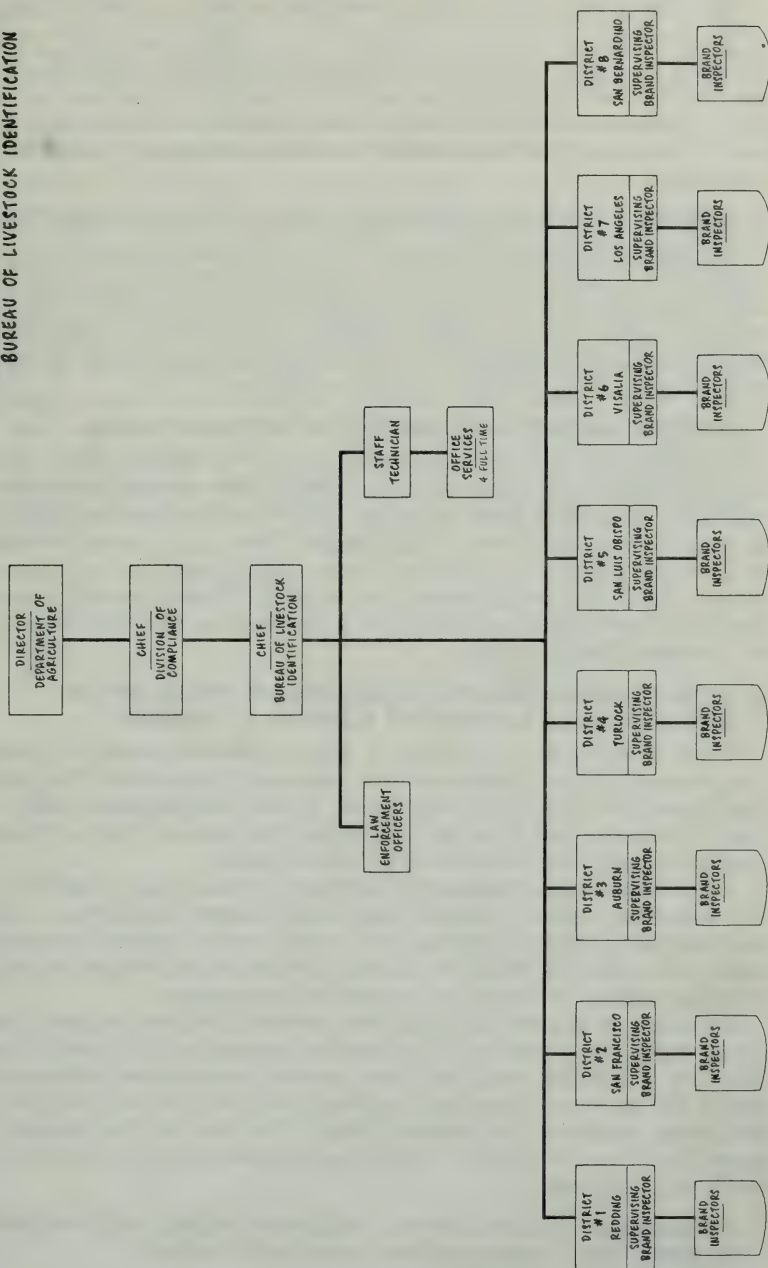

As indicated previously, the present position of program coordinator carries responsibility for seeing that uniform practices are implemented throughout the state. In practice, this has resulted in reducing the responsibility of the supervisors because the coordinator acts essentially in a line rather than staff capacity. Program coordination should be one of the prime responsibilities of the bureau chief working directly with the supervisors, not through a program coordinator.

4. DEVELOP STANDARDS FOR MAJORITY OF BRAND INSPECTION WORK TO PERMIT PLANNING, SCHEDULING, AND MONITORING OF PERFORMANCE OF BRAND INSPECTORS

The nature of brand inspection makes effective management difficult, since scheduling of work is virtually impossible except in urban areas. While productivity of inspectors is probably high, there exists a real potential for improving utilization. However, in order to achieve a higher utilization, yardsticks based on units of work should be developed.

Standards should be developed for the majority (80 percent) of brand inspection work. These standards would be used to evaluate the performance of field personnel and have a gauge on current workload. Based upon previous experience where standards have been applied to such work, utilization could be increased as much as 20 percent to 30 percent. This increased utilization could result in direct savings to the program through either normal attrition of personnel or with no increase in manpower to handle a significantly higher workload.

RECOMMENDED PLAN OF ORGANIZATION BUREAU OF LIVESTOCK IDENTIFICATION

5. CONDUCT REGULAR TRAINING PROGRAMS FOR ALL FIELD PERSONNEL

Training is necessary to provide (1) qualified persons, (2) a pool of skills that will improve the bureau's organization and effectiveness, and (3) a means of appraisal and identification of persons for promotion. The state has highly qualified training officers who could conduct such a program, and the bureau should move rapidly to seek its development.

6. PREPARE LITERATURE DESCRIBING BUREAU'S PROGRAM AND SERVICES

During the course of the work, the survey team observed the general lack of knowledge about the hide and brand law. The Department of Agriculture should prepare literature describing the law and how it operates with regard to each segment of the industry. This material should be made available to all cattle operators and could be sent with brand registration renewals or new recordings.

7. DISSOLVE LIVESTOCK IDENTIFICATION ADVISORY BOARD

Previous chapters have indicated that the advisory role of the present board has little value to the program. The various associations are regularly consulted when changes in the law are contemplated; thus, in reality, the board merely duplicates effort. An alternative would be to give the board policymaking responsibility such as selection of the bureau chief, budget approval, and so forth. This alternative, however, does not appear to be practical for a program as limited in size as that of livestock identification.

8. BOTH A CATTLE TAX AND STATE GENERAL FUNDS APPEAR IMPRACTICAL AS ALTERNATIVE SOURCES OF REVENUE

While a cattle tax is perhaps a more equitable method of financing the program, it also appears to be a more costly approach. The pertinent cost element is that of collection cost. Under the program today, collection is directly tied in with the service performed—that of brand inspection—and thus substantially reduces costs.

A cattle tax would require the service of a state, and possibly a local, tax collecting agency, which then would charge the bureau a fee for performing the tasks of billing, collecting, crediting, and dispensing the funds. Because this would be a costly procedure in comparison with the existing system, it is not an acceptable alternative.

Moreover, it appears unlikely that general funds to support the program would be available. The question regarding the use of general funds is a political one, and the current government administration would like to have all special programs, such as this one, supported by the group receiving its benefit. This is the case of the bureau's program, and thus under the present administration the use of general funds is improbable.

9. AN INDUSTRY-WIDE INSURANCE PROGRAM WOULD NOT PROVIDE THE REQUIRED INSPECTION SYSTEM AND COSTS WOULD PROBABLY BE PROHIBITIVE

One alternative to the present system would be an insurance program. Costs were developed on the basis of loss experience, which indicates that the annual premium for such coverage would probably

approach \$600,000, or \$0.13 per animal. This does not include any inspection service, the costs of which would have to be added to the insurance program. Without the inspection system, losses would undoubtedly rise which, in turn, would merely result in higher premiums.

10. SCOPE OF BUREAU PROGRAM LIMITS USE OF OTHER AGENCIES OR GROUPS TO PROVIDE BUREAU PROGRAM SUPPORT

An evaluation was made of other agencies in the Department of Agriculture, county sheriffs offices, and local independent groups to determine if any of the present services of the bureau could be handled elsewhere. Criteria, including such factors as knowledge of cattle, statewide information system, background in law enforcement, ability to respond to service calls on demand, and freedom to operate outside of local pressures, were developed. These criteria were considered prime requisites of the program. While several agencies, such as animal health, plant quarantine, and dairy service, were closely allied, they did not meet all criteria. Moreover, delegating the program to county sheriffs or local groups would be even less effective in meeting the program's requirements. An effective program requires specialization, and it appears this is best achieved through the Bureau of Livestock Identification.

V. PLAN OF ACTION TO GUIDE INSTALLATION OF RECOMMENDATIONS

Following are suggested guides for installing recommendations contained in the report. Inasmuch as several groups are involved (the Senate factfinding committee, cattle industry advisory committee, Department of Agriculture, cattle associations), each should be given an opportunity to review the report and submit its views to the Senate factfinding committee.

1. Senate factfinding committee should request the cattle industry advisory committee to review the report and submit its views to the committee.
2. Director of Department of Agriculture, Chief of Division of Compliance, and bureau chief should review the report and submit their views to the committee.
3. Executive secretary should review the report for any possible changes in law resulting from implementation.
4. Meetings should be scheduled with cattlemen's association and other interested groups to discuss findings of the report.
5. Schedule for implementation of adopted recommendations should be developed by the bureau chief and regularly scheduled reports should be given to the Director of Department of Agriculture regarding implementation progress.

HON. GLENN M. ANDERSON, *President*
and Members of the Senate

Gentlemen :

The Senate Permanent Factfinding Committee on Agriculture functioning pursuant to the provisions of Senate Resolution No. 145 of the 1963 Regular Session of the Legislature submits a report entitled "Pesticides."

This report is based on an objective evaluation of the some 1,026 pages of testimony and statements presented to the full committee by over one hundred witnesses at a series of meetings held throughout the state during 1963 and 1964. These meetings were called to receive testimony on AB 2233 (Petrís) of the 1963 Regular Session relating to injurious materials, the subject matter of which had been referred to the committee for interim consideration by the Senate Rules Committee.

It is felt that information contained in the report, together with the committee's findings and recommendations will prove of value to members of the Legislature and to others having an interest in the broad field of pesticides.

Respectfully submitted,

VIRGIL O'SULLIVAN, *Chairman*

FOREWORD

“Legislative control of the use and application of pesticides is an exercise of the state’s police power under the Federal Constitution for the protection of health and welfare of the people.”

INTRODUCTION

On September 12, 1963, the subject matter of AB 2233 (Petrís) of the 1963 Regular Session, relating to injurious materials, was assigned by the Senate Rules Committee to the Senate Factfinding Committee on Agriculture for interim study. AB 2233 was the subject of an exhaustive study by the committee during the 1963-65 interim period.

The first series of meetings on this measure was held in Sacramento, October 22 and 23, 1963. In announcing this particular two-day hearing, Senator O'Sullivan, chairman of the committee, said that the meeting was being called to review the entire picture of agricultural chemicals and, in particular, pesticide or economic poisons, in an attempt to ascertain whether any new legislation at the state level is needed. Senator O'Sullivan went on to say that the proper use and regulation of economic poisons is becoming a problem of sufficient magnitude to warrant a thorough legislative review at this time.

Senator O'Sullivan also said that while he was genuinely concerned with the possible affect of the indiscriminate use of injurious materials on humans and wildlife, we should not overlook, in our consideration of the use of these materials, the part they have played in the story of mankind's battle against his worst enemies; namely, starvation, disease, insects, rodents, fire and plagues.

The first day of the meeting, October 22, was devoted to receiving testimony from representatives of federal, state and local agencies having responsibilities in this area of research, education, application, regulation and control of the use of economic poisons. The second day the committee received extensive testimony from various representatives of farm and industry organizations and other interested individuals.

Testifying or submitting written statements for the record at the October 22 and 23 meeting of the committee were the following:

Hugo Fisher, Administrator of the Resources Agency
Frank M. Stead, Department of Public Health
Charles Paul, Director of State Department of Agriculture
E. P. Reagan, Agricultural Research Service, USDA
Dr. Irma West, State Department of Public Health
Dr. M. L. Peterson, Dean of Agriculture, University of California
Dr. George F. Stewart, University of California
Dr. D. G. Crosby, University of California
Norman B. Akeson, University of California
Walter T. Shannon, Director, California Department of Fish and Game
Eldridge G. Hunt, Department of Fish and Game
Ian McMillan, San Luis Obispo County
James L. Averell, U.S. Forest Service
S. T. Ancell, State Association of County Agricultural Commissioners

Kenneth L. Wolff, Agricultural Commissioner, Los Angeles County
 Richard Straw, Agricultural Commissioner, Marin County
 Loren D. Anderson, University of California
 C. J. Barrett, Agricultural Commissioner, Ventura County
 R. M. Schneider, Agricultural Commissioner, San Bernardino County
 James M. Moon, Agricultural Commissioner, San Diego County
 William Fitchen, Agricultural Commissioner, Orange County
 L. D. McCorkindale, Agricultural Commissioner, Fresno County
 McKay McKinnon, Jr., Food and Drug Administration, SF District
 W. D. Murray, California Mosquito Control Association
 Mrs. Helen Nelson, Consumer Counsel, State of California
 Malcolm N. Allison, Bureau of Sport Fisheries and Wildlife
 C. O. Barnard, Western Agricultural Chemicals Association
 William Staiger, Agricultural Council of California
 Norman W. Hazel, Kern Chemical Association
 Powers S. Messenger, University of California
 Betty Lee Morales, National Health Federation
 E. Alan Mills, California Grape and Tree Fruit League
 R. K. Sanderson, packinghouse manager
 Robert J. March, Cannery League of California
 Dean Donaldson, Agricultural Research, California Packing Corporation
 Evan Hudelson, farmer, Modesto area
 Homer A. Harris, Associated Produce Dealers and Brokers of Los Angeles
 Herman Grabow, California State Grange
 Allan Grant, California Farm Bureau Federation
 Laura Tallian, Committee for Biological Pest Control in Agriculture
 James G. Van Maren, California Milk Producers' Federation
 William E. Warne, Director, California State Department of Water Resources
 R. E. Butcher, California Citrus Pest Control Association
 Edwin A. Putnam, California Agricultural Aircraft Association
 George Defani, California Wildlife Federation
 D. Lowell Wells, California Pest Control Association
 Edward Brubaker, State Department of Industrial Relations
 William F. Huston, California State Beekeepers Association
 Kieth Kirstein, California Feed & Grain Association
 X. Dahlstrom, Los Angeles Chemical Company
 Claude M. Finnell, Agricultural Commissioner, Imperial County
 Robert M. Howie, Agricultural Commissioner, Riverside County
 Max Rafferty, Director of Education, State of California
 William Hazeltine, Lake County Mosquito Abatement District
 Knox Marshall, California Forest Pest Control Action Council
 W. B. Carter, California State Board of Forestry

The committee also held, during the week of June 16 through 19, 1964, another series of hearings to complete its extensive pesticide studies. The first meeting in this series was held in El Centro on June

16. That particular meeting was called to provide southern California diversified agricultural interests with an opportunity to present their views on the subject matter of AB 2233. The committee next met on June 16, 1964, on the Riverside campus, University of California, Riverside, to observe firsthand many of pesticide research programs then being conducted by the university. The last meeting in the series was held on June 19, 1964, in San Francisco, to receive testimony from representatives of selected governmental agencies having responsibilities relating to pesticides. Representatives of the California Medical Association also testified at length at the hearing in San Francisco.

All individuals requesting a place on the agenda for the June 1964 series of meetings were requested to come prepared to comment on a list of some twelve observations, questions and recommendations here enumerated which had been raised or suggested by witnesses testifying at the 1963 committee hearing: These are

1. The desirability of mandatory interagency consultation and co-operation by all interested governmental agencies.
 - a. Prior to registration of a pesticide chemical for use in California;
 - b. Prior to the initiation of programs and activities involving the use of pesticide chemicals.
2. If research on the subject of agricultural chemicals is to be expanded, what area or areas should receive priority?
3. Salesman of agricultural chemicals.
 - a. Require salesmen of pesticide chemicals (as such chemicals are defined in Section 1010(b) of the Agricultural Code) be licensed by the Director of the State Department of Agriculture and registered with the agricultural commissioners in counties where the pesticide chemicals are offered for sale.
 - b. Require any recommendation for application and/or for use made by a salesman of pesticide chemicals be reduced to writing with a copy to the user and one to the supplier.
4. In what manner should labeling, container type and size requirements be changed to afford greater protection to users?
5. Desirability of legislation requiring that the authorization for the use of pesticide chemicals be reviewed annually.
6. What portion of existing law, if any, should be made applicable to governmental agencies and individual farmers engaged in programs involving the use of pesticide chemicals?
7. More stringent regulations on the use of insecticides around the home and garden.
8. If the need exists for an expanded educational program relative to the use of and application of insecticides, particularly around the home, who should be responsible for the development and administration of the program?
9. Should the penalty provision for violations of laws and regulations relating to the use and application of pesticide chemicals be strengthened?

10. Would there be any merit in legislatively categorizing materials other than those listed as injurious that may need monitoring?

11. Should county agricultural commissioners be given authority to adopt rules and regulations governing the use and application of pesticide chemicals, authority comparable to that presently existing as relates to pest control (see 160.5 of the Agricultural Code)?

12. The need for further study of the technical issues involved in the concepts of zero tolerances and no residue.

Included in the list of individuals or organizations testifying or submitting written statements for the record at the June 1964 series of hearings were the following:

Claude Finnell, Agricultural Commissioner, Imperial County
 E. J. Dietrick, Entomologist, Elmore Desert Ranch
 Norman Stanley, Agricultural Aircraft Association
 Bill DuBois, Imperial Hay Growers Association
 Delvin Ashurst, Beekeeper
 M. J. LaBrucherie, Farmer and cattle feeder
 Bailey Santistevan, Crown Chemical Company
 William S. Zimmer, Salesman of Agricultural Chemicals
 Leroy Westmoreland, Imperial County Farm Bureau
 Rudolph J. Miller, Imperial County Growers Association
 Earnest Studer, Imperial County Farm Bureau Pesticide Committee
 A. C. Morrison, Legislative Counsel
 Charles Paul, Director of State Department of Agriculture
 Frank M. Stead, Division of Environmental Sanitation
 Stanley J. Leland, M.D., Director of Health
 Robert Allen, Imperial Valley Beekeepers Association
 Ralph Teall, M.D., California Medical Association
 C. H. Hine, M.C., Ph.D., University of California
 Parke C. Brinkley, National Agricultural Chemicals Association
 Robert L. Ackerly, Chemical Specialties Manufacturers Association
 E. B. Antonell, Western Growers Association.
 Jack Garriott, Jr, Agricultural Aircraft Association, Inc.
 L. D. McCorkindale, Agricultural Commissioner, Fresno County
 Steve Ancell, Agricultural Commissioner, Tehama County
 Herman Grabow, California State Grange
 Russ Richards, California Farm Bureau Federation
 Henry Moras, Stauffer's Label and Registration Department
 Robert J. Marsh, Cannery League of California
 California Medical Association
 Kenneth L. Wolff, Agricultural Commissioner, Los Angeles County
 Maynard W. Cummings, Tulalake Pesticide Review Committee
 Toxicology Center at University of California
 Robert M. Howie, Agricultural Commissioner, Riverside County
 James M. Moon, Agricultural Commissioner, San Diego County
 R. M. Schneider, Agricultural Commissioner, San Bernardino County
 Robert W. Johnston, Manager, Contra Costa Water District

McKay McKinnon Jr., Department of Health, Education and Welfare, EFA

George A. Gooding, California Packing Corporation

E. P. Reagan, Assistant Administrator, U.S. Department of Agriculture

H. T. Spieth, Chancellor, Riverside Campus, University of California

Dr. A. M. Boyce, Dean of College of Agriculture, Riverside Campus, University of California

Dr. L. D. Anderson, Professor, Entomology, Riverside Campus, University of California

Dr. J. E. Swift, Extension Entomologist, University of California

Dr. F. A. Gunther, Professor, Entomology, Riverside Campus, University of California

The committee's report and recommendations, are to a large extent, based on an evaluation of the testimony received relating to these same 12 observations, questions and recommendations.

PROPOSAL 1

Desirability of mandatory interagency consultation and cooperation by all governmental agencies.

- a. Prior to registration of a pesticide chemical for use in California.
- b. Prior to the initiation of programs and activities involving the use of pesticide chemicals.

Discussion

This recommendation was first advanced at the series of meetings of the committee held in October 1963 in Sacramento. It was also discussed briefly at an executive session of the committee held during the 1964 Budget Session. Witnesses appearing at the second series of meetings on the subject of pesticides held during June of 1964 were asked to comment on the specific proposal. Dr. Ralph Teall, President of the California Medical Association, in commenting on this proposal, said that in his opinion, there seemed to be no reason for any attempt to change by regulation or law the relationship between departments because it is presently working very fine on a day-to-day basis.

Mr. Parke C. Brinkley, President of the National Agricultural Chemical Association, in speaking to this suggestion, said that while he recognized the need for consultation between the various agencies, he realized the cumbersomeness and the antagonism which could develop from a mandatory requirement giving one department the authority to tell another department what to do or to veto the action of that department.

Mr. Robert L. Ackerly, counsel to Chemical Specialties Manufacturers' Association, in commenting on this proposal, said: "I am a lawyer and I have never believed constitutionally in the value of the Legislature delegating legislative authority to a specific branch of the executive branch of government. I feel that the Legislature delegates

authority to the Governor, to the executive—and it is his responsibility to carry it out.”

Agricultural interests represented at the two series of hearings generally indicated they did not favor mandatory interagency consultation and cooperation in this matter and the same interests were quite emphatic in expressing their concern—at least the basic control of and the responsibility for—agricultural chemicals being transferred to another department other than agriculture.

I think it is safe to say that most of the witnesses appearing before the committee were of the opinion that the required and desired degree of cooperation and consultation should be initiated by the executive branch of government, which, if it works as it seems to be in California at the present time, due in part to the progress made by the Governor's Committee on Pesticide Review, should obviate the necessity for action by the Legislature making such cooperation and consultation mandatory.

At the same time, it would be naive not to recognize that unless something is done at the state level, we may witness in California what has happened in Washington; namely, representatives of federal agencies appearing before various committees of Congress, each trying to acquire more jurisdiction and authority in this field.

Committee Recommendation

For this reason, the committee recommends that the executive branch of the government formalize, by executive order, interdepartmental arrangements for continuous coordination and cooperation between the various agencies in the executive branch having responsibilities in the field of pesticides. This could be accomplished through formal memorandum of agreement between these various agencies, establishing working procedures to assure effective coordination in carrying out their respective responsibilities such as is being done now at the national level under an agreement reached between the Departments of Agriculture; Interior; and Health, Education and Welfare, in April 1964.¹

Committee recommendation to be implemented through the introduction of a Senate Concurrent Resolution at this session of the Legislature. The resolution as introduced in the Senate on April 22, 1965, reads as follows:

SENATE CONCURRENT RESOLUTION NO. 70

Relative to Coordination of State Pesticide Activities

WHEREAS, There does not exist any formalized interdepartmental arrangements for continuous coordination in the executive branch in matters relating to the safe use of pesticides; and

WHEREAS, Through formal memorandum of agreement such arrangements have been made at the national level between the Departments of Agriculture; Health, Education and Welfare; and Interior establishing working procedures to assure effective coordination in carrying out their respective responsibilities; and

¹ A copy of this agreement was appended, marked exhibit A.

WHEREAS, The development and registration of new economic poisons and their expanded use throughout the environment will require greater supervision and closer coordination to protect public health and plant and animal life; and

WHEREAS, The lack of such cooperation, consultation and coordination between agencies having responsibility relating to pesticides may lead to incidents involving injury to humans and to plant and animal life unless a program for coordination and consultation is initiated by the executive branch of government; now, therefore, be it

Resolved by the Senate of the State of California, the Assembly thereof concurring, That the executive branch of the government is requested to formalize by executive order, interdepartmental arrangements for continuous coordination, consultation and cooperation between the various agencies in the executive branch having responsibility in the field of pesticides.

PROPOSAL 2

Should pesticide recommendations by salesmen be made in writing?

Discussion

Governor Brown's Committee on Pesticide Review in its preliminary report on pesticides in California, dated June 1964, recommended that salesmen dealing in agricultural pesticides and structural pest control products should be required to make all recommendations for specific application of such pesticides in writing and keep copies of such recommendations for review by an appropriate state department. The Department of Agriculture has also recommended similar legislation. This same subject has also been a suggestion advanced by the California Association of Agricultural Commissioners.

Mr. Parke Brinkley, President of the National Agricultural Chemical Association, in commenting on this proposal, said that a mandatory requirement of the salesmen to give written recommendations does two things. According to Mr. Brinkley, it either makes the salesmen rewrite the label or the Legislature itself, by this action, sanctions the salesmen going beyond the recommendation that is on the label or beyond the recommendations developed by the U.S.D.A., the University of California — as would be the case in California — and in turn, through the extension service to the farmer.

Mr. Robert M. Howie, Agricultural Commissioner of Riverside County, speaking in support of this proposal, said he could foresee the day when most pesticides used in California agriculture would be by prescription on much the same basis as presently applies to certain medicines and drugs. On the other hand, Mr. James Moon, Agricultural Commissioner of San Diego County, took the position that such a requirement would be extremely complex. He pointed out, for example, that the salesmen of pesticides in retail nurseries would be overburdened with writing. He further pointed out that commercial pest control operators often sell materials in the conduct of their services, while at the same time, these individuals have, by a state examination, been found to be competent and knowledgeable.

While it must be recognized that testimony presented in the exhaustive series of committee hearings on the subject of pesticides was rather limited, the committee feels that it cannot ignore the very substantial support for such a proposal.

Committee Recommendation

The committee approves, in principle, the concept that recommendations involving the use of pesticides on commercial crops be required to be made in writing, with appropriate control procedures relative to the documentation and safekeeping of such writing. The committee notes the pendency at this session of Assembly Bill 598 (Petriss), which bears upon this subject. Pending legislative action on AB 598 the committee will defer specific legislation on the subject, subject to the possibility that Senate legislation may be indicated later at this session. The committee reserves specific comment on AB 598 until it has reached the Senate Standing Committee on Agriculture for consideration at this session.

PROPOSAL 3

Should the penalty provisions for violation of laws and regulations relating to the use and application of pesticides be strengthened?

Discussion

Mr. L. D. McCorkindale, Agricultural Commissioner of Fresno County, in commenting on this question, said "Yes." According to him, county agricultural commissioners should have the same power in the enforcement of pesticide regulations as they have had for many years in the enforcement of fruit and vegetable quality requirement standards and in the enforcement of state and federal plant quarantine laws. He suggested that possibly the language "it is unlawful to" should be used as it presently is in Sections 106 and 106.1 and many other sections of the Agricultural Code. For many years, according to Mr. McCorkindale, the county agricultural commissioner has been able to effectively enforce standardization and plant quarantine laws because of adequate power to issue violation notices and resort to legal action if the need arises. The commissioner is not left in doubt as to his authority as he sometimes is in laws concerning pesticide usage.

Mr. Stephen T. Ancell, president of the California Association of Agricultural Commissioners, in commenting on this proposal, said his association makes the following recommendation: "Add a section to Article 1 of Chapter 1a of Division 2 of the Agricultural Code, Agricultural Pest Control Business, to provide that any person who violates any of the provisions of the article or the regulations made under the article would be guilty of a misdemeanor." In elaborating on this recommendation, Mr. Ancell said that the article as now written is not clear on this matter. According to him, there are provisions for administrative action which can be taken against the license of the pest control operator or a pilot's certificate but this type of action usually takes several months and is a very expensive procedure. According to Mr. Ancell, if the necessary provisions existed in the law

whereby a complaint could be filed against the pest control operator or pilot when necessary, it would strengthen the law and give the agricultural commissioner an effective weapon to carry out his duties. Mr. Ancell went on to say that while he recognizes that Section 8 in the general provisions of the Agricultural Code provides that "unless a different penalty is expressly provided, a violation of any provision of this code is a misdemeanor," there would be merit in adding the misdemeanor language to Chapter 1a (Agricultural Pest Control Business).

Mr. Herman Grabow, representing the California State Grange, in his presentation to the committee on this proposal, called for strict penalties to be imposed on those who flagrantly violate "sensible" regulations governing the use of restricted pesticides.

On the other hand, Mr. Russell Richards, speaking for the California Farm Bureau Federation in his testimony before the committee, is quoted as saying: "We feel that at the present time, there is no need to strengthen the penalty provisions of the law."

Mr. Robert M. Howie, Agricultural Commissioner, Riverside County, in speaking to this proposal, said that in his opinion, by and large, the penalty provisions relating to the use and application of pesticide chemicals are adequate, if used. He went on to say that: "My only question here is the inadvisability of suggesting that violations or regulations pertaining to pesticides be made a misdemeanor. The revocation or suspension of permits and licenses under regulations is appropriate."

Mr. James M. Moon, Agricultural Commissioner, San Diego County, in commenting on the proposal, stated that any violation provisions of Chapter 1a should be unlawful and treated as a misdemeanor.

Committee Recommendation

In view of the uncertainty surrounding this proposal, the committee recommends the Legislative Counsel be requested to review the language in Chapter 1a in an effort to resolve the uncertainties raised by the various county agricultural commissioners regarding their authority as it applies to violations of Chapter 1a of the Agricultural Code, prior to recommending any remedial legislation. Following is the opinion of the Legislative Counsel in response to the committee's request:

Sacramento, California
December 11, 1964

HON. VIRGIL O'SULLIVAN
P. O. Box 427
Williams, California

Pest Control Operators, No. 7873

Dear Senator O'Sullivan:

QUESTION

You have asked whether a violation of Section 160.2, or accompanying sections (160.1 to 160.9) of the Agricultural Code* is a misdemeanor.

* All references are to this code.

OPINION

Yes.

ANALYSIS

The Agricultural Code contains a general penal section which applies to a violation of any section of the code:

“8. Unless a different penalty is expressly provided, a violation of any provision of the code is a misdemeanor.”

It could be argued that a “different penalty” is provided for in Section 160.2 since a license may be revoked:

“160.2. It is unlawful for any person to engage for hire in the business of pest control without first procuring from the director a license for each calendar year or portion thereof. Applications for such license shall be in the form prescribed by the director, and shall state the name and address of the applicant and the type of pest control in which he intends to engage. The application, except as hereinafter provided, shall be accompanied by a fee of twenty dollars (\$20). Each applicant shall further satisfy the director of his character, qualifications, responsibility, and good faith in seeking to carry on the business of pest control.

“* * *

“The director may refuse to grant a license or renewal of license and may revoke or suspend any license, as the case may require, when, after a hearing as herein provided, he is satisfied that the applicant or licensee is not qualified to perform the type of pest control under the conditions and in the locality in which he intends to operate, or, that he has committed any of the following acts, each of which is declared to be a violation of this chapter:

“* * *”

However, it is our opinion that these provisions controlling the revocation of a license to do business are not penal. The purpose of statutes authorizing revocation of licenses is to protect the public rather than to punish the licensee (53 C.J.S., Licenses Sec. 44a; see also *West Coast Home Imp. Co. v. Contractors' State License Board of Dept. of Professional and Vocational Standards* (1945), 72 Cal. App. 2d 287).

Since the licensing provisions of the statute are not penal, there is no “different penalty . . . expressly provided” under the terms of Section 8, and therefore Section 8 would apply to make a violation a misdemeanor.

The same reasoning applies to Sections 160.1 and 160.3 through 160.9 regarding the application of Section 8 to make a violation a misdemeanor.

Very truly yours,

GEORGE H. MURPHY

Legislative Counsel

By STANLEY M. LOURIMORE

Deputy Legislative Counsel

PROPOSAL 4

Biennial review of pesticide programs conducted by state agencies.

Discussion

In this connection, it should be noted that in at least one such program, the State Department of Agriculture has already taken some preliminary steps. In a memorandum dated May 18, 1964, the Chief of the Bureau of Entomology recommended to Mr. Charles Paul, Director of the State Department of Agriculture, that a meeting be held between representatives of U.S.D.A., California State Department of Agriculture, the University of California and selected industry representatives, to discuss the resumption of intensified pursuance of control research directed toward diminishing the role of insecticides and attendant costs in the control of beet leafhoppers and this research should be on a sustained and adequately financed basis. Such a meeting was held on September 29, 1964, at which time a steering committee was selected to evaluate suggested research proposals.

It should be pointed out that for over 20 years, the Department of Agriculture has been engaged in control of the sugar beet leafhopper. In the four-year period beginning in 1950, approximately \$3,500,000 has been spent to chemically reduce populations of this insect, conservatively estimated to have caused losses of \$5 million in 1950 to California tomatoes and melons alone.

During the 1963-64 fiscal year, for example, the department expended \$318,000 on this program. The annual cost for the past five years has averaged \$261,000. It should also be pointed out that in the areas in which the problem occurs, these crops, which also include squash, cucumbers, spinach, flax and beans, are represented by over 400,000 acres, showing an annual average return of over \$100 million.

Implementation of this proposal by state agencies, it should be noted, would be in line with action taken recently by the U.S.D.A. in establishing a pest program evaluation group. This group has been given the responsibility of reviewing all U.S.D.A. control programs involving the use of pesticides on a continuing basis to make certain that the safest and most effective of materials and procedures are being used.

Committee Recommendation

The committee is of the opinion that this proposal has merit and recommends that such a resolution be introduced at the 1965 Regular Session of the Legislature with a further stipulation that the Legislature be provided with a biennial report from the various agencies on progress, if any, achieved in the implementation of the intent of the resolution. The text of the resolution introduced in the Senate on May 11, 1965, reads as follows:

"SENATE RESOLUTION NO. 182**Relating to the Use of Pesticides**

WHEREAS, Questions have been raised regarding the possible cumulative hazard to human and animal health as a result of extended exposure to pesticides; and

WHEREAS, For example, the annual cost for the state administered sugar beet leafhopper chemical control program has for the past five years averaged \$261,000; and

WHEREAS, Tremendous progress has been made in recent years in the development of new biological methods of insect control and/or eradication designed to avoid or greatly minimize the possibility of environmental contamination; and

WHEREAS, The United States Department of Agriculture recently established a pest program evaluation group which has been given the responsibility of reviewing all United States Department of Agriculture control programs involving the use of pesticides on a continuing basis to make certain that only the safest and most effective materials and procedures are used; now, therefore, be it

Resolved by the Senate of the State of California, that all state agencies conducting continuing, large scale control and/or eradication programs involving the use of pesticides for whatever purpose review these programs biennially not only in an effort to reduce cost but more importantly to ascertain whether or not the same measure of effectiveness can be attained through means other than the continued use of pesticides; and be it further

Resolved, That the Legislature of the State of California be provided with a biennial report from the various state agencies on progress, if any, achieved in the implementation of the intent of this resolution."

PROPOSAL 5

Would there be any merit in legislatively categorizing materials other than those listed as injurious that may need monitoring?

Discussion

This subject was first advanced by Mr. Alan Grant of the California Farm Federation at the meeting the committee held in Sacramento on October 23, 1963. In his presentation, Mr. Grant said that there should possibly be a category set up in the codes somewhat similar to the injurious materials list. According to Mr. Grant, many of our chemicals need the same degree of monitoring that injurious materials do but are materials that have not been proven dangerous to man, animals and plants under ordinary circumstances. Mr. Grant went on to say that the entire chemical situation can be so delicate that even categorizing some materials incorrectly can have an adverse affect on agriculture.

It should be pointed out that witnesses commenting on this specific proposal at later hearings of the committee were unanimous in their opinion that legislatively categorizing materials would be a mistake, inasmuch as it would reduce the flexibility in adding or deleting materials from the particular lists as new information is acquired. It was generally felt that handling this phase of the program by regulation has been eminently fair and effective.

It is quite possible that Mr. Grant in his testimony meant categorizing materials in the Administrative Code, rather than in the Agricultural Code, which, as a matter of fact, has since been accomplished.

Amended regulations of the Department of Agriculture which became effective on June 10, 1964, provide a completely new category of restricted materials established to include dieldrin, endrin, heptachlor, and toxaphene, and certain uses of these materials in both spray and dust form are subject to the requirement of a permit. The pesticides DDT and DDD are also designated as "restricted materials" and their use is regulated in a similar manner.

Committee Recommendation

The committee is of the opinion that the present system of categorizing injurious materials by administrative regulation should not be changed.

PROPOSAL 6

If the need exists for an expanded educational program relative to the use and application of insecticides, particularly around the home, who should be responsible for the development and administration of the program?

Discussion

Mr. Parke Brinkley, president of the National Agricultural Chemical Association, in commenting on this proposal, said he thought it was a job for everyone to work at. According to him, his industry has developed the "Read the Label" program. He said this year his association is working through the National Safety Council and is encouraging through them the 4-H Clubs and their individual chapters and the FFA chapters, to make this a part of their farm safety program. Mr. Brinkley is further noted as saying:

"I think all of us—the extension service, the State Department of Agriculture, the State Department of Public Health, the industry—I think that everyone has a responsibility in this."

At least one other individual testified that the development and administration of such a program should be a joint venture between the farm advisor's office and the county agricultural commissioner. Still another suggested a cooperative program between the Extension Service of the University of California, the agricultural commissioners' offices and private industry.

There was general agreement on the need for an expanded educational program. This is in line with a recommendation contained in the report of the President's Science Advisory Committee on the Use of Pesticides for the initiation of a broad educational program delineating the hazards of both recommended use and the misuse of pesticides.

I think it can be said that an impartial evaluation of the testimony presented to the committee indicates that educational programs attuned to hazards associated with the manufacture, transportation, application and use of toxic materials on a commercial basis are effective; however, it would appear that a need still exists for an educational program designed to reach the accidental type of hazard, particularly to children around the home and garden.

In this connection, it should be pointed out that Section 8000.1 of the Education Code specifically provides that instruction shall be given in every elementary and secondary school in the state in the subjects of public safety and accident prevention, with special emphasis to be devoted to avoidance of hazards upon streets and highways.

Section 8000.2 of the Education Code also provides that the State Board of Education shall adopt such rules and requirements as it deems necessary and proper to secure instruction in public safety and accident prevention in the elementary and secondary schools of the state.

Dr. Max Rafferty, Superintendent of Public Instruction, in a statement submitted to the committee on the subject of pesticides said that "All of us who are engaged in education have an intense interest in this very important issue. As I view our role in education, it is one of providing all of the available information possible to students who have any contact with pesticides either directly or indirectly. While classes throughout the state have stressed the need for intelligently handling and applying pesticides to growing crops and in the harvesting of fruits and crops to which pesticides have been applied, classes in chemistry are equally interested and give instruction as part of their curriculum in the use of chemicals as pesticides. I want to assure the Senate factfinding committee of the genuine interest of the Department of Education in this important problem and their desire to acquaint students with the results of any research that may furnish answers. If the committee has any suggestions of anything that we in education should do, we would be most happy to receive them."

It should also be pointed out that in the report of the President's Scientific Advisory Committee on "Use of Pesticides" it was recommended that "to enhance public awareness of pesticide benefits and hazards, . . . appropriate federal departments and agencies initiate programs of public education describing the use and the toxic nature of pesticides. Public literature and the experiences of panel members indicate that, until the publication of *Silent Spring*, by Rachel Carson, people were generally unaware of the toxicity of pesticides. The government should present this information to the public in a way that will make it aware of the dangers while recognizing the value of pesticides."

Committee Recommendation

The committee recommends that a resolution be introduced at the 1965 Regular Session of the Legislature requesting the State Department of Education to undertake a survey of public safety and accident prevention instructional programs in elementary and secondary schools in the state in order to ascertain to what extent, if any, instruction is being given in the hazards associated with the recommended use and the misuse of pesticides and then to take whatever action is deemed appropriate based on the results of this survey. The text of the resolution as introduced in the Senate on May 11, 1965, reads as follows:

SENATE RESOLUTION NO. 181

Relative to Pesticides and Toxic Agents

WHEREAS, About 45 million pounds of pesticides are used each year in urban areas and around homes, with much of the material being used by individual homeowners; and

WHEREAS, It has been demonstrated that householders take few precautions in their home and garden use of pesticides and other toxic agents; and

WHEREAS, It is apparent that educational programs attuned to the hazards associated with the manufacture, transportation, application and use of toxic agents and pesticides on a commercial basis are effective, however, it does appear that a definite need exists for a continuing educational program designed to reach the accidental type of hazard, particularly to children; and

WHEREAS, The President's Science Advisory Committee in its report on Use of Pesticides has found that it is necessary to provide, on a continuing basis, for the initiation of a broad educational program delineating the hazards of both recommended use and misuse of pesticides; now, therefore, be it

Resolved by the Senate of the State of California, That the California State Department of Education is requested to undertake a survey of public safety and accident prevention instructional programs in the elementary and secondary schools in the state in order to ascertain to what extent, if any, instruction is being given in the hazards associated with the recommended use and misuse of pesticides and other toxic agents and then to take whatever action is deemed appropriate based on the results of the survey.

PROPOSAL 7

What portion of existing law, if any, would be made applicable to governmental agencies and individual farmers engaged in programs involving the use of pesticides?

Discussion

Surprisingly enough, there was very little opposition to the proposal to make existing law applicable to the individual farmer who is sometimes referred to as the "do-it-yourself type of operator." Testimony referring to blanketing governmental agencies under existing law was quite limited. First, it should be pointed out that a very real void exists in the law as it relates to the individual farmer who conducts his own pesticide program. This void is further enlarged by the language contained in Section 160.2 of the Agricultural Code which provides in part as follows:

"A person not regularly engaged in the business of pest control and operating only in the vicinity of his own property and for the accommodation of his neighbors shall not be required to procure a license but shall obtain a permit from the director, register with the commissioner as provided in Section 160.3 and be subject to all other provisions of the chapter."

While this provision does exist in the code, it is almost impossible to determine the magnitude of this type of operation.

Section 160.5 of the Agricultural Code is a controlling section. It specifically provides that the director shall make rules and regulations governing the conduct of the business of pest control; however, this section is applicable only to persons who are registered to engage for hire in the business of pest control. Farmers who conduct their own pest control programs are excluded. It should be noted, however, that Section 1080 of the Agricultural Code which gives the Director of Agriculture authority to adopt rules and regulations governing the application in pest control or other agricultural operations of any material which the director finds and determines to be injurious is applicable not only to commercial operators but to individual farmers as well. It is this section which gives the Director of Agriculture authority to require permits for the use of materials which he finds and determines to be injurious to persons, animals and crops other than the pest or vegetation which the material is intended to destroy.

It is felt that the problem was placed in its proper perspective by Mr. Kenneth Wolff, Agricultural Commissioner from Los Angeles County. In his testimony to the committee at the meeting held in San Francisco on June 19, 1964, Mr. Wolff pointed out that in Los Angeles County, it had been his experience that present state laws and regulations relating to persons and firms who do pest control work for hire give the commissioner an adequate degree of control over pesticide applications for commercial operators. Also, the commissioner, through the issuance of permits, can control application by individual users of those pesticides which have been designated by the Director of Agriculture as injurious or restricted materials. However, according to Mr. Wolff, there still remain many pesticides which have not been so designated over which the commissioner can exercise no control when applied by persons using their own equipment.

In this connection, Mr. Wolff point out, for example, in the Antelope Valley area, during the year ending June 30, 1962, there was a total of 82,655 acres, treatments of which 14,000 or less than 20 percent, were by commercial pest control operators.

The point Mr. Wolff was trying to make was the fact that in this particular area, the preponderance of work on commercial crop acreages is by growers using their own equipment rather than by commercial pest control operators.

To meet this situation, Mr. Wolff said that the County of Los Angeles, in 1962, put into effect a county ordinance which puts restrictions on the use of seven pesticides in the chlorinated hydrocarbon group; namely, aldrin, BHC, DDT, DDD, deldrin, endrin, and heptachloride, which, if allowed to drift onto forage crops fed to dairy stock could cause a residue which would later show up in dairy products.

The use of a county ordinance for this purpose, according to Mr. Wolff, for the following reasons is not altogether satisfactory:

1. Such an ordinance is effective only in the unincorporated areas of the county.

2. A question could be raised as to whether a local ordinance of this nature infringes on an area already occupied by the state.

Similar action for a like reason was also taken by the Board of Supervisors of Imperial County which passed an ordinance in 1962, which provides that:

"Any person, firm, association, company or corporation who engages for hire in the business of agricultural pest control in Imperial County shall obtain a permit from the Agricultural Commissioner of Imperial County before applying any pesticide other than those pesticides which have been determined by the Director of Agriculture of the State of California to be injurious to persons, animals or crops. The agricultural commissioner may issue such permit in which he may provide conditions for the application of such pesticides he deems necessary to protect persons, animals (including bees), crops, and property."

Mr. Norman Stanley, owner of Growers Aerial Service in El Centro, in speaking to this proposal, while not advocating the extension of existing law to farmers, did suggest that the present exemption for farmers who apply pesticides for their neighbors (see Section 160.2 of the Agricultural Code) be deleted. Mr. Stanley went on to say that in his opinion, any person who applies materials commercially, including the farmer, should have to meet the same regulations that he meets.

Many witnesses testifying recommended that control regulations be kept at the local level with the agricultural commissioner calling hearings to make regulations on each material with final approval of the proposed local regulation to remain with the Director of the State Department of Agriculture.

Mr. M. L. La Brucherie, diversified farmer in the El Centro area, in speaking to this proposal, pointed out that there are several materials not listed as injurious which, if not used properly, could cause problems. As an example, he pointed out that if a representative from the agricultural commissioner's office saw a commercial applicator (in Imperial County) dusting or spraying, with a wind stronger than five miles an hour, he has the authority to stop him; however, he would have no control over a grower doing the same thing. Mr. La Brucherie went on to say:

"The commissioner should have the same control over the farmers as he has over the commercial applicator."

Mr. William S. Zimmer, salesman of agricultural chemicals in Imperial County, also took the same position as that of Mr. La Brucherie. Mr. Zimmer illustrated his point, citing the example of a farmer using sulfur on a hot day on a crop adjacent to a field of cantaloupes. According to Mr. Zimmer, sulfur fumes (not listed on the injurious materials list) could, under certain circumstances, "run down hill and if the cantaloupes were not sulfur resistant and were in a particular stage of growth, the sulfur would fry them."

One of the few witnesses testifying against further regulations of farmers in this area was Mr. L. D. McCorkindale, Agricultural Commissioner of Fresno County. In commenting on this proposal, he said: "As 20 of the most commonly used pesticides are now under permit where producers are regulated, enough laws are already in existence which are applicable to farmers."

Mr. Russell Richards, coordinator of feed commodity services, California Farm Bureau Federation, in commenting on this proposal, said:

"In this I note we went on record on March 31, 1964, when we testified in the injurious materials hearings (State Department of Agriculture), to the effect that we do believe there should be controls and that the controls should be applicable to everyone who uses them and in this case, it was chlorinated hydrocarbons. We would make, certainly, the same statement to injurious or restricted materials. By this, we mean the rules for use and penalties for misuse should apply to commercial applicators, farmers who apply the materials themselves and government agencies."

It should be pointed out that Mr. Richards did not comment on materials other than those on the injurious list.

Mr. R. J. Marsh, secretary-treasurer of the Cannerymen's League of California, in speaking to the proposal, said:

"We feel that county agricultural commissioners, individually or collectively, should not be given such comparable authority to adopt rules and regulations regarding the use and application of pesticide chemicals. We believe that such authority should be vested solely in the State Department of Agriculture."

Mr. Robert M. Howie, Agricultural Commissioner, Riverside County, in his comments on this subject, said:

"It is my opinion that governmental agencies, except for research agencies, should be included in all regulations restricting the use of pesticides, including the sections pertaining to injurious materials and herbicides. Instead of imposing more restrictions on pest control activities of individual farmers, I would refer to my comments and suggest that should my proposal be adopted, this should suffice to control the activities of the individual farmer."

As Mr. Howie's remarks relating to labeling, are interpreted, he is suggesting that pesticide use in California will ultimately be on a prescription basis. Under this setup, the county agricultural commissioner would be the prescriber.

Mr. James M. Moon, Agricultural Commissioner of San Diego County, in commenting on the proposal to make existing law applicable to governmental agencies said:

"In view of alleged pesticide contamination of fish and wildlife from apparently 'unknown' sources, as experienced in other areas, it might be wise to consider expanding existing law to include governmental agencies and individual farmers under a portion of Section 160.3 of the Agricultural Code, to wit:

"The registrant shall further keep and maintain a record of each property treated, showing the date of treatment, the material and dosage used, the number of units treated, and such other information as may be required, and shall report the same to the commissioner or to the director when and as required.'"

The Department of Agriculture, as one possible solution to this problem, has suggested a provision be added to the code to make it unlawful to use a pesticide on any food or fiber crop other than in the manner specified on the label or on the printed directions delivered with the product. The department also suggests legislation which would prohibit the use of pesticides in a manner which would permit

any substantial drift to other crops without express authorization by the director or the agricultural commissioner." ¹

Staff Recommendation

Based on an evaluation of the testimony received, the following recommendations were presented to the committee for consideration.

1. Make all of the provisions of Chapter 1a (Agricultural Pest Control Business) applicable to farmers who engage in the business for hire.

2. Require all farmers and nurserymen engaged in pest control operations to obtain a permit from the director, register with the commissioner as provided in Section 106.3 and be subject to all other provisions of the chapter. Farmers should not, however, be required to be licensed.

3. Make Recommendation No. 2 equally applicable to governmental agencies.

For a variety of reasons, the committee refused to concur in these three staff recommendations.

PROPOSAL 8

If research on the subject of agricultural chemicals is to be expanded, what area of areas should receive priority?

Discussion

Research certainly was the key word used by most witnesses testifying before the committee at the hearings held in Sacramento on October 22 and 23, 1963. Accordingly, witnesses testifying at the series of meetings in June 1964 were asked to comment on what area or areas of research should receive priority. At the meeting held in El Centro, on June 16, 1964, the number of suggestions from farmers testifying at this meeting was rather limited. However, the following four recommendations were made:

1. The study of pesticide residue with an aim to eliminate as many zero tolerances as possible.
2. Expand work in biological control.
3. Study attractants such as black light.
4. Pesticides in the soil.

At the hearing held in San Francisco on Friday, June 19, 1964, the following recommendations were advanced by witnesses testifying:

Dr. Ralph Teall, president of the California Medical Association, in his presentation suggested that research in all areas pertaining to agricultural chemicals should be continued. He specifically called for a greater capacity for research and investigation into the affect of pesticide on human health.

Dr. C. H. Hine, M.C., Ph.D., association clinical professor, preventative medicine, University of California, in his testimony to the committee on research stated that research is needed in the area of human experimentation and controlled observation on the population to ascertain the affect of the intake of substances of a persistent na-

¹ This suggestion was incorporated in the provisions of AB 598 as amended on April 21, 1965. The amended version is appended marked Exhibit B.

ture over an extended period of time. Dr. Hine went on further to say that as a source of scientific inquiry, study should be conducted in an effort to ascertain whether there is an aggravation of any degenerative-type of naturally occurring disease or any acceleration of disease by exposure to the substances and the quantity in which they are encountered ordinarily. Plans for the first large-scale study ever made to determine possible relationships between long-term health effects and the use of pesticides were made public on March 4 by the Public Health Service, U.S. Department of Health, Education, and Welfare. According to an account which appeared in the April issue of *NAC News and Pesticide Review*:

The study will be underway by the end of March in nine states and is expected to be extended next year to at least three other areas. Initial cost will be \$1.2 million and will rise to \$2.3 million next year. Areas participating in the study are:

The Windsor-Greeley region of Colorado; Dade County, Florida; the Island of Oahu in Hawaii; La Fourche and St. Bernard Parishes, Louisiana; Berrien County, Michigan; Monmouth County, New Jersey; the lower Rio Grande Valley in Texas; the Wenatchee-Quincy Basin in Washington; *and an area to be designated in California.*

Seven research programs are being set up under PHS contracts with the assistance of state health departments that will conduct them. In Louisiana and Hawaii, operations will be by contract with academic institutions. Some county health organizations also are cooperating and assistance is being provided by university research units in many of the states.

Public Health Service scientists regard much of the present information about the effect of pesticides on people as inadequate in that it is related to short-term human investigations, or animal toxicity tests, or to acute cases of poisoning resulting from heavy accidental exposures. None of these is immediately relevant to long-term exposure effects. To ascertain any long-term health effects, the community research will run at least five years in all cases.

"Many pesticides, widely used for years, have not been investigated for their impact on human beings after long environmental exposure," said Dr. Robert J. Anderson, Chief of the Public Health Service's Bureau of State Services which will have charge of the research. "We know very little, moreover, about disease states which may crop up ten years or more after acute pesticide poisoning."

Dr. Anderson described the study as "a truly pioneering venture in environmental health research."

"Never before has an effort of this magnitude been made to determine how and what pesticides get into the environment, by what routes they affect people, how their metabolites are handled by the human body and its tissues and organs, and whether pesticides are making people sick or shortening their lives," Dr. Anderson said. One of the first tasks of the community researchers will be to determine the kinds and amounts of pesticides used and methods of application; pesticide retention characteristics of the soil; local weather features; methods employed for farm, garden, household, public health, and commercial pest control; and rural and urban population distribution patterns, disease incidences, and mortality rates.

Surveillance will be maintained in each community to develop accurate information on varying levels of pesticides in human beings.

Instances of persons receiving heavy chronic pesticide exposure will be subjected to scientific scrutiny with researchers focusing upon the health of pest control operators. Particular attention will be paid to liver and kidney ailments, neurological diseases, and allergies, among other disorders. Deaths from unknown causes will be checked to determine if pesticide fatalities have been occurring which were not recognized as such.

A recently established PHS Office of Pesticides will supervise the community research programs and operate a national pesticides intelligence system to disseminate data to scientists working in the field.

Mr. Parke C. Brinkley, President to the National Agricultural Chemicals Association, in commenting on research said that the pesticide industry is a very research conscious industry. According to Mr. Brinkley, this industry spends 10 percent of its gross income on research and development, which is one of the highest ratios between sales and research and development among all industries. According to Mr. Brinkley, it is exceeded only by the pharmaceutical industry. Mr. Brinkley went on to say that he felt that the chemical industry is extremely well qualified to synthesize new materials, to screen them for the pesticidal activity and to test them for the efficacy and for safety.

Mr. Brinkley also pointed out that the land grant colleges and universities and the U.S. Department of Agriculture all are extremely well qualified to do research in the use of these materials, and the development of new methods of application. They are also, according to him, extremely well qualified to do research in the field of attractants, of sterilization, of biological control of various sorts, and it is his opinion that if, in general, the industry confines itself to the development of these new materials, the colleges and the U.S.D.A. devote themselves to these other fields that industry is not so well qualified to do, that we will do away with considerable duplication and at the same time we will be serving the American people to a better extent.

Mr. L. D. McCorkindale, Agricultural Commissioner, Fresno County, in his testimony on the question of research, said that he felt work definitely needs to be done on insect repellents which are nontoxic to plants or animal life, and that additional study should be given to why a particular host plant attracts a certain pest. Subsequently, according to him, a repellent chemical could be sought which would seemingly change the nature of the host plant, thus rendering it unattractive to the pest. Mr. McCorkindale went on to say that in his opinion more selectivity in pesticides needs to be achieved, especially in directing control toward a certain stage in the life history of a pest. According to him, in this manner desirable species of insect parasites and predators can be better protected. Mr. McCorkindale also pointed out that for many years, a great deal of interest and considerable difficulty has been experienced in the application of pesticides to crops in bloom where pollination is unnecessary, and where injury to honeybees has occurred. According to him, more research should be done in seeking chemical bee repellents that might be added to insecticides. He said

that he was aware that considerable work had already been done on this, but in his opinion, even more study needs to be directed to the subject.

Mr. Herman Grabow, representing the California State Grange, in his statement to the committee, said that his organization is convinced that vigorous and intensive study in research be implemented immediately in biological control of insects. He further called for stepped-up programs of research into chemical and all other controls that will be harmless to human life and further reduce soil pollution as well as water pollution to a minimum. According to him, chemical and other suppliers of insecticides have a duty to lead in these avenues.

Mr. Russell Richards, speaking for the California Farm Bureau Federation, in commenting on this proposal said that his organization feels that research priority should be given to the effects of chemicals on (1) humans and animals, (2) drift, and (3) biological control.

Mr. Robert J. Marsh, secretary-treasurer, Cannery League of California, in his testimony to the committee said that in the matter of research that his organization feels that the following areas should be given consideration:

- a. Determination of the influence of pesticide chemicals on quality factors (both raw and finished products), for example, flavor and color.
- b. Determination of persistence of pesticide residues which might become a health hazard to agricultural workers.
- c. Development of data on pesticides' breakdown and persistence in soil.

Also made a part of the record of the committee's proceedings at the meeting held in San Francisco was a statement regarding the proposed toxicological center at the University of California in Davis. It is understood that this unit will be officially designated as the University of California, Davis Toxicology Center. This center, according to the statement, will have three broad objectives:

1. To sponsor coordinated, multidisciplinary research programs on problems related to chemical and microbiological hazards associated with agricultural production and food processing and food preservation.
2. To sponsor training programs in disciplines required for the solution of public health problems, especially those associated with the healthfulness and safety of foods, including the agricultural practices used to produce raw materials.
3. To sponsor seminars, colloquia, conferences, symposia, etc., on environmental health problems, particularly those associated with the use of chemicals in agricultural production and food processing and food preservation.

The statement went on to say that the university study has revealed that the Davis campus has the potential for a broadly based program of research on chemical and microbiological hazards associated with agricultural production and food processing and food preservation. The following research areas have been identified which are already under investigation and can be expanded or which have the potential for substantial development:

1. Chemical hazards.
 - a. Analytical methods and instrumentation.
 - b. Methods for assessment of chronic toxicity.
 - c. Morphological, physiological and biochemical aspects of chronic toxicity.
 - d. Environmental fate (air, water and soil) of agricultural chemicals and feed additives.
 - e. Naturally occurring feed and food toxicants.
 - f. Methods and systems for minimizing health hazards and chemicals.
2. Microbiological hazards.
 - a. Isolation, identification and enumeration of toxigenic and infective agents.
 - b. Physiological and biochemical characterization of infective and toxigenic agents.

Another agricultural commissioner testifying on research at the San Francisco meeting was Mr. Robert M. Howie, Riverside County. In his presentation, Mr. Howie pointed out that tremendous amounts of research had been devoted to most of the chemicals as regards to their use and effectiveness on specific pests. About this Mr. Howie said: "I do not mean to imply that this should be curtailed, but under present circumstances stepping up the research in the area of analysis for chemical contamination on commodities is most important." According to him, research must provide as quickly as possible the information regarding required effective dosage, toxicology, pesticide decay, pesticide detection, etc., of chemicals which will make possible the establishment of finite tolerances for pesticides on commodities at harvest. Another important area of research involved methods of safely applying chemicals without drift.

Mr. James M. Moon, Agricultural Commissioner of San Diego County, in commenting on this proposal said that systemic pesticides, lures and chemosterilants are quite specific in function. When used properly they do not readily move out of the "target" area. Engineering studies of methods and equipment used in application of pesticides to more closely confine them would be of benefit. Analytical methodologies to determine residues should be standardized and such standard methods should be maintained.

Mr. Robert W. Johnston, manager of the Contra Costa Water District, also had several recommendations on this proposal. According to Mr. Johnston the Contra Costa County Water District would recommend that priority be given the following areas of research in the order presented:

1. The problems of measuring and isolating pesticides in raw water supplies used for treatment and distribution as a potable water for human consumption.
2. The effectiveness of filtration to remove pesticides from potable water supplies.
3. The tolerances of the human system for maximum levels of pesticides in potable water supplies.

Mr. E. B. Antonell, speaking for the Western Growers Association, stated as follows: "We feel that the most important field of long-range study is in the area of biological or natural controls which could ultimately eliminate or at least greatly reduce the need for chemicals. We are, however, practical farmers and we know that such programs take time and may not even produce commercial results within our lifetime. We would, therefore, recommend an increased study and experimentation with effective chemicals of low mammalian toxicity. There have been great improvements in this area in recent years, and we feel that such materials hold greater immediate promise than any pie-in-the-sky ideas about the rebalancing of nature."

According to Mr. Antonell, such nontoxic or low-toxic materials should receive immediate consideration and rapid approval when they are developed and they should not be delayed by red tape or scare tactics in their release to food producers.

It should also be pointed out that Governor Edmund G. Brown's special Committee on Public Policy regarding agricultural chemicals in its report presented to the Governor on December 30, 1963, recommends that research should be intensified in all areas pertaining to the use, toxicology and the effects on health of agricultural chemicals and in finding better pest control methods. The research should continue to include not only development of safer pesticides and more efficient methods of analyses, but also alternative measures such as biological control and the development of pest-resistant varieties of crops.

Mr. George A. Gooding, vice president of California Packing Corporation, in a statement submitted to the committee enumerated a number of areas where, in his opinion, knowledge of safety and efficiency is as yet incomplete. He pointed out that, for example, with respect to workers' safety we need new knowledge of proper gloves, face covering and clothing. He also went on to say that we must know more, for instance, about how long a parathion-treated orchard remains unsafe to enter. Specifically he suggested that the environmental sciences center to be created at Davis study these problems. With respect to residue safety, he called for new definitions as well as new knowledge. He pointed out that there are demands for a federal definition of zero tolerances as well as a statewide definition. As more agriculturists follow the trend toward selective applications, new knowledge may be needed for public agencies to recommend safe use of several pesticides in combination or in succession. Such knowledge, according to him, must be backed by residue studies of the combination or sequential treatment, not by isolated studies with individual pesticides alone. In the area of crop safety, Mr. Gooding said, we need more care in tagging pesticide mixtures "compatible" if the compatibility depends on use of a particular solvent, for instance, or emulsifier, or low concentration in the spray mix.

In speaking to the safety of nontarget organisms, Mr. Gooding said that excellent work is being done and even more must be done.

On the question of pest control efficiency, Mr. Gooding asked that the committee look toward a total approach. According to him while the use of agricultural pesticides must remain the mainstay of pest

control, we must by all means continue to explore supplementary biological and cultural control.

Mr. Gooding went on to say that to achieve maximum efficiency we must know what the pest is, when to control him, if at all. He further pointed out that while publications of the University of California Extension Service have been very helpful in this regard, it may be true that such advice as "if the pest is present" or "as needed" is somewhat too vague. Next, a total approach necessarily involving determination of the best control methods . . . where a combination. . . . We know of only one or two biologicals registered for use in pest control, and these are limited in their effectiveness.

Mr. Gooding went on further to say that in seeking to meet the goal of safe and efficient pest control through a total biological approach, there are, according to him, still information gaps that frustrate the industry. He questioned if there is sufficient effort being made in studying pests of all major crops, rather than only certain ones. He also questioned whether there is a proper balance between basic research and applied research.

Mr. Gooding in a written statement submitted to the committee also asked that state agencies consider cooperation with nongovernment agencies in an effort to increase the output of basic research. According to him, possibly this can be done through a system of grants and contracts aimed at providing a continuing supply of capable research personnel.

It should also be noted that the Governor's Committee on Pesticide Review in its report to the Governor dated June 1, 1964, also recommended there be established in state government a continuing program to identify, stimulate, conduct and evaluate needed research in the field of pesticides. Some 11 specific areas were singled out as needing research. Many of these duplicate research requested by witnesses testifying at various hearings of this committee. To implement this specific recommendation the Governor's committee is suggesting an appropriation of \$100,000 be made in the next fiscal year to the Pesticide Review Committee for use in areas not adequately funded by current programs. It is understood that these funds would be used to identify, stimulate, conduct and evaluate needed research in the field of pesticide problems.

University of California Pesticide Research Program 1961-62

At a meeting of the committee held at the Riverside campus of the University of California on June 17, 1964, Senator O'Sullivan requested that the committee be provided with the expenditures by the university incident to pesticide research. In response to this request the following information was submitted to the committee by Mr. Harry Wellman, Vice President of the University of California.

"These figures were compiled for the fiscal year 1961-62 at the request of President Kennedy's Science Advisory Committee. I believe these figures are fairly representative of more recent years since there has been almost no augmentation of the research budget in this area since that time. Please note that the figures were compiled for the university's entire Division of Agricultural Sciences including the College of Agriculture on four campuses, the School of Forestry and

the School of Veterinary Medicine. Also, the figures are not for pesticides alone, but also cover expenditures on biological control of pests including insects, diseases and weeds.¹

<i>Field</i>	<i>Man-years *</i>	<i>Expenditures including salaries</i>
	<i>1961-62</i>	<i>1961-62</i>
Fungicides -----	10.05	\$308,756
Insecticides -----	26.31	480,219
Nematocides -----	5.50	49,593
Weedkillers -----	11.66	305,550 †
Host resistance to diseases -----	16.82	319,359
Host resistance to insects -----	5.40	91,307
Biological control of insects (predators, parasites, etc.) ----	19.17	499,679
Biological control of plant diseases (predators, parasites, etc.) -----	5.00	83,857
Biological control of weeds (predators, parasites, etc.) ----	1.30	26,855
Eradication of diseased hosts -----	.50	12,180
Heat therapy-disease-free clones -----	.93	38,850
Total -----	102.	\$2,216,205

* Academic—include nonacademic salaries under expenditures.

† \$16,831 is from industries.

Committee Findings and Recommendations

This committee is definitely in favor of additional research, however, it is not in a position, even based on the voluminous testimony provided, to say which area or areas of research should be initiated or expanded where programs have already been initiated. Rather, the committee is concerned, after reviewing the testimony and information developed to date, just where we are going in this research field. The committee is also aware of the fact that the President's Science Advisory Committee in its reports in the use of pesticides in one of its recommendations specifically called for "coordination of the research programs of those federal agencies concerned with pesticides."

If coordination is called for at the federal level, it appears logical to assume that coordination is also needed between federal programs and existing or recommended state-sponsored programs. This is particularly true in view of the fact that many of the programs being carried on by the several states through universities are financed by the federal government.

On February 13, 1964, the Sacramento *Bee* carried an article entitled, "Rutgers University Gets One Million Dollars for Pesticide Study Task." The article said and we quote in part, "A million-dollar study of how pesticides influence the balance of nature was announced today by Rutgers University. It will be financed by the federal government. The Rutgers' study is to be supported by a series of five one-year grants from the Public Health Service totaling \$1,740,591, the largest single research grant in the university's 198-year history. A staff of 30 scientists at the Rutgers College of Agriculture will research for pesticide residue in soil, water, fish, insects and plants, and determine their effects. Dr. Samuel D. Foss said scientists do not know what are safe levels of pesticide in water because we have no way of detecting them in small quantities. If we find pesticides persist in water

¹ Appended marked Exhibit C are State Department of Agriculture budget figures for 1963-64 for pesticide programs.

supplies and municipal water purification systems, we will probably have to eliminate them."

It appears that many of the areas planned for research as a part of Rutgers University's program are comparable to those programmed for research and training center in environmental health now in the process of being created at the University of California at Davis. If this is the case, certainly then the need exists for coordination at both levels.

With this information in mind, the committee specifically recommends that:

a. Any future state appropriation for pesticide research not be made available until such time as a complete-documented search of all pertinent literature available indicates in published form that the need exists and that the proposed research project will not represent a duplication of research programs previously conducted or programed for the future by other governmental agencies, domestic and foreign, and including industry research programs when such information can be made available.

b. That no state appropriation for pesticide research be approved unless it can be demonstrated that the research project is needed to provide an answer to a problem of a significant nature which is peculiar to California.

c. That no appropriation be approved for pesticide research until a *specific* research program has been presented to and reviewed by the Legislature.

PROPOSAL 9

Should the renewal date for the pest control operator's license be changed from the last day of January to the first day of January?

Discussion

This proposal was advanced by Mr. Steve Ancell, then president of the County Agricultural Commissioners' Association, at a meeting the committee held in San Francisco on June 19, 1964. This proposal has since been recommended by the State Department of Agriculture.

Section 160.2 of the Agricultural Code presently provides in part that the license "may be renewed annually . . . on or before the last day of January of the calendar year for which the license is issued." In addition, Section 160.3 of the Agricultural Code makes it "unlawful for any person to engage for hire in the business of pest control in any county without first registering for each calendar year or portion thereof with the commissioner. . . ."

According to the Department of Agriculture, this proposed change would prevent operators from registering with the commissioner and operating during January without having a valid renewal license issued by the state.

Apparently this situation has caused some problems for commissioners in certain areas of the state wherein the commissioner is required to register these operators with no knowledge that the applicant has a valid renewed license.

Committee Recommendation

It would appear that this suggestion does have merit; accordingly, the committee recommends that legislation be introduced to accomplish this date change.

PROPOSAL 10

In what manner should labeling container type and size requirements for pesticide containers be changed to afford greater protection?

Discussion

A—Existing provisions in the Agricultural Code.
Section 1064 provides as follows:

Economic poison is misbranded when:

(a) The package or label thereon bears any false or misleading statement, design, or device regarding such article or the ingredients or substances contained therein.

(b) The package or label is falsely branded as to the place of manufacture or production.

(c) It is an imitation or offered for sale under the name of another article.

(d) It is labeled or branded so as to deceive or mislead the purchaser.

(e) The contents of the package as originally put up have been removed in whole or in part and other contents placed in such packages, or the contents of the package are of a quality below that of the guarantee on the label or on the application for registration of the economic poison or of the analysis of the representative sample delivered in connection with the application for registration of the economic poison.

(f) In package form, and the contents, if stated in terms of weight or measure, are not plainly and correctly stated on the outside of the package.

(g) The label fails to state either.

(1) The name and percentage of each active ingredient, together with the total percentage of the inert ingredients, in the economic poison; or

(2) The name of each active ingredient, together with the name of each and total percentage of the inert ingredients, if any there be, in the economic poison.

If the preparation is highly toxic to man, as determined by rules and regulations of the director, option (1) only shall apply.

(h) The economic poison contains arsenic in any form and the label fails to state, in addition to one of the options required by provision (g) of this section, the percentages of total and water-soluble arsenic, each calculated as elemental arsenic.

(i) The label does not contain a warning or caution statement which may be necessary and if complied with adequate to prevent

injury to living man and other vegetable animals, vegetation, and useful invertebrate animals.”

1061. As used in this article:

(a) ‘Economic poisons’ includes any substance, or mixture of substances intended to be used for defoliating plants or for preventing, destroying, repelling, or mitigating any and all insects, fungi, bacteria, weeds, rodents, predatory animals or any other form of plant or animal life which is, or which the director may declare to be, a pest, which may infest or be detrimental to vegetation, man, animals or households, or be present in any environment whatsoever.

Section 1064.2 also relates to labeling and provides as follows:

Spray adjuvants are economic poisons within the meaning of this article and, except as otherwise specified, the provisions of this article apply to spray adjuvants with the same force and effect as though the term ‘spray adjuvant’ were specifically named and set forth in each usage of the term ‘economic poison.’ The term ‘spray adjuvant’ means any wetting agent, spreading agent, deposit builder, adhesive, emulsifying agent, deflocculating agent, water modifier, or similar agent, with or without toxic properties of its own, intended to be used with another economic poison as an aid to the application or effect thereof, and sold in a package separate from that of the economic poison with which it is to be used.

In addition to the provisions of Section 1064, a spray adjuvant is misbranded when the label fails to state the type or function, and the names of the principal functioning agents. If more than three such agents are present, only the three principal ones need be named. An economic poison sold only as a spray adjuvant shall not be construed to be misbranded within the meaning of provision (g) of Section 1064 if the total percentage of the constituents ineffective as a spray adjuvant is stated on the label without mention of the terms ‘active ingredient’ or ‘inert ingredient’ in lieu of one of the options required by said provision (g).

(Added by Ch. 505, Stats. 1949.)

1064.5. The statement of ingredients in such economic poisons as are intended and sold for internal administration to animals may be given in terms of dosage in lieu of percentage by weight as specified in Sections 1064 and 1071.

(Added by Ch. 83, Stats. 1945.)

1065. The registrant of economic poisons shall attach to every separate lot, and every separate, finished, sealed or closed container or package of economic poisons which he intends to sell within this State, a plainly printed label, stating the name, brand or trade-mark, if any, under which sold, and the name and address of the registered manufacturer, importer, or vendor.

The registrant of any economic poison sold or delivered to a consumer in this State shall furnish printed directions for use, and dilution, if any, upon the label, or shall inclose such printed directions in each container or package thereof, except that such printed directions for use shall not be required when the economic poison, in accordance with established local custom, is to be used in its original form as sold, without dilution or further preparation for use.

A registrant of economic poisons may cause to be printed upon the label of any sealed or closed container or package of economic poisons which he intends to sell within this State, or upon the label of any opened lot from which sales have been authorized by the director, such limitations of warranty with respect to the use thereof, as the registrant may consider, proper; but no such limitations shall exclude or waive the implied warranty that the economic poison corresponds to all claims and descriptions which the registrant has made in respect thereto in print; nor shall any such limitation exclude or waive the implied warranty that such economic poison is reasonably fit for use for any purpose for which it is intended according to any printed statement of the registrant.

The registrant shall not be liable in respect to any injury or damage suffered solely by reason of the use of said economic poison for a purpose not indicated by the label, or when used contrary to the printed directions of the registrant or seller, or in respect to the breach of any warranty by the registrant not expressly printed on the label, except as provided in this section.

Sales of economic poisons in any other than the registrant's sealed or closed container or package are prohibited. The director, in his discretion, in accordance with regulations prescribed by him, may authorize sales of economic poisons to be made out of registrant's opened but properly labeled lot, container or package. The director shall serve notice of his proposed action, by depositing a copy thereof in a United States post office, inclosed in a sealed envelope with postage prepaid thereon and addressed to each economic poisons registrant at his last address on file with the division of chemistry of the department, and allow 15 days during which any protest may be filed.

Section 1068 also gives the director authority to adopt, amend or repeal such rules and regulations as usually are necessary to carry out the provisions of this article on economic poisons, including various provisions for labeling.

Mr. E. P. Reagan, Assistant Administrator, Agricultural Research Service, U.S.D.A., in his presentation before the committee at a meeting held in Sacramento on Tuesday, October 22, 1963, pointed out that an important protection to the public is provided by control over the labels used on pesticides. According to Mr. Reagan, labeling requirements are strict and U.S.D.A. officials review each proposed label in its entirety. They accept a proposed label only when they are satisfied that the directions of warning are adequate to protect the public. Mr. Reagan went on to say that such day-to-day working arrangements are indispensable. According to him, if at any stage of the review, U.S.D.A. officials find that they do not have enough information to judge the adequacy of label claims, the manufacturer is informed and the registration is withheld until the essential information is developed and submitted. Continued review is carried on to establish label requirements to give greater protection in the home and garden and on the farm. Labels that are easy to read and understand are a necessity because both federal and state laws are requiring more and more information on pesticide labels. They are sometimes printed, especially on small containers, and typed too small for easy reading. Requirements for both legibility and context, size and type of block arrangements and simpli-

fied wording are under review. Better placement and increased emphasis on precautionary statements and specific requirements for front panel labeling are being drafted for consideration. Mr. Reagan further pointed out that any changes will be published in the *Federal Register* as proposed regulations with an invitation to consumers, industry scientists and others to give the department their views for consideration before final action. In preparing the proposed regulations, advantage has been taken of the views of the specially selected group of outstanding specialists in public health, food and drug, fish and wildlife and the Federal Trade Commission, together with experts from the State Department of Agriculture and the public. These people, Mr. Reagan pointed out, were asked by the Department of Agriculture to study registration operations and suggest what, if any, changes were needed to increase public safety. The speaker felt the proposed label changes would help users to handle pesticides more safely and effectively and would provide additional safeguards against possible misuse.

This great concern for safe labeling is part of an educational campaign by the U.S.D.A. to make users highly conscious of the need to use pesticides carefully. The department, Mr. Reagan said, had prepared and issued posters, publications, and news stories writing against the dangers of proper pesticide use. Radio and television spots have been used widely. A film called "Safe Use of Pesticides" is also available in every state. The essence of the message in all these materials is simply this: "Use pesticides safely—read the label."

In his final remarks, Mr. Reagan said the law provides for enforcement of safe and effective labeling by the manufacturers. The department's enforcement inspectors cooperate with state enforcement officials in locating nonregistered, mishandled or adulterated pesticides.

Mr. Charles O. Barnard, executive secretary, Western Agricultural Chemicals Association, in speaking to this proposal, pointed out that a leading member of his organization had initiated a long-range program which illustrates the industry's awareness of responsibility. This company, according to Mr. Barnard, has expanded its educational program to emphasize proper use of pesticides in our society. It has revised its label format by dividing product lines into four categories, as follows:

(Skull and Crossbones in red)

Group I—Extremely toxic
Do not inhale
Do not get on skin
Do not take internally

(Six-sided stop sign in red)

Group II—Toxic in large amounts
—requires warning statement
Do not inhale
Do not get on skin
Do not take internally

(Four-sided caution sign in blue)

Group III—Product not usually toxic if inhaled or from contact with the skin

Group IV—Products of very low toxicity

No special precautions required

“All labels will carry cautions and warnings prominently in center panels.”

Mrs. Betty Lee Morales, representing the National Health Federation, in her testimony made available to the members of the committee, copies of an article entitled “Your Customers Want to Know” and another article, “Better Than a Thousand Words.” According to her, these articles tell about how efficiently the industry is mothproofing blankets. She went on to say that the blankets are mothproofed in such an efficient way that they can be washed countless times and the mothproofing is not removed. There are, according to her, no laws legislating the mothproofing of blankets, carpets, drapes—all kinds of things that are used in the home in our daily life being impregnated with all kinds of poisons. There is not one word on any of the literature to explain what the toxin was that was used or how much of it is there. There are people who know they have allergies to certain specific chemicals and certainly, Mrs. Morales said if we are going to permit things like this, we should require the proper labeling so that a person knows what he is being subjected to.

Mrs. Morales also said, in response to a question from Senator Sturgeon,

“The Health Federation stands for freedom of choice—put it on the label and you choose it if you want and let me reject it if I want.”

Mr. George Difani, representing the California Wild Life Federation, in his comments to the committee on this proposal, cited for the record a resolution which was adopted by his association in which it was resolved that:

“The California Wild Life Federation does hereby endorse the provisions of HR 2857 requiring federal agencies to consult wildlife management agencies before initiating major pesticide programs, and

“Be it further resolved, that there be a better understanding of the hazards of such materials and the California Wild Life Federation does hereby endorse the provisions of HR 4487 requiring more stringent labeling of these materials with respect to their affect on wild life.”

Mr. D. O. Wells, President of the California Citrus Pest Control Association, in his comments on this proposal, stated he wanted to preface his remarks by commenting further on Mr. Barnard's statement that perhaps there is no real distinction between our labeling of poisons. Mr. Wells said:

“On any sack that we have, there is some sort of a poison sign on it. They are all the same—they have crossbones and say the material is poison. I think it would be very important from all aspects to have properly labled materials. Some of them are just materials to be used

with caution; some of them are a little more toxic and some of them are real toxic, and if there is a gradation of types of material that we do use . . . I might say this—in pest control, the personnel that we get very often cannot read and if they do read, they don't read with understanding. If they use one material for years that says poisonous and is of low toxicity, and then they see something that is really poisonous, they see no difference in the meaning."

At the second series of hearings of this committee held in June of 1964 on the subject of pesticides, the witnesses requesting time were asked to come prepared to testify on just what could or should be done on the labeling problem.

Mr. Santistevan, an entomologist from Holtville, California, in his testimony before the committee meeting held in El Centro on June 16, stated that he felt more regulations should be enforced, for the following reasons:

"I do not believe that the average home owner has the knowledge of the uses, the dangers or methods of application or storage or disposal of the used containers of pesticides.

"It was reported in the California Farm Bureau Monthly last April, and I quote: 'Nationally about 150 deaths per year are attributed to persons in rural and urban areas. More than half involved are children less than five years old, who encounter the poison materials while playing. Most of the remaining deaths are of adults who mistakingly drink a poison pesticide that someone carelessly placed in a beverage bottle, fruit jar or food container. Relatively few deaths occur nationally from exposure to pesticides during their manufacture or application. In California, there is an average of 10 deaths per year due to pesticides and 6 or more are children under five years of age. Two or three are adults who mistakenly drink the poison. The other one or two deaths are people who work in manufacturing or application of pesticides.' The chemicals may be purchased very easily at any drug store, feed store, nursery, grocery store or at many others. I recently spent an afternoon visiting different stores to find what pesticides were sold for household use, that could be considered of an injurious nature. I purchased four of these materials which I have placed before you.

"For example, one material contains 3.8 percent arsenic in the form of an ant paste and it's recommended for certain types of ants by mixing it with bacon grease as one method of control.

"Another is tetraethyl pyrophosphate, commonly known as TEPP in a mixture with another pesticide for fly control. It recommends that the user use, and I quote, 'Protective equipment, such as boots, or shoes impervious to TEPP.' And I might add here if the consumer knew he was going to have to buy some new boots or shoes to use this material, he wouldn't buy it. But he doesn't know this until he has it at home.

"'Milk accidentally contaminated with this material would be hazardous if consumed by animals or humans.' This is also on the label.

"I would like to add that practically no TEPP has been used in the Imperial Valley in agricultural pest control for a number of years. We found this chemical to have serious effects on our applicators. I also found I could purchase 95 percent sodium fluoride and small

candles that can be burned within a house that contains 12 percent DDT for flying insects.

"With these observations, I felt that the labeling of small packaged pesticides was sufficient, for trained or experienced personnel but the real dangers that could exist were not clearly stated. I also found that on the highly toxic chemicals that the red skull and crossbones ranged in all sizes from one-fourth inch in diameter and up, depending upon the size of the container. In some cases, I actually had to inspect a container on all sides to find this poison marking. I concluded that these markings are placed in areas on the containers not easily seen by the purchaser. There were many other pesticides available at different strengths, mixtures and forms. I have just pointed out a few that I thought should be mentioned. In conclusion, I want to state that:

1. I definitely feel that pesticides are indispensable to modern life providing they are used correctly. I recommend to this committee that steps should be taken to establish a more complete method of labeling small package pesticides, with their danger more clearly stated in a form that would attract the eye of the purchaser.

2. That steps be taken to remove from sale certain injurious pesticides that can be purchased by persons who lack the knowledge of their usages and dangers. I suggest this can be accomplished by marking these chemicals accordingly and making them available only to licensed structural pest control operators."

Mr. Santistevan, in response to a question of Senator Geddes as to what could be done to protect people who buy these pesticides and do not read the label, had the following suggestions to make:

"Let's take this ant paste, for example, which is arsenic. I don't believe this should be on sale. I think if there is a use for arsenic, it should be used only by somebody who is licensed within the field. For example, I don't think that anyone should be able to walk in and buy it."

Mr. Santistevan went on to say:

"I bought these . . . (referring to the ant paste and other materials) at a drugstore—just pulled them off the counter and went home with them."

Stanley J. Leland, M.D., M.P.H., F.A.C.P.M., Director of Health Imperial County, in a statement submitted to the committee for consideration, said that the major health hazard to the public is the use and application of insecticides in and around the home. Here, according to Dr. Leland, the question of appropriate labeling with conspicuous warning is most important. However, he went on to say that public health agencies have been concerned with this as a part of prevention programs and are reporting some progress.

Support for the position taken by Mr. Santistevan was also given by Mr. William S. Zimmer, salesman of agricultural chemicals in Imperial County.

At the meeting of the committee held on the Riverside campus of the University of California on June 17, officials of the university were asked by Senator Stiern whether or not they felt there should be a review of the labeling of these products (pesticides) that are sold to people who are strictly uninformed on how to handle them or use

them so that there would be more caution taken to prevent people from contaminating themselves or causing harmful effects to themselves in handling roses and shrubs and things of that nature. Senator Stiern asked: "Have you thought about this and do you think there should be a little stronger regulation in this area?"

Dr. Swift, in answering this question, said:

"Yes, I think we should take a real careful look at these materials for home use, both as to the labeling and as far as the caution statement and the uses designed for them and also type of products that are available."

Dr. Swift went on to say: "I think one of the most important things that has occurred in the last two years was sodium arsenide. It used to be available for homeowners. The number of deaths—the information supplied by public health—showed sodium arsenide was one of the greatest offenders between children three to five years of age. Two years ago, it was decreed injurious and not available for sale, and there has not been a death from sodium arsenide since. I think if we look carefully at this we might have some reservations but I think it would certainly be worth a review."

Senator Stiern, in commenting further on this problem, said:

"On the surface of it, it seems a little foolish that you would go to the pharmacist to buy a drug. It might be criminal to use and you would have to have adequate reason for obtaining it—signing a registry maybe and probably going through some routine but you can walk into a nursery and pick up products made by Ortho and similar companies like this or arsenical compound used for ant and insect control in packages that come labeled by Merek in the original label of that company sodium fluoride with absolutely no controls at all. It would seem the average housewife would be wide open for some very serious results because this seems so loose."

Senator Stiern went on to say: "It seems odd we are so restrictive when a pharmacist dispenses these things but we are so loose in just letting these out to people with no experience who may seriously damage themselves through other outlets for these kinds of chemicals and drugs."

Dr. Ralph Teall, President of the American Medical Association, in commenting on the problem of labeling at a meeting of the committee held in San Francisco on June 18, said that adequate labeling and public information concerning the danger of agricultural pesticides should be a continuing effort. At the same time, he went on to say, the manner of labeling and handling of such very potent poisons is always a matter of personal and direct interest but does not require any new legal approach.

Dr. C. H. Hine, M.C., Ph.D., associate clinical professor, preventive medicine, University of California, in speaking to this proposal, said that, according to him, our major problem is the intentional ingestion of drugs and chemicals to cause death or the accidental ingestion of chemicals by children in groups other than economic poisons. Dr. Hine went on to say that in the national poison centers an analysis of statistics which they obtain on a nationwide basis, including those from California, on medicinal compounds and agents used about the house for chemicals, cleaning, sanitary agents, compiling the number

of injuries and deaths with agricultural chemical substances in proportion is a relatively small figure. Speaking of his own experience, Dr. Hine pointed out that he had been connected with the coroner's office in San Francisco for the last 14 years and had the opportunity to analyze 1,000 deaths which occurred in San Francisco from the ingestion of drugs, chemicals or exposure to noxious substances in the atmosphere. Of this total of 1,000, there were two deaths which related to agricultural chemicals and these both occurred with adults with the intentional ingestion—the death wasn't due to the agricultural chemical; it was due to the solvent used. He went on to point out that there were, in addition to these two deaths due to agricultural chemicals of the hydrocarbon type, eight deaths due to arsenic or fluoride and these again were intentionally or accidentally ingested; two accidentally and six intentionally ingested.

According to Dr. Hine, the problem in the urban areas, such as San Francisco, is insignificant insofar as exposure to the general public is concerned. And it is his opinion that the practice now of placing these agents in specific, well-identified containers does not lead to a problem so far as accidental deaths are concerned. These agents are potent materials and if one wishes to commit suicide, they are available, but again, in this country, they are resorted to to a very limited extent. "It is my understanding," Dr. Hine said, "that in areas abroad—especially in Japan—suicide with these agents is, rather than the barbituric hypnotic drug class used here, much more frequent."

Dr. Hine went on to say that this problem of labeling is a very difficult one and he is quoted as saying: "It is my opinion that labeling as it is now conducted is as practical as it's going to become. I don't think you can impose upon a label the inclusion of all the information that would make poisoning impossible because this situation just is never going to exist."

"In the first place," Dr. Hine said, "I think the labeling of economic poison in agricultural chemicals is better than labeling in any other area—certainly, there are no labels on a bottle of aspirin which is purchased in a pharmacy or in a drugstore, or at the supermarket, and aspirin causes more deaths in children than all the agricultural chemicals combined. This one drug, aspirin, causes a minimum of 50 deaths a year and has for a great length of time. Acute intoxications will occur with unlabeled prescription drugs like the iron tablet the mother takes in pregnancy and the purchase of gasoline or petroleum solvents of any number of sanitary chemicals is now done with impunity. But I think this: There is an irreducible minimum which cannot be exceeded by more elaborate-type labeling."

Dr. Hine went on to say that labeling could be improved, certainly, among some of the household chemicals. He said: "I think, speaking generally, that the labeling in this particular area is quite satisfactory and more thought has gone into it than any other . . . I do think that specific labels could be improved. They should be looked at and could be looked at generally. It is not a major problem and you will not achieve—well, what kind of decreased mortality are you going to obtain when you have about 3 to 10 accidental deaths a year in the whole state?"

Senator Lagomarsino, in commenting on the proposal, said he wondered if there might be an increase in intentional use of pesticides if they were clearly labeled poisons.

In commenting on this statement by Senator Lagomarsino, Dr. Hine said:

"Well, it's something one has to balance against the other. However, I don't think it makes any difference so far as the suicidal intended persons; that person, whether he uses this or a drug—the American way is to take barbiturates."

Dr. Parke C. Brinkley, President of the National Agricultural Chemicals Association, Washington, D.C., in commenting on the proposal, said:

"In this matter of labeling, a great deal of thought and consideration is given to it. We are constantly in contact with the state authorities, the State Departments of Agriculture, that require the approval of these labels. We are constantly in touch with the Department of Agriculture in Washington and this is a moving thing all the time. These labels are being changed from time to time to meet the requirements, to meet the desires of the various regulatory officials and they are, we think, quite good. We think that they are improving all the time.

"Now, I think it is something that requires a great deal of very thoughtful study by people who are real specialists in this field. But I think that the Departments of Agriculture are the ones to make the requirements rather than the writing of the requirements of the label into legislation because it is such a changing thing and laws are harder to change and regulations are more flexible."

In his concluding remarks, Mr. Brinkley said:

"I would like to remind you that most of these products that we produce are distributed all over the United States, or at least into several states, into interstate commerce, and we constantly run into the problems of differing laws and rules and regulations in differing jurisdictions. If everybody had exactly the same laws, rules and regulations, of course, it would be much easier for us to label the products and ship them. The more difference there is in regulations, the more difficult it is and more costly it is for us to do this."

Also testifying on this proposal was Mr. Robert L. Ackerly, counsel to Chemical Specialties Manufacturers Association. Mr. Ackerly pointed out that the U.S. Department of Agriculture early this spring published final regulations which will become effective January 1, 1965. These regulations require a signal word and a statement of the hazard which will appear on the front panel of each pesticide. Mr. Ackerly went on to say that the Department of Agriculture will make public very shortly type size requirements in relationship to the available panel size so that every pesticide, after January 1, that moves in interstate commerce will have a warning statement on the front panel and it will be prominent. It will be distinctive in color and it will be in a minimum type size.

The labeling of all pesticides is spelled out in great detail by the U.S.D.A. Interpretation 18 which interprets the enforcement of the Insecticide and Rodenticide Act. In speaking on the point of uniformity, Mr. Ackerly said:

"We do sell products throughout the 50 states and to some foreign countries. In the pesticide field, our uniformity is good. One reason, I think, is because the state officials have a national association, the American Association of Pesticide Control Officials, that meets every year, usually in August or September, so that there is a good communication between the state enforcement officials and with the industry and U.S.D.A."

Mr. Ackerly went on to say it is impossible to write a label that will meet the requirements of every state in the country. It would be so conflicting everybody who sells it would violate some law or regulation.

Mr. L. D. McCorkindale, Agricultural Commissioner, Fresno County, suggested that where labeling is concerned a long series of trade names for the same pesticide chemical should be eliminated, if possible. This large number leads only to confusion. He pointed out that a number of years ago, with few chemicals on the market, the problem did not exist. Hundreds of products with numerous assorted brand names now do cause confusion in the agricultural industry. Probably a standardized system of using the commonly accepted name after the company name would be more appropriate. As an example, use "John Doe DDT" instead of "John Doe Special Bug Killer" or "John Doe Killum Dead." In this manner, one specific chemical could always retain its common name, the manufacturer still could use his company name, and persons reading the label would immediately know what pesticide was involved.

As his second suggestion, Mr. McCorkindale stated that it would be desirable to have the common name of the pesticide, which could be either a single name or a mixture of names, stand out just as prominently in the lettering as the name of the company. Commonly used names of pesticides should not be hidden in small print on a container label.

Mr. McCorkindale went on to suggest that legislation could be enacted to make it illegal to reuse containers of certain toxic pesticides. A statement on each label should so indicate.

As his final suggestion in this area, Mr. McCorkindale said that for toxic pesticide chemicals which cause injury to or through the skin, the use of glass containers should be avoided because of possible breakage and subsequent physical damage to persons handling these materials.

Mr. Russell Richards, coordinator of feed commodity services, California Farm Bureau Federation, had five specific recommendations to make relative to labeling. It should be pointed out here this is not necessarily the Farm Bureau position but it was the position taken by a number of growers who served on the committee to review this problem of labeling.

These recommendations are as follows:

1. Wherever possible, there should be a larger print on the labels.
2. Instructions regarding the disposal of the containers should be on the labels, if they are not there. The term "Warning" or any of this sort of wording should be very prominent on the labels.

3. Instructions for use should be understandable, particularly where it might be used by farmers and nontechnical people.

4. A good adhesive should be used to affix the label to the container.

5. On the matter of reregistration of chemicals, Mr. Richards said that his farm supply people told them that while there are instances where labels should be updated, this is something that should be handled by registration in the Administrative Code rather than making it an automatically annual affair.

Mr. Henry Moras, manager, Stauffer's Label and Registration Department, and chairman, Western Agricultural Chemical Labeling and Packaging Committee, in his testimony pointed out that:

"Agricultural chemicals are marketed in two broad channels which the industry refers to as agricultural chemicals and the home and garden trade. Many labeling features apply to both product labels intended for both markets. Certain basic differences are involved in composition, however. In this regard, package types, sizes too are significantly different. Proposed changes, therefore, should consider these differences."

Mr. Moras went on to say that pesticide manufacturers who are members of his association have carried on a voluntary program of labeling improvement and changes are made frequently as new experience and knowledge is gained. He went on to say that:

"The art of labeling is one which is a constantly evolving one. Labeling specialists in our industry are alert for more effective means of providing instructions which will result in more effective and safe use of the product. Principles of labeling, label specimens and examples of package types and sizes by industry should be examined before labeling proposals are adopted to assist this committee or any other group to evaluate the basic factors involved."

Mr. Robert M. Howie, Agriculture Commissioner, Riverside County, had two suggestions to make regarding the labeling proposal. He suggested first that in addition to that presently required, the addition on containers of injurious or restricted materials of appropriate size, words to this effect: "Before using, obtain a permit from the county agricultural commissioner," and the requirement that the injurious materials permit number be stamped on each container delivered.

Mr. Howie went on to say that the only suggestion he could make in the area of more stringent regulations on the use of insecticides around the home and garden would be in the restriction of pesticides that could be sold for such purposes and bigger print on the labels.

Mr. E. P. Reagan, Assistant Administrator, U.S.D.A., who previously testified at the committee meetings held in 1963, was unable to attend the series in 1964; however, he did submit for the record a statement relating to legislation before the Congress concerning pesticides. Mr. Reagan pointed out in the legislative field on the the most recent developments was the passage by Congress of S. 1605, Public Law 88-305 by Senator Ribicoff, an act entitled "To amend the Federal Insecticide, Fungicide and Rodenticide Act, as amended; to provide for labeling of economic poisons with registration numbers; to eliminate registration under protest and for other purposes."

The measure, according to Mr. Reagan, was signed by the President on May 12, 1964, and, with the passage of this act, all registration under protest terminated and the department sent notices to the holders of such registration. Proposed regulations providing for the display of registration numbers on the labels of pesticides were published in the *Federal Register* on May 20, 1964, with an invitation for comments from all interested persons.

In the administrative field, Mr. Reagan pointed out that the department published on March 27, 1964, in the *Federal Register*, proposed revisions to regulations governing the registration of pesticides. The new regulations require key warning and caution statements to be placed prominently on the front panel of the pesticide label. These must include the statement: "Keep out of reach of children" or its equivalent and a "signal" word—such as "Danger," "Caution," or "Warning"—which draws the user's attention to the need to handle the material carefully. Warning and caution statements must be easy to read. "Signal" words and the warning to keep the product away from children must conform to specified minimum type sizes.

Use of pesticides, according to Mr. Reagan, in and around homes by the general public, has increased rapidly in recent years, making it essential that consumers know how to handle them safely. For this reason, the department is now requiring that expanded precautionary information be placed on the label—in a place where it is easily seen.

Mr. Reagan went on to say that other changes have been made to update the regulations, bringing them in line with present practice. For example, wording has been added making it clear that a foreign language version of the label may be used in addition to one in English in U.S. areas where such a language is spoken.

Most of the revisions became effective April 26. Those dealing with labels became effective May 26. Manufacturers of products registered prior to the effective date must comply with all provisions of the revised regulations by January 1, 1965.

In a separate but related action, the department republished one of its original proposals to require manufacturers to remove safety claims from pesticide labels and allowed a 30-day period for added comment. This proposal, applicable to a limited class of pesticides—estimated at about 1 percent of all products registered—also was published in the *Federal Register* on March 27, 1964.

Department of Agriculture Recommendation

The Department of Agriculture has recommended that Section 1064 of the Agricultural Code be amended to require that the applicant for registration of an economic poison state on the application the name and the amount of each inert ingredient contained in the pesticide proposal for registration. According to the department, the law now requires only that the applicant supply the total percentage of inert ingredients contained. According to the department, this will provide information necessary for a better evaluation of the pesticide before granting the registration.

In this connection, it should be noted that solvents and other carriers, according to public health officials, may contribute to the danger of insecticidal formulations, either through their inherent toxicity or

through their solubilizing action on the so-called active ingredients. In some instances, according to informed sources, cases of poisoning by solutions of insecticides have been characterized by symptoms and clinical causes indistinguishable from those caused by the solvent alone.

Kerosene is one of the most common solvents in insecticidal solution and emulsions, especially in sprays of the household type that may contain up to 98 percent kerosene. Systemically, kerosene acts as a narcotic. Liver and kidney damage may occur in severe cases. Xylene is another common solvent in insecticidal solution, emulsifiable concentrates and emulsions. It is extensively used in industry, especially as the main constituent of "solvent naphtha." Undiluted xylene is a severe irritant to mucous membrane and delicate skin and can cause a local dermatitis on any skin if used repeatedly. When absorbed, it too acts as a narcotic and affects the circulatory red blood cells.

Committee Findings and Recommendation

1. The committee finds that the labeling of economic poisons (pesticides), both commercial and those materials designed for the home and garden trade, is not a major problem and, as a matter of fact, is much better than labeling in any other area. As was pointed out by C. H. Hine, M.C., Ph.D., associate clinical professor, preventive medicine, University of California, there are no labels on a bottle of aspirin, yet aspirin has caused more deaths in children than all the agricultural chemicals combined.

2. While the committee recognizes that labeling can be improved, particularly in the area of household chemicals, it is convinced that, generally speaking, label requirements for economic poisons should, to maintain flexibility, be accomplished by administrative regulation, rather than through action of the Legislature.

3. The committee recommends that the Department of Agriculture undertake a systematic review of labeling requirements, particularly for home and garden type pesticides, to ensure that adequate protection is being afforded to the public. In the event sufficient funds are not presently available for this review, the committee will support a required budget augmentation.

4. The committee also recommends that the Department of Agriculture be requested to investigate and report back to the committee on the statements made by Mr. Bailey Santistevan of Crown Chemical Company, at the committee meeting held in El Centro on June 16, 1964, to the effect that he was able to purchase four different pesticides of an injurious nature which were offered for sale for household uses. Mr. Santistevan referred specifically to ant paste, containing 3.8 percent arsenic; to a material containing TEPP; to a 95 percent sodium fluoride (commonly used for roaches) and finally, to small candles containing 12 percent DDT for flying insects.¹

5. The committee also instructed the committee secretary to secure a Legislative Counsel's opinion on the constitutionality of the labeling provisions as proposed in AB 598. A copy of the opinion is appended marked Exhibit E.

¹ Appended marked Exhibit D is a report of the department's investigation of this matter.

PROPOSAL 11

Should the administration of the pesticide program in California be transferred from the Department of Agriculture to the Department of Public Health?

Discussion

Such a proposal was envisioned in AB 2233 (Petriss) of the 1963 Regular Session of the Legislature, which measure, after being substantially amended, was passed by the Assembly and heard by the Senate Standing Committee on Agriculture. This committee, after rather extensive hearing, in turn referred the measure to the Senate Rules Committee, with the recommendation that the subject matter be referred to the proper interim committee for study. AB 2233 was subsequently referred to the Senate Factfinding Committee on Agriculture for interim consideration.

Extensive hearings were held by the Senate Factfinding Committee on Agriculture in October of 1963 and again in June of 1964. The committee's position on this proposal is based on an evaluation of the voluminous testimony presented to the committee at the two series of hearings.

Intent of AB 2233

As introduced, AB 2233 generally proposed to accomplish the following:

1. Revise existing law regarding injurious materials to transfer from the Director of Agriculture to the Director of Public Health the authority to designate substances as "injurious materials" and to prescribe tolerances for pesticide chemicals in or upon any food.

2. Require that any person, including governmental agencies, desiring to receive or use any injurious material in pest control or agricultural operations, obtain a permit from the city or county health officer of the place of use and authorize such health officer to deny or revoke any such permit for designated reasons.

3. Would add Section 25955 to the Public Health and Safety Code to provide that a city or county health officer may, if he determines that such action is necessary, for the protection of public health, require that a less toxic injurious material be used, rather than one which the person has made application to receive or use, or the city or county health officer may refuse to issue any permit to such person if he determines that there is a biological control method readily available which such person may use instead of the injurious material.

4. The measure also proposes to add to the Health and Safety Code, Section 25968 to provide that no injurious material can be sold, furnished or given away to any person in the state in any glass container or in any other container which the director by regulation determines cannot be safely used to package such materials.

5. Amend Section 26470 of the Health and Safety Code to provide that a food shall be deemed to be adulterated if any pesticide chemical residue which the food bears or contains is in excess of the permissible tolerance for the pesticide chemical established by the director.

6. Amend Section 26510 of the Health and Safety Code to change the minimum fine for a violation of Chapter 3 (Foods) Division 21, Health and Safety Code, from not less than \$25 to not less than \$100 and would further provide that if the violation is committed after a conviction of such person under the same chapter has become final, the maximum amount of the fine would be raised from \$1,000 to \$5,000.

It can be said that the preponderance of testimony by representatives of agricultural interests and governmental agencies overwhelmingly favored maintenance of the status quo. Very little testimony was given in support of the provisions of the Petris bill as originally introduced. One of the few witnesses testifying in support of that measure was Mrs. Helen Nelson, Consumer Counsel of the State of California. In her opening remarks, Mrs. Nelson stated that:

"On the basis of four years of experience as a Consumer Counsel in California, I can report that no other concern placed upon me by consumers is held as deeply by as many consumers as the concern over the widespread use of pesticides."

It is found quite difficult to reconcile this statement with the 19,432 valid signatures filed on the pesticide initiative constitutional amendment, keeping in mind that 468,259 signatures would have been required to place the initiative on the ballot. This initiative measure was submitted to the Attorney General under date of January 24, 1964, and titled by his office to read, "Provides it is unlawful to use in agriculture certain designated or any pesticides which might cause damage to the human body. Legislature may enact implementing legislation."

Specifically, Mrs. Nelson urged the committee to recommend legislation which would make the Department of Public Health the final authority for decisions on the use of any chemical pesticide in California. Mrs. Nelson went on to say: "In making this recommendation, we follow the lead of the President's Science Advisory Committee panel which expressed their belief that within the federal government, registration of pesticides related to health should be the responsibility of the Department of Health, Education and Welfare. Mrs. Nelson neglected to point out, however, that the panel was specifically referring to the U.S.D.A.'s regulatory staff evaluating and approving uses that bring pesticides into intimate contact with people, such as in the case of mothproofing of clothes and blankets and applications to household lawns and gardens. It should also be noted that this particular field has already been occupied by the California State Department of Public Health, as is the case relating, for example, to criteria established for the use of indoor fly control devices which vaporize or mechanically inject into the air of buildings, measured amounts of chemical insecticides.

Mrs. Nelson's second recommendation concerned the criteria for registering a pesticide. In this connection, Mrs. Nelson is quoted in part as saying:

"Present state laws governing the registration of pesticides are designed to protect the public from being sold a worthless or ineffectual product. This work is a valuable first criteria but it should be the first and not the only one as it is now." Mrs. Nelson went on to say:

"Under existing law, if an agricultural pesticide is determined useful for the product and marketing of products, this is sufficient to allow its use."

Specifically, Mrs. Nelson recommended that the California law should require that prior to the licensing of a pesticide chemical, proof be submitted that the public will benefit from its use. Not only effectiveness but its need and relative safety should be considered, according to her. The burden of proof should be upon the manufacturer and the final authority for weighing the evidence and making the decision should rest with the California Department of Public Health.

Mrs. Nelson, for whatever reason, failed to point out that Section 1072 of the Agricultural Code presently provides in part as follows:

"The director may, after hearing, cancel the registration of or refuse to register any economic poison, (a) which is of little or no value for the purpose for which it is intended or which is detrimental to vegetation, except weeds, to domestic animals, or to *the public health and safety* when properly used and may require such practical demonstration as may be necessary to determine said fact"

It should also be noted that an additional proviso in Section 1075 gives the Director of Agriculture authority to seize and quarantine any economic poison which is adulterated, or misbranded within the meaning of the article, or detrimental to agriculture or to the *public health*"

In her third recommendation, Mrs. Nelson urged the committee to consider legislation requiring authorization for the use of a pesticide on a crop to be reviewed annually and be limited to the potential abundance of the crop. On the basis of Mrs. Nelson's other recommendations, it can only be assumed that this particular authorization would also be a function of the Department of Public Health. This suggestion, to say the least, is completely unrealistic regardless of the agency charged with this responsibility. In its practical application, this would be analagous to using a particular cultural practice to reduce, for example, the number of holes in an apple from—say, seven to five.

Perhaps more to the point and in support of the effectiveness of the present control system is this excerpt from the testimony presented by Mr. Frank Stead, Chief, Division of Environmental Sanitation, Department of Public Health, in which he stated:

" . . . I believe that it would be desirable to make a statement that can be made clearly and to make it early in this hearing, and that is that the current information both from the measurements made by the Department of Agriculture in California and by the Food and Drug Administration nationally, indicate that the average levels of pesticide residue in the public food supply is a small fraction indeed of the present tolerance I believe we have enough information on this subject to indicate that this is not where our primary concern should be except with respect to a refinement of our information on the long-term effects of these said tolerances."

Then, in his prepared statement submitted to the committee, Mr. Stead said:

"In general, the State Department of Agriculture is carrying on an adequate program of regulation and monitoring of insecticides applied to raw agricultural crops. The Department of Public Health has

not considered it necessary to carry on a parallel program of monitoring of processed food. Levels of residue in processed food may, on the basis of the Department of Agriculture's program, safely be assumed to be within existing tolerances for fruits and vegetables. However, except for special situations, no systematic measurement has been made by any agency on fish or game, either sport or commercial. Consequently, on the basis of present information, all that can be said with assurance about the food supply is that the pesticide levels in agricultural crops are well below the tolerances which have been established."

The position of the county agricultural commissioners on this proposal was possibly best expressed by Mr. Stephen P. Ancell, president of the California Association of County Agricultural Commissioners, when he said to the committee:

"California has had laws governing the sale and use of pesticides for over 40 years.

"This state is noted for its diversity of crops, varying climate and geography. With these variables and large metropolitan areas, many different individual types of problems develop that must be dealt with at the local or 'grass root' level.

"California is the only state that has county agricultural commissioners who provide this grass root type of regulations on pesticides. Existing laws provide some of the flexibility necessary to allow county agricultural commissioners to deal with problems as they are recognized in their various localities.

"With the commissioner's knowledge of local situations, a reasonable and logical job of regulating the sale and use of pesticides can be accomplished, resulting in protection to the consumer but still allowing the use of pesticides which will put products on the market that are safe and which the consumer can afford to buy.

"Protection is also provided to the user of the chemicals."

Speaking to the Department of Agriculture's role in the area of economic poisons, Mr. Charles Paul, director, said in his presentation to the committee:

"The department's functions are primarily regulatory in nature. The law and regulations we administer deal with the registration of pesticides, the *licensing and regulation of pest control operators*, the control of the use of injurious materials, and the establishment and enforcement of pesticide residue tolerances.

"The agricultural industry is deeply concerned and recognizes and supports the viewpoint that the primary public interest in pesticide chemicals is to safeguard the health and safety of the public. Our function is to provide this protection. We need to be assured that pesticides are used safely and effectively. This requires that our high-quality food supply be free from chemical residues; that people are not injured by the application of pesticides; and that our wildlife is protected from injury or destruction."

"We believe that the people of California are provided with a more complete and practical surveillance program, to see that their food is healthful and wholesome, than any other state.

"The concern of agriculture is twofold: first, and paramount is public safety and the health and welfare of the people; second, there

is also a public interest which calls for the judicious and responsible use of agricultural chemicals."

Mr. Paul went on to say:

"So conscious has the state been in its responsibility to the safety of the public, that it leads the nation in the field of pesticide residue control. This leadership has existed for many years. Our position is the result of the state's 37 years of foresight and experience."

In commenting on the extent of the department's program, Mr. Paul pointed out:

"The department's activities in the task of protecting its exploding population and of providing high quality, wholesome foods has expanded rapidly. Funds in our budget for pesticide control work increased fourfold from \$154,793 in 1958-59 to \$624,017 in 1963-64.

"It is not unusual, then, that chemists from other states and foreign countries visit our department's laboratories frequently to learn our techniques in dealing with pesticide problems. From these visitors, we have learned that many states and foreign countries are just inaugurating programs we established in California in 1926."

Mr. Paul went on to say:

"We have found that strict enforcement of pesticide laws and regulations is mandatory if full protection is to be achieved. The effectiveness of California's pesticide control program then, may be attributed to the state's historic concern for the health and welfare of its citizens, to state pesticide laws, and to strict enforcement of those laws and regulations.

"The department's enforcement of our pesticide laws and regulations is assisted by the work of the county agricultural commissioners. The county agricultural commissioners and their staffs, numbering approximately 700 persons, constitute the largest field force of its kind in the nation. These officials have an intimate knowledge of almost every farm in their counties and have the duty of enforcing certain pesticide controls. County agricultural commissioners, under the supervision of the California Department of Agriculture, enforce state regulations pertaining to agricultural pest control operators and the use of injurious pesticides."

Also speaking against the proposal was Mr. Charles O. Barnard, representing the Western Agricultural Chemicals Association, who said that his association believes the Department of Agriculture is the public agency best qualified to administer pesticide regulations.

Mr. William Staiger, assistant executive secretary, Agricultural Council of California, in commenting on this specific proposal, stated:

"We believe that the present laws dealing with agricultural chemicals have, generally speaking, proven to be adequate. Weaknesses, as demonstrated by the so-called 'protest' registrations at the federal level indicate the need for periodic review and reappraisal. However, with respect to state laws we have no recommendations for specific legislation at this time. Most of the recommendations we would make are outside the scope of legislation.

"We believe that the State Department of Agriculture is the logical state agency to supervise and control the laws regulating agricultural chemicals and we urge that no changes be made as initially suggested by AB 2233 (Petris) in the 1963 Legislature. This department, in

close cooperation with the Public Health Department and other state agencies, the University of California and with the agricultural chemicals industry, has done an excellent job of protecting the public interest both from the standpoint of pure, safe food products, and from the equally important standpoint of an abundant, economical variety and supply of food and fiber. Continued cooperation should be encouraged, but the responsibility must lie with one agency."

Mr. E. Alan Mills, executive assistant of the California Grape and Tree Fruit League, in his comments on this proposal, said:

"We believe you will agree that the fresh grape, tree fruit, and berry industries of California have done and are continuing to do an outstanding job in the application of agricultural chemicals, and that their long-range objectives are in tune with the best interests of the economy of our state and nation, and the health and welfare of its citizens. This effective program is being carried out under existing laws set forth by the California State Legislature and the Congress of the United States. Each of these governing bodies had seen fit to place flexible authority in the hands of competent administrators. It is our judgement that this authority has been wisely applied at both the state and federal levels. It is important that the continuity existing between state and federal pesticide rules and regulations be maintained. This continuity has been developed largely through the administrators of the respective laws. Ninety percent of the fresh grapes, deciduous tree fruits, and berries shipped to market by California growers are involved in interstate commerce. Though we believe existing state laws amply provide for the protection of the health and welfare of the citizens of California and the nation, we urge that any changes in the state laws governing the use of agricultural chemicals in the State of California be written so as to coincide with the federal laws with which California growers must comply in marketing 90 percent of their production."

Mr. Robert J. Marsh, representing the Cannerymen's League of California, took a similar position in testifying to the committee, stating that:

"We believe the present laws and regulations governing the licensing and use of agricultural pesticide chemicals in California are working very well. The present law contains adequate provision for the promulgation of additional regulations if and when they become necessary. And we can see no need at this time to provide additional regulatory powers or to substitute legislation in fields which could easily be covered by regulation."

Mr. Homer A. Harris, consultant for Associated Produce Dealers and Brokers of Los Angeles, stated:

"The Agricultural Code wisely provides for its joint enforcement by the Department of Agriculture and county agriculture commissioners. This is particularly true in the regulation and control of the spraying and treatment of food crops. Every agricultural county in the state has an agricultural commissioner, a total of 53. They are well qualified and are devoted to their many duties. They have staffs in proportion to the importance of agriculture in their respective counties. They license and regulate pest control operators and inspect the fields during the application of the pesticides, and again before harvest to make sure that all requirements have been met, both as to applica-

tion of sprays, but also as to safety requirements for operators. Some counties have radiotelephones so that the office can keep in constant touch with inspectors in the field.

"The county commissioners have more than 500 men in the field as inspectors and supervisors in the enforcement of the many provisions of the Agricultural Code. Their normal individual duties may be as diverse as California agriculture, but their training is broad enough that manpower can be concentrated on any urgent problem. Our county commissioner system permits a flexibility in the use of manpower and efficiency in operation that could not be attained by any single state agency.

"For these and many reasons already expressed by other speakers, we do not believe any major changes in the law are desirable. Specifically we are opposed to changes of the type indicated by AB 2233 as introduced."

A spokesman for the California State Grange, in his statement, recommended that the present constituted authority governing the use of pesticides remain as it is under the Director of the California State Department of Agriculture and always in cooperation with the State Department of Public Health.

Mr. Allan Grant, representing the California Farm Bureau Federation in his presentation to the committee on this proposal said that his organization believes that the State Department of Agriculture should have the authority to administer the chemicals and residues program with more of the policing and monitoring assigned to and be done at the local level by the agricultural commissioners under local conditions.

One of the few testifying in support of the Petris bill was Mrs. Laura Tallian, speaking as chairman of the Committee for Biological Pest Control in California. Mrs. Tallian asked the committee to strengthen the bill until the State of California has a mandate to move to biological control of pests.

Mr. Richard E. Butcher, secretary of the California Citrus Pest Control Association, while not speaking directly to the proposal as such, stated that in his opinion, there are already all the laws and regulations on the books necessary to keep the public safe.

Also submitted for consideration by the committee was a statement of the Resources Agency, Department of Conservation, which expressed the opinion that the existing system of pesticide regulation has been satisfactory to forestry interests. The statement went on to say: "Any change made should permit the continued privilege of using the wonders of chemistry to protect and manage forest lands for the benefit of this and future generations.

Mr. Edwin A. Putnam, executive director of the California Agricultural Aircraft Association, said that his purpose in appearing before the committee was to voice the association's support of the manner in which the use of agricultural chemicals are being controlled at the present time at the state and county level. Mr. Putnam went on to reiterate his association's support of presently existing laws, rules and regulations. In this connection, he is quoted as saying:

"We take the firm position that further legislation is not indicated at this time."

It should also be emphasized that Mr. Putnam, in speaking to the question which had been raised as to how much injurious materials the human body could absorb before developing symptoms of illness, referred to a survey conducted at Bakersfield by the Bureau of Public Health in 1950. According to Mr. Putnam, this survey firmly established that an agricultural aircraft pilot, flying 500 hours, would absorb one million times as much material each year as the ordinary man would in a lifespan of 1,000 years. Mr. Putnam went on to say: "To our knowledge, not one of these pilots, some of whom have flown as much as 20 years, has ever developed symptoms of any kind."

Mr. D. Lowell Wells, President of California Citrus Pest Control Association, in speaking to the proposal, said:

"I submit that we need no further legislation controlling either method of application or materials used in order to give the consumer the safe and insect-free food and fibre to which they have become accustomed."

A similar position was also taken by Mr. Keith Kirstein, secretary-treasurer, California Feed and Grain Association. Mr. Kirstein urged that no major changes be made in the present pesticide laws.

Mr. X. Dahlstrom, sales manager of the Los Angeles Chemical Company, in a statement to the committee, took a position definitely opposing the transfer of any authority invested in the Department of Agriculture to the Director of Public Health. According to Mr. Dahlstrom, the present controls are specific and adequate and transferring to the Department of Public Health would not increase their effectiveness.

Mr. Robert M. Howie, Agricultural Commissioner, Riverside County, in his presentation to the committee, said:

"We believe the present system of controlling the use of pesticides in California is certainly the best in the world. We would not recommend a wholesale revision of the present laws. We should retain the existing authority in the hands of the capable, responsible, and experienced personnel of the State Department of Agriculture and the county agricultural commissioners."

Mr. W. Hazeltine, manager, Lake County Mosquito Abatement District, also spoke out against the proposal, saying that "There does not appear to be a need for additional legislation to protect the public health or wildlife provided registrations be reviewed as often as some diverse effect is detected and confirmed."

The California Forest Pest Control Action Council also went on record before the committee opposing the proposal, pointing out that because of the well-established, well-understood and workable relationships and because of outstanding safety records on forest pest control provisions in the past, the regulation of pesticide use should continue under existing regulatory authority, rather than having its activities assigned to a new agency.

Is There a Public Health Hazard?

C. H. Hine, M.D., Ph.D., associate clinical professor of preventive medicine (occupational medicine) and toxicology, in his testimony to the committee, pointed out that the hazard which is associated to the general public and to the employed person as regards agri-

cultural chemicals is real but it is finite. According to Dr. Hine, there are about 800,000 injuries that occur to employed persons in California in the course of a year. About 20,000 of these result in a visit to a physician and of these 20,000, approximately one-third to one-fourth result in lost time after that single visit. Of this total number of cases that have resulted in lost time, approximately 5 percent are due to exposure to agricultural chemicals . . . this is minutia of 1 percent in terms of actual disease frequency and the injury that has occurred. Dr. Hine went on to point out that about 45,000 people die from all sources in the course of one year in California. About 450 are related somehow to work situations. Of these 450, about 2 are due to exposure to agricultural chemicals so we have 2 out of a total of 45,000 people who died. In addition to this, an estimate of about 10 accidental deaths among a population as a whole occurs from the ingestion of products which could be broadly classified as agricultural chemicals or substances related to them. The majority of these are agents that are used about the house in the control of ants, roaches and other pests. These are arsenic and floride; agents that have been used for many years and are not the new exotic type of more active agricultural chemical. So we have a total death of employed group of about 2 due to this and about 10 totaled in the state. In the United States as a whole, we have 8,000 deaths a year due to poisoning . . . we would figure about 800 deaths per year in California due to this problem of the exposure to or overingestion of drugs and chemicals, and of these 800, 10 are due to agents which are related closely to economic poisons.

According to Dr. Hine, our major problem is the intentional ingestion of drugs and chemicals to cause death or the accidental ingestion of drugs and chemicals by children and groups other than economic poisons. Dr. Hine further said that analyses of statistics obtained nationwide indicate that medicinal compounds, agents used about the house as household chemicals, cleaning, and sanitary agents far exceed in number the injuries, ingestions and death as compared with agricultural chemical substances.

Having summarized the extent of the total problem of exposure, I would like to comment, if I could, on the problem to the consumer. I have carried out some research and analysis of food samples for the presence of persistent type of insecticide in human fat. These samples have been collected both in California and other parts of the United States since we wished to see if California in any way differed from other parts of the United States and it was our finding that there were definite detectable amounts of about five persistent insecticides in the human fat of people who had no known exposure, occupationalwise or through their use of them intensively about the home, of the substances. They were present in very small quantities. In the greatest, one of the present greatest amounts, DDT, a metabolic product, DDE has been referred to in this article quoted this morning and we have found this to be true. There are other substances that are also present. The finding of these substances in this quantity in no way implies a chronic intoxication of the population. This merely indicates exposure and exposure and hazard are not necessarily related. In fact, they are not related as we can see by these figures in any way.

The body has stored within it a great number of naturally occurring minerals, metals and other chemical substances because with ingestion of these materials in drinking water, in the foods that we eat as they come off the soil, these things are present so we have arsenic and manganese and vanadium and cobalt. A number of these are deposited in the bone and the soft tissues, where they remain for a long period of time. *They do not, so far as we know, constitute any hazard, so far as we know, so far as the public health is concerned.* They don't affect aging. They don't affect reproductivity. They don't affect the general health.

I think the question was asked relative to the exposure of the young and could we accurately and safely predict what would happen 30 or 50 years from now in the then older population. I don't think that, medically speaking, anyone could say with a hundred percent assuredness that there would be no effect. On the other hand, *one would be most foolish to predict, based on the present evidence, that there is any likelihood of an untoward effect in the future.* I am basing this now, as best I can, on the experimental work which has been done on animals to date where intake of the substances of a persistent nature over a period of months and years and for the lifetime of animals has shown no change that can be measured and, since this is the only experimental data which is available, I would have to base my opinion on this and in our general experience in this field and in which we are basing predictions continually on new drugs and new chemical substances, this is the only data that could be used for a long-term projection.

Now, I do think that certainly efforts and research are needed in this field. I have recommended this to Senator Ribicoff's committee. I have written the National Institute of Health about this subject. I think the human experimentation is necessary and controlled observation on the population is needed in the future. I think the State Department of Public Health and the research arm of the university in the State of California should be encouraged in this particular area to continue these investigations. I think that the surveys done to date, not in California, but in other parts of the country where there has been widespread advocacy of persistent type of insecticides, has shown no effect on the general public health as measured by morbidity, absence from school, absence from work, increase of any type of disease. In fact, the whole picture has indicated that when these materials are used and they have been used judiciously—because of cost in part and because of the good intent of the Public Health people who have applied them—there has been nothing but improvement of the total public health. There has been a decrease, if anything, in the diseases which are carried by insects and vectors of this kind. They are destroyed by the insecticides and I think the total public health picture is immeasurably improved by their use.

In commenting on the possible effects of pesticides on persons with degenerate disease, he had this to say:

"I do think that, as a source of scientific inquiry, that studies should be conducted along these lines in order to establish more firmly this question which you have raised but there is no information at the present time which would indicate that there is an aggravation of any degenerative type of naturally occurring disease or any accelera-

tion of disease by exposure to the substances in the quantity in which they are encountered ordinarily.

"Now, if we have a person who has had tuberculosis and he is exposed to methylobromide or chloropicrin, he may have acceleration of that disease state and die but this would be an exposure beyond that which would be considered safe under ordinary circumstances. Exposures to the concentrations which are accepted as safe would, to my knowledge, in no way cause aggravation or acceleration of the disease states."

The Governor's Interest In the Problem

In June 1960, Governor Edmund G. Brown appointed a 15-member Special Committee on Public Policy regarding agricultural chemicals to study and review the problem and recommend a sound public policy. This committee was appointed because questions had arisen with regard to the safety of man's food supply, in view of the fact that many agricultural chemicals in themselves are known to be toxic to man and other animals. This committee, in a statement of public policy, published in December of 1960, said in part:

"The great preponderance of evidence convinced the committee that at this time, our food supply is safe. The belief of some witnesses that the presence of any chemical residue in foods is deleterious was not substantiated. The public health is not threatened in this way."

In June of 1963, the Governor announced the creation of a Pesticide Review Committee to conduct a continuing review of the works being done by the various arms and branches of the state government in pesticide control, investigation and research. The committee consisted of Hugo Fisher, Chairman, and Administrator, The Resources Agency; Charles Paul, Director of Agriculture; Malcolm H. Merrill, M.D., Director of Public Health; Maurice L. Peterson, Statewide Dean of Agriculture, University of California; William E. Warne, Director of Water Resources; Samuel A. Abrahams, President, Structural Pest Control Board; Walter T. Shannon, Director of Fish and Game; Helen E. Nelson, Consumer Counsel; Fred Jordan, Press Assistant, Governor's Office; DeWitt Nelson, Director of Conservation.

The committee had available to it, the assistance of a technical staff group consisting of representatives of the various departments and agencies of state government having a direct interest in problems associated with the use of agricultural chemicals.

In its preliminary report on pesticides in California submitted to the Governor under date of June 1, 1964, the committee made some 13 recommendations for new programs. It is quite interesting to note that not one of the recommendations advance involved the transfer of existing authority from the Department of Agriculture to the Department of Public Health. It should be noted, however, that several new programs such as one of environmental monitoring, together with a human surveillance program, including a program to assess the level of exposure from pesticides used by householders would, if they prevail, become the responsibility of the State Department of Public Health.

Committee Findings

For the following reasons, the committee refuses to support the intent of AB 2233 to transfer existing pesticide authority from the Department of Agriculture to the Department of Public Health:

1. Such a transfer could seriously jeopardize agriculture, the state's largest industry.

2. The few arguments advanced by proponents of the proposal were not valid.

3. No showing was made that such a transfer would provide a better degree of safety to public health than is presently provided under existing programs.

4. While it is recognized that there may be some cause for concern, the committee is not convinced that an emergency exists and that the seriousness of the problem warrants such a radical approach.

5. The state pesticide program, implemented and administered at the local level by county agricultural commissioners, has proven to be one of the most effective in the nation and a pattern for other states to follow.

6. The State Department of Public Health presently has the authority to insure that harmful residues exceeding legal tolerances, do not exist in processed foods. The manner in which this responsibility has been discharged leaves much to be desired in view of the fact that it has been stated by officials of the Department of Public Health that their existing program has not been systematic but rather has been carried on a "lead or suspicion" basis.

Committee Recommendation

Based on these findings the committee recommends that the existing pesticide authority now vested in the Department of Agriculture remain vested in the Department of Agriculture and not be transferred to the Department of Public Health, but that the Department of Agriculture be required to keep the Department of Public Health apprised of its activities in this field.

PROPOSAL 12

The need for further study of the technical issues involved in the concepts of zero tolerances and no residue.

Discussion

First, the difference between the two concepts should be understood. "No residue" is a determination made by the U.S.D.A., based on experimental data that none will remain from a particular pesticide use, irrespective of toxicity. "Zero tolerance," on the other hand, is an F.D.A. prohibition of any residue on a crop because the compound is too toxic to permit a residue. These concepts have been modified as more sensitive detection methods become available. In practice, zero tolerance is interpreted by the F.D.A., in some cases, to include a detectable level of residue lower than that believed to be pharmacologically significant. The F.D.A. is responsible for establishing safe tolerances of pesticide residues on food products and enforcing such toler-

ances by preventing illegal residues on interstate and foreign food shipments. The Department of Agriculture, on the other hand, has the sole responsibility for approving registration for pesticides used on any agricultural product other than food crops, on food crops where no residue results, and for all nonagricultural uses. The F.D.A. is responsible for assuring that tolerances are not exceeded. In addition, individual states may directly control pesticide uses and enforce their own tolerances for products sold within the state. In this connection, it should be noted that in California, the State Department of Agriculture has, by administrative regulation, adopted the tolerances established by the federal government.

As an administrative principle, tolerances are set by the F.D.A. at 0.01 of the lowest level which causes effects in the most sensitive test animals whenever data on human toxicity are not available. However, tolerances have been set for some compounds, such as dieldrin, aldrin, heptachlor and chlordane, although a "no effect" level in animals has never been determined.

History

In 1954, the F.D.A. Act was amended to empower the Department of Health, Education and Welfare to establish tolerances or exemptions from the requirement of tolerances in or on raw agricultural commodities. This amendment, known as the Miller amendment, or pesticide chemical amendment, assigned two responsibilities to the Department of Agriculture. When a petition for a tolerance or an exemption is submitted to the Department of Health, Education and Welfare, a copy is furnished to the Department of Agriculture, which is required to furnish to the Department of Health, Education and Welfare (1) a statement certifying whether the pesticide chemical is useful for the purpose for which the tolerance is sought and (2) an opinion as to whether the tolerance proposed by the petitioner reasonably reflects the amount of residue likely to result when the pesticide chemical is used in the manner proposed for the purpose for which certification is made. Tolerances sometimes are set at zero.

In other cases, in the absence of information to demonstrate finite amounts of residue, registration of a pesticide may be given on a no-residue basis. In both cases, the rapid advance of technology in the development of procedures for the measurement of extremely small amounts of residue is constantly upsetting the determination as to whether or not a residue actually exists in a food or feed. This problem was very thoroughly considered by the President's Science Advisory Committee and in the report of that committee entitled "Uses of Pesticides" published on May 15, made two recommendations in this area.

"1. That the Food and Drug Administration proceed as rapidly as possible with its current review of residue tolerances, and the experimental studies on which they are based. When this review is completed, it is recommended that the Secretary of Health, Education and Welfare select a panel from nominations by the National Academy of Sciences to reevaluate toxicological data on presently used pesticides to determine which, if any, current residue tolerances should be altered. Of the commonly used chemicals, attention should be directed first to heptachlor, methoxychlor, dieldrin, aldrin, chlordane, lindane, and par-

athion because their tolerances were originally based upon data which are in particular need of review. Upholding the same standards, the secretary should ensure that new compounds proposed for registration be rigorously evaluated.

"2. That the National Academy of Sciences—National Research Council be requested to study the technical issues involved in the concepts of 'zero tolerance' and 'no residue' with the purpose of suggesting legislative changes."

Mr. E. P. Reagan, Assistant Administrator, U.S.D.A., in a statement submitted to the committee at a meeting held in San Francisco on June 19, 1964, pointed out that in recognition of the seriousness of this problem, the Secretaries of Agriculture and Health, Education, and Welfare, according to him, recently asked the president of the National Academy of Science's National Research Council, to have the technical questions relating to zero tolerances and no residue evaluated by a group of experts with a view to recommending a basis for a solution. According to Mr. Reagan, this request has been accepted and the academy is now engaged in convening the group of scientists to undertake this work.

*Extent of the Problem as It Relates to Milk and Dairy Products in California*¹

"The Bureau of Dairy Service enforces the provisions of the California Agricultural Code relating to the production and processing of milk and dairy products. These statutes are designed to provide consumers safe, wholesome dairy foods, and to protect the public against fraud and misrepresentation.

"The bureau employs a staff of 50 persons: a chief, two regional administrators, 22 district supervisors, 25 dairy inspectors, and five clerical assistants. City and county health departments operate approved milk inspection services under the general direction of the Director of Agriculture. There are 38 approved milk inspection services which employ 98 inspectors plus laboratory personnel who perform the required bacteriological and chemical tests on milk and fluid market milk products.

"While the regulatory responsibility for the quality and safety of market milk is shared with the local health departments, the Bureau of Dairy Service is the sole state agency charged with the enforcement of laws dealing with the composition and sanitary standards of manufactured dairy foods such as ice cream, dry milk products, cheese, butter and evaporated milk.

"Most of the work of the bureau consists of dairy product sampling, testing (done by the Division of Chemistry), dairy farm and processing plant inspection and enforcement. Special activities are performed in cases of acute problems or emergency situations.

Pesticide Program

"Keeping pesticide residues out of milk has been of primary concern to bureau officials. Activities in this field have increased each year since the program started in 1959.

¹ From the 44th Annual Report, Volume 53, No. 2, 1964, Department of Agriculture Bulletin.

"Pesticides of the chlorinated hydrocarbon group, such as DDT, remaining on feed which dairy animals eat, are stored in the body fat of the cow and released into the milk. Therefore, it is necessary to test samples of milk on a routine basis to determine if traces of pesticides are present.

"Early in the program it was established that packinghouse wastes, vegetable or fruit trimmings and tomato pomace almost always contained slight traces of pesticides and should not be fed to dairy animals. As in past years, constant policing was necessary to keep these trash feeds from cows and dry heifers. The effort has been worthwhile. Only a few remote cases of trash feeding gave trouble during 1963.

"California is believed to be the only state which attacks the pesticide problem directly at the farm level. The program calls for testing milk as it comes from the dairy. If pesticide residues are found, operation of the dairy is suspended and the milk is kept off the market. This action protects the consumer.

"In enforcing this program in 1963, sales of milk from 26 dairy farms was suspended. The total loss of milk was 146,781 gallons. Over 1,500 tons of hay and dairy feed contaminated by pesticides were condemned by bureau officials as unfit for dairy animals. It was necessary to prosecute two uncooperative dairymen who persisted in selling milk from suspended dairies or who offered physical resistance to control officials.

"The 1963 Legislature enacted Assembly Bill 507 which empowers the State Director of Agriculture to identify female dairy cows and goats known to be contaminated with pesticide residues and makes it unlawful to move such animals from the premises until their milk is free of adulteration.

"For many years the director has had the power to condemn milk or to the director's authority over the movement of dairy animals carrying pesticides in their bodies. This law helps the state's enforcement program, not only in identifying contaminated animals so they may be excluded from a milking string, but also in prohibiting the sale of such animals to other dairymen.

"The law became effective in September 1963. In the four months before January 1, bureau officials identified 220 cows known to be carrying pesticide residues. At the close of the year 25 cows were being held and 195 had been released after having been found free of pesticide residues.

Drift Contaminates Feed

"During July and August 1963, a serious pesticide drift problem occurred in the peach- and prune-growing areas of Sutter and Yuba Counties. This was a particularly bad year for losses caused by the oriental fruit moth. The fruit growers missed their "spraying cycle" because of adverse weather conditions and were unable to spray at the precise intervals needed for effective control. In this situation growers used liberal quantities of DDT dust to keep the orchards 'fogged' in an effort to save the maturing fruit. Through drift, adjoining alfalfa fields and permanent pasture became contaminated.

"Milk from three dairy farms in the area had to be excluded from the market and many tons of hay were found to contain excessive

pesticide residues. Contaminated pasture had to be clipped and the feed destroyed.

"This situation led to a change by the department in the California Administrative Code. After public hearings, held in Sacramento and San Bernardino in September, the code was amended by placing DDT and DDD on the injurious materials list when applied in dust form or when delivery of more than 50 pounds is obtained in a 24-hour period. Permits for DDT and DDD application in dust form must now be obtained from the county agricultural commissioners.

"The bureau continued its policy of encouraging dairymen to test all home grown hay and purchased hay before storing.

"In November 1963, one large dairy with 150 milking cows in southern California was suspended because the milk contained 9.1 ppm, benzene hexachloride (B.H.C.), fat basis. Investigation revealed that the dairyman had used B.H.C. in place of methoxychlor as a dust on the necks of the animals for fly control. The B.H.C. was absorbed through the skin and contaminated the cows to the point where the milk was affected. Operation of the dairy was suspended for three weeks and more than 23,000 gallons of milk was lost. This costly experience demonstrated to the dairyman the necessity for reading and understanding directions on pesticide labels.

"One facet of the problem as it relates to contaminated hay supplies is still with us, as is pointed out in the following editorial which appeared in the November 1964 issue of the *'Dairyman.'*

"A situation of critical proportions has developed in the Kern County growing area of California. Many thousands of tons of alfalfa, scheduled to be fed to dairy cows, have been contaminated with endrin, a chlorinated hydrocarbon like DDT, but much, much more toxic. The tolerance for it on hay is zero. In practical enforcement, hay is quarantined if it contains above one-tenth part per million.

"How much hay has been contaminated no one really knows. Estimates have gone as high as 30,000 tons and even higher. The endrin was not applied directly to the growing alfalfa, but drifted on to the fields from nearby crops, chiefly cotton.

"When the situation was discovered, hay growers in the area voluntarily held up supplies. The State Department of Agriculture stepped up its testing program, quarantined loads of hay in the San Joaquin Valley and over 1,000 tons in southern California.

"But the critical question still remains. How much hay was affected, how many dairymen will get hurt because of it, and why did it happen in the first place?

"Control of the application of chlorinated hydrocarbon pesticides such as DDT and endrin is the responsibility of the agricultural commissioner of the county in which application is performed.

"Several years ago, the commissioner of Imperial County, where alfalfa and cotton are grown in adjacent areas, took a forward step and prohibited the application of chlorinated hydrocarbons, except under rigidly controlled conditions. All the other commissioners in southern California soon followed suit, and there has been practically no trouble in that area with hay since then. Early this year, similar restrictions were imposed by the commissioners of Fresno and Tulare Counties.

"Kern County adopted like restrictions as soon as the endrin situation was apparent, but this was like locking the barn door after the horse escaped. Why, in a predominant cotton- and hay-growing area like Kern County, were these restrictions not imposed at the time other counties made their move? And how well have spraying activities been policed by the county commissioner? Certainly a degree of negligence is indicated.

"From the standpoint of economics, the situation is already reflected in slightly higher hay prices. But this is of minor consideration compared with the enormity of the problem confronting a dairyman who unknowingly feeds heavily contaminated hay.

"There is only one safeguard to follow. Buy and feed only hay that has been tested for both DDT and endrin and certified by a reliable commercial lab."

The Problem Nationwide

In the *Western Milk and Ice Cream News* dated July 5, 1964, there appeared this statement:

"A little-noted amendment to the Antipoverty Bill, about to become law, provides for payments to dairy farmers whose milk must be dumped because of pesticide content. The amendment was tied to Title III of the bill in a flurry of changes, made by the Senate July 23. The milk amendment, introduced by Senator Mitch Young, R-N.D., provides for indemnity payments at fair market value of the milk. The payments would go to producers of milk whose milk has been kept off the market 'because it contained residues of chemicals registered and approved for use by the federal government at the time of such use.' The payments would continue until a farmer is allowed to sell his milk again. The provision is retroactive from last January 1 until January 31, 1965."

And from the *California Dairyman* of August 1964, this account: "MORE FARMERS LOSE WASHINGTON, D.C., MARKET. More farms supplying milk to the Washington market have been cut off as a result of pesticide residue in the milk, district authorities reported. Originally 14 farms in Maryland and Pennsylvania were suspended for too much heptachlor in the milk. Four of these have been reinstated. Meanwhile, the total of suspensions has risen to 27, of which 6 have been reinstated. Some of the more recent suspensions were in Virginia. Of the recent suspensions, three of four have been for milk which contained too much dieldrin, a chlorinated hydrocarbon similar to heptachlor. Authorities said that testing is continuing. Meanwhile several bills were being introduced in Congress to reimburse farmers whose milk has been withdrawn from the market. The bills would pay for losses at the support price. The National Milk Producers Federation, which backs the bills, said the U.S. Department of Agriculture recently rejected such payments by administrative action."

Also, from the *Western Milk and Ice Cream News* of August 28, 1964:

"Insecticide traces (heptachlor and dieldrin) have been detected in milk at Denver and four other U.S. areas recently, according to John Kirk, associate commissioner of FDA. But government and agricultural leaders this week assured citizens the contamination was negligible.

Other milksheds showing contamination are Baltimore-Washington, Philadelphia, Dallas and Minneapolis. Use of heptachlor is illegal in Colorado and children is barred from alfalfa in that state. Colorado Governor John Love stated Friday that additional funds for testing milk and field crops will be allocated, 'If I can find them.' Present Colorado testing facilities can handle 350 analyses per year, but Love said it should be able to make 1,500 trace tests."

From the *California Dairyman* of September 1964, this account:

"Pesticide Residues Found. Insecticides have been found in milk in five different areas in the United States—Denver, Dallas, Philadelphia, Minneapolis and Washington-Baltimore—and the concentration has caused shippers in more than one area to be banned from milk sales, according to reports from officials of the Food and Drug Administration. A few Wisconsin dairymen have been shut off from the Chicago and Milwaukee markets."

From the *Western Dairyman*, the following account of one legislative approach appeared:

"Appearing before the House Agricultural Committee last week, Representative W. R. Poage of Texas stated, 'Zero pesticide residue tolerance in milk is absurd.' He said, 'There is more heptachlor in Washington, D.C., drinking water than the FDA seeks to permit in milk.' On the 'no tolerance' ruling, Poage asked, 'Is this a matter of protection or an exercise in enforcement?'"

Industry reaction to the pesticide indemnity proposal is cited in the following account which appeared in the September issue of the *California Dairyman*:

"Pesticide Indemnity Okayed. As a result of the action of the U.S. Senate which has approved paying indemnities to farmers who suffer losses when their milk is banned from markets because it contains pesticides, it is anticipated that increased crackdowns are in the offing. States and cities have been chary of banning the milk containing small amounts of the pesticides but now that indemnity payments will be made it is expected that closer checks will follow and more milk will be banned from various markets."

Dr. D. G. Crosby, toxologist at the California Agricultural Experimental Station, in commenting upon pesticide research programs of the University of California Experimental Station, in his testimony to the committee on October 22, 1963, had this to say:

"At the outset, let me explain that perhaps the principal difficulty in pesticide residue work is that we are required to deal rigorously with quantities more nearly approaching nothing at all than ever before in the history of food chemistry. The finest analytical balance generally in use is sensitive to one-tenth of a milligram—far less than the weight of a single salt grain. However, there may be much less DDT than this in a quart of overtolerance, illegal milk! Our analytical procedures usually require that we work with amounts of pesticide smaller than the unaided eye can see as our maximum limits. It may be comparatively easy to chemically analyze 'something'; it is very difficult indeed to analyze 'nothing.'"

"Basic research in my own laboratory, supported by a U.S. Public Health Service grant, is concerned with the toxicology of the array of potentially toxic substances which may be expected to be found in

ordinary foodstuffs. One part of this study involves development of new methods for detecting and measuring toxicity in animals. Using these techniques, the chemistry and toxicology of naturally occurring toxicants, products of the metabolic breakdown of pesticides by plants, and the pesticide decomposition products caused by the action of sunlight are under investigation.

"Incidentally, the results of this work, we hope, will also give us an opportunity to destroy pesticide residues intentionally at will."

Mr. William Staiger, executive secretary of the Agricultural Council of California, in speaking to this problem, said:

"One of the problems in the field of research that does concern us is the apparent lag between progress made in the analysis of residues left in or on crops after varying periods of time, and the toxicological effects of such residues in man. With greater and greater analytical accuracy being developed, we are rapidly approaching the time when any residue above absolute zero can be measured. It is important that equally accurate data be developed concerning residue buildup and safe levels of toxicity in man, since 'zero tolerances' are, in our opinion, highly impractical and perhaps for many chemicals, unnecessary."

Mr. William Zimmer, salesman of agricultural chemicals, employed by the Airi-Cal Chemical Company, in his testimony on this problem at the meeting in El Centro on June 16, 1964, had this to say:

"If research on the subject of agricultural chemicals is to be expanded I would suggest the following areas:

"1. Study of pesticide residues with an aim to eliminate as many zero tolerances as possible. We in the industry, in order to do a good job of integrated control at an economical cost, must have as many materials at our disposal as possible.

"We feel that a priority should be put on this study because of new and very much more accurate methods of analysis for such residues that have been developed in industry and are now being used in government laboratories. Under old methods you had at least a fraction of a part per million tolerance. Now with new methods, a technician can for example measure 0.01 part per million of endrin. Further, if I understand correctly, a sample of carrots that tested 7 parts per million of toxaphene last year might test 12 parts per million now with new methods.

"I'm talking about the same carrots and the legal allowable amount in this case is 7 parts per million, so one case would be legal and the other case wouldn't be.

"To me, this means the safe tolerance must be reexpressed (after sufficient research) to go along with the new methods.

"In other words, if it was safe at 7 parts per million and now because of new methods of analyzing we find that it now tests 12 parts per million, then it would seem to me that the person wouldn't be poisoned any quicker or be hurt with that amount and, therefore, the regulations should be changed to catch up with the technology."

Mr. Ernest Studer, chairman of the Imperial County Farm Bureau Pesticide Committee, in speaking to the proposal, said:

"The dairyman has probably been one of the most affected in agriculture by the pesticide regulations even though he is one of the smallest users. There have been a few instances where a dairyman has fed by-

products (crop residues from food processing) or bought contaminated herd replacement; but, by and large, the dairyman's main problem has been pesticide drift from field adjacent to his forage crops.

"Prohibiting the use of pesticides where there is any change of contamination of these feed sources would appear to be simple solution to the problem, but, in the first place, there are times when the forage crops themselves must be treated for pests. Lack of treatment would result in less feed at a much higher cost or severe economic losses. The past year of high feed costs have taken their toll of the marginal dairies and if the trend continues, the ultimate cost will be passed on to the consumer. Also by prohibiting usage of pesticides which might contaminate the dairyman's feed sources, the farmer whose land lies next to the dairyman's would be penalized while his competition whose land is a safe distance away is free to use insecticides as he pleases.

"Much of the problem area in the pesticide fields has revolved around the lowering 'zero' dairy tolerance and its repercussions on the chemicals programs of other commodities. This zero dairy tolerance problem—I inserted that word there—has come about by new and better methods of testing. Because the zero dairy tolerance has always been unrealistic, I feel that legislation should advocate 'reasonable' tolerances on all foods—including milk and butterfat."

Mr. Studer went on to say:

"I'll probably get into trouble for saying this but I think we are real fortunate in California that we always seem to stay a little bit ahead of the federal people on this zero tolerance and, even though the milk by federal standards has zero, by some of the standards we are using out here, it might not. This gives us an indication where we have to go."

When asked to elaborate on what he considered a reasonable tolerance, Mr. Studer said:

"Well, I personally would kind of base it on something like this. I believe that, like your lettuce and some of your foodstuffs, you have a present standard that has been set at those. Okay. Then we'll go down and milk is at what we'll call zero now. I would say the dairy product should probably stay at a proportionate ratio below these other products. I'm not saying milk should have the equal rights that these other things do because we have in the past been able, as a general rule—not too many dairymen have been closed down. This has happened to some but we can keep the milk fairly pure within reason and I think in a proportionate amount we can continue going down.

"In other words, if you set the standard, what the dairyman's complaint is is this: Here you have allowed on these foods and we are down on zero and they keep finding out that zero isn't zero, actually."

Dr. Ed Swift, extension entomologist, University of California, in commenting on zero tolerance described the concept as an administrative zero based on the technique used for analyses. Dr. Swift, in response to a question from Senator Way regarding changing techniques, said:

"They have made a change and it has led to the improvement of techniques. On October 11, 1963, the level of sensitivity was 2.5 parts per million in butterfat and that has been cut to 1.25 as of now."

Dr. Swift also indicated, in response to another question from Senator Stiern, that in his opinion, the tolerance of zero on milk for such contaminants as DDT is not realistic. He went on to say that:

"... Following the work of the U.S. Public Health Service, the amount which is the level of sensitivity that we did have was two-five-five parts per million in the butterfat or a tenth of a part per million in the whole milk, and this, once again following the U.S. Public Health Service, seems to be a safe level, and it is not only safe, it is a practical level as far as the general contamination throughout and it's difficult if you're going to use these pesticides. They drift. This will occur on various food crops—I mean feed crops. There also seems to be a possibility sometimes residue may be picked up from the soil from its contamination as Dr. Anderson spoke about it. It's there and if they try to establish an absolute zero, if you could ever find that point, we wouldn't be able to have any feed crops feeding."

Dr. Alfred M. Boyce, dean, College of Agriculture, Riverside campus of the University of California, added the following comment:

"May I make a comment relative to your zero tolerance? This has become such an issue that the Food and Drug Administration and others concerned have asked the National Academy of Sciences to appoint an expert committee to evaluate this whole problem because to say a zero is a zero when it isn't a zero is not intellectually honest so a very high quality committee has been appointed by the National Academy of Sciences to explore this whole area and it would appear probable that the results of that study would come up with a decision to have finite tolerances. Instead of having the zero be synonymous with the lowest detectable amount that the method will show 1.25 in butterfat is zero. This is intellectual nonsense so we have hopes they will come up with recommendations and develop finite tolerances for these because the chances are with the improvement of analytical techniques you'll be able to find some chlorinated hydrocarbons and other compounds, for that matter, in practically everything."

Dr. Ralph Teall, president of the California Medical Association, in speaking to this proposal at a meeting of the committee held in San Francisco on June 19, 1964, had this to say:

"I'm sorry but I couldn't be regarded as an expert on this one at all. I did discuss the matter (zero tolerance) about a week ago with certain veterinary physicians who are interested in the field. It was their feeling, as I have indicated a moment ago, that the matter of zero tolerance, as you have already indicated, was not necessarily proving that there was nothing there but we weren't able to detect what was there. The matter of zero tolerance as a protection may or may not be unrealistic. It is unrealistic from the standpoint of DDT and we are talking essentially now of zero tolerance of DDT because DDT is one of the more persistent things we are concerned with."

"I don't think the CMA should try to go on record at this point as to the realism or unrealism of this tolerance since it's not in any sense expert on the veterinary aspect. But from the standpoint of the public health hazard, this would seem to be a requirement that is in excess of our present knowledge. I believe that that is as accurate as I can say it. That we probably do not require from the standpoint of the prevention of disease, a complete zero tolerance. This is true."

However, a great many tolerances, most of which are established by the Federal Food and Drug Administration and are concurred in by the state although there are some variations, that the tolerances are set well apart from any possible recognizable disease situation and in this case I believe the tolerance was set on the basis of public health emotional factors as well as the problem of identified public health hazard.

"I think that the testimony as to the exact level as to whether a DDT tolerance of zero or a tolerance of a few parts per million could be allowed is a matter which we should not attempt to commit the CMA to because we didn't have enough information on it."

C. H. Hine, M.D., Ph.D., associate clinical professor of preventative medicine, in commenting on the proposal, had this to say:

"The persistent insecticides must, with the newer chemical methods, be present in every milk sample. I am sure if we use our highly accurate, scientific methods for determining these persistent insecticides, that they could be detected in minute quantities in every sample. We have to do one of two things; either we use a method that doesn't detect small quantities and you can leave your zero tolerance, if this is the most pragmatic and easiest way of arriving at the solution, or I think we should allow a tolerance in milk. I do not believe that the presence of small quantities of persistent insecticides in milk constitutes any public health problem.

"This regulation arose, I believe, from the early deliberations on the part of Dr. Arnold Lehman and Dr. Justice Ward in Washington, who felt that milk, being the sole source of food intake of infants and the infant being perhaps more susceptible than the adult, should have an absolutely pure product. But, of course, this is relative nonsense because there is present in mother's milk quantities of these insecticides. I don't know how you are going to legislate it out of mother's milk because it's going to be there as long as the mother has fat in her body and stores these insecticides.

"To answer your question levelwise, I think that this has an order of magnitude of somewhere around two to three parts per million of total persistent insecticides would be a reasonable order of magnitude but I think that it should be the subject of scientific inquiry by an expert board."¹

Mr. McKay McKinnon, Director, San Francisco District, F.D.A., in outlining the activities of his administration in this area, stated:

"One of our own activities to expand capabilities has been the establishment of an F.D.A. Institute for Advanced Analytical Chemistry at Georgetown University. This institute is offering four 12-week courses each year of intensive study in advanced theory and application of instrumental methods to analytical chemistry. The second 12-week session is in a limited number of designees from the various states. The course includes lectures and laboratory work in chromatography, electrochemistry, radiochemistry, and the various types of spectroscopy, including ultraviolet, visible, infrared, nuclear magnetic resonance, X-ray and mass spectroscopy.

¹ Appended marked Exhibit F is an Associated Press account of an exhaustive study of pesticides by the U.S. Department of Agriculture which disclosed "No milk available on the market today in any part of the United States is free of pesticide residue."

"Our experience with notification of results to growers and to state regulatory officials, a procedure adopted experimentally in 1962, has convinced us that these reports serve a distinctly useful purpose and they will be continued.

"In an effort to reduce time lag between a sample collection and examination, Los Angeles district has augmented its major facilities by using mobile laboratories, particularly along the Mexican border.

"San Francisco district set up a remote laboratory on the Fresno State College campus to make preliminary examinations of the wide variety of products produced in the southern Central Valley. Both of these activities will be repeated this year with added emphasis on imported foods. By June 30, 1964, the two districts will have examined about 2,800 samples of raw agricultural commodities grown in California and imported into California. In addition, the two districts will have examined a total of slightly over 700 samples of imported foods. This work on imports has been done largely by Los Angeles district. The chart which follows shows the number of samples collected in each general food class in California from July 1, 1963, through May 31, 1964.

Vegetables -----	939	Vegetable oils -----	77
Fruits -----	835	Hay -----	43
Grains -----	150	Animal feeds -----	33
Miscellaneous processed		Nuts -----	33
foods -----	147	Fresh milk -----	25
Dairy products -----	144	Fish -----	3
Eggs -----	81		

San Francisco district for the first time in several years found it necessary to request a seizure on charges of pesticide residues. Frozen broccoli produced in the Watsonville area was found through field sampling to have gone into process carrying measurable residues of endrin. Los Angeles district had no seizures of fruits and vegetables within the period covered, but did cite two southern California firms for shipping celery in interstate commerce carrying excess residues of chlorinated hydrocarbons.

Both Los Angeles district and San Francisco district found it necessary to seize alfalfa hay bearing pesticide residues. The hay seized by Los Angeles originated in Arizona and contained substantial quantities of DDT. The hay seized by San Francisco originated in Nevada and contained significant amounts of DDT and heptachlor epoxide. Los Angeles successfully prosecuted an Arizona shipper whose romaine lettuce moved in interstate commerce carrying 19 ppm of DDT as against a tolerance of 7 ppm. The firm was fined.

It has consistently been the purpose of the Food and Drug Administration in carrying out its obligation under the law to keep the channels of commerce free from products which do not meet the law's requirements, to use the best methods available to determine whether any residues are present where the law and regulations provide for none.

In the action we found necessary to take against California frozen broccoli, and in other actions directed against carrots produced else-

where in the United States, we felt that we had developed a method completely reliable to show endrin in any amounts above 0.03 ppm. We have, therefore, considered that figure as the dividing point between 'actionable' and 'nonactionable' for all agricultural commodities bearing endrin residues. In amounts above that level, we feel confident that we can go into court and prove that the pesticide is actually there. As methodology improves, this undoubtedly will be the case where other agents—particularly those having a zero tolerance or no established tolerance—are concerned. In fact, we announced to state regulatory officials in October 1963 that we now have methods capable of conclusively demonstrating the presence in milk and dairy products of a number of pesticides in the following levels:

Whole milk			Whole milk		
	<i>Fat basis</i>	<i>basis</i>		<i>Fat basis</i>	<i>basis</i>
Aldrin -----	0.25 ppm	0.01 ppm	Dieldrin -----	0.25 ppm	0.01 ppm
BHC -----	1.25 ppm	0.05 ppm	Endrin -----	0.25 ppm	0.01 ppm
DDE -----	1.25 ppm	0.05 ppm	Heptachlor -----	0.25 ppm	0.01 ppm
DDT -----	1.25 ppm	0.05 ppm	Heptachlor		
TDE (DDD) ---	1.25 ppm	0.05 ppm	Epoxide -----	0.25 ppm	0.01 ppm
DDT+DDE+			Lindane -----	1.25 ppm	0.05 ppm
TDE -----	1.25 ppm	0.05 ppm	Methoxychlor ---	1.25 ppm	0.05 ppm

These figures were made available to the dairy industry at the same time. No tolerances have been established for any of these agents in milk or milk products.

Based on testimony about toxicity studies presented at residue spray hearings held in 1950, chlordane has a currently existing tolerance of 0.3 ppm on about 47 fruit and vegetable crops. Methods for determining the safety of pesticide residues have improved tremendously since 1950 and F.D.A. reached the conclusion that reevaluation of chlordane toxicity data indicates that they are inadequate in the light of present information. Therefore, a proposal was published in the *Federal Register* for December 5, 1963, to amend the existing regulation to repeal all tolerances now outstanding for chlordane and to make it a no residue agent. Final action had not been concluded when this statement was prepared.

One of the major reasons for the broad scale screening procedures mentioned earlier is to help us develop information as to the overall potential intake of pesticide residues in the diet. Frequently, attacks are made by alarmists on the safety and integrity of our food supply. To determine just what the facts are, F.D.A. began in 1961 a "total diet study" which has been popularly called the "market basket survey." We started this in the District of Columbia and have since extended it to a number of strategically located cities throughout the United States. Several times a year we go to the usual retail outlets in these cities and purchase the estimated amount of food of all varieties sufficient to satisfy the appetite of a healthy 19-year-old boy for two weeks. We figure his intake would probably exceed that of any other individual of any age or either sex. This food is prepared in diet kitchens exactly at it would be prepared for serving in the home and various assays are made of the foods when they are ready to eat. We began this study to obtain basic data on strontium 90 and cesium 137, but quickly realized that such excellent samples could be used to determine

nutritive content and pesticide residues. The results have shown that most of the food analyzed contain no pesticide residues or amounts too small to measure. The residues were found to range from approximately 0.1 ppm to 0.002 ppm. No residues were found to represent more than a minor percentage of established safe tolerances.

The nationwide survey, state by state, of enforcement capabilities is well underway and should reach the reporting stage by this fall.¹ As previously reported to this committee, F.D.A. is under no illusion that the protection of the public in the pesticide area is something that we can achieve alone. We are convinced that such public protection demands concerted effort by state and local officials working in coordination with the federal agencies which may be involved. The goal has not changed; to plan against surprise to the end that no pesticide mishap, however localized, will go undetected and uncorrected."

Committee Findings and Recommendation

On the question of the need for further study of the technical issues involved in the concepts of no residue and particularly that of zero tolerance, the committee had this to say:

We recognize that the rapid advance of technology in the development of procedures for the measurement of extremely small amount of residue has made these concepts completely unrealistic. It is understood that, aware of the seriousness of the problem, the Secretaries of Agriculture and Health, Education, and Welfare earlier this year requested the National Academy of Sciences-National Research Council, to study the technical issues involved in the concepts of zero tolerance and no residue with the purpose of suggesting legislative changes. The committee further understands that the request has been accepted, and the academy has been engaged in convening a group of scientists to undertake the study. The committee is hopeful that the studies being conducted by this group will lead to a resolution of the problem.

¹ Appended marked Exhibit G is a copy of a news release by the F.D.A. making public the results of the F.D.A.'s continuing "total diet" studies undertaken to discover the quantity of pesticides in all kinds of food and drink consumed daily.

Exhibit A**NAC NEWS AND PESTICIDE REVIEW****COORDINATION OF FEDERAL PESTICIDE ACTIVITIES**

The Departments of Agriculture, Interior, and Health, Education, and Welfare announced in April 1964 interdepartmental arrangements for continuous coordination in the executive branch in matters relating to the safe use of pesticides, including federal registration, establishment of permissible tolerances in food and feed, and exchange of research findings.

Through formal memorandum of agreement, the three departments have established working procedures to assure effective coordination in carrying out their respective responsibilities.

The formal agreement is reproduced below :

**INTERDEPARTMENTAL COORDINATION OF ACTIVITIES
RELATING TO PESTICIDES**

by

The Department of Agriculture
The Department of Health, Education, and Welfare
The Department of the Interior

Purpose

Coordination of activities of the three departments pertaining to pesticides with special reference to registration and the setting of tolerances to give effect to the pertinent recommendations of the May 15, 1963, report of the President's Science Advisory Committee on "Use of Pesticides."

Existing Departmental Responsibilities

The following responsibilities of the respective departments relate to the registration of pesticides and the setting of tolerances for pesticide residues:

Department of the Interior

Fish and Wildlife Service. Conserving beneficial wild birds, mammals, fish and their food organisms and habitat, with regard to pesticides.

Department of Health, Education, and Welfare

U.S. Public Health Service. Protecting and improving the health of man in regard to pesticides.

Food and Drug Administration. Establishing tolerances for pesticides in or on raw agricultural commodities and processed foods.

Department of Agriculture

Agricultural Research Service. Providing for the safe and effective use of pesticides, including the registration thereof.

Agreement

1. Information

Each department undertakes to keep each of the other departments fully informed of developments in knowledge on this subject from research or other sources which may come into its possession. Additionally, the Department of Agriculture undertakes to furnish to the other two departments on a weekly basis a listing of all proposals affecting registration and reregistration, and the Department of Health, Education, and Welfare undertakes to furnish to the other two departments on a weekly basis a listing of all proposals affecting tolerances. Upon request, the Departments of Agriculture and Health, Education, and Welfare respectively will furnish to the other departments full information about any pending action on registration or the setting of a tolerance.

2. Procedure

(a) Each department will designate a scientist to act on behalf of such department in carrying out the terms of this agreement. The weekly listings from the Departments of Agriculture and Health, Education, and Welfare and any additional information relating thereto will be directed to these representatives.

(b) The departmental representative will review the weekly listing of actions pending. If there is reason to question any of the items on that list, this will be communicated to the originating department within one week stating the specific reason for need for further review.

(c) Upon receipt of such request the originating department will furnish the necessary information and make the necessary arrangements for further review and will withhold final action on the matter for an additional three weeks.

(d) If one department concludes that the proposal should be rejected in whole or in part, this view shall be expressed in writing and shall be supported by appropriate scientific evidence. Upon being notified, the department responsible for final action will take the initiative to work out a basis for agreement.

(e) In the event agreement is not reached among the department representatives within two weeks of the initial objection, the matter will then be referred directly to the secretary of the department responsible for final action with such information, views, and recommendations as the three department representatives deem appropriate.

(f) The secretary of the department charged with final action may then avail himself of whatever administrative and scientific review procedures seem appropriate under the circumstances. The other two departments will be notified in advance of the proposed final determination of the issues.

(g) The department representatives will jointly make a quarterly report concerning their activities to the secretaries of the three departments.

(h) The departmental representatives are authorized to review questions involving existing patterns of use of pesticides or tolerances upon which they have reason to believe that critical questions exist.

3. *Conference*

At least once each year the departmental representatives will arrange a general conference to discuss research needs, research programs and policy, and the application of research findings in action programs, including public information relating to pesticides.

4. *Federal Pest Control Review Board*

The Federal Pest Control Review Board may be asked from time to time to consider broad questions on policies relating to pesticides involving the interrelationships of control programs, research, registration, tolerances and general departmental recommendations to the public.

Exhibit B

AMENDED IN ASSEMBLY APRIL 21, 1965

CALIFORNIA LEGISLATURE—1965 REGULAR (GENERAL) SESSION

ASSEMBLY BILL

No. 598

Introduced by Assemblyman Petris

January 27, 1965

REFERRED TO COMMITTEE ON RULES

An act to amend Sections 160.2 and 1071.2 of, and to add Sections ~~1066.2 and 1066.3~~ to ARTICLE 4 (COMMENCING WITH SECTION 160.98) TO CHAPTER 1a, DIVISION 2 OF, the Agricultural Code, relating to pesticides.

The people of the State of California do enact as follows:

SECTION 1. Section 160.2 of the Agricultural Code is amended to read:

160.2. It is unlawful for any person to engage for hire in the business of pest control without first procuring from the director a license for each calendar year or portion thereof. Applications for such license shall be in the form prescribed by the director, and shall state the name and address of the applicant and the type of pest control in which ~~he~~ intends to engage. The application, except as hereinafter provided, shall be accompanied by a fee of fifty dollars (\$50). Each applicant shall further satisfy the director of his character, qualifications, responsibility, and good faith in seeking to carry on the business of pest control.

The director shall thereupon issue to such applicant a license entitling the applicant to conduct the business described in the application for the calendar year for which the license is issued, unless the license is sooner revoked or suspended. Such license may be renewed annually upon application to the director, accompanied by the proper fee, on or before the first day of January of the calendar year for which the license is issued. To any fee not paid when due, there shall accrue and be added a penalty of five dollars (\$5).

A person not regularly engaged in the business of pest control and operating only in the vicinity of his own property and for the accommodation of his neighbors shall not be required to procure a license, but shall obtain a permit from the director, register with the commissioner as provided in Section 160.3, and be subject to all other provisions of the chapter. The determination of the director that a person is engaged in the business of pest control beyond the vicinity of his own property or for the accommodation of others than his neighbors shall be final.

The director may refuse to grant a license or renewal of license and may revoke or suspend any license, as the case may require, when, after a hearing as herein provided, he is satisfied that the applicant or licensee is not qualified to perform the type of pest control under the conditions and in the locality in which he intends to operate, or, that he has committed any of the following acts, each of which is declared to be a violation of this chapter:

(a) Making false or fraudulent claims, or misrepresenting the effects of materials or methods to be applied, or applying worthless or improper materials, or otherwise engaging in unfair practices;

(b) Operating in a faulty, careless or negligent manner;

(c) Refusing or neglecting to comply with the provisions of this chapter, or of rules and regulations issued hereunder, or of any lawful order of the commissioner;

(d) Refusing or neglecting to keep and maintain the records required by this chapter, or to make reports when and as required;

(e) Making false or fraudulent records or reports;

(f) Operating in any county without first having registered with the commissioner, as hereinafter provided;

(g) Operating equipment with incompetent or unqualified persons in charge thereof;

(h) Fraud or misrepresentation in making application for a license or for renewal of a license;

(i) Failure to comply with the provisions of Article 4 (commencing at Section 1080) of Chapter 7 of Division 5 of this code.

SEC. 2. Section 1066.2 is added to said code to read:

1066.2. It is unlawful for any person to make any recommendation regarding the agricultural use of an economic poison in connection with a sale of an economic poison unless such recommendation regarding the use of the economic poison is given in writing to the customer and a copy retained on file by the party making such recommendation for a period of one year. Any recommendation shall conform to the label or to supplementary printed directions delivered therewith unless authorized by the director or the commissioner.

SEC. 3. Section 1066.3 is added to said code, to read:

1066.3. It is unlawful for any person to use an economic poison on any food, forage or fiber crop other than in the manner specified on the label or in any supplementary printed directions delivered therewith or to use an economic poison in a manner which permits any substantial drift to other crops, unless such application is expressly authorized by the director or the commissioner.

SEC. 2. Article 4 (commencing with Section 160.98) is added to Chapter 1a, Division 2 of said code, to read:

Article 4. Recommendations and Usage

160.98. *It is unlawful for any person to make any recommendation regarding the agricultural use of an economic poison either in connection with a sale of an economic poison or in connection with an advisory service for hire or for a fee, unless such recommendation regarding the use of the economic poison is given in writing to the customer. The written recommendation shall be delivered not later than the time of delivery of the material to the customer, or the time of use by the customer. A copy of the written recommendation shall be retained on file by the party making the recommendation for a period of a year. No written recommendation shall be in conflict with the label or with supplementary printed directions delivered therewith unless authorized by the director or the commissioner. The recommendation need not include any specific directions contained on the label or supplementary printed directions delivered therewith.*

160.99. *Unless otherwise expressly authorized by the director or the agricultural commissioner, the use of a pesticide by any person in pest control operations shall be in such a manner as to prevent any substantial drift to other crops and shall not conflict with the manufacturer's registered label or with supplementary printed directions delivered therewith and any additional limitations applicable to local conditions contained in the conditions of any permit or the written recommendations issued by the director or commissioner.*

Violations of this article constitute a misdemeanor.

SEC. 4.

SEC. 3. Section 1071.2 of said code is amended to read:

1071.2. Each applicant for a license shall also file a statement of the brands, trademarks, and kinds of economic poisons intended to be manufactured or sold, the correct name and percentage of each active ingredient and of each inert ingredient contained therein. Supplemental applications for registration of additional economic poisons may be submitted at any time without payment of penalty required by Section 1071.1. A change in the name or percentage, or both, of an inert ingredient shall not be construed to be a change in composition of the economic poison requiring a new registration unless the change in inert material results in a change in the use or application of the economic poison.

Exhibit C

STATE OF CALIFORNIA
DEPARTMENT OF AGRICULTURE

EDMUND G. BROWN, Governor

December 9, 1963

MR. PAUL K. HUFF, *Executive Secretary*
Senate Factfinding Committee on Agriculture
Room 409, State Capitol, Sacramento

Dear Mr. Huff:

As requested in your recent letter we are attaching a statement of the funds budgeted in the 1963-64 fiscal year for each of the three divisions involved, to support functions of the Department of Agriculture in the field of agricultural chemicals and in particular, pesticides. Also attached is a listing of the functions in each of the divisions and the funds budgeted for each activity.

It is to be noted that the total of funds budgeted for 1963-64 is \$17,896 less than the total given in testimony before the Senate interim committee. This differential is a result of adjustments made in the 1963-64 budget after an evaluation of prior year expenditures.

The department does not employ any private laboratories for the determination of pesticide residues in any kind of produce. We are not in a position to estimate the total work done on pesticide residue determinations by private laboratories.

We believe that no money is expended for the determination of pesticide residues in any commodities by any city or county agency. However, county agricultural commissioners have joint responsibility with the State Department of Agriculture in the enforcement of Division 2, Chapter 1a, Agricultural Pest Control Business of the Agricultural Code relating to the regulation of pest control operators. In this activity all county agricultural commissioners in the state spent \$142,967.18 during the fiscal year ending June 30, 1962. This information has not been tabulated for the fiscal year ending June 30, 1963 but we are sure that more funds were used in the counties in the 1962-63 fiscal year than in the previous year and no doubt still more funds will be used in the present 1963-64 fiscal year.

If you need additional information please call upon us.

Sincerely yours

CHAS. PAUL, *Director*

Exhibit D

STATE OF CALIFORNIA
MEMORANDUM

To: PAUL K. HUFF
Executive Secretary
Senate Factfinding Committee on Agriculture
Room 409 State Capitol
Sacramento, California

Date: December 3, 1964
Place: Sacramento

From: Department of Agriculture
Allen B. Lemmon, Chief, Division of Plant Industry

Subject: Testimony of Bailey Santistevan at June 16 Meeting of
Senate Factfinding Committee at El Centro

You have requested my comments concerning the testimony of Bailey Santistevan of Crown Chemical Company at the June 16 meeting of the Senate Factfinding Committee on Agriculture at El Centro.

A transcript of the hearing which you sent me shows, on pages 74 and 75, that Mr. Santistevan stated he had recently purchased pesticides for household use that he considered to be of an injurious nature. I will comment on them as follows:

1. One material contained 3.8 percent arsenic in the form of an ant paste. The poison law administered by the State Board of Pharmacy requires ant paste containing more than 0.40 percent arsenic expressed as metallic to be sold only through registered pharmacists. If the ant paste mentioned by Mr. Santistevan was not purchased from a registered pharmacist, it was an illegal sale.
2. Tetraethyl pyrophosphate, commonly known as TEPP, is an injurious material under Section 1080 of the Agricultural Code, and a permit from the county agricultural commissioner is required to use such a material. He comments: "Milk accidentally contaminated with this material would be hazardous if consumed by animals or humans." TEPP breaks down in water rather rapidly, and in a few hours would not be poisonous. I concur that it should not be permitted to get into milk, but because of its rapid breakdown consider it considerably less of a hazard than some other materials from the standpoint of food contamination.
3. Ninety-five percent sodium fluoride is no more toxic than various other chemicals that are used around households. I do not think it is any more hazardous than common lye.
4. The small candles that contained 12 percent DDT for flying insects will be investigated.

By a copy of this letter I am forwarding to Field Crops and Agricultural Chemicals, in the Division of Standardization and Inspec-

tion, the information you have given us. Followup will be made with Mr. Santistevan, and proper action taken to stop any violation of pesticide laws that appear to have been reported by him.

From: Department of Agriculture—H. E. Spires, Chief
Division of Standardization and Inspection

Supplementing Mr. Lemmon's memorandum to you dated December 3 on the above subject, attached is a copy of our inspector's report of investigation relating to testimony of Bailey Santistevan.

The first three products are currently registered for sale in California, but the Ortho fly killer containing lindane and TEPP has not been registered for at least 10 years. The manufacturer ceased marketing this product when TEPP was placed on the injurious materials' list.

You will note that the owner of the pharmacy was at fault for not requiring Mr. Santistevan's signature on the poison register at the time of purchasing the ant paste.

For your further information attached is a photocopy of the label for the new bug fog insecticide containing 12 percent DDT.

STATE OF CALIFORNIA
MEMORANDUM

December 21, 1964
Los Angeles

From: Department of Agriculture, L. Eskenazi
Field Crops & Agricultural Chemicals

Subject: Economic Poison Samples
12/10/64 memo VM-GDB, Economic Poison Samples

As requested in Mayhood's memorandum, on 12/15/64 I called on Mr. Bailey Santistevan owner of Crown Chemical Company, Holtville. The call was made with regard to the pesticides mentioned in Santistevan's testimony before the Senate Factfinding Committee on Agriculture in El Centro in June 1964.

Santistevan explained that he had been invited to testify before the committee and on 6/12/64 he purchased over the counter several pesticides which he considered to be extremely dangerous. He further explained that he, as owner of a chemical company and as a structural pest control operator, is required to comply with many regulations in regard to pesticides and yet anyone can go into a retail store and purchase these very dangerous materials. He wanted it made clear however that this was in no way a criticism of the Department of Agriculture. He said he understands the problems of our agency but he had wanted to bring the matter to the attention of the committee.

The products purchased by Santistevan were examined and they consisted of the following:

New Bug Fog Insecticide, a candle-type device containing 12% DDT, manufactured by Hanksraft; Reedsburg, Wisconsin.

Sodium Fluoride Merek Tinted, containing 95% sodium fluoride, manufactured by Merek & Co., Inc.; Rahway, New Jersey.

Kellogg's Ant Paste, containing 3.8% total arsenic as metallic, manufactured by Kellogg's Insecticide Co.; Los Angeles.

Ortho Fly Killer, containing lindane and 4.7% TEPP, manufactured by California Chemical Co.; Richmond, California.

Santistevan said he bought the above products from Parker's Pharmacy, 102 Fifth Street, Holtville. He did not have to sign a poison register for the arsenic ant paste nor was he asked for his permit to buy the TEPP fly killer. He also brought to my attention Stearn's Electric Brand Paste, and economic poison containing phosphorous 3%, manufactured by Stearn's Electric Paste Co.; Chicago, Illinois. This too, he said was dangerous. He thought that these same items were probably offered for sale in several other retail outlets.

I then called on Mr. Myrl Parker, owner of Parker's Pharmacy. He said that many of the materials on his pesticide shelf had been on hand for several years including some of those purchased by Santistevan. He said that he was not aware a permit was required for purchase of TEPP; and he said that the sale of the arsenical ant paste without requiring the purchaser to sign a register was "one of those things that got by."

Official samples were taken of the following materials:

1. Bug Fog Insecticide; Hankscraft, Inc. LE-1794.
Certificate of registration shows it should read HANKSCRAFT BUG FOG INSECTICIDE.
2. Kellogg's (the original) Ant Paste; Kellogg Insecticide Co. LE-1795.
3. Sodium Fluoride Merek Tinted; Merek & Co. LE-1796.
4. Stearn's Electric Brand Paste; Stearn's Electric Paste Co. LE-1797.

None of the Ortho Fly Killer could be found, but Parker said that in September 1964 he had had his employees clear out several pesticide items which were dumped and buried and he believed this product was among them.

Several drugstores, feed stores and livestock supply stores in Holtville, El Centro and Brawley were then inspected, but not a one of the items in question was found on their shelves.

Exhibit E

STATE OF CALIFORNIA
OFFICE OF LEGISLATIVE COUNSELSacramento, California
December 22, 1964Honorable Virgil O'Sullivan
P.O. Box 427
Williams, California

PESTICIDES—#7709

Dear Senator O'Sullivan:

QUESTION NO. 1

You ask us if it is constitutional for the Legislature to enact a statute which would make it unlawful for anyone to use a pesticide on any food or fiber crop other than in the manner specified on the label or on the printed directions delivered with the product.

OPINION NO. 1

Yes.

ANALYSIS NO. 1

The scope of legislative power to enact laws is only limited by restraints found in the Constitution, and unless a denial is found therein, the law will be valid (see *Dean v. Kuchel* (1951), 37 Cal. 2d 97). We have not found any constitutional limitation that would prohibit the Legislature from enacting such a statute.

As we understand the proposed statute, private business interests will determine the scope of the pesticide directions. We think the courts would treat the private determination not as a nondelegable legislative act to a private party, but as a prerequisite for the legislative act to take effect (see *Scovill Mfg. Co. v. Skaggs Pay Less Drug Stores* (1955), 45 Cal. 2d 881). The Legislature itself determines that a violation of the pesticide directions is a crime while participation by private interests is only in formulating the directions.

We note that the Legislature in the area of livestock remedies (Ch. 7B (commencing with Sec. 1095), Div. 5, Ag.C.) has made it unlawful to use any livestock remedy except in accordance with the instructions for use provided with the remedy (Sec. 1099.4, Ag.C.). However, the livestock remedies, including the instructions for use, are required to be registered with the Director of Agriculture (Secs. 1096 and 1096.7, Ag.C.), and the director is required to refuse registration if he finds that the instructions for use do not contain adequate warnings against use in those conditions, whether pathological or normal, under which its use may be dangerous to the health of livestock, or against unsafe dosage, unsafe duration of use, or unsafe methods of administration (Sec. 1096.5, Ag.C.).

Exhibit F

REPORT SAYS ALL MILK HAS PESTICIDE TRACES, DISCOUNTS PERIL

By GEOFFREY GOULD

WASHINGTON—AP—An exhaustive study of pesticides by the agriculture department discloses “no milk available on the market today, in any part of the United States, is free of pesticide residues.”

The report cites interviews with many scientists in the field, both government sponsored and private. It adds that these authorities said “there is no evidence that minute traces of any pesticide in milk have either an immediate (acute) or cumulative (chronic) ill effect of human health.”

Furthermore, the report says, federal and state health authorities have determined that “samples of mothers’ milk contained amounts of pesticide residues far in excess of the pesticide residues permitted by the F.D.A. (Food and Drug Administration) in cows’ milk.”

The report says breast fed babies are ingesting these residues in their mothers’ milk because the latter ingest foods which legally contain pesticide residues.

Yet it adds that “the study concluded that there were no ill effects on the babies as a result of the pesticide residue in the mothers’ milk.”

Tolerance Set at Zero

The government set tolerance for pesticide residues in cows’ milk shipped in interstate commerce is zero.

But the scientists told the government investigators “it is scientifically impossible to guarantee that any product is absolutely free of some pesticide, as it is only possible to state that a product does or does not contain more than a certain proportion of a pesticide.”

Part of the problem is that more sophisticated testing techniques have been developed, so that products which formerly tested zero for pesticide residues are now found to contain minute amounts.

The report says:

“Most scientists and representatives of the American Medical Association, industry, and federal and state governments interviewed by the staff questioned F.D.A. policy in establishing tolerances. They advised that F.D.A regulations for establishing tolerances for residues in certain foods are unreasonable and inconsistent.”

The milk situation is cited as an example.

The report was included with testimony of Secretary of Agriculture Orville L. Freeman before a house appropriations subcommittee March 19 and was made public today.

Overall Review

The report is in the nature of an overall historical review of the pesticide problem and traces much of the public concern to the book *Silent Spring* by the late Rachel Carson. Miss Carson in the book projected a time when no bird would sing or insect chirp because they had been poisoned by manmade pesticides.

The report attempts to "debunk" the Carson book in this manner: "The staff was advised, by scientists and by physicians, that the book is superficially scientific in that it marshals a number of accepted scientific facts. However, it is unscientific in (A) drawing incorrect conclusions from unrelated facts and (B) making implications that are based on possibilities as yet unproved to be actual facts."

The report details major pesticide incidents over the last 10 years, such as the cranberry scare of 1959; contamination of milk from sprayed alfalfa in Maryland, Pennsylvania and West Virginia in 1964; cauliflower on Long Island, in 1963; cheese in Utah in 1963; and the Mississippi River fish kills of 1963.

Reassurance Given

The report concludes that "there is no evidence to date that humans are adversely affected by long term ingestion of the minute traces of pesticides present in raw and processed foods.

"The greatest cause of public apprehension is that traces of pesticides may produce cancer. The cancer problem has changed little since the advent of synthetic pesticides."

In a February 3rd appearance before a different appropriations subcommittee, Food and Drug Commissioner George P. Larrick acknowledged criticism of the pesticide tolerances set by the FDA and said it has asked top scientists for advice.

"I don't know what they can come up with," Larrick said. "It may very well be that additional legislation in this field is needed."

Exhibit G

U.S. DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Food and Drug Administration—Washington, D.C. 20204

Pesticide residues are detectable in the American food supply by today's highly sensitive analytical methods, but the amounts of such residues are insignificant from a health standpoint, according to findings announced today by the Food and Drug Administration, U.S. Department of Health, Education, and Welfare.

F.D.A. made public the results of the latest of its continuing "total diet" studies undertaken to discover the quantity of pesticides in all kinds of food and drink consumed daily. Through the tests F.D.A. is able to evaluate broadly the results of all efforts made to keep pesticide residues below legal tolerance levels. The studies also provide clues as to which pesticides may be getting into the food supply in excessive amounts.

Pesticide levels found in the test samples were generally less than 1 percent of the safe legal tolerance. Many of the most commonly used pesticides were not found at all.

The F.D.A. studies are made on market-basket samples collected from grocery stores in three major U.S. cities. Groceries selected are representative of those that would be in a nutritionally satisfactory diet of a hypothetical average 16- to 19-year-old boy—biggest eater in the U.S. population.

Unlike previous total diet studies, the 1964 tests were made on composite samples representing 12 major food groups, for example, root vegetables, dairy products, and grain and cereal products. In previous years the contents of the market-basket sample were blended together in a single composite. The effect of the new procedure is to increase the sensitivity of the tests, and make their results more significant. Results of the 1964 tests showed pesticide levels lower than in the earlier studies.

All pesticides detected were at very low levels. Twenty-four different chlorinated pesticide residues would have been found had they been present but only seven were detected in tested samples. In 1963, comparable tests for 20 chlorinated pesticides detected nine kinds. No one sample contained all of the kinds found in either year. Tests made for organophosphate pesticides in 1964 detected no residues at the established detection levels; eight kinds were found in the 1963 tests.

The diet samples were also examined to detect herbicides and fungicides. These results were similar to those reported in previous years. Of 72 composites tested 13 contained detectable residues which were well within safe limits established for individual crops.

Method and Details of 1964 Study

The 1964 study was conducted in three F.D.A. district laboratories, representing northeastern, midwestern, and western regions of the United States. It covered foods being marketed in Boston, Kansas City, and Los Angeles. In each of these cities F.D.A. inspectors purchased a typical market-basket sample of many kinds of fruits, vege-

tables, dairy products, meats, and other commodities. These were prepared for the table by trained dieticians to eliminate variations in food preparation practices. Composite samples of the prepared foods representing 12 major food categories were then tested in the F.D.A. laboratories.

Following are the residues reported:

DDT, and its homologues (DDE and DDD), were most frequently found but at low levels ranging from 0.001 ppm (parts per million) to a maximum of 0.396 ppm.

Seven other chlorinated organic pesticides were found in the 72 commodity composites examined. Lindane was found in 11 composites at levels 0.001 ppm to 0.210 ppm. Heptachlor epoxide was found in 10 composites at levels from 0.002 ppm to 0.057 ppm. Dieldrin was found in 10 composites at levels from 0.003 ppm to 0.033 ppm. BHC was found in four composites at levels from 0.015 ppm to 0.141 ppm. Aldrin was found in three composites at levels from 0.001 ppm to 0.005 ppm. One composite contained 0.166 ppm of Kelthane. One composite contained 0.011 ppm TCNB (tetrachloronitrobenzene).

The chlorinated residues in the dairy products, meat, fish and poultry, and oils, fats and shortening were determined on the fat basis and would be much lower if the entire weight of the food were considered.

No organic phosphates were found in any of the 72 composites.

Four composites were found to contain 2,4 D at 0.03 ppm or less. Two composites were found to contain 0.01 ppm and 0.02 ppm PCP (pentachlorophenol).

Four composites contained residues of cabaryl ranging from 0.19 ppm to 0.42 ppm. Two composites contained dithiocarbamates at 0.4 and 0.5 ppm.

Bromide residues were found in 56 composites, with residues above 30 ppm in only four composites.

No arsenic residues were found at level above 0.1 ppm.

In addition to the total diet studies, F.D.A. laboratories continuously test individual samples of fruits, vegetables, and other foods for pesticide residues. In the past fiscal year the administration's laboratories analyzed 32,678 samples of raw agricultural commodities for excessive residues. Only 34 lots of high-residue commodities had to be seized in federal court actions. Under F.D.A.'s system of reporting high-residue lots to both the owner and to state officials, some other illegal lots were not shipped.

Pesticide tolerances are established on the basis that the commodity will be safe to eat as it is shipped to market. Normal trimming, peeling, washing, and cooking substantially reduces the amount of pesticide residue actually consumed.

LETTER OF TRANSMITTAL

May 3, 1965

HON. GLENN M. ANDERSON, *President*
and Members of the Senate
Senate Chamber
State Capitol
Sacramento, California

Gentlemen :

Attached hereto is the report of the Factfinding Committee on Business and Commerce. The report contains a summary of the hearings held by the committee during the interim period from August 1, 1963, to December 31, 1964.

This report incorporates the views of the state agencies involved as well as private organizations and individuals as to those matters of particular concern to them.

Respectfully submitted,

ALAN SHORT, *Chairman*
LUTHER E. GIBSON
JOHN F. MCCARTHY
STAN PITTMAN, *Vice Chairman*

New York 17, N.Y.

BREAD SIZES AND WEIGHTS

Senate Bill 1362

Senate Bill 1362 was introduced in the 1963 Session of the Legislature and referred to the Senate Factfinding Committee on Business and Commerce for study. In essence, the bill restores the old standards that provided for a 16-ounce loaf of bread and a 24-ounce loaf, or 1 pound and 1½-pound loaves, respectively. These sizes have been traditional throughout the United States. In addition to the 1-pound and 1½-pound loaves, the bill also permits the baking of a ½-pound loaf.

This legislation was introduced at the request of consumer groups throughout the state. Bread weight standards were established by the State Legislature in 1921 and amended in 1939 and 1947. The present weight standards were introduced in 1942 as a World War II measure designed to conserve wheat. In 1947, at the termination of World War II, the Legislature enacted the wartime regulations into California law with minor change. These present regulations provide for a standard loaf that weighs not less than 15 ounces nor more than 17 ounces, and a standard large loaf that would weigh not less than 22½ ounces nor more than 25½ ounces. These weights are subject to check only during the 24-hour period after baking. There are special provisions for inspection and weighing, and 10 loaves are tested for overall weights. The 10 loaves must average out to the tolerance permitted within the law. This procedure differs from the usual weights and measures procedures in use for testing other commodities throughout the state.

At the committee hearing, held in Sacramento on Thursday, April 9, 1964, the following parties appeared in support of SB 1362: Helen Nelson, Consumer Counsel of the State of California; Wilda Huffman, representing the Association of California Consumers; Betsy Wood, representing the Berkeley Consumers Co-op; Arthur Sealy of the Contra Costa Weights and Measures Department; Don Weinland; Assistant to the Director of the State Department of Agriculture; William Kerlin, Chief of the Bureau of Weights and Measures of the Department of Agriculture; Mrs. John Miller, Jr., California State Division of the American Association of University Women; Herman Grabow, of the California State Grange; and Senator Carl Christensen, author of the proposed legislation.

Appearing in opposition to the bill were Mr. Wesley Sizoo, attorney for the California Bakery Employers Association, and Merle Goddard, executive director of the California Grocers Association.

Testimony by Mrs. Helen Nelson, Consumer Counsel, indicated that California consumers purchased bread at a distinct disadvantage as compared with consumers in neighboring states. She stated:

“The weight of a loaf of bread established by law, and the bread law in California, from the consumer point of view is inferior to that of the neighboring states of Nevada and Arizona, as well as that of many other states in the country. We would hope that

your committee would recommend to the Legislature that we end the 15-ounce loaf of bread in California. We have brought some examples here to show you the difference between our bread size or weight in California and in the neighboring states, and maybe I can do this best by showing you some of these things.

Let me say at the outset that there are two; we have established two standard loaves of bread, fundamentally the pound and the pound and one-half. This is in order that there will not be a proliferation of sizes, and so that people will be able to compare the prices of bread, and to keep deception in bread to a minimum. This is a practice in practically all states. Here are three loaves of bread, one from Nevada, one from Arizona, and one from California. The loaf from Nevada bears the statement of a pound, and, as you will see, it costs 27 cents. The one from Arizona is a different company and is labeled one pound, and incidentally this particular one costs 26 cents. The California loaf, which is baked by the same baker as this Nevada loaf, is labeled 15 ounces and sells for 27 cents, the same price as the pound loaf by the same baker in Nevada. So, very simply, we think we ought to get a pound in California."

It is interesting to note that during their presentation to the committee while the 1963 Session of the Legislature was convening, the industry insisted that broad weight tolerances were necessary. Mrs. Nelson indicated that the same bakeries make sweet dough products such as cakes, sweet rolls, etc., and that these are packaged in precise ounces and are subject to the same rules and regulations as other commodities tested by the sealers of weights and measures. As far as she was able to ascertain there are no violations, and bakeries are well able to operate within the policies set forth by the Department of Agriculture regulations. She continued:

"This piece of Hostess pound cake is 11 ounces, so apparently the company that may profess to have trouble hitting a pound on bread seems to be able to hit 11 ounces when they are baking pound cake."

Testimony centered around the so-called elongated, fluffed, or ballooned loaf of bread which has become the major bread item on the retail market. It was pointed out that to prevent shoppers from becoming confused, the neighboring states of Arizona and Oregon have taken steps to insure the shopper's being able to distinguish between a pound loaf of bread and the pound-and-one-half loaf. These states require the affixing of a red label with the designation "balloon loaf" whenever a standard loaf of bread is whipped, fluffed, or ballooned. With this protection the customer is not misled, if he does prefer this type of bread.

In the course of her presentation Mrs. Nelson showed the committee various loaves of bread produced by the same baker and pointed out the disparities not only in weight but in price. The so-called elongated loaf or balloon loaf, which is the same weight as the standard 15-ounce size, sells for 31 cents, or 4 cents more than the regular 15-ounce loaf. In the State of Oregon the same baker sells the one-pound balloon loaf

for 27 cents, or 4 cents less than the similar loaf in California, which weighs only 15 ounces.

Testimony indicated that in many instances bakers doing business in California are baking bread in this state and shipping to neighboring states wherein the prices and weights are different from those obtaining in the State of California. A bakery in Sacramento bakes bread for both local and Nevada consumption; loaves weighing 16 ounces are transported to Nevada and sold there for the same price as the 15-ounce loaf of bread sold in California. The Oregon situation is even more aggravated, according to additional testimony by Mrs. Nelson:

"I would like to show you this. Now here, in Oregon, is a standard loaf of bread. Here is a loaf by the same baker that weighs the same amount which has been fluffed or whipped or whatever you want to call it. Now, the bakers tell us that there is a market for this balloon loaf. Some people like a fluffier loaf of bread, so the Oregon answer for this is 'O.K., let's just make sure those people who want it know what they are buying.' So they label their loaf a balloon loaf. Now you will see that these two loaves in Oregon sell for the same price. This one costs 27 cents, and this one costs 27 cents, and next to the label is the balloon bread designation, so as it sits on the shelf there can be no doubt about it.

"Now the same loaf of Wonder bread in California, which is ballooned, sits on the shelf at 31 cents, with no designation at all to alert the customer to the fact that it is a 15-ounce loaf of bread that has been ballooned. Now it would appear that where the customer is aware of it there is a choice. The bakers are putting no more dough into this; it sells at the same price. In California the housewife is paying 4 cents a pound more for the same amount of bread as the housewife in Oregon is."

Senator Pittman: "May I ask a question? The same number of slices?"

Mr. McKenzie: "The California loaf had 20 slices including the ends, and the Oregon had 21."

There was further philosophical discussion relative to the need for specifics and standards for foods:

Mrs. Nelson: "Basic foods like milk, milk for home use, is sold by the quart and two quarts, and butter the Legislature or regulation in most every state specified must be sold as pounds, halves, or quarters. These basic foods are traditionally . . . and I think very wisely the Legislature specified the quantities so that prices can be compared and cheating and deception kept to a minimum. Therefore the sizes of the loaf of bread which have been permitted in the past have been kept to the minimum, these two basic ones, really, for retail use. Now the question occurs as to whether or not the changes in the family composition . . . we should review these and perhaps authorize another because any other unauthorized size is illegal."

There has been a great deal of discussion to the effect that the present bread sizes are confusing to the customer, and that he actually does not know what he is buying. There is a feeling that perhaps comparison

cannot be made, that people in this hustle and bustle age do not take the time to make comparison, and that it is the Legislature's duty to be protective. The testimony of Mrs. Betsy Wood of the Berkeley Consumers Co-op was most interesting. This co-op represents 30,000 families in the Berkeley, Walnut Creek, El Cerrito and Castro Valley areas. Mrs. Wood has worked as a part-time home economist for the co-op.

Mrs. Wood: "I have never found one who knew the California bread weights or that the big one is 50 percent larger than the small one unless we had recently told them. It is an easy thing to forget because these are confusing numbers. It took me four years of consumer education work before I realized this relationship and I'm ashamed to say that, too. I have been taking a course at the University of California Medical School and this last Monday we distributed a sheet of questions to—these are mostly hospital dieticians. We asked them—well, the sheet reads: 'There are two standard sizes of bread for sale in California retail stores. The minimum weights of these breads are ----- and -----.' Then the next is 'How much more does the larger loaf weigh than the smaller loaf: 20 percent more, 25 percent more, 33 $\frac{1}{3}$ percent more, 40 percent more, 50 percent more, 75 percent more, 100 percent more.'

"Some people didn't hand in sheets, but we received 56 sheets back. Three people out of 56 got all answers right, in other words, the two weights and then the relationship between the two. Two more knew the weights but they missed the relationship. Sixteen said the weights were 1 pound and 1 $\frac{1}{2}$ pounds. There were 21 other answers and 14 blanks indicating they couldn't even begin to guess at any of these."

The whole question of confusion in costs was brought out vividly in Mrs. Wood's testimony:

Mrs. Wood: "I would like to give an example of what it might cost a family in terms of confusion when they cannot compare prices or they just do not know how to compare prices.

"I brought a little bread, too. These two breads are the same. The brand makes no difference. This is the whole wheat bread, it is 15 ounces, and it cost 33 cents. This is the large loaf, 22 $\frac{1}{2}$ ounces, and it cost 37 cents. Now, to get 22 $\frac{1}{2}$ ounces of bread at this rate would cost a person 49 $\frac{1}{2}$ cents. In other words, to get the equivalent of a large loaf it would cost 49 $\frac{1}{2}$ cents. This would be a rather expensive bread. Most people wouldn't buy it, and yet they are paying the equivalent when they pay 33 cents for this one. If a family of four used this or the equivalent of this, in another example with the same kind of relationship, if a family of four buys six—and this would be a reasonable number, even a little low if you have active children—six small loaves a week, it would cost \$1.98 for six of the 15-ounce loaves at 33 cents. Now, you get the same amount of bread by buying two-thirds as many loaves or four loaves a week of the large loaf, and that costs \$1.48 for the same amount of bread."

Senator Gibson: "Different quality?"

Mrs. Wood: "No, as far as I know—no. I haven't called the company, but I have tasted both of these. There is nothing on the label to indicate any difference in quality."

There was further discussion as to the confusion in price comparison.

Mrs. Wood: "No, I am saying that if the bill that is under consideration is passed and this were clearly labeled 1 pound and this clearly labeled $1\frac{1}{2}$ pounds, that a housewife could compare and decide how much she wants to pay for the convenience of the smaller loaf."

Senator Gibson: "May we ask a question, what is that labeled now, presently?"

Mrs. Wood: "This label says 1 pound $6\frac{1}{2}$ ounces, and this says 15 ounces. Perhaps you would all go home and give your wives this questionnaire and see if they know what the small loaf and the large loaf is. My argument is that with the weights at 15 ounces and 1 pound $6\frac{1}{2}$ ounces, our educational level or something is not high enough for people to be able to tell that the big one is 50 percent more than the little one. I'm amazed at this, but this is my experience and I keep asking this question. I think they should have the choice, but if the bread is labeled clearly at 1 pound and $1\frac{1}{2}$ pounds, then the choice would be more rational than paying one-third more for this per pound. That is a lot to pay. . . .

"My feeling is they should know they are paying 50 cents a week extra or the equivalent and would be able to figure it out, or it would cost \$2.17 a month extra, or \$26 a year extra just for the difference in the small and the large loaf.

"Of course, bread is a staple in the diet of most people, and people who have low incomes and people with large families and many growing children eat more bread than others. I think these people need weights they can understand. As it is now, it is hard to calculate, but I would say at least 90 percent of the people cannot compare the standard loaf and the large loaf.

"If this bill becomes law and if the weights are clearly labeled, I predict that most people will learn how to compare 1 pound and $1\frac{1}{2}$ pounds and if there is a half-pound they can do that."

The previous industry argument and testimony to the effect that weight tolerances were necessary rendered the testimony of Mr. Kerlin, State Chief of the Bureau of Weights and Measures, of notable interest.

Mr. Kerlin: "We just took from our files and from our records the reports that the Sealers send us of the bread that they have weighed over the past few months. We did an analysis of what we found on these 60 reports so that the committee would have the benefit of what is actually occurring. Now, as far as weight deviations in loaves of bread, 73 percent of all of the loaves weighed during that period were controlled by the industry within plus and minus one-fourth of an ounce. In other words, they were someplace within this 15- and 17-ounce range. This weight was within one-fourth of an ounce of each other all the way through. Twenty-seven percent were not. Five percent were controlled

within plus and minus one-half ounce. We thought this would be interesting for the committee for their future study.

Chairman Short: "What was the 27 percent?"

Mr. Kerlin: "The 27 percent were within the range, present range of plus and minus one ounce or you might say the two-ounce range. Let's put it that way, because there is a two-ounce range between 15 and 17 which now is permitted and these 27 percent were within that area."

Mrs. John Miller, Jr., spoke on behalf of the California Division of the American Association of University Women, which has a total membership in California of 25,836.

Mrs. Miller: "The California State Division of the American Association of University Women urges and supports California legislation on bread packaging and labeling which will restore to the consumer the traditional rights of freedom from deceptive labeling and packaging and the ability to purchase food in pounds, pints, quarts or even fractions thereof.

"Traditionally, bread—as with other foods—has been sold in even measures. A loaf of bread weighed 1 pound or $1\frac{1}{2}$ pounds. During a wheat shortage shortly after World War II, California bakers were given temporary permission to sell a slightly lighter weight loaf—a minimum standard loaf of not less than 15 ounces, and a large loaf of not less than $22\frac{1}{2}$ ounces were permitted.

"Recent developments in the breadmaking process have produced a loaf seemingly larger, but in reality weighing but the minimum 15 ounces. This process is known as 'ballooning,' or 'batter whipped,' or some other name meaning nothing more than that it is baked in a larger pan with more air locked into the same weight loaf. Such a loaf sells for more than the standard small loaf. While this may make for a lighter, softer loaf of bread, the housewife should know that she is paying more for bread weighing the same as the smaller sized 15-ounce loaf."

A similar statement was offered by Mr. Herman Grabow, speaking on behalf of the California State Grange.

Mr. Grabow: "I am Herman Grabow, legislative representative for the California State Grange, and while we haven't taken up this specific thing, the things that the Grange stands for are along this line, that we believe that everybody should be very easily informed to identify the amount they are buying whether it is gallons or pounds, like on the milk, when we sell, we sell by pounds of milk, pounds per hundred, and to go back to this pound exact amount, it seems to me I remember that Shakespeare wrote a play about a pound of flesh and it couldn't be more or less. Our position is this, that today with the automatic machinery we have, that tolerances should be to a bare minimum because we know that in the butter machinery where we have a pound it is almost exactly a pound, and therefore we are in favor of this bill."

There was further discussion relative to bread baked in California and shipped out of the state:

Senator Christensen: "Perhaps for the orderly presentation, there was a suggestion or Senator Stiern asked a question relative to certain testimony that Mrs. Nelson may have given before the standing committee. Perhaps Mrs. Nelson would like to respond to that question at this time."

Mrs. Nelson: "We did present to the standing committee during the regular general session last year two loaves of bread from the same baker, one of which has been bought locally here in Sacramento and one which I bought up in Tahoe City or across the border in Nevada, a pound loaf up there, 15 ounces here, the same price."

Senator Stiern: "Made by the same baker and made in the same bakery in California?"

Mrs. Nelson: "Yes."

Senator Stiern: "In other words, this bakery produced a loaf of bread in a Sacramento bakery with the prevailing label?"

Mrs. Nelson: "I believe it was a San Jose bakery."

Senator Stiern: "A San Jose baker. Correct me if this is wrong, a San Jose baker baked two loaves of bread, one was a 15-ounce loaf and one was a 16-ounce loaf. They were both labeled at the same price and the 16-ounce loaf was transported as far as the Nevada line and sold in Nevada at the same price to the Nevada housewife as the loaf would have been sold to the housewife in San Jose, and the San Jose housewife received 1 ounce less of bread but paid exactly the same price as the 16-ounce loaf in Nevada. The labor is the same in San Jose, the transportation cost was on top of the one that went to Nevada. Am I confusing you? I want for for the record of this committee the same thing we had on the other committee."

Mrs. Nelson: "That is correct. We traced the loaves of bread to the same bakery. We can only assume, I mean the judge has left and we can only assume that it had to be transported to Nevada. I can't prove it."

Senator Stiern: "The reason I made the point is because Senator Gibson was asking a former witness if they knew what the labor problems were between the various states and I thought this was an illustration where the labor problem was the same on the two loaves of bread plus the fact there was a transportation cost on the one."

The California Bakery Employers Association, represented by Mr. Wesley Sizoo, was obviously in opposition to the proposal. In answer to a question by Senator Stiern, Mr. Sizoo replied that it was a fact that bread is produced in California, shipped to Nevada, and sold there at a price similar to that asked for a comparable loaf in California. The reason for this, according to Mr. Sizoo, is that the bakers have no way and seek in no way to regulate the retail price of bread on the grocers' shelves, and that the Federal Trade Commission and the Robinson-Patman Act would prevent them from so doing. In the view of the bakers, bread prices are controlled by the retail grocer, and not by the wholesaler. Questioned as to how bread prices were determined on the wholesale level, Mr. Sizoo offered the opinion that testimony along this line would be in violation of federal regulations.

Senator Pittman inquired as to the price tags on bread:

Senator Pittman: "May I ask a question? Just while you are traveling along that line, these stamps, are they put on in the factory, these price stamps? There is a red stamp."

Mr. Sizoo: "At the plant."

Senator Pittman: "Does the wholesale grocer tell you, that is the manufacturer, 'I want this price put on'? You are talking about price; I am just asking for information."

Mr. Sizoo: "I'm sorry, Senator, but I can't answer that because I am not involved with the merchandising phase of it. Again, I question the legality of the Robinson-Patman Act in this type of discussion. I do submit without any equivocation that the baker has and can have no control over the price at which the retail grocer sells this product."

Senator Pittman: "Well, then, somebody should explain to me at what point those red seals go on."

Senator Backstrand: "You see 31 and 27 on them. What Senator—excuse me, Mr. Chairman, what Senator Pittman is asking is at what point and where do those labels get on there?"

Mr. Sizoo: "Well, they are put on generally at the plant, but I would prefer—now, we are getting into a technical area of pricing and dealing with the retail grocer, and I would prefer to defer to one of the gentlemen from the wholesale bakers who are present today and would be glad to take up that aspect of the problem."

Senator Stiern: "Because of a phrase you used, Mr. Chairman, I would like you to know I am not accusing anybody of shady dealing. I am asking why does the Reno lady get the bonus of one ounce. Why does the Nevada housewife get the bonus of one ounce over the California housewife? We are not talking about shady dealings. Why does the one lady in Nevada get an advantage?"

Mr. Sizoo: "In what sense do you use the word 'bonus'?"

Senator Stiern: "Sixteen ounces for the same price the California lady gets 15 ounces. That is a one-ounce bonus for the same labeled price on the end of the loaf. The loaf is the same labeled price."

Mr. Sizoo: Is your question then, sir, why is the lady purchaser in Nevada getting more for her money per ounce in Nevada than in California? Is that the question?"

Senator Stiern: "Well, she gets one ounce more for her money. If a San Jose baker sends a loaf to Reno and sells it to the lady for the same price as the lady in San Jose gets a loaf of bread which is one ounce less weight, then the Reno lady has a bonus of one ounce."

Mr. Sizoo: "We are assuming first of all that the statement made is a fact. Again, if we were in court, we would have to establish on what day, at what store, and with what frequency, if any, these loaves were purchased and by whom at a Reno location."

Some discussion over logical terms followed, in an interchange between Senator Stiern and Mr. Sizoo:

Senator Stiern: "You don't deny she got 16 ounces in Reno where the San Jose lady got 15 ounces?"

Mr. Sizoo: "This is a possibility."

Senator Stiern: "Yes, a possibility or a fact?"

Mr. Sizoo: "No, a possibility. Now, we are getting into another area which I was going to discuss later and that is the aspect of the bill which concerns itself with the tolerance between 15 and 17 ounces. Mr. Kerlin has also testified in effect, I think, on behalf of the industry by saying that so few loaves are found to be below the 15, most average in the 16 area so it is roughly the same."

Senator Stiern: "I'm not a lawyer and I am not—I don't think it is a possibility, I think it is a fact that the law says in Nevada a loaf weighs 16 ounces, and it is a fact in California the law says it is 15 ounces. This is not a probability or possibility, this is a fact."

There was more discussion about bread being baked in California and shipped to Nevada, and the discussion got far afield. In order to bring it back to a focal point, Chairman Short inquired:

Chairman Short: "Why do they get a better deal in Nevada?"

Mr. Sizoo: "We don't think they do, sir. How do you define a better deal, in what sense is this used?"

Chairman Short: "You don't have to be a lawyer to answer this. The loaves of bread cost the same and one is heavier, and we have to take into account the distance; the cost of labor is the same because it is made in one location. So why do they get a heavier loaf of bread, which is a better deal because there is more dough, there is more bread there."

Mr. Sizoo: "And for the same price?"

Chairman Short: "For the same price."

Mr. Sizoo: "There is one fallacy in the statement which the Consumer Counsel made and that is the assumption that the labor cost is the same. As a matter of fact, that is a gross misstatement. We are just recently concluded negotiations on behalf of those bakers who ship into Nevada with the Teamsters Union Local 533. Nevada is a right-to-work state and the wage rates, the distribution cost in Nevada is substantially lower than that governing the distribution of bread in California, all of which are under master agreement. The baking industry has negotiated—we are not complaining or blaming the labor unions for anything. We have negotiated master contracts with them and we are living up to them, but our facts remain our labor costs are grossly higher in California than they are right across the border in Nevada and the big cost is not in production in this sense. It is in distribution, the commissions paid for distribution, overtime."

Chairman Short: "Is this your answer? I'm waiting for it. Why do they get a bigger loaf of bread shipped out of San Jose at the same price as the purchaser in San Jose pays for it?"

Mr. Sizoo: "In the first place, none is shipped out of San Jose, just to be technical, but there are some producers in Sacramento or Stockton and sent to—"

Chairman Short: "Say Sacramento or Stockton then. I think Senator Gibson answered it. He said because they want to do it that way. I think that is the answer."

Mr. Sizoo: "There are really two answers. There are a multitude of answers. I thought I had answered your question by saying (1) we don't agree the consumer is getting a better deal; (2) we can't control the price the grocer charges for the merchandise in Reno."

Senator Gibson: "I think it is not a very difficult question to answer. The fact that they require a 16-ounce loaf in Nevada, that is the first requirement of a loaf there, and that is number one. Now, if this bakery down in Sacramento desires to meet those conditions and send his bread up and sell it competitively, that is his business, and I think that is the answer."

Senator Stiern: "Mr. Chairman, I still would like the witness to answer yes or no or give an answer. Is it not true that the Nevada housewife gains a bonus of an ounce of bread in weight for the same money when both loaves are baked within California?"

Mr. Sizoo: "Here is the difficulty—the answer is no, and the reason is this, you said for the same money. We must in order to answer that question take a survey over a representative period of time, etc., etc. . . ."

Chairman Short: "Well, I think we can resolve this situation, because we have to proceed, by pointing out whether the wholesale price was the same, and so this would take care of the fluctuations that might happen in Nevada. If the wholesale price is the same to the purchaser in Nevada as it is in Sacramento or Stockton—"

Mr. Sizoo: "I will be glad to answer that. The answer to that, sir, is that first I don't know anything about the wholesale price, and secondly if I did, both federal and state law would prevent me from discussing it with you."

In discussing the situation with respect to the State of Oregon, the opponents of the legislation argued in their testimony that we are not taking all factors into consideration.

Mr. Sizoo: "Many factors were ignored in this pricing example, one of which is that one of the major mills in the entire west coast, Centennial Mills, is located right in the City of Portland. There are plants in Portland, and therefore the bakers can buy their flour practically next door and it is not shipped in. So this is just one more factor and again is why the rates in Oregon for both inside production people and distribution are lower in the State of Oregon than they are in California. . . ."

The industry opposed the legislation on the basis that it would remove tolerances contained in the present regulations:

Mr. Sizoo: "The present tolerance of 15 to 17 ounces has been in effect for a good number of years, as in this case Mrs. Nelson accurately stated the history of how the California law amended and how it came to its present form. It is in the nature of things

in this industry that the equipment which is used, and technically the term is the divider, is not so precise as to make possible the flat use of the term one pound or pound and a half. This tolerance is necessary. Now, it is not of course impossible to raise tolerances, or if we used the term one pound and one pound and a half, bakers obviously would have to increase the weight. This is not impossible, but to do so to comply with this bill would require anywhere from 5 to 7 percent ingredient increase and would increase the cost to the baker quite substantially, to a degree where the baker in the present narrow profit margin could not absorb this, and this certainly would not be a service to the consumer. We are very concerned about the fact that we must have this increased tolerance, this present tolerance, and that because of the ingredient cost would have to go into this. Bakers would just not be able to absorb this.

"Secondly, we feel that there is no problem here of misleading the public or as one of the ladies who testified suggested, I am not sure as we ended up whether she was accusing the industry of fraud or not. We were in sort of a nebulous area there, but if in fact fraud is accused to the industry, then the State Senate and also several state committees and state bureaus are parties to this fraud because in the last Legislature the industry cooperated with the state agency, the Sealer of Weights and Measures, who did us the courtesy to point out several deficiencies which in the department's judgment existed in the labeling of bread. We worked very closely with the department and as a result came up with some legislation which went through the committee without any opposition and with the full endorsement of the industry."

Mr. Sizoo was referring here to SB 377, a piece of legislation which provided that the printed type indicating bread sizes and weights must be in quarter-inch type, in letters contrasting in color with the wrapper, and must be conspicuously located on the wrapper. In discussing weight sizes, the industry insisted that there is nothing sacred about 14, 15, 16, or 18-ounce loaves of bread, so long as the public is not misled. They object to the notion of a half-pound loaf because they feel it is unnecessary.

Mr. Sizoo: "The half-pound loaf is one which would involve a great deal of expenditure to the industry in equipment and production changes and we don't think would serve a general consumer need.

"Present bread products and processing and refrigeration and freezing which the average housekeeper has, makes it unnecessary to be concerned with bread not being preserved over a matter of a couple of days. It can be frozen almost indefinitely and a refrigerator can keep it at least a week. Also it is misleading sometimes for people to think that if they were to buy a half-pound loaf the price necessarily therefor would be one-half the price of the one-pound or minimum of 15 ounces. This doesn't follow at all . . . the same production labor cost would be applicable, the same wrapping costs, the same or greater distribution costs. . . . So with all these other major costs which would remain fixed,

the difference in price . . . would be negligible. We have not taken the position in this industry that we are opposing any change for the sake of opposition alone . . . there is no point in changing the law unless there is a pressing need for the benefit of the consumer, which we do not see exists here. I might add . . . that if this bill were to become law . . . it would impose another and very gross cost upon the industry members in California. There was a tremendous cost to make the changes required by SB 377 which went into effect January 1 . . . and we think to have to do this again would impose a totally unwarranted and very gross added cost to the industry, which it is just not in a position to stand."

Discussion followed concerning the sizes and portions of bread products:

Senator Stiern: "You made a statement where you said there is nothing sacred in a 14, 15, or 16 loaf. In your opinion why would the larger bakeries object to making a 16-ounce loaf and selling it as such? What would be the objectionable feature to that?"

Mr. Sizoo: "The objectionable feature to that is, Senator, if we made a flat 16-ounce loaf it would require, in order to avoid any risk of noncompliance, baking or adding to the weight of the dough, and to add to the weight of the dough to comply with this bill as presently written would raise the cost anywhere from a quarter to a third-of-a-cent for a loaf of bread in many cases, and that profit just isn't there and the cost of this would have to come from somewhere."

Senator Stiern: "Well, what I was thinking, if the consumer would desire a pound or a pound-and-a-half loaf of bread and was willing to pay for the difference of getting the extra ounce, is there any particular loss then to the baker?"

Mr. Sizoo: "If the consumer were willing to pay the additional money, there might be, but we have to consider this, with each increase in price of bread comes an increase in consumer resistance and consequent decrease in bread consumption. For example, if we did add the extra ounce and did, as would be necessary, increase the price, consumption would fall down and the industry as well as its many thousands of employees in this state would suffer. And again, as long as the loaf is conspicuously labeled as it is now, we feel nobody is in any way being deluded or misled.

" . . . if I may add one thing more, statements were also made about the so-called balloon loaf, elongated or expanded loaf. This is suggested as something which is a snare and a delusion upon the public. We submit again that we have this 15 ounce very conspicuously labeled here and apparently the consuming public in California has raised no objection to this because this loaf constitutes 52 percent of the sales of white bread in this state. If that is so, certainly this is something which has not met with any consumer resistance . . . we don't think it is appropriate for us to deprive the people of this loaf."

The representatives of the baking industry were questioned extensively about the difference of the loaf of bread in Nevada and Oregon, and the nature of the pricing structure; they were most evasive and argumentative. At the conclusion of the noon recess the representative of the industry clarified and corrected his testimony.

Mr. Sizoo: "I wanted to answer a question which was posed this morning by Senator Stiern, it is a fact, if I correctly phrase your question, that the Nevada housewife receives a 16-ounce loaf of bread where the California housewife would receive a 15-ounce loaf. Yes, it is true. And if the same price were paid for each loaf in each case, then it would follow that she has received a more advantageous transaction there . . . I want just very briefly to state that the price and the conditions under which this bread is sold are governed by local competitive conditions and are not established by the baker.

"Secondly, we talked about the end seals. . . . I have checked this with the representatives of all major bakeries who are here and they have advised me that these end seals are in fact placed on the loaf of bread by the baker at the factory and are delivered to the retail grocery store with the end seal in place. The end seal is used by the baker at the request of the retail grocer . . . this is just the suggested price which as I have said has been established by the grocer through competitive conditions, competitive factors, but the grocer, of course, is not obligated to sell a loaf of bread to the consumer at the price indicated on the end seal. . . ."

There has been considerable discussion to the effect that bread companies give rebates to certain large users, and this practice is employed in a competitive manner either to secure new accounts or to destroy competition. In this connection, Senator Short inquired as follows:

Chairman Short: "It has been my experience in the past as far as milk is concerned, and other basic food items, that there is a rebate section in the Agricultural Code concerning milk products. Is there any comparable section as far as bread is concerned? If the grocer gets a rebate from a bread manufacturer, is there anything in the code that says this is illegal and finable?"

The chairman was answered by Mr. Merle Goddard, representative of the California Grocers Association:

Mr. Goddard: "The only thing that would apply would be the Robinson-Patman Act. If they give a discount to one operator, they would have to give it to the other. Specifically there is nothing with regard to either the grocer's cost or what he charges. It is strictly based on competition, and whatever he wants to charge."

The California Grocers Association, represented by Mr. Goddard, recorded opposition to the bill, and was specifically opposed to that provision which would permit a baker to manufacture a half-pound loaf. Mr. Goddard registered doubt that any public benefit would be derived from such a practice, for substantially the same reasons as those offered in prior testimony. The grocers association had an addi-

tional and more important reason for opposing the manufacture of the half-pound loaf:

Mr. Goddard: "If Section 19802.5 is added to law, more shelf space for bakery products in the supermarket would be required, and shelf space in the food store costs money. Another factor not to be overlooked is that placing half-pound loaves in food stores would have to increase the percentage of stale returns that are picked up by the bakers and this certainly adds to their cost."

Chairman Short: "Do you have any position as far as the 15-ounce loaf is concerned?"

Mr. Goddard: "Well, frankly, it doesn't affect the grocer generally, Mr. Chairman. However, I think looking at it realistically, that competition itself has pretty well taken care of the consumer as far as the value in California is concerned, and this is a personal opinion. I think if we require the bread sizes, the pound loaf to go to 16 ounces, you are certainly going to have a tendency there to increase cost to the consumer, and on that basis I would question the advisability of passing legislation particularly unless there is good sound reasons for it. If it can be determined that the customer is actually being gypped, cheated, or frauded . . . you have the responsibility of legislating."

Senator Stiern: "I would like to ask a question. . . . Why would you oppose a provision for a half-pound loaf when it would seem that it would allow people to manufacture it who wanted to, and grocers to stock it who wanted to, because I know of bakeries that would like to make a half-pound loaf, and what difference does it make to the grocer? He doesn't have to buy it or stock it, and the manufacturer does not have to manufacture it. It would only provide a provision where one could if they wished."

Mr. Goddard: "Officially and legally, Senator, you are perfectly right. But from the standpoint of competition, which we think is the greatest of all public benefactors, competition would say they would have to put it in. In a typical supermarket, you are running about three shelves and somewhere between 30 and 40 feet of shelf space for bread.

"Now to satisfy all these demands, satisfying them with the varieties that the consumer wants . . . in a great many cases it would certainly require an expansion of the bread space in a food store, and we don't think that this is in the public interest. . . . It is true that if you put this into law and authorize it, it is not mandatory, but the competitive forces would make it so."

Senator Stiern: "I am thinking of a family bakery and small bakeries who manufacture and put it right out of their own outlet. They certainly would not be manufacturing to put it on supermarket shelves. Therefore they would not be competitive to you and still they would not be denied doing this in their own individual small neighborhood bakery."

Mr. Goddard: "Conceivably you have a point there, Senator . . . we would certainly look at that possibly that we could come out with some sort of definition of a so-called retail baker . . . but I would think, too, that the first thing we would have to determine is whether or not there is really a public demand for it

. . . if there was a widespread demand on the part of the consumers for it, the grocers would hear about it . . . and we would probably come to the Legislature with that request, but it just doesn't exist."

Senator Stiern: "Well, you mean at the grocery level."

Mr. Goddard: "That's right."

Senator Stiern: "But it does exist in a small bakery and people come in asking for it and they cannot be provided with it because of this law."

Mr. Goddard: "I don't know from the standpoint of a small bakery, Senator."

At the suggestion of the chairman, subsequent meetings were held with Consumer Counsel Helen Nelson, Mr. Sizoo, counsel for the baking industry, and Committee Consultant W. W. Montgomery attempting to ascertain if there might be a possibility of working out some mutual solution to the questions raised at the hearing. The first such meeting was held in Sacramento, with a representative of the Continental Baking Company and Mr. Vince McKenzie, Advisor to the Consumer Counsel, also being present. This meeting was not very fruitful; discussion was largely a recapitulation of the material covered at the hearing in April. The industry representatives requested an opportunity to speak with their members, and suggested that a meeting with other industry representatives might yield more results. It was agreed that such a meeting would take place.

In December a meeting was held in San Francisco, attended by representatives of the major bakeries of the State of California, Consumer Counsel Helen Nelson, and Committee Consultant William Montgomery. Mr. Stanley Langendorf, head of Langendorf United Bakeries, acted as industry spokesman at this meeting. The position of the Langendorf Bakeries is enunciated in the 10 points raised by Mr. Langendorf, and his opposition to the bread bill is most explicit. In the course of the discussion, Consumer Counsel Helen Nelson suggested that if there were no agreements and the industry felt that competition would be the deciding factor, then perhaps all regulations pertaining to bread sizes should be repealed. If this were the case, the bakers could then bake such sizes as they might choose, and competition would dictate the price and size of a bread loaf without respect to state regulations. The representative of the Interstate Baking Company indicated that in many states where his firm operates there are no bread regulations, and that they would be most happy to see all rules and regulations dropped. The representatives of the other baking companies expressed a desire to see a 20-ounce loaf of bread placed on the market. It was quite obvious from the discussion that there is no consensus or agreement among members of the baking industry.

During this meeting, the question of the role of the so-called "captive" bakeries such as those operated by the Safeway and Purity chains was raised. It was pointed out that they had been solicited for their position on the legislation and had been noncommittal. They had evidenced no opposition to the legislation and there were indications that they were not opposed to it. It should be pointed out that these chains sell their own bread for from 2 cents to 4 cents less than that charged by the large commercial machine bakeries.

In these discussions, the bakeries indicated that they could not increase bread loaves to the proposed 16- and 24-ounce sizes without increasing their price. This would not necessarily be the fault of the proposed legislation, but is connected with the fact that the industry has negotiated a union contract covering labor costs in the production and distribution costs of bread. This contract provides for annual increases for the next three years for both the inside workers and the drivers. It seems apparent that the price of bread is going to increase irrespective of whether or not bread sizes are increased.

It should be emphasized that testimony by the industry itself indicates that the so-called balloon bread represents 52 percent of the bread sold in the state, and the price differential between the regular 15-ounce loaf and the balloon loaf is 4 cents, the regular loaf selling for 27 cents and the ballooned loaf for 31 cents. If it is necessary to raise the price of a loaf of bread because of the one-quarter cent ingredient cost increase predicted, there is certainly no logical reason for an increase in the price of the balloon loaf.

After the report was completed, the committee chairman received a letter from the Safeway Stores which stated that on March 1, 1965, they intended to increase their bread sizes to the 1-pound and 1½-pound loaf for their stores. This was to be done without any corresponding increase in price.

In the appendix are letters from both industry and consumer sources, supporting their respective positions on the proposed changes in bread size.

RECOMMENDATIONS OF THE COMMITTEE

As a result of the action on the part of Safeway Stores in raising their bread sizes to the 16-ounce and 24-ounce loaves, the committee feels that competition should compel the rest of the baking industry to follow suit. For this reason, it is felt that no legislation with respect to the 16- and 24-ounce bread sizes be introduced. However, the committee feels that the 16- and 24-ounce sizes should be the California standard.

Insofar as the 8-ounce loaf of bread is concerned, it is recommended that at this time, legislation be introduced that would permit bakeries to produce this size for sale on the bakery premises.

There is reason to believe that the baking industry is engaged in questionable selling practices that might be in possible violation of the Robinson-Patman and/or the Cartwright Act. Investigation by the Attorney General's Office is suggested.

With respect to these questionable selling practices, it seems apparent that they are harmful to the industry and of no benefit to the consuming public. It is recommended that the industry explore the possibility of a marketing order for the industry under the State Department of Agriculture.

APPENDIX

AMENDED IN SENATE MAY 29, 1963

SENATE BILL

No. 1362

Introduced by Senators Christensen, Williams, Nisbet, Arnold,
Rattigan, Farr, and Cobey

April 23, 1963

REFERRED TO COMMITTEE ON BUSINESS AND PROFESSIONS

An act to amend Sections 19800, 19801, 19802, 19803, 19804, 19805, and 19806 of, and to add Section 19802.5 to, the Business and Professions Code, relating to bread.

The people of the State of California do enact as follows:

SECTION 1. Section 19800 of the Business and Professions Code is amended to read:

19800. All loaves of bread, sliced or unsliced, made or procured for the purpose of sale, sold, offered or exposed for sale in this State shall weigh, until 24 hours after baking, ~~within the tolerances prescribed by the Director of Agriculture pursuant to Section 12211~~ *baking, the weight prescribed by this chapter* for standard loaves, large loaves, or small loaves,; provided, however, that larger loaves having weights that are multiples of the mean weight of a standard loaf weight may be made or procured for sale to restaurants, caterers, sandwich makers, hotels, commissaries, institutions, or other public eating places. *Whether or not any lot of loaves of bread conforms to the weight requirements prescribed by this section shall be determined pursuant to Section 12211.*

SEC. 2. Section 19801 of said code is amended to read:

19801. "Standard loaf" shall weigh one pound avoirdupois *net weight*.

SEC. 3. Section 19802 of said code is amended to read:

19802. "Large loaf" shall weigh $1\frac{1}{2}$ pounds avoirdupois *net weight*.

SEC. 4. Section 19802.5 is added to said code, to read:

19802.5. "Small loaf" shall weigh one-half pound avoirdupois *net weight*.

SEC. 5. Section 19803 of said code is amended to read:

19803. Bread commonly known as "twin loaves" may be made or procured for the purpose of sale, sold, offered or exposed for sale, providing each unit of such twin loaf conforms to the standard weights as herein defined for standard loaf, large loaf, or small loaf.

SEC. 6. Section 19804 of said code is amended to read:

19804. ~~Whenever any bread is sold in any wrappings there shall appear on the body of the wrapping in letters so as to be clear and legible to the buyer or prospective buyer, in a color contrasting with the background, the words "standard loaf," "large loaf," or "small loaf," as the case may be, and such label shall also comply in all respects within the provisions of Chapter 6 (commencing with Section 12601) of Division 5 of this code.~~

19804. Whenever any bread is wrapped, in any wrapping, for sale through retail outlets, there shall appear on the body of the wrapping, or on the insert band, in letters clear and legible to the buyer or prospective buyer, in a color contrasting with the background, the words required by this section. Such label shall also comply in all respects with the requirements of Chapter 6 (commencing with Section 12601) of Division 5 of this code.

The words required on such label shall read "standard loaf, net weight one pound," "large loaf, net weight 1½ pounds," or "small loaf, net weight one-half pound," as the case may be, and the lettering shall be of a minimum height of one-quarter inch.

SEC. 7. Section 19805 of said code is amended to read:

19805. The provisions of this chapter shall not apply to crackers, pretzels, biscuits, buns, scones, rolls, muffins, or loaves of fancy bread weighing less than one-fourth of a pound avoirdupois or to what is commonly known as "stale bread," sold as such, provided the seller shall, at the time of sale, expressly state to the buyer that the bread so sold is stale bread.

SEC. 8. Section 19806 of said code is amended to read:

19806. Any person, firm or corporation who shall make or procure for the purpose of sale, sell, offer or expose for sale within this State any bread in loaves which do not conform to the requirements which are prescribed by this chapter, ~~or which do not weight within the tolerances prescribed by the Director of Agriculture pursuant to Section 12211, is guilty of a misdemeanor. this chapter is guilty of a misdemeanor.~~

Statement on Senate Bill 1362

BREAD WEIGHT

By Betsy Wood, Consumers Cooperative of Berkeley

My name is Betsy Wood. I work as a part-time home economist for the Consumers Cooperative of Berkeley. We have eight supermarkets in the East San Francisco Bay area and have over 30,000 member families. Our home economics program is aimed at helping our members be wise consumers.

We urge passage of Senate Bill No. 1362 because the present weights are so confusing that shoppers do not know how to compare prices on bread. Practically no one realizes that the 1-pound $6\frac{1}{2}$ -ounce loaf is 50 percent heavier than the 15-ounce loaf.

This past week I asked eight store managers or grocery managers about bread weights. Not one remembered the two legal minimum weights or even the relationship between them. I have never found *any* grocery person who knew the bread weights. It took me about four years of work in the field of consumer education before I realized that 15 ounces is two-thirds of $22\frac{1}{2}$ ounces.

On Monday night we distributed a questionnaire to dieticians, nutritionists, and teachers taking a course at the University of California medical school. The sheet read:

THERE ARE TWO STANDARD SIZES OF BREAD FOR SALE IN CALIFORNIA RETAIL STORES.

THE MINIMUM WEIGHTS OF THESE BREADS ARE
----- and -----.

How much more does the larger loaf weigh than the smaller loaf?

20% more	-----
25%	-----
$33\frac{1}{3}\%$	-----
40%	-----
50%	-----
$66\frac{2}{3}\%$	-----
75%	-----
100%	-----

We received 56 sheets back. Three people out of 56 got all answers right, two more knew the minimum weights, but missed the relationship between the two.

Sixteen said the weights were 1 pound and $1\frac{1}{2}$ pounds. There were 21 other answers and 14 blanks, indicating that these people couldn't even guess.

I would like to give an example of the cost of confusion to the family who cannot compare prices.

A 15-ounce loaf of whole wheat costs 33 cents.

A $22\frac{1}{2}$ -ounce loaf of whole wheat costs 37 cents.

To get $22\frac{1}{2}$ ounces of bread at the rate of the smaller loaf you would pay $49\frac{1}{2}$. This is pretty expensive. If a family of four buys six small loaves a week, it would pay \$1.98.

The same weight of bread can be had in four large loaves for \$1.48. Therefore a person who does not know how to compare 15 ounces and 22½ ounces might spend one-third more for the family bread. This would mean an extra cost of 50 cents/week, \$2.17/month, \$26/year.

Bread is a staple in our diet. Poor people and families with many children eat more bread than others. These people need weights that they can understand. As it is now, I think at least 90 percent of the people cannot compare "standard" and "large" loaves. If SB 1362 becomes law, and if the weights are clearly labeled, I predict that most people will learn how to compare one-half pound, one pound and 1½ pounds.

March 31, 1964

HON. ALAN SHORT, *Chairman*
Senate Factfinding Committee on
Business and Commerce
State Capitol
Sacramento, California.

Dear Senator Short:

I am writing to express my organization's interest in SB 1362. This bill, restoring bread to prewar weights and authorizing a one-half-pound loaf, was unanimously endorsed by the 1,400 seniors attending our annual convention last May.

It has long seemed to me that bread and other flour products have been permitted to rise in price far above a legitimate profit level, so that bread can no longer be a mainstay of low-income families with growing children—the staff of life as we used to consider it.

We are particularly interested in seeing the half-pound loaf become a reality. As you know, a large percentage of our elderly live alone, and on extremely limited incomes. The smaller loaf is obviously more practical and more desirable for them. The can ill afford to pay for and then discard bread that has not been consumed within a reasonable time, as so often happens, with large loaves. A smaller bread would eliminate such waste of their limited food budget, and would make possible a little more variety in diets that are often too restricted because of food costs.

We hope also that SB 1286 will be enacted as a protection against "ballooning" of loaves and other deceptive practices. It is bad enough to have to pay today's inflated prices, let us at least not have "blowup, inflated bread" to boot!

Thank you very much for your efforts in behalf of consumer protection.

Sincerely yours,

MRS. ALEX VAN FRANK, *President*

April 6, 1964

Senate Factfinding Committee on Business
and Commerce
California Legislature
State Capitol
Sacramento, California

Gentlemen:

Consumers Cooperative of Sacramento favors passage of SB 1362—Christensen, because it will return the loaf of bread in the store to its original standard weights. At the present time a loophole in the law permits unduly wide variation in the weights. The loaf of bread commonly understood to be a “one-pound size” may vary from 15–17 ounces. The large loaf may vary from $22\frac{1}{2}$ – $25\frac{1}{2}$ ounces. Obviously, the baking companies take advantage of this loophole, and the minimum under the law becomes the standard size.

Of four standard brand “large loaves” weighed by one of our representatives on Sunday, April 5, three weighed between $22\frac{1}{2}$ and 23 ounces; one weighed about $23\frac{1}{2}$ ounces. Thus, three out of four were at the minimum weight. All loaves were priced the same.

Senate Bill 1362 will correct this situation. Standard sizes will be set at 1 pound and $1\frac{1}{2}$ pounds, respectively, within tolerances provided by the Department of Agriculture for all baked goods. The advantages to the consumer are obvious.

The bill also would permit manufacture of a one-half pound loaf of bread. Single persons, young couples, and retired people with limited incomes will be the major beneficiaries of this permissive legislation. No baking company is required to manufacture the small-size loaf. However, we believe there will be a ready market for one-half pound loaves of bread, if any manufacturer decides to meet the need.

We strongly urge favorable action by your committee on Senate Bill 1362—Christensen; and passage of the bill by the California State Legislature this spring.

Very truly yours,

Dear Senator Short :

As a homemaker with a college major in home economics I am concerned with consumer problems and misrepresentation.

I understand that there will be a committee hearing on SB 1286—Deception in Bread, and SB 1362—Size of Bread Loaves, on May 27th.

It is my hope that the committee will act favorably on both of these bills.

Very truly yours,

MRS. LOUIS POLUZZI

STATEMENT OF MERLE J. GODDARD
Executive Director, California Grocers Association
before the
Senate Factfinding Committee on Business and Commerce
April 9, 1964

SENATE BILL 1362

Mr. Chairman and members of the committee, my name is Merle J. Goddard, representing the California Grocers Association.

Senate Bill 1362 proposes to eliminate the present weight tolerances on bread that is manufactured and sold in California. The baking industry has or will testify in regard to this provision as set forth in the bill.

Senate Bill 1362 also proposes to add Section 19802.5 to the code which would authorize the manufacture and sale of a half-pound loaf. The California Grocers Association is opposed to this provision. The proponents might argue that the manufacture and sale of a half-pound loaf of bread would benefit persons living alone. We seriously believe that any public benefits that might be derived under this theory would be more than offset by other important disadvantages that must be taken into consideration.

1. Freshness of product. Bread can be kept frozen and maintain its freshness for indefinite periods of time. Therefore, little or

nothing would be added to freshness of product if Section 19802.5 were to become law.

2. On the surface, the passage of Section 19802.5 might lead us to believe that a person can purchase an 8-ounce loaf of bread at half price. This is not true. The only savings that could be accrued in the manufacture and sale of an 8-ounce loaf would be ingredient cost; all others, baking, wrapping, advertising, distribution and the sale of the 8-ounce loaf would not be reduced. In fact, it is reasonable to assume that the costs would be increased because of the inefficiency that the 8-ounce loaf would create for industry in general.

The California Grocers Association also has a more direct reason for opposing the bill. If you have ever visited a supermarket and noticed the bread rack, you will have seen that it has almost reached the point of utter confusion.

To satisfy demand, the baking industry provides a wide variety of breads. For example, one company reports that it manufactures some 50 different varieties of bread and, of course, to satisfy demand, the grocer has to handle a great many different varieties to please his customer.

If the law is changed whereby a half-pound loaf is legalized, it will only be a matter of time until it makes its appearance on the market. Bread is one of the most popular items in a food store and the efficiency in operation at the store level would be affected, and any time we affect operating efficiency, we tend to raise prices. The supermarket industry operates on less than 2 percent net profit before taxes and it is certainly in no position to absorb added costs.

Also, if Section 19802.5 is added to law, more shelf space for bakery products in the supermarket would be required, and shelf space in the food store costs money.

Another factor not to be overlooked is that placing half-pound loaves in food stores would have to increase the percentage of stale returns that are picked up by the bakers and this certainly adds to their cost.

We therefore ask that Section 19802.5 not be passed. This request is not at all unusual. The Legislature has historically entered into the field of container sizes when they deemed it necessary, referring to the many agricultural commodities that are so regulated—lettuce, oranges, grape and many others.

Respectfully submitted,

MERLE J. GODDARD
Executive Director

HON. ALAN SHORT, *Chairman*,
Senate Factfinding Committee on Business and Commerce
State Capitol Building
Sacramento, California

Dear Senator Short:

We understand that SB 1362 which has been referred to your committee for interim study will come up for hearing on April 9, 1964. We wish to present our views on this proposed legislation. The industry unanimously opposed this bill in 1963 when it came before the Business and Professions Committee, and we would like to reiterate at this time our strong opposition to this bill.

Senate Bill 1362 proposed to change the bread standard minimum weight of 15 ounces to 1 pound, and 22½ ounces to 1½ pounds. The baking industry has been in a price-wage squeeze and a large number of bakers today are operating at a loss. To increase the weight approximately ½ to 1 ounce on the small loaf and 1 to 1½ ounce on the large loaf would not make a noticeable difference to the consumer. On the other hand, it is estimated that the increased cost to our company would amount to \$300,000 to \$500,000 per year on the volume of business in our various plants in California, which would practically wipe out the profit reported to our stockholders for the year ended June 30, 1962. Prices of bread cannot be readily adjusted to meet the increased cost of labor, raw materials, wrapping supplies and hundreds of other items which enter into the operation of a bakery.

The laws of the States of Oregon and Washington provide for the same standard weights as currently in effect for the standard minimum 15-ounce loaf and the standard 22½-ounce loaf, as currently in effect in California. Our company, as well as other bakers, cross the Oregon and Washington lines and any changes that would be made in the current bread weight laws would cause complications in a free flow of merchandise from California into the States of Washington and Oregon, and vice versa. The current bread weight law in California has proven to be satisfactory to the consumers in the state and there has been no point of complaint.

This proposed bill also provides for a one-half-pound loaf, with the assumption that this would make possible selling a small loaf at approximately one-half the price of the current standard 15- to 17-ounce loaf now provided by the California Standard Bread Weight Law. Manufacturing and distribution costs of a one-half-pound loaf would be identical to the current 15- to 17-ounce loaf of bread. The only saving would be in material. Even if it were sound and practical to market a one-half-pound loaf of bread, the saving to the consumer as

against a full standard-sized loaf would be negligible. *A one-half-pound loaf of bread is practically unknown in the baking industry throughout the United States and would not be economical or satisfactory to either the consumer or baker.* Furthermore, a one-half-pound loaf would not possess the flavor and would dry out quickly—almost comparable to a roll. The present-day bread will retain its freshness for at least five days.

An agreement was reached with the Bureau of Weights and Measures through the enactment of SB 377, to designate weight on wrappers or labels of bread in one-quarter-inch sized letters, in order to avoid any possible misunderstanding to the public.

The baking industry today is performing a real service to the consumers, giving them bread of high quality and nutrition, and with practically no complaint from the consuming public. Senate Bill 1362 if enacted would impose a serious financial problem on the baking industry and could lead to insolvency on part of a great number of bakers.

We trust you will see the wisdom of not recommending Senate Bill 1362 to the Legislature at the next session. We sincerely and strongly believe it would be disastrous and cause bankruptcy to a number of bakers in the industry.

Sincerely yours,

STANLEY S. LANGENDORF

THE HONORABLE ALAN SHORT
Senate Chamber
State Capitol
Sacramento, California

Sir:

We strongly protest the passage of proposed Senate Bill No. 1362, as we consider it costly and damaging to the baking industry, with ensuing increased costs to the buying public. The present requirements that minimum weights of 15 ounces and 22½ ounces be imprinted on all wrappers safeguard the consumer from any deception. And, the recent passage of Senate Bill No. 377 stipulating the size of type gives further assurance that the weight legend is obvious and legible.

In view of the fact that the consumer is not being deceived as to the weight of the bakery product, we can see no advantage to the consumer or the State of California in the passage of a bill that would impose such great additional costs to be borne by the bakers of this state.

The present minimum weight law recognizes the baker's problem with uncontrollable variables, such as machines not yet perfected to measure precise weights, atmospheric pressures, human error, etc. The removal of these tolerances will mean increased raw dough costs, in-

creased labor costs for additional processing, less yield from wrapping paper because of greater loaf volume, cost of changing weight legend on all wrappers (a cost just absorbed by the baking industry on passage of Senate Bill No. 377, which would now again be incurred), and increased inspection labor to insure compliance. No doubt the State of California would have increased payroll costs in its department of inspectors also.

To comply with the proposed exact weights of 1 pound and 1½ pounds, the baker will be compelled to increase baked weights to somewhat in excess of the 16-ounce and 24-ounce weights in order to overcome the variables. In making this increase in weight, the baker must recoup his cost of additional ingredients, wrappers, labor, etc., through an added cost to the consumer— and for the same number of slices of bread.

We sincerely urge defeat of this bill as not being in the interest of the public by being a financial burden to the baker and to the housewife.

Sincerely,

J. P. MENICHETTI
Regional Manager

SENATOR ALAN SHORT
State Capitol
Sacramento, California

April 3, 1964

Subject: SB No. 1362

Dear Senator Short:

As one who has been in the baking business in both southern and northern California since 1931, I am very concerned as to the additional costs and difficulties the passing of the subject bill will create for the industry, if passed as now written.

Contrary to the belief of some persons, machinery has not been developed to accurately scale a piece of dough to the point of closer tolerance than the present law allows, except when the divider is new which condition cannot be maintained because of excessive cost of replacement.

It is my opinion that certain changes could be made in the present law that would protect the consumer and would add only slightly to the cost to the baker which no matter how slight, must be passed on to the consumer.

I am sure that at the hearing April 9th, the California Bakery Employers Association will present a program which will provide changes necessary to the improvement of the present laws.

Sincerely,

GLENN A. FULLERTON

April 1, 1964

HON. SENATOR ALAN SHORT

Senate Factfinding Committee on Business and Commerce

State Capitol

Sacramento, California

Sir:

It has come to our attention that Senate Bill No. 1362 will be heard on April 9, 1964, before the Senate Factfinding Committee on Business and Commerce. This particular bill has reference to the weights at which loaves of bread may be baked and sold in the State of California.

We would like to register our serious objections to the passage of this form of legislation. Although the essential idea behind the legislation may be a noble one, it is certainly impractical from a business standpoint. According to the language of the bill, a bakery selling bread which does not conform to the exact weight requirements, would be guilty of a misdemeanor.

We have been permitted a tolerance for a good many years which has permitted us to produce a baked loaf of bread to meet the stated weight requirements. We know of no state in the United States that does not, in practice, grant tolerances on weights of food products. The burden that would be imposed upon the baker by Senate Bill No. 1362 would be intolerable. Due to the nature of the industry and its equipment, it is physically impossible to scale the weights of each loaf of bread by scientific accuracy. There must be some variance.

If we are compelled to produce an exact 1 pound and $1\frac{1}{2}$ pound, it would be necessary for the baker to increase his present scaled weights by approximately 7 percent over what we are now scaling. Again, it would be impossible, as mentioned above, to be exact in those finished weights even though we increased our scaling weights by 7 percent. Because of this increased cost, it would ultimately have to be passed on to the consumer. We can see no benefit to the consumer from such an increase.

We strongly suggest that you give serious consideration to this very rigid legislation and use your best efforts to defeat it at the time it is brought to a vote, which would permit us to continue operating as we now are. As you may not know, last year we were compelled to make certain changes in our weight listings (SB No. 377) which cost not only us but the industry as well, a large sum of money.

Very truly yours,

CONTINENTAL BAKING COMPANY

JAMES W. HOOKS

THE SACRAMENTO BEE . . . Saturday, December 19, 1964
SUPERIOR CALIFORNIA NEWS

RENO BAKERY SUES TWO CHAINS ON PRICE CUTS

CARSON CITY, Nev. — UPI Welsh's Bakery, Inc., of Reno has filed a \$600,000 damage suit in the federal court charging two bakery chains conspired to put the company out of business by undercutting prices and making kickbacks to certain key customers.

Welsh's Bakery, a bread wholesaler, named as defendants in a suit filed yesterday The Continental Baking Company, of Rye, NY, which markets Wonder brand bread, and Interstate Bakeries Corporation of Kansas City, Mo., which produces Blue Seal bread.

Reno, Tahoe Market

Welsh's Bakery said that since 1961 the two companies joined to monopolize the sale of bread and bread products in the Reno and Lake Tahoe markets, restaurants and clubs. The complaint said the

firms sold bread in Nevada at lower prices than it did in California, despite the fact the bread was made in plants in Sacramento.

Welsh's claimed the bread manufactured in California cost 2 to 3 cents a loaf to ship to Nevada. The complaint said loaves of bread sold in California weigh less than those sold in Nevada because of the difference of requirements in state law.

Rebates Charge

The Reno bakery charged certain "key customers" were offered 5 to 7½ percent rebates below the published wholesale prices and the defendants would keep prices low in Nevada while high in other areas.

The out-of-state firms also were accused of submitting "unreasonable low prices" to stop Welsh's from getting government contracts.

THE DRYCLEANING INDUSTRY

THE DRYCLEANING INDUSTRY

Three bills were introduced at the last session of the Legislature affecting the drycleaning industry: SB 61, SB 957, and SB 347. All three bills were formulated in response to problems that have arisen in the industry as a result of the expansion of the so-called agency operations and the growth of the coin-operated drycleaning establishments.

Senate Bill 61 would do away with that section of the Business and Professions Code requiring the operator of an agency to take an examination before he can secure his license. The wholesale operators depend on either pressing shops, or what are known as "drop shops," to keep their wholesale cleaning operation functioning at full capacity in the large metropolitan areas. This is a relatively large segment of the industry. A person rents a store, puts up racks, and generally sets himself forth as a cleaning and dyeing outlet at cut-rate prices. He receives the garments, they are picked up by the wholesaler, cleaned and sometimes pressed, and returned to the outlet for distribution.

The introduction of SB 61 came about because of incidents in the less populated areas, where a local barber or local mercantile store operator, as a convenience to his customers, would accept laundry and drycleaning to be picked up and returned by the wholesale route man. For this courtesy to his customers, it was necessary for him to pay a \$10 license fee, and also to pass an extensive examination dealing with the operation of a drycleaning plant, etc. In many instances, the total annual volume of this outlet would not exceed \$150. The mere cost of taking the examination and paying the license fee acted so as to greatly diminish the inducement to the agent; the extra expense and trouble were not worthwhile. As a result, the public suffered a reduction in service or had no service whatsoever.

Senate Bill 347 and SB 391 were the products of the rapid growth of the coin-operated drycleaning establishments, similar in operation to the laundromats that sprung up all over the state. The large manufacturers of equipment for these operations helped to set up and finance these establishments, and assisted in the training of the operators. Because of the wording of the present drycleaning act, anyone operating a cleaning plant must have an operator's license. In order to qualify for this license, he must have one year's experience or 360 hours of schooling in the industry.

Senate Bill 957 would exempt the coin-ops from the licensing provisions of the Dry Cleaning Act. Senate Bill 347 is even more drastic. It would abolish the State Board of Dry Cleaners and do away with the Dry Cleaning Act.

The present regulations were adopted in 1945 and the State Board of Dry Cleaners was then set up to regulate the drycleaning industry for the protection of the public. Prior to this time, the regulation of the drycleaning industry was vested in the State Fire Marshal's office, which for the past 40 years has made inspections of premises for fire safety and for the protection of the public. It still issues a permit for the coin-op plants, and for any plant using boilers.

In addition to the three bills that were introduced in the 1963 session of the Legislature, Senate Resolution 188 was introduced and passed. It requested the State Board of Dry Cleaners to adopt regulations giving

relief to the coin-ops with respect to those provisions requiring licensed operators and attendants.

The State Board of Dry Cleaners held a public hearing and did adopt certain changes in the regulations. They now have what is known as a cleaning plant owner classification with the designation "no spotting and pressing." In addition, they have the cleaning plant operator, "spotting and pressing"; and cleaning plant operator, "not spotting and pressing." The designation and classification "no spotting or pressing," for both the operator and the owner, are new categories and are for the purpose of meeting the special requirements of the coin-operated drycleaning plants.

The examinations for the new categories have also been changed. That of the plant owner and operator where spotting and pressing is done consists of a written examination and also a manual pressing and spotting examination. Where no spotting or pressing is to be done, there is a written examination only. Despite these changes, the operators of the coin-operated establishments are still desirous of further alterations, and also feel that they are being discriminated against.

The testimony of the industry representative, Mr. Guy Catterton, was along these lines.

Mr. Catterton: "Just to refresh your recollection on the problem that, we feel, faced the self-service drycleaning industry. These stores have wholly automatic drycleaning machines. The stores have typically some washing machines and some drycleaning machines. Some stores have coin-operated pressing machines, and they also have liquid detergents or liquid soaps that customers use to place on the garments before they place them in the machines for drycleaning. The problem that we have here today, is that under the present law, we must have a registered operator. Now, these stores that have these drycleaning machines, have heretofore, until a recent change, had to have a registered operator who was qualified to know all about drycleaning, know all about spotting and know all about pressing, even though some of their stores do not have pressing equipment. Many times they are self-service type pressing machines in which you put a coin in the machine, and you can then use the pressing equipment to press your own clothes. This has worked a hardship upon the people who own these stores because they themselves, unless they become qualified, cannot work in their own stores. To qualify for this, you have to pass the test, have a year's experience or schooling in lieu thereof, and this experience in the industry, even though we are again using wholly automatic equipment, is a new concept in the industry."

Senator Pittman: "You came up here with the idea of cleaning, spotting and pressing."

Mr. Catterton: "Yes, sir."

Senator Pittman: "You are aware now that the board has set up some new categories as a result of this last session?"

Mr. Catterton: "Yes, I am."

Senator Pittman: "Do you have time to make some comments as your feeling on this. Is this meeting the problem?"

Mr. Catterton: "No, it is not, Senator, they have set up a category of cleaning only."

Senator Pittman: "Clean and spot only?"

Mr. Catterton: "Yes, they still require for one thing, a year's experience or something in lieu thereof, for this operator to be able to work in a coin-operated store. They still have to have this year, and they still have to take an examination. Their examinations, from what I can gather in talking to people, are quite extensive, and they make the examination on items that are not related to the coin equipment but are related to many chemicals."

There was further discussion concerning the fact that the coin-operated industry has now gone into spotting, pressing, and dyeing in order to reduce its overhead.

Mr. Catterton: "Until recently, all the coin-operated stores have had to go into competition to help increase the growth with which to pay for a registered operator. The present law means that we have to shape our industry along the lines of competition with the commercial field instead of letting us shape the growth of our industry along with what we feel that the public will buy and accept in our own self-service concept. You see the problem as we see it, is to have reasonable regulations. We should recognize that this self-service concept or coin-operated concept is a new concept and should not have to be under the same laws applicable to the commercial drycleaning field. I said before that I felt that the law in the present form penalized the small operator, the small self-service clan, for this reason: under the present regulations you have to have a highly qualified operator. Any commercial establishment in the traditional drycleaning field may have 20 or 30 employees that do the work of drycleaning and spotting and pressing. Only one of them has to be a registered operator though he may have 20 or 30 people who actually do the work on the clothes. I do not know what this man's duty may be, but as long as he is on the premises this satisfies the law. Now, with the self-service store, even though it has only one employee, this employee must under the present law be the self-same, highly qualified man, even though the people are really doing the cleaning themselves and the pressing themselves. Also it means that unless the owner also happens to be this qualified person they cannot work in their own store and satisfy this legal requirement. What we hope to do is to obtain some new law that will recognize this new field and have a reasonable regulation which will enable people to take advantage of the low costs of drycleaning, doing it yourself, and still have available this regulation in its present form, if this is satisfactory with the present traditional drycleaning people, so that people who are protected are benefited by the laws who wish to continue to take advantage of sending their clothes out to be drycleaned, spotted and pressed."

In the testimony of the coin-op representatives, the industry is seeking to define the self-service establishment and write its place into law. They are also urging that the term "spotting" be spelled out under

the present rules. The addition of a soap or detergent on the clothes before they are cleaned is considered "spotting." The coin-ops feel that the present composition of the Board of Dry Cleaners should be changed. They are urging both greater public representation and representation from the self-service branch of the industry. The coin-op representatives also urge that the examination be more reflective of the categories being examined, and that the provisions requiring the examiner to have been in the industry for five years be changed. They urge that the one-year-experience requirement be deleted insofar as the self-service cleaning establishments are concerned. It is their feeling that an examination which would indicate competence to operate the machinery should be sufficient, and that the technical knowledge of chemicals and solvents is more detailed than necessary for their type of operations. It was the opinion of the industry representatives that the examination should take into account the machines that are being used, the solvents used in the machines, and the general health, fire, and safety regulations pertaining to that equipment and to the industry as a whole. It was not their opinion that the Board of Dry Cleaners should be eliminated. Testimony from an operator of nine self-service drycleaning plants in Southern California was of interest. Mr. Jules Moster owns and operates these plants and is also a distributor of the equipment used.

Jules Moster: "I have found from experience, not so much at the present day, but when the self-service drycleaning stores first opened this law, which required a licensed operator, actually operated to the detriment of the public and to the detriment of giving good service in these stores. This was simply due to the fact that there was a tremendous shortage of licensed operators with the large amounts of self-service drycleaning stores going in. . . . The whole thing apparently is being administered to restrict competition. Now, I do not think this is surprising. The State Board of Dry Cleaners is composed of six members from the so-called regular or professional drycleaning industry. I would say that it would be a little difficult for them to administer the law not in their own favor. It has been my experience, and I have attended, I would say, 90 percent of the meetings of the board in the last year and a half, that they are not at all interested in the public's welfare. They are only interested in restricting competition of the drycleaning industry. . . ."

Senator Short: "Let's get to the point. If you've got some hard blows to give, let's give them now. Now is the time"

Mr. Moster: "I contend, Senator, the State Board of Dry Cleaners does not run the board for the public's interest, but mainly to restrict competition in the industry, that they have attempted to prevent the coin-operated or the self-service drycleaning from succeeding. And they have succeeded in this attempt. A lot of them have gone bankrupt. I contend that they spend something . . ."

Senator Short: "May I ask you to back up on that last statement. You say they succeeded and that a lot of them have gone bankrupt. I read a little bit in the article in *Time* magazine, for example, that indicates that many of them that have gone into this particular business, many small operators investing their

life savings, just have not made it in these self-service businesses. I am sure that when the opponents of this bill are heard this afternoon they will make a big point of that. Would you comment on whether a lot of the people are going bankrupt, whether you think the drycleaning board as presently constituted with their present policies is responsible for any of this? I think that this is the heart of the matter."

Mr. Moster: "They are responsible in part for all of it and probably directly for some of it. I couldn't give you any definite figures. But it has created a hardship on us to have to hire operators that—who were technically supposed to know what they were doing but actually did a very bad job. This was the problem."

Senator Short: "Will you explain your statement, please. Now, the party responsible for all of it . . . go ahead."

Mr. Moster: "Well, sir, I can take a real good store that I have and put a bad operator in it and ruin that store overnight. I can take a store that is not doing very well because it has got a bad operator in there and I can make that store go by doing a little advertising and put a good operator in there. The heart of the matter is to have a good person running this store. And this law has forced us not to have good people running our plants but bad people ruining our plants because the law has created a shortage of licensed operators. We have had to take what was left over, or people who were supposed to be trained that were not actually doing a good job in practice."

Senator Short: "Do you think the drycleaning board is doing this deliberately?"

Mr. Moster: "Yes. I know for a fact that they did this deliberately."

Senator Short: "Do you think it would mean a savings to the householder, the average householder with a number of children, to be able to patronize a coin-operated establishment?"

Mr. Moster: "I think it would result in a savings and also in better quality drycleaning."

The testimony of owners of self-service drycleaning establishments was embellished with comments from another operator. Throughout the questioning and investigations that have taken place, it is evident that the operators of the self-service establishments feel that the composition of the present Board of Dry Cleaners works to the detriment of the self-service business. It is apparent from their testimony that they feel the regulations were adopted to protect old-time drycleaning establishments and do not necessarily reflect the needs of the new coin-ops. It is also evident that the purchasers of the coin-op equipment, who invest their money in the equipment and in the opening of a self-service store, feel that they should be permitted to run the establishment and that there should be a simple type of examination which would reflect the equipment used.

Mr. McConnell: "Samuel H. McConnell, 1624 University Avenue, Berkeley. I represent the East Bay Coin Operated Dry Cleaners Association. I am going to comment just briefly on a couple of points brought out in Mr. Catterton's recommendations

about the year's requirement. The people in our association have felt that if they own the stores—and, by the way, one of the chief complaints seems to be from owners of stores, not just employees—where the owners would like to have the relaxation of the rules and regulations so that they could operate their own establishments that they put their investment into. The year's requirement works a hardship upon them and they feel if they can pass the new examinations put out by the board, they should be able to do it without 370 hours of formal schooling or a year in the industry, especially in view of the fact that somebody can come in from out-of-state who has had a year out-of-state and they can get a job and the owner can't. So we would like you to give consideration to that in the overall picture. I am speaking to the two laws that were on the agenda.

The other point I think should be looked into. It would be quite interesting if you attend these sessions to see that the examinations given to the people apply to the type of equipment that they are going to operate and to the type of solvents that they are using and to the fire regulations that they are faced with actually. There will be a reluctance on the part of the board to remove from the examination ancient questions on fire, door linkage problems and solvent problems that our people are not involved in at all. I think with a little prodding you could get them to be realistic in the examination they give to all the people without coming back and saying, 'I guess it was in the book but it isn't. I never ran across it before and I missed that question and I am flunked.' Those are two of the main things. I think there should be consideration given to coin operated pressing as a way of doing business rather than making the people become so proficient when they are not going to be actually damaging the people's clothes with the poor crease in the pair of trousers."

The foregoing testimony by Samuel McConnell is in line with the thinking of the coin-op industry. At the previous hearings during the regular session on the legislation affecting the drycleaning industry, the self-service establishments were primarily interested in exemption from the state regulations. During the course of the hearing held by this committee, an apparent change in viewpoint occurred. In discussing the safety factors and features of the use of self-service equipment, the spokesmen for the industry praised the State Fire Marshal for the work he was doing to protect the public with respect to toxicity and fire prevention.

Senator Pittman: "I heard two remarks here when the abolition of the board bill was presented. Do you say now that some type of examination would be necessary, must be necessary, in order to run a coin operation?"

Mr. McConnell: "It seems to be insisted. No. I don't think it would be necessary. Our discussions with the Fire Marshal—he didn't think so. He thinks a person should be in attendance in the store in case something comes up."

Senator Pittman: "I want to get this attitude because you are now subscribing to some type of regulation."

Mr. McConnell: "Senator Pittman, you are discerning. We have changed our attitude from the time we appeared before the Senate where we asked for a fully automatic, no attended store. That, I might explain to the Senators, was at the behest and insistence of the National Automatic Laundry and Cleaning Council who, over the whole United States in all but two states, are able to operate without attendants. We don't insist on that because all of our stores are going to—just for competitive reasons are going to have an attendant. We should have reconciled our differences ahead of time. But even at that it wouldn't have made much difference because they still insist on an elaborate examination. We think that a person on hand with personality to help produce the business would be more important to us than one who is extremely proficient in all kinds of spotting and pressing."

During the testimony of the self-service operators, it was repeatedly asserted that the examination given to them by the State Board of Dry Cleaners did not particularly fit the type of establishment they were operating, and further, that the time requirements were unrealistic. It is of interest to note some of the testimony which pointed this out.

Mr. McConnell: "We will go along with an examination and comply with the law. We appreciate what they have done to date. We don't think they have gone far enough. We would like our people to be as trained and proficient as possible, but we don't think it is necessary for the law to say they can't cross that line for a year and be an operator when the window washer from a dry-cleaning plant can come in and take the examination and he has not been cleaning clothes. This is how silly this thing can get. Whereas the same window washer in a laundry can't take the examination. So it is something that has worked a hardship on us and we would like to see some alleviation of it. I think we are on the right track."

It was quite apparent in the course of the hearing that there was no one desirous of abolishing the Board of Dry Cleaners, but that this bill had been introduced solely to provoke action and to call close attention to the needs of self-service drycleaning establishments as being out of alignment with the regulations enforced upon them. This was amply brought out in the statement of Chairman Short.

Chairman Short: "To conserve time I think if there is anyone that is here that is in favor of abolishing the Dry Cleaning Board you are certainly welcome to testify before this committee. But as I judge the temper of this committee they are not to go along with that recommendation. Is there anybody else that wants to testify in regard to eliminating some of the requirements as far as licensing the coin-operated industry is concerned? Is there anybody in opposition to Senate Bill 957 here?"

The opposition to the proposed legislation which had been referred to this committee was from the Board of Dry Cleaners, whose spokesman was Mr. Dwight Alquist, a member of the board and a proprietor of a drycleaning establishment in San Joaquin County. The gist of

Mr. Alquist's testimony was that passage of SB 957 would be discriminatory and would offer unfair advantage for coin-operated establishments as contrasted with the regular drycleaning establishments, in that the coin-op would not be licensed and would pay no fee.

Mr. Alquist: "First I would like to point out that the opinion of the board is that the board is responsible for the administration of the statutes as they exist, not for creative circumstances whereby the board controls the industry. In California there is roughly 600 coin-operation-type of plant. A portion of these offer self-service drycleaning and the rest offer spotting and pressing. The board would like to point out that if SB 957 were enacted the discrimination would exist in this respect: Those coin-operation-type plants offering spotting and pressing service would be required to be licensed and those coin-operation-type plants using exactly the same drycleaning machine but offering true self-service drycleaning only would not be required to be licensed. Now, the health and safety factors exist in the dry cleaning facility and not in the spotting. Also those plants offering a clean only service but not using machines activated by coins would be discriminatory."

The committee questioned Mr. Alquist relative to the activities of the Dry Cleaning Board in acting to protect the public. This was evidenced by Senator Short's questioning.

Senator Short: "May I interrupt here. I believe that the Dry Cleaning Board is set up to make sure that there are competent people cleaning clothes, removing spots of various types on fabrics and hides, leather and so forth. But what I want to know is over the past five years what action has been taken by the Dry Cleaning Board against any drycleaner in the way of suspension or revocation of license other than on these broad generic terms or moral turpitude which has nothing to do with cleaning clothes but nevertheless seems to be a prime cause of taking away or revoking licenses."

Mr. Alquist: "In this area I would like to use the year 1962 as the year that we have figures compiled. There were 762 notices of violations issued during the year 1962. By one means or another the board has gained compliance and closed 645 cases. There are presently 143 cases not yet closed. As of October 28, 1963, these cases that are not closed are in various phases of progress. Some have been tried by criminal procedure and decisions not rendered. Some prosecutions have been ordered and the Attorney General or the District Attorney have not prosecuted awaiting the outcome of the legislation. Some cases have been ordered to be handled by administrative hearing procedure. Now, the only provision that the board has not used to my personal knowledge is that it has not used the provision of the statute that relates to the injunctive procedure."

Senator Short: "May I go back to my original question? How many have been suspended and revoked, say, over the last five-year period that you know of, or the last year or the last two months or the last three years?"

The committee questioned Mr. Alquist as to what the board has done to meet the needs of the coin-op drycleaning establishments. He was advised that it was the feeling of the public and other people in the industry that a system of examinations has been set up which acts to exclude competition, particularly on the part of the self-service industry. The chairman asked Mr. Alquist what the board had done in answer to this allegation. Mr. Alquist indicated that the board had established two new categories that did not require full examination. The chairman wanted to know precisely what these were, and received the following explanation.

Mr. Alquist: "This test consist of 50 questions for an operator who would be termed a clean only. They are written questions. They do not contain questions that refer to outmoded chemicals or outmoded equipment that is still in use, but on a commercial basis or a larger scale basis not utilized by coin operation. I have first-hand knowledge of this in that Mr. Carroll and I prepared the first examination that was to be used for the clean only category. Does this satisfy that portion of your question?"

The committee was interested in the types of questions used, and it was apparent that these were based on safety factors and matters pertaining to the Health and Safety Code. The questions did not deal with the particular types of solutions or spotting; they did cover the type of machinery being used and its operation.

There was a recurrent question as to the effect which the attitude of the board might have in stifling competition, and Mr. Alquist's further testimony is of interest.

Mr. Alquist: "Are you asking the question, do we attempt to stifle competition? You mean the board?"

Senator Short: "Are you trying to do this with your examinations and outmoded rules and regulations, questions that apply to the conventional establishments that shouldn't apply to the coin-operated establishments?"

Mr. Alquist: "I am positively of the opinion that there has not been an attempt to stifle competition."

Senator Short: "Senator Stiern."

Senator Stiern: "You mean that the conventional operators have no fear of the machine-type operation, that they don't see it as a possible hazard to the conventional operation?"

Mr. Alquist: "You mean from a competitive standpoint?"

Senator Stiern: "Yes."

Mr. Alquist: "I believe that conventional drycleaners have had a great deal of apprehension in this area. However, I believe that is entirely quieted down and it doesn't seem to be a great big monster. I welcome it personally. I like to see any medium or method of selling. I am very happy to see it. When the public wants to buy it I think the public ought to have it."

In the course of hearing testimony from the industry representatives, the question arose as to the need for a licensed operator to be on the premises. It became obvious that the language of the law requiring this is rather loosely interpreted.

Senator Stiern: "I heard something said earlier about an operator always being on the premises. I know of operators who belong to service clubs who go to service club meetings."

Mr. Alquist: "They are the only operator. Is this not an uncommon thing to have a shop operating where the operator is not present? There is no reason why clothes can't be dispensed and taken in while the operator goes to a luncheon meeting. It is not an uncommon thing, is it, that there isn't an operator in the establishment? I am not positive that I get the essence of your question."

Senator Stiern: "Take yourself. Are you the only licensed operator in your shop?"

Mr. Alquist: "No, sir."

Senator Stiern: "If you were and you wanted to go to the Lodi Kiwanis Club you could go, your shop doesn't have to lock its doors."

Mr. Alquist: "That would be true."

Senator Stiern: "And so that the law says this but actually that is not the way it works out."

Mr. Alquist: "It states his absence may be for reasonable cause."

Senator Stiern: "Well, the law says, does it not, that you must have an operator on the premises when the premises is open and operating?"

Mr. Alquist: "That is correct."

Senator Stiern: "And in the actual fact of the case this isn't always true. Is this correct?"

Mr. Alquist: "I would say certainly that men go to lunch. I am sure this is a habit. I think they also go to service clubs. But inspections indicate that flagrant violations are not commonplace."

There was discussion on the question of public benefit from the operations of the Dry Cleaning Board. In the course of questioning, there had been comments made from time to time to the effect that the board either did not or could not take effective action on the complaint of someone who had made application to it because of shoddy workmanship on the part of the licensee.

Mr. Montgomery: "Is it true, Mr. Alquist, that a furrier who cleans furs as a sideline has to have a cleaner's and dyer's license?"

Mr. Alquist: The statute provides for a furrier's license, yes, sir."

Mr. Montgomery: "If Senator Short's wife had a mink coat and it was cleaned by this furrier . . . could he appeal to the board for a redress alleging that this licensee had done a job that had been improperly licensed."

Mr. Alquist: "I feel that he could not."

Mr. Montgomery: "What would happen if he did complain about the type of cleaning that was done by one of your licensees?"

Mr. Alquist: "If repeated alleged misconduct of the licensee were obtained by the state board, in all probability they would authorize an administrative hearing procedure act and we could

request he place with the state board a bond of \$1,000. This bond could be used only for the purpose of satisfying the court claims. We could not dispense this money."

Mr. Montgomery: "Has this ever been done?"

Mr. Alquist: "Not to my knowledge of having dispensed any money."

Mr. Montgomery: "Has the public any protection at all from the board against operators who do poor workmanship?"

Mr. Alquist: "The statute does not provide anything. I have one little statement, if I may."

Senator Short: "Yes. Don't you think it should? This is the purpose of the board. I have something from the department, the purpose and function is to protect the public and employees of the drycleaning industry. But it says it is primarily to protect the public. To protect the public from what? From shabby work. If you are not cleaning it or if you are destroying his garment then there should be some avenue of relief, shouldn't there?"

Mr. Alquist: "That sounds very reasonable."

Senator Short: "But as far as you know there is none at the present time?"

Mr. Alquist: "The statute does not provide for anything in this area."

Senator Short: "Don't you think it should?"

Mr. Alquist: "Are you asking me for a personal opinion?"

Senator Short: "Yes."

Mr. Alquist: "Well, I would say that it would probably be highly impossible that 100-percent protection could be given to the public under any circumstances."

Senator Short: "Well, I understand that, Mr. Alquist. And I understand there have been goofs, including attorneys and veterinarians and real estate men and insurance men and everybody else—maybe reporters from time to time. Everybody is human. And you have a manner of conduct where a place is doing shabby, shoddy work. Don't you think then you ought to have the power to step in and stop that individual from doing business in the future?"

When witnesses were questioned about the activities of the board and the inspections made to protect the public, they placed a great deal of emphasis upon the fact that there were over 700 violations referred to the board for action and for handling. The allegation of a lack of confidence on the part of the public because of these violations and their handling cropped up again during a later part of the hearing. The industry representative testified, indicating that these 700 and some odd violations were in the main the result of coin-operated establishments failing to have a registered operator present. It was apparent from the questioning that there was a wide difference of opinion as to the purposes and reasons for existence of the board.

Senator Stiern: "May I ask you, do you agree with me in regard to my belief about boards in general, including your board, that the people of California establishes these boards by their elected Governor who appoints them for the protection of the people of

California, that people on individual boards are qualified and are not necessarily for the protection of those industries or professionals that the boards represent? Is this a statement that you agree with?"

Mr. Alquist: "Not wholeheartedly, Senator. In my opinion you are asking me these. The examinations that we conduct definitely educate the uneducated and inexperienced person. I have seen many cases where people have repeatedly applied for examinations, as much as five times, and I think there have been cases of more than this. They have educated themselves and they have become a better business person. They are more responsible to handle your clothing."

Senator Stiern: "That is not my point. My point is that you as a drycleaner and I as a member of the medical field hold a license because a board examined and found us satisfactory, not to protect us, to let me practice medicine or you drycleaning, but to protect the public with whom we come in contact, so that we are competent to do this job. Is this not correct?"

Mr. Alquist: "I am sure that the origin of all the boards comes from the industry which it represents. They were probably founded on the good, old, solid, American principle of greed."

The one area discussed which indicated the possibility of a need for a registered operator or experienced person in attendance in the self-service cleaning establishment was that of safety. The testimony of the State Fire Marshal was important along these lines. When questioned by the chairman and asked if there had been any incident of fire or asphyxiation coming to his attention, he replied:

Mr. Vance: "In one combination plant, Senator, we did have an individual who was cleaning—this is a combination coin operation and commercial, as I recall."

Senator Short: "The same building?"

Mr. Vance: "Same building. In cleaning out the muck—this is a term used in the industry—he was overcome. This was an employee."

Senator Short: "That is a coin-operated establishment and a commercial. . . ."

Mr. Vance: "As I recall they were a combination. They did have some commercial equipment and I think in the front of the store they had the other. Now, I will say this in mitigation. The muck was being cleaned from the commercial equipment. We have had some spills, some faulty equipment or malfunction that was quickly corrected in one or two instances where it ran into the streets."

The Fire Marshal's opinion was solicited relevant to the requirements of knowledge for the operator of a coin-operated plant, and his testimony was as follows:

Mr. Vance: "We would expect him to certainly know the details of the equipment. And it isn't completely simple. First the removal of the muck, the electrical system, to watch the joints and connections and gaskets, and some experience, certainly a knowledge, of boilers. We find there is a threshold where industrial

safety, for example, doesn't touch on the boiler less than 15 horsepower or 15 pounds per . . . 15 pounds per square inch. Now, these boilers are inspected regularly by our people. They would necessarily have to have some knowledge of that."

Further questioning by the chairman was as follows:

Senator Short: "Has the coin-operated industry been a problem to you at all?"

Mr. Vance: "Not mechanically or physically. We have had some problems with their machinery. Almost without exception they have been able to correct this—gasketing and so forth. We are finding that the public using equipment as opposed to maybe the heavier commercial machines . . . that this is causing more maintenance problems and we have to watch it more closely."

Senator Short: "They are rougher with it?"

Mr. Vance: "Yes."

Senator Short: "Have you had any resistance from the operators of the coin-operated plants in complying with the requests?"

Mr. Vance: "None whatsoever. They have been very gracious, particularly even the manufacturing end of the situation. These are top grade companies. I mean, these people are in the business to manufacture good equipment and I think they have been doing it."

The Fire Marshal was questioned during the course of his testimony as to the finances and monies received from the board for his work.

Mr. Montgomery: "Mr. Vance, you receive a good portion of your budget from this particular agency for inspection purposes, don't you?"

Mr. Vance: "To answer that, no. We first do not receive enough to entirely support the program in the last couple of years with the installation of a new investigating agency. They are taking substantially more money than we. I was very interested. They say we get 26 percent. To directly answer your question, 12 percent of our total operations is in the dry cleaning field."

Mr. Montgomery: "Are you under any pressure by the board to look closer at some operations because of this money?"

Mr. Vance: "By all means. And we have done things to try to accommodate them. First, we have to set our inspection program up now to 13, 14 months instead of once a year. Here again I was rather interested in the figure of 20,000 inspections. In California we have 10,532 cleaning establishments. This includes 7,218 shops, or stores as we would call them, where they have no direct cleaning equipment. Maybe some have presses only. That would mean as opposed to us—I didn't mean to bring a family situation out, but you did ask the question—that they are making twice as many inspections to determine whether the man who is operating the plant is the man whose name is on the license hanging on the wall than we are making as far as fire and life safety inspections. Maybe a little more than twice. Once we did check the licenses, possibly we can work something out."

Mr. Montgomery: "You couldn't check the license while you are checking the other factors?"

Mr. Vance: "This was recommended by the 1962 G & E Committee interim study in the same field, and they said this: 'Under the present program deputy state fire marshals and investigators from the Department of Professional and Vocational Standards survey the same cleaning establishments each year. The necessary surveys and inspections could be performed by a deputy state fire marshal in one visit.'

"And I would say this would be a saving to the drycleaners fund. Prior to 1945, of course, we did this, all through the years back to 1926. It would be nothing new to our deputies. I would say this in all respect to the Division of Investigation. We wouldn't want to be back in a position where there was a violation and we would have to camp on the doorstep, sit out and watch and see if they are diluting solvents with the wrong materials and so forth and then have to carry through a lengthy investigation. If there were enough investigators to follow up our reports of some violations, then I still think it would be a substantial economy."

In the course of subsequent investigation by the committee, the safety factor loomed more important. Information from the California State Fire Marshal, public health bulletins and newspaper items showed that the use of perchlorethylene was hazardous and prolonged exposure to its fumes highly toxic. The following are some of the cases in point:

A news item in the *Benton Harbor News Paladium* dated May 4, 1962, stated that two children were overcome from "perch" fumes emanating from a rug and drapes that their mother had just cleaned at a self-service cleaners. She had placed the items on the back seat of her car and then drove to the grocers. While there, the children rolled up the windows. When she returned, the children were unconscious.

The August 3, 1964, issue of "This Week in Public Health" which is published by the Massachusetts Department of Public Health related to a 16-year-old boy who had died after sleeping in a sleeping bag cleaned in perch at a self-service cleaners.

A Minnesota Health Department report indicated that two young children of a St. Paul mother were overcome by fumes coming from draperies she had hung in their bedroom shortly after cleaning them at a self service plant.

Reports from the State Fire Marshal showed incidents of employees and owners of conventional cleaning plants being overcome by perch fumes. These occurred through improper handling of the solvent and improper ventilation.

The State Industrial Accident Commission awarded almost \$35,000 to a former cleaning plant employee. A toxicologist testified that in his opinion exposure of the employee to perchlorethylene had caused post-necrotic cirrhosis of the liver.

The 1965 Buyers Guide published by Consumer Reports when referring to sleeping bags quotes on page 330 of that guide:

"In CU's opinion, no bag should be laundered, but any bag can be cleaned by competent professional drycleaners. No bag

should ever be cleaned in coin-op drycleaning machines. For one thing, this may damage the comforter; for another, *solvent residue in the bag not completely dry may release toxic vapors in high concentration.*" (The italic is for emphasis.)

RECOMMENDATIONS OF THE COMMITTEE

It is recommended: one, that the Board of Dry Cleaners not be abolished; two, that the powers of the Board of Dry Cleaners be enlarged so as to give it the authority to set up separate licensing categories wherever it is deemed necessary in order to meet the peculiar or new innovations in the industry, such as the coin-operating, self-service cleaning establishments.

It is recommended that the board be directed, in preparing its examinations, to consider the welfare of the public but also the needs peculiar to the type of license required. It is further recommended that the time requirements for the experience of operators be decreased and adjusted to the needs of the particular type of establishment.

It is recommended by this committee that every self-service dry cleaning establishment be required to have an attendant on duty at all times. It is the feeling of the committee that there is no comparison between the self-service laundry and the self-service drycleaning establishment other than the simple fact that a coin activates the operation of each machine. There is a demonstrable health hazard and danger in the use of cleaning solvents, and unless the clothing is properly cleaned and aired there could be irreparable harm to the public.

With respect to the agent or agency classification, the committee recommends that this category be exempt from examination, as the latter serves no useful purpose. It had been argued that these people who pick up clothing should know fabrics, in order to advise the patron that certain fibers could not be adequately cleaned, etc. But this argument is not justifiable, since no license or examination is required of a counter girl in any retail drycleaning establishment. In the course of many inquiries, the committee was unable to find anyone who had been questioned as to the fabric or had been told that a certain garment could not be cleaned.

It is the feeling of the committee that the prospective licensee for an agency license could be investigated and questioned by a staff member of the department to ascertain his knowledge of the basic rules and to check on his moral fitness, etc.

With respect to the composition of the board, there was testimony to the effect that the coin-ops should be represented per se and that there should also be union representation on the board.

The committee does not feel that special categories should be spelled out, and as a matter of fact recommends that the present system of having wholesalers and retail shops represented by designation be eliminated. It is further recommended that the powers of the board be expanded so that the public may be better protected and the board enabled to handle complaints made against licensees by customers charging shoddy workmanship, etc. In this connection, it is felt that the present bonding requirements should be altered so as to give the

board authority to require a bond when, in its considered opinion, this would offer a better protection for the public.

In the course of testimony presented to this committee, and also on the evidence of certain newspaper articles, a strong feeling exists that there has been a laxness on the part of manufacturers of drycleaning equipment, demonstrated by their sale of this equipment to less than qualified people. It is the recommendation of the committee that the manufacturers or the wholesalers of such equipment in the State of California be licensed to sell same. As a condition partied to this license, there should be a stipulation that prospective purchasers be advised that a state license and examination are required in order to operate a self-service drycleaning establishment.

APPENDIX

OUTLINE OF STATEMENT OF GUY B. CATTERTON, ATTORNEY AT LAW, 1111 AMERICAN TRUST CO. BUILDING, BERKELEY 4, CALIFORNIA, REPRESENTING LAUNDERETTE SALES AND EQUIPMENT CO., BERKELEY, AND VALLEY LAUNDERETTE SALES, SACRAMENTO, NORTHERN CALIFORNIA DISTRIBUTORS OF PHILCO BENDIX SELF-SERVICE (COIN-OPERATED) DRY CLEANING EQUIPMENT AND VARIOUS MAKES OF SELF-SERVICE PRESSING EQUIPMENT.

General Statement

Present drycleaners law should be amended to include reasonable regulation of the self-service drycleaning branch of the cleaning industry. Present laws were enacted years before self-service drycleaning came into being and the laws applicable to commercial drycleaning (the cleaning, spotting and pressing of clothes for other persons in consideration of a "fee" or charge) are equally applicable in all details to those stores that have coin-operated equipment that patrons use in the cleaning and pressing by them of their own clothes. Simply expressed—the present laws should be "up-dated" to reflect the new developments and concepts in the industry. The administrative board—the State Board of Dry Cleaners—should also be changed to provide representation for this new branch of the industry and to provide for more representation thereon by the public. The majority of persons on such board should be public members in order to avoid regulation of the industry by members in the industry and the conflicts of interest resulting therefrom.

Specific Recommendations

1. Amend Sections 9505, 9507, and 9511 of the Business and Professions Code to provide a separate category for stores exclusively using self-service or coin-operated drycleaning and/or self-service pressing equipment and upon whose premises the patrons themselves use liquid soaps or detergents in the cleaning of their clothes. The definition should include the requirement that the drycleaning equipment use non-volatile solvents.
2. Amend Sections 9505 and 9522.4 to delete from the definition of "spotting" the use of liquid soap or detergents by patrons of self-service cleaning and pressing establishments in the cleaning and pressing of their own clothes.
3. Amend Section 9530 to provide that the seven-member board be composed of following: four (4) public members, two (2) representatives from the commercial drycleaning industry and one (1) member from the self-service branch of the industry. This will provide technical advice to the board but at the same time keep majority control in the public members.
 - a. Amend Section 9531 to be consistent with above amendment.

4. Amend Section 9533 to include a category of self-service stores as outlined in (1) above. Delete the five-year requirement for examiners in the self-service category for such self-service equipment has not been used in California for five years.
5. Amend Sections 9540, 9540.5, 9540.51, 9540.53, 9541 and 9542 to provided a license for a self-service store referred to in (1) above.
6. Amend Section 9550 to provide the attendance of a registered operator at self-service stores.
7. Amend Section 9551.5 to delete the one-year-experience requirement for a registered operator. The passing of an examination should be sufficient. This will enable owners of self-service stores to work in their own stores if they pass the examination.
8. Provide in this article (4) pertaining to examinations, that the examinations for an operator of a self-service store shall be an examination on the coin equipment to be used in the store, the non-volatile solvents used in the automatic drycleaning machines, and general health, fire and safety regulations pertinent to self-service stores and equipment.
9. Amend Section 9580 to provide for inclusion of self-service drycleaning stores or establishments in the schedule of fees.
10. Amend such other sections of the drycleaners law as necessary to be consistent with the above.
11. Amend the rules and regulations of the State Board of Dry Cleaners to be consistent with the above changes and to establish reasonable examinations for the specific license and operator classifications pertaining to the coin-operated drycleaning and pressing categories.

Conclusion

The above changes will provide reasonable regulations and safety for coin-operated or self-service drycleaning stores and enable persons desiring such to do their own drycleaning with fully automatic equipment at considerable money savings while at the same time maintaining existing regulations for the benefit of persons desiring to have their clothes drycleaned, spotted and pressed by the "professional" drycleaners.

STATEMENT OF THE CALIFORNIA DRYCLEANERS ASSOCIATION CONCERNING SENATE BILL 347 BY SENATOR O'SULLIVAN

We are opposed to Senate Bill 347 which would repeal the present law licensing drycleaning establishments for the following reasons:

1. The present law aids in the protection of the public health. All drycleaning solvents used commercially today are highly volatile and produce toxic vapors. Without a qualified person in charge of a drycleaning establishment, these vapors can be and are dangerous to the health, and in some instances fatal. On January 29, 1963, Mr. Ralph E. Netz, Santa Ana, was overcome by fumes at a coin-operated drycleaning establishment. Fortunately he recovered, but if there had not been someone present to call an ambulance and get him to a hospital, the concentration of fumes could have been fatal.

This danger is greatest in coin-operated establishments because here the customer takes the garments from the drycleaning unit and if a unit should be out of adjustment or if the load should be too large for the machine, or consist of heavy fabrics or padded garments, the garments would not be fully dried and the solvent retained can result in vapors which can be highly dangerous.

Although this particular situation would occur only in a coin-operated establishment, the fumes, of course, are just as dangerous to employees of commercially operated attended drycleaning plants. A maximum permissible concentration of the vapor from perchlorethylene, which is the solvent used in virtually all coin-operated drycleaning establishments and over 50 percent of the commercial drycleaning establishments in California, is 100-parts-per-million parts of the air. Since the solvent is highly volatile this concentration can develop very rapidly if there is a leak in the system or solvent is spilled on the floor, or for some other reasons is exposed to the air.

The improper handling of clothing could contribute to the spread of communicable diseases. Persons who are licensed by the State Board of Drycleaners have passed an examination showing they have knowledge of proper operation of a drycleaning establishment.

2. The present law aids in the maintenance of public morals. A drycleaning agency is an excellent front for the distribution of narcotics or for other immoral uses. The investment required for opening a drycleaning agency is very nominal and it is normally used regularly by all types of people, so that anyone coming or going into the establishment would not necessarily be suspicious. It is particularly convenient to deliver narcotics in the pockets of garments which have been left for processing, and the State Board of Drycleaners have on many occasions refused licenses to applicants who had a record of narcotic violation.
3. The present law contributes to the financial welfare of the general public. A person wishing to defraud the public could open a drycleaning establishment, collect the garments and then disappear with the garments to be pawned or sold at considerable financial loss to his customers. The State Board of Drycleaners requires three character references so that a licensed establishment is operated by a person who can be traced in case of such action.

It has been reliably estimated that over two billion dollars in aggregate value of garments is handled by the drycleaners of California each year. There are approximately twenty different types of fibers used in the manufacture of yarn for fabrics. These fibers can be combined into hundreds of difference combinations, each of which will react differently to some of the spotting chemicals necessary to use in the drycleaning process. The improper drycleaning, spotting or finishing of garments can easily result in damage which makes the garment worthless. If lack of competence on the part of drycleaners were to result in only 1 percent loss of the aggregate value of garments handled by drycleaners each year in California, this would represent a loss in excess of twenty million dollars annually to the customers of such establishments.

The present law protects the investing public as well as the consuming public. A good example is that of coin-operated drycleaning. In California the development of this service for the public has been orderly and the investments have been much sounder than in some other parts of the country. In areas where no licensing is required a few unprincipled distributors of coin-operated equipment have promised extremely high return on investment and developed a chaotic condition which has resulted in the loss of a substantial amount of the invested value in some coin-operated establishments.

The drycleaners law has not resulted in prevention of new people entering the industry. In the fiscal year 1961-62, 2,079 new licenses were issued by the State Board of Drycleaners and this represents 20 percent of the total number of licenses in effect on June 30, 1962 of 10,422.

4. Many persons engaged in the drycleaning business in California could suffer substantial loss if Senate Bill 347 was passed.

The drycleaners of California sponsored legislation in 1927 which established the office of the State Fire Marshal and provided for license fees of members of the drycleaning industry to support this office. During the 36-year period since this time, the drycleaning industry of California has raised its own standards, eliminating racketeering and establishing a reputation of responsible business leadership. There have been a large number of persons who have not obtained licenses during this period of time because of their inability to prove competency sufficient to be responsible for the handling of the public's wearing apparel, or with criminal or immoral records sufficiently important to warrant their denial of a license to do business as a drycleaner in California.

If the cleaners law was repealed, it is highly probable that many of these people would immediately open up drycleaning establishments for the purpose of taking advantage of the unsuspecting public who have learned to rely on the competence and good moral character of drycleaners in California, or possibly for the purpose of engaging in illegal activities such as distribution of narcotics or other immoral or illegal activities. This would be detrimental to the public's health, morals and welfare of the people of California and could jeopardize the substantial investments of legitimate, qualified drycleaners now engaged in this service.

There are 10,422 licensed drycleaning establishments in California representing investments in excess of 250 million dollars. These firms are responsible for the livelihood of over 45 thousand workers. The repeal of the present cleaners law would certainly result in some readjustments in the industry if this should be responsible for the loss of only 10 percent of the investment mentioned above, it would represent over 25 million dollars in loss as well as the livelihood of thousands of employees.

5. The State of California would lose financial support if the law was repealed. Far from being a drain on the taxpayer, the cleaners law not only is fully supported in its administration by the drycleaning industry, but funds from this source are also used to sup-

port the Department of Professional and Vocational Standards, the State Fire Marshal and the Division of Investigation. If the State Board of Dry Cleaners were abolished there would still be a substantial portion of this revenue which would have to be obtained from other sources for the support now furnished from funds of the State Board of Dry Cleaners to the State Fire Marshal, Department of Professional and Vocational Standards and the Division of Investigation.

Because of stable conditions resulting at least in part from the licensing of the industry under the cleaners law, the drycleaners of California have maintained the highest average pay for employees that exists in any part of the country, and at the same time provides drycleaning services to the public at prices below that available in any other states surrounding California.

The drycleaners in California are recognized as the leaders of the industry throughout the United States, and the President of the National Institute of Drycleaning is from California and is a past president of our own state association. A research project has been conducted for the past eight years at the University of California with funds fully supplied by members of the industry for the purpose of developing better methods of serving the public who patronize drycleaning establishments.

The State Board of Dry Cleaners licenses schools of instruction in the field of drycleaning and the passage of Senate Bill 347 would eliminate this control of educational establishments in drycleaning processing, and students would lose this protection against fraudulent or incompetent persons operating such an educational institution.

The California Dry Cleaners Association with over 1,100 drycleaning plants as members, is committed to the maintenance of good drycleaning service rendered to the public at reasonable prices, and legislation leading to this end will be looked upon with favor by the association.

If the repeal of the present cleaners law is in the interest of better service to the public without the sacrifice of protective measures important to the public, we would support such action. However, from the information set forth above, it appears to us that the repeal of this law would be seriously detrimental to the interest of the consuming public and to the drycleaning industry of California.

CALIFORNIA DRYCLEANERS ASSOCIATION, INC.

1153 Lincoln Ave., San Jose 25, California

May 1, 1963

To the Members of the
Business and Professions Committee

Senate Bill 957, which would remove self-service drycleaning establishments from the provisions of Chapter 18 of the Business and Professions Code is scheduled to be heard on Monday, May 6.

The California Dry Cleaners Association is opposed to this bill for the following reasons:

1. The public has been protected by the present law for 18 years, and Senate Bill 957 would remove this protection to the health, safety and welfare of the public. Perchloroethylene, the solvent used in self-service drycleaning establishments produces toxic vapors, and the maximum permissible concentration of such vapors is 100 parts per million parts of air in California. Also, many types of fabrics used in wearing apparel and household items can be ruined by improper drycleaning, and some cannot be drycleaned at all without serious damage. The present law provides for a licensed attendant who is qualified to give the public the protection it has grown to expect in California.
2. Senate Bill 957 would require a license and an attendant in self-service drycleaning establishments which do spotting or finishing, but remove this requirement from those where drycleaning only is done. At present about 50 percent of the self-service drycleaning establishments in California have spotting and finishing available, and more are adding these facilities all the time. The passage of Senate Bill 957 would make for an inequitable situation where one operator with the same type of cleaning equipment as another, but with added spotting or finishing equipment, would be at a competitive disadvantage.
3. Senate Bill 957 would reduce the revenue to the State Board of Dry Cleaners without commensurate reduction in operating expenses. It is difficult to determine the exact amount of the reduction in revenue, since it would depend on the number of self-service drycleaning establishments which do drycleaning only, but based upon the figure of 50 percent mentioned above, there would be approximately \$20,000 per year reduction in revenue to the board.

Your opposition to Senate Bill 957 is solicited and will be greatly appreciated.

Yours very truly,

G. M. SHEPHERD
Executive Secretary

ASSOCIATED RETAIL DRY CLEANERS ASSOCIATION, INC.

REPRESENTING SMALL PLANTS, SHOPS AND AGENCIES

326 W. 3rd St., Los Angeles 13, Calif.

Claude W. Carruth, President; Frank Evans, Vice President

October 29, 1963

Interim Committee on Business and Commerce Agency

Attn.: Senator Short, *Chairman*

Gentlemen:

We are asking your indulgence to read this entire letter. Perhaps we can enlighten you in a small way as to why the cleaners law was enacted. And, before going any further, may we state that it was the Associated Retail Dry Cleaners who instigated this action. And, if you would look up the records, you would find that Rudolph Henry, our public relations director, was the first president of the State Board of Dry Cleaners.

We are calling to your particular attention that previous to the time this board came into existence, racketeering, sabotage, stench bombs, and even murder were resorted to in order to stop unethical conditions. But, since the year 1945, there has been no violence of any kind. So this must prove to you why this law should be upheld.

Let us go a step further. If you repeal this law, where will you obtain funds to continue the work of the State Fire Marshal? You must not forget that the funds amounting to \$110,000 and, at times, a considerable more, is being given every year out of the funds collected from this industry. Not one penny is taken from the public taxes.

Secondly, the industry is paying all moneys needed to conduct the business of the board, plus thousands of dollars given to the Berkeley institute. This business is a highly professional business and through the work of this board another evil, and one that is important, is that undesirables under the guise of being cleaning shops have used these places for an outlet for dope, bookies and even prostitution, and an outlet for stolen merchandise. Through the board and its method of inspection, no more do the cleaners have this kind of reputation. They are gradually being classed as first-class citizens in the eyes of the public. Since the industry has established through the board, examinations, the public is being better served and have more confidence that those handling their garments are better qualified.

If any of you gentlemen are attorneys, and if not practicing under the rules set up by the Bar Association, many unethical lawyers would surely take over and we would feel sorry for those needing a lawyer. And particularly, if the layman, the real estate man, the banker, the notary, had a right to practice law without any control, what would happen? If this cleaners board is abolished, surely you would not expect to collect a license fee. We are certain the 20,000 or so licensed cleaners and operators would take exception, feeling why pay license without representation?

If this law is repealed, you are letting down the so-called Mama and Papa shop and placing the business in the hands of big business and you are adding insult to injury when and if you allow any segment of this big industry to be taken away from the jurisdiction of this board.

And if you decide to recommend the coin operators be taken out of this jurisdiction you definitely would be discriminating against the others in the industry.

We sincerely hope that you will accept this letter in the spirit it was written, and not a letter of a crackpot.

Thanking you for having read this letter, and hoping instead of recommending the repeal you will recommend the law to be amended to give more "teeth" to the board.

We remain your servants,

CLAUDE W. CARRUTH
President

RUDOLPH HENRY
Director of Public Relations

STATEMENT TO THE SENATE INTERIM COMMITTEE ON BUSINESS AND COMMERCE

By Glenn B. Vance, State Fire Marshal

October 30, 1963

Senate Bill No. 347

Senate Bill No. 347 would abolish the State Board of Dry Cleaners and, consequently, all funds collected by that agency through present licensing provisions would be discontinued.

Funds necessary for the administration and enforcement of Chapter 2 of Part 3, Division 12 of the Health and Safety Code by the State Fire Marshal are dependent upon appropriations made to the General Fund by the Board of Dry Cleaners. Discontinuance of these appropriations would place administration and enforcement responsibilities upon the State Fire Marshal without means of support, unless otherwise provided for from General Fund allocations for this purpose.

Chapter 2, Part 3, Division 12 of the Health and Safety Code authorizes the State Fire Marshal to adopt and enforce regulations to provide for the protection of life and property from fire, and to promote the occupational security of the operators in clothes cleaning establishments. The State Fire Marshal is required to approve all plans for new construction or reconstruction of existing plants and to make periodic inspections of all cleaning plants. During the 1963 fiscal year, the State Fire Marshal conducted 5,311 inspections and reviewed 965 plans.

There are 3,307 plants in the state. They are divided into three groups, based on the type of solvents used. The hazard of the various solvents determines the building construction and the type of equipment used.

Type	Number	Solvent	Solvent Hazard
1 Stoddard	367 Plants	Petroleum 100°F. flashpoint	Flammable
2 140 F	315 Plants	Petroleum 138.5°F. flashpoint	Flammable
3 Synthetic	2,571 Plants	Chlorinated hydrocarbon (perchloroethylene)	Toxic fumes (nonflammable)

Protection From Hazard

The primary hazard in Stoddard and 140 F cleaning plants is the use of a flammable solvent. The equipment in such plants is examined to determine its safe use with flammable solvents. Special construction of the cleaning room is required to prevent a flash fire from spreading to other areas of the plant or adjoining buildings. Because of the effective enforcement of the State Fire Marshal, the cleaning industry enjoys an insurance rate lower than that of the laundry industry, which incidentally, uses only water in their cleaning process. Further, local authorities have readily permitted establishment of Stoddard and 140 F plants in areas that are prohibited to other industries employing a flammable solvent.

The local authorities generally do not have the training or equipment to carry out the detailed field inspections.

Synthetic Cleaning Plants

The synthetic cleaning plants use chlorinated hydrocarbon solvents in their cleaning process. Perchlorethylene is used almost exclusively. There are other synthetic solvents that are less toxic, but the cost has limited their use. The hazard of perchlorethylene is from the toxic fumes.

The State Fire Marshal standards for synthetic plants are consistent with recommendations of the State Department of Public Health, National Board of Fire Underwriters and other recognized authorities.

A potential fire hazard in the plants using a synthetic solvent would be the use of a flammable solvent rather than a nonflammable one. The temptation to use flammable solvents exists because they cost about one-eighth the price of perchlorethylene. The electrical equipment on the synthetic machines, including coin-operated, is not designed for flammable vapor atmospheres.

Another common fire hazard in all cleaning plants, including synthetic plants, is the spotting area where various flammable solvents are used. The cleaning industry has responded to the State Fire Marshal's program regulating the synthetic plants.

The fire service and the cleaning industry have, in the past, given complete support to this program.

GLENN B. VANCE
State Fire Marshal

STATE BOARD OF DRY CLEANERS

Subject: Senate Business and Professions Factfinding Committee,
Re: Senate Bills 957 and 347—October 30, 1963

Senate Bill 957 would eliminate requirements for licensing coin-ops.

Senate Bill 347 would eliminate the Board of Dry Cleaners.

Purpose and Functions of the State Board of Dry Cleaners

The primary function of the State Board of Dry Cleaners is to protect the public and employees of the drycleaning industry from hazards to their health and safety, due to the use of highly flammable and toxic substances in the cleaning process; also to assure the public that only persons of experience and demonstrated skills are permitted to

work on their wearing apparel. This protection extends from cleaning plant operators, spotters and pressers, to hat, fur and leather renovators. The entire function is self-supporting from funds derived from fees charged to the industry, and these funds are also used to help support the operation of the State Fire Marshal.

I. What would be the effect on the board and the public if SB 957 became law?

- (A) The public would not be protected against the dangerous hazards of the highly toxic fumes from cleaning solvents (see attached copies of letters from the State Department of Public Health, attesting to the need of qualified attendants).
- (B) The self-servicing type of drycleaning equipment requires a permit issued by the State Fire Marshal after inspection and approval. The Attorney General has rules that these establishments are plants as defined in the Business and Professions Code, and therefore are licensed by the drycleaners' board as such and subject to the same regulations as other plants.
- (C) If coin-ops were eliminated, the board would suffer a loss of approximately \$41,000 annually in licensing fees.

II. Recent board action to correct inequities and problems:

- (A) In response to the needs of the self-service type of drycleaning establishment (coin-op) and in response to the reactions of various legislative committees, the new state board has established two new categories of operators: These are "clean only" and "clean and spot only." "Clean only" requires the applicant to pass a written examination composed of 50 questions, lasting 1½ hours; *no spotting or pressing tests required.*
- (B) The clean and spot examination requires 2 hours and 15 minutes; it is comprised of 50 written questions *and a manual test in spotting.*
- (C) The State Fire Marshal will receive \$115,260 during this fiscal year toward the support of his office from the Drycleaners Fund. If the Board of Dry Cleaners, by law, is unable to supply these funds to the State Fire Marshal in the support of the Health and Safety Code, *he will be forced to ask for an equal amount from the General Fund.*

III. Major problem in coin-op business for committee's consideration:

Coin-ops require large capital investments averaging from the small units, \$25,000, up to the larger units, \$100,000. Many unqualified persons who have capital but no experience in this type of business, have been encouraged by extensive national advertising into opening coin-ops. As a result of this lack of experience in the drycleaning industry, many have gone bankrupt and defaults of payments are rife throughout the coin-op plants in the State of California. Information has been received that 31 have closed in the Los Angeles area, alone. The Los Angeles office of Norge distributorship for this equipment is now closed. Coin-ops (due to the general financial arrangements) for the most part are under absentee management; the public therefore would not be protected from dangerous fumes, clothing damage and other haz-

ards without properly trained personnel on the premises to supervise, help and instruct the public in the use of equipment. (See Exhibit 2.)

IV. *What is the board doing to alleviate the shortage of trained operators and other qualified personnel?*

(A) To promote a better supply of trained operators, the board has been working closely with the Manpower Development Training Act for the unemployed and partially employed individuals interested in entering the drycleaning business. Schools are now being set up in Los Angeles and San Francisco which will be tuition-free and open to the public.

(B) Request of Legislature:

The Legislature can assist this board in this regard by amending the drycleaning law as proposed in Exhibit 1-D or by similar legislation.

V. *Enforcement—how is the law being enforced, and what improvements can be made?*

(A) The principal enforcement of the drycleaners laws is obtained through an inspection program. Previous board policy in enforcement was extremely lenient. This policy has led to a situation where the law in some areas is being flaunted.

(B) This committee can assist the board by recommending additional legislation to make the improved board program more efficient and less costly (see Exhibit No. 1, attached).

VI. CONCLUSIONS AND SUMMARY

(1) It is the considered opinion of the board, State Fire Marshal, and the State Department of Public Health, that safety and public health require a trained operator on duty during all times when self-service (coin-op) premises are open to the public—or in operation.

(2) To assist in securing trained personnel, the board has created the two new categories of clean only and clean and spot only.

(3) The board is working with federal and state authorities in establishing tuition-free drycleaning public schools.

(4) The Legislature can help by permitting the board to reduce the hourly equivalent to the one year's experience requirement for the two new categories established by the board. (For example: from 360 hours to 120 hours and from 360 hours to 240 hours).

(5) The present board has changed the former policy in regard to effective law enforcement and requests the assistance of the Legislature for statutory law changes to improve efficiency and reduce enforcement costs.

(6) The board is currently reviewing and has revamped examination procedures to assist all candidates to better performance in examinations.

(7) The board requests legislation such as proposed in Exhibit 1 to relieve the small agency from paying the same fee as the larger ones.

DEPARTMENT OF PUBLIC HEALTH

MALCOLM H. MERRILL, M.D., Director of Public Health

EDMUND G. BROWN, Governor

1930 Beverly Boulevard, Los Angeles 57, California

COIN-OPERATED DRYCLEANING MACHINES
A RÉSUMÉ OF FINDINGS OF SEVERAL INDUSTRIAL HYGIENE STUDIES

Report date : December 15, 1961

Report prepared by : State Department of Public Health
Bureau of Occupational Health
Paul E. Caplan, Senior Industrial Hygiene
Engineer

During the past year, industrial hygiene studies have been conducted in California to evaluate the health hazards associated with the installation and operation of several coin-operated drycleaning machines. Our concern has been directed toward exposures of perchlorethylene solvent vapors both to the employees maintaining the machines and to the customers using the machines. Studies were conducted during normal and abnormal operations to estimate existing exposure levels and to anticipate conditions that might occur as the result of malfunction of the equipment.

Summary of Findings

1. Two general types of equipment were observed : (1) a single combination machine (similar to a combination hot water clothes washer and drier), in which all operations of cleaning, draining, spin drying and final drying (or deodorizing) are performed in the same machine; and (2) two separate machines (similar to a clothes hot water washer and a clothes drier), in which cleaning, draining, and spin drying are performed in one machine, and the final tumbler drying (or deodorizing) is performed in a second machine.

2. During *normal* cleaning operations of these machines, atmospheric concentrations of perchlorethylene were maintained at low levels (less than 100 parts per million (ppm)) both in the customers' areas and in the **maintenance** areas. These optimum conditions were the result of the mechanical ventilation provided in all of the installations evaluated.

3. *Some of the installed equipment was found to contain improperly designed components, such as malfunctioning interlocking switches. As a result of these malfunctions, excessive vapor concentrations were observed during some unloading operations and during the periodic cleaning out of the filtration systems. Additionally, excessive concentrations were observed when heavy drapes (which became entangled in the drier) were removed from the drier while still excessively damp.*

General Procedures

Atmospheric concentrations of perchlorethylene vapor were measured during the operation of four types of installations, using a calibrated Davis Halide meter and (in some cases) a Varian Graphic Recorder, Model G-10, to obtain a written continuous record of the

variations in concentrations. The maximum allowable concentration (MAC)* for an eight-hour working day exposure to perchlorethylene is 100 parts per million (ppm) by volume. The Hygienic Guide of the American Industrial Hygiene Association for perchlorethylene states (1) "200 ppm is believed to represent the *maximum*, which should not be exceeded in repeated daily exposures; it is not to be used as an integrated average concentration. A level of 100 ppm would be more suitable for the latter."

Installation A consists of a bank of three tumbler driers which open both to the customer area and to the drycleaning operator's area (see Figure A), plus a single washer unit in the drycleaning operator's area. In this arrangement, the clothing is (1) placed by the customer in the clothes compartment adjacent to the front of the tumbler drier. The drycleaning operator then (2) removes the clothing from the back opening of the compartment; places it in the washer for cleaning, draining and spin drying. The operator then (3) transfers the damp load from the washer into the back of the tumbler drier for final deodorizing. At the end of this operation, a red light illuminates in the customer area, and the customer (4) removes the dried clothing from the front of the drier.

Installation B consists of eight combination cleaning units in one room. The facility is divided into a customer area and a maintenance area, separated by an air-tight wall, with a locked door between the two areas.

Installation C consists of a bank of six combination machines so arranged that the fronts of the machines are in the customer area, and the rears of the machines are in the maintenance area. These areas are separated by a partition wall.

Installation D consists of two combination units fitted together as one machine. The customer area is separated from the maintenance area by means of a wooden partition wall with an access door.

Measurements and Results

Atmospheric concentrations of perchlorethylene vapor were measured during various phases of the equipments' operation. The general concentration levels are shown in Table I. (See Table I.)

General Comments

Under *normal* operating conditions, no hazardous exposures to perchlorethylene vapor existed in either the customers' or operators' areas. Excessive exposures were developed when heavy loads were removed from the machines after tumbler drying. This was caused by solvent retention within the clothing. Precautions must be taken to insure that overloading is not permitted, and that loads are properly dried. *This may indicate that the operator should supervise all loading and unloading operations.*

Additionally, high concentrations persist for several minutes during the removal of used filter-residue material from the cooker during routine maintenance operations. This operation normally is performed once a week, for about 10 to 15 minutes. For a short period of time, approximately 5 minutes, the concentrations may exceed the 100 ppm,

* California General Industry Safety Orders.

or even the 200 ppm limit. Respiratory equipment should be available and used, if excessive levels are developed. It is recommended that this operation be performed after the regular store hours, so that customers will not be inadvertently exposed to these vapors.

The front door of one machine was so designed that the fan activating interlock switch functioned only after the door was opened 45 degrees. As a result, a slight opening of the door permitted vapors to escape into the customer area. Particular emphasis should be placed on the proper design of interlock switches, so that they are activated immediately upon door opening.

In California it is required that a qualified operator be present at all times during the operation of these machines. The Association of Casualty and Surety Companies suggests "A competent, full-time attendant is recommended when the center is open. If this is not possible, frequent supervision and inspection services should be provided." In the Michigan survey two occasions are described where "a gasket blew out of the equipment which treats solvent for the . . . machine in an attended laundry . . . the maintenance man, who was fortunately available, was able to enter the back room and repair the break. On another occasion in the same plant, a lint bag plugged up. The dike and underfloor drain took care of the leaking solvent, *making possible rapid repair and cleanup.*"

In consideration of the toxicity potential of this solvent, the proven need for evacuation of the building in time of equipment breakdown, the demand for immediate action for the minimizing of exposures in the event of equipment casualty; the necessity for proper use (and limitations involved in use) of respiratory protective equipment; supervision requirements for proper loading and unloading of machines; we feel that all of these factors suggest the need for a qualified operator on the premises at all times that the equipment is available for customer use.

Summary of Recommendations

1. Require the presence of a qualified operator at all times during operation of equipment.
2. Require an organic vapor mask in proper working condition for use in emergency situation.
3. Supervise the use of weighing scales to insure proper loading of the machines.
4. Require the presence of the operator during unloading of machines to insure that loads are properly dried.
5. Provide sufficient mechanical exhaust ventilation in the customer and maintenance areas to insure rapid removal of solvent vapors and to prevent leakage from the machines into the occupied areas.

Report prepared by:

PAUL E. CAPLAN
Senior Industrial Hygiene Engineer

TABLE I
Atmospheric Concentrations of Perchloroethylene

Operation	Atmospheric concentration—ppm ¹				Remarks
	A	B	C	D	
A. Customer area

DEPARTMENT OF PUBLIC HEALTH
 BUREAU OF OCCUPATIONAL HEALTH
 1930 Beverly Boulevard, Los Angeles 57, California

**REPORT OF AN INDUSTRIAL HYGIENE STUDY OF COIN-OPERATED DRY
 CLEANING MACHINES AT PACIFIC DRY CLEANING, INC., 205
 SOUTH GLENDALE BOULEVARD, GLENDALE, CALIFORNIA**

Study No. : S-1532

Study requested by :
 State Fire Marshal's Office
 Mr. William Garrett

Report date : March 24, 1961

Study conducted by :
 Bureau of Occupational Health

Robert R. Johnson, M.D., Medical Officer in Charge
 Paul E. Caplan, Industrial Hygiene Engineer

General Comments

Under normal operating conditions observed, no hazardous exposures to either the customers or the operators of this equipment were developed. The major consideration, from a health standpoint, should be

directed towards plans and provisions in the event of breakdown of the equipment. *We suggest that the inherent toxicity of perchlorethylene is sufficient to warrant the continuous presence of an attendant who is cognizant of the hazards of overexposure to this solvent, and instructed in the measures to be taken in the event of equipment failure. We refer you to the "general requirements" mentioned in the "Michigan Occupational Health" bulletin on "Coin-op Dry Cleaning—New Development", Vol. 6, No. 2.*

We particularly would emphasize the need for proper respiratory protective equipment, ready for immediate use; the use of scales for weighing load; and the presence of an attendant at all times that the equipment is in use, to insure prompt and proper action in the case of equipment failure. This operator should be instructed concerning the toxicity and hazards associated with the use of chlorinated solvents.

Summary of Recommendations

1. Require the presence of a qualified operator at all times during the operation of the machines.
2. Require respiratory protective equipment, in proper repair, for use in emergency situations.
3. Require a means for weighing garment loads, and requiring the operator to supervise the customers' proper use of the scale and equipment.

CLEANING WITH COINS

More Misery Than Money

SMALL BUSINESS

The Troubles of Coin-Ops

Potential investors poured into the convention of the National Institute of Drycleaning two years ago, clamoring to find out about a new "wonder business" that was virtually guaranteed to coin profits while they went fishing. Last week in Washington, the institute met again, and this time it was hard to hear a good word said for the business of coin-operated drycleaning shops. In the two years between the two gatherings, the coin-op industry blossomed into a \$120 million-a-year business with

7,300 shops across the U.S. But coin-ops have made more owners miserable than millionaires.

Not for Amateurs. Coin-operated drycleaning machines look and operate much like coin-operated laundry machines. Promising to clean an eight-pound load of clothes for \$1.50 to \$2, they were expected to be just as successful. The Norge division of Chicago's Borg Warner Corp. got into the market early and now had 50 percent of it. Soon 32 other firms followed—including G.M.'s, Frigidaire, Whirlpool, Westinghouse, Philco—and the competition was

on. Most of the machines were sold not to established and experienced drycleaners, but to investors who swallowed the high-powered promises of "profits while you sleep." Hard-talking salesmen urged investors to take out 90 percent loans on equipment worth up to \$100,000. Many cities were quickly swamped with coin-ops; Denver at one point had 1,800 machines vying for business that 500 could have handled. Drycleaning even by machine turned out to be no business for beginners. The plumbers, insurancemen, and merchants who set up shops found that almost every fabric posed a different cleaning problem and that customers expected them to take out spots and stains just like the more expensive professionals, whose drycleaning process takes 14 separate steps. Coin-op cleaning proved to be better suited for such bulky items as blankets and draperies than for men's suits and outerwear. Full-time attendant (often required by local laws) sent up labor costs. Electric bills were high, and machines frequently proved unreliable. Clothes often came out smell-

ing like sulphur. Many began to echo the wry dismay of Irwin Gott, a Houston jeweler-turned-drycleaner, "I didn't intend this to be a nonprofit corporation; it just turned out that way."

Little Extras. When coin-ops first started, the talk was that they would soon put professional drycleaners out of business. Something quite different is happening. To attract customers, the successful coin-ops have had to expand their operations into spotting, pressing and other services, thus are becoming somewhat professional themselves. Many professionals, having lost some business to the coin-ops, have turned to selling coin-op-type service as a sideline, for cleaning materials from around the house and old clothes that do not need pressing. The general feeling at last week's convention was that there is a continuing place for coin-ops, but that the most successful will probably be managed by professional cleaners in big operations that put coin laundry and coin drycleaning under the same roof with a full line of professional drycleaning.

Coin-operated drycleaning boom loses some of its steam. Some of the estimated 7,000 shops housing coin-operated drycleaning machines are feeling a competitive pinch. Dikran P. Conchian, president of an eight-store chain in the New York area, says his company has closed one shop and "it's quite conceivable we may have to close another," because of market saturation and difficulties in getting people to try the service. *Norge fashions a \$1 million advertising campaign to boost patronage at Norge-equipped stores.*

Makers of coin-operated cleaning machines report sales are off 50 percent from last year. *John Crouse*, general manager of *Whirlpool's* commercial laundry and drycleaning division, *predicts the sharp sales drop will eliminate many of the weaker producers of such equipment.* "We grew faster than the public accepted the new idea," says William A. Douglass, a Westinghouse executive. Most firms in the field remain optimistic about long-term prospects however.

LICENSING OF FORESTERS

LICENSING OF FORESTERS

Senate Bill No. 991

Senate Bill 991, authored by Senator Carl Christensen of Eureka, was introduced in the 1963 session of the Legislature. The bill was referred to the Senate Interim Committee on Business and Commerce for further study.

Senate Bill 991 creates a board of registration for professional foresters within the Department of Professional and Vocational Standards. It sets forth the minimum requirements for licensing and registration, which require an applicant to be 23 years of age, a graduate of a forestry school, and to have two years of practical experience as a forester; in addition, he must pass an examination which has been prescribed by the Board of Registration. The act does not apply to any governmental agencies nor employees or agents of landowners working their own lands.

There are approximately 1,400 people engaged in the field of forestry within the State of California that could be affected by this legislation, if enacted. At the present time, seven other states have licensing provisions similar to those proposed by SB 991. The committee has been advised that five other states are contemplating such legislation. The committee staff contacted officials of those states known to have laws pertaining to the licensing of foresters. The States of Florida, Alabama, South Carolina, and Michigan responded to the requests for information. Information from the State of Georgia was received subsequent to the hearing.

Officials of the Society of American Foresters were contacted in an effort to secure the best possible witnesses for the hearing held by the committee on April 7, 1964. In addition, F. H. Raymond, State Forester of the State of California, was asked for suggestions as to possible witnesses. He also appeared personally to testify. Inquiry was made of the U.S. Forest Service, in order to secure the views of the federal officials in forest protection and forest management. Finally, the large lumber companies were requested to express their views, and did so at the hearing, through a spokesman. The public hearing covered as broad a spectrum as possible in an effort to obtain the views of those directly concerned. Only one letter was received that opposed the licensing and registration of foresters.

Testimony in Support of Proposed Legislation

The bulk of the testimony was actively in support of SB 991. Any opposition, as such, arose out of incidental questioning by the various members of the committee. As was previously indicated, the proponents of the measure are either officials of public agencies or members of the Society of American Foresters.

The Society of American Foresters is a nonprofit organization with about 50,000 members. In the main, the membership is comprised of graduates of professional forestry schools with a four-year course of study. The society has been instrumental in securing the licensing and registration of foresters in the states of Alabama, Florida, Georgia, Michigan, Oklahoma, South Carolina, and West Virginia. 1,100 of the 1,400 persons engaged in this activity in the State of California

are members of the northern and southern California sections of the national society.

Testimony by Mr. Tobe Arvola, Chairman of the Northern California Section of the Society of American Foresters, indicated the scope and extent of professional activity in this field:

Mr. Arvola: "The principal employers of foresters in California are the private timber industry, the two professional forestry schools in the state, the U.S. Forest Service, the U.S. Bureau of Land Management, the U.S. Bureau of Indian Affairs and the California Division of Forestry. Twenty forest consultant firms are resident in California. A number of consultants from outside the state practice here, too. Foresters are also employed as specialists in a number of other state and federal agencies concerned with wild land management, outdoor recreation, and taxation. In aggregate, the foresters in these many organizations have technical responsibilities for the protection and management of over 17 million acres of private and public commercial forestland in California."

The State Forester, F. H. Raymond, concurred in testimony that there are 17 million acres of commercial timber in the State of California, half of which is privately owned. He indicated that we are the second largest producer of timber in the United States, with an output of $5\frac{1}{2}$ million board feet each year. Sixteen percent of the nation's lumber manufactures and wood products originates in the State of California. The value of this timber harvest is 270 million dollars. In addition, $2\frac{1}{4}$ billion dollars are brought into the economy through those engaged in enterprises dependent on wood. There are 250,000 jobs supported by the lumber industry in the State of California.

Needless to say, the old method of harvesting timber is no longer used. The old procedure of ruthless cutting, leaving the small trees and denuding the land as a result of the operation, has been succeeded by enlightened forest management. With the aid of the professional, the concept of a perpetual timber crop is the keystone of the continuance of the forest industry, not only in California, but throughout the country.

It was the opinion of the State Forester that the successful continuation of good timber practice requires highly trained men in the management of both public and private forest lands, and that fire protection, proper control, and other related practices are dependent upon this supply of personnel.

In addition to the question of recreational use of public and private timber lands, everyone is aware of the acute water problems. Eighty-five percent of the water supply in California is produced or affected by the watersheds lying within the erodable forest lands of the state. This situation entails fire protection, pest control, production and distribution of tree planting stock, advisory services, research, and last but not least, regulation of the forestry harvesting practices on private lands.

Section 4901 to 4973.5 of the Public Resources Code spells out the minimum standards for the harvesting of timber. The Forest Practice Act of California provides for the establishment of forest districts

and each district has its own rules. These rules are developed by the Forest Practices Committee, comprised of timber owners and operators within the area, who are appointed by the Governor. Public hearings are held to develop the rules, and interested parties make recommendations as to their scope and content. When the rules have been adopted, they have the force of law.

Under the Forest Practice Act, timber owners are permitted to deviate from specific requirements to alternate procedures which have been approved by the state. The State Forester indicated some of the implications of these practices:

Mr. F. H. Raymond: "As forestry becomes more intensive in California, I expect that more and more use of the alternative plan of forest management will come to govern their practices. Foresters are often used by private operators to develop these plans, and execution of such practices as seeding and planting is sometimes subcontracted to private consulting foresters. It is becoming quite apparent that the Forest Practice Committee and the Board of Forestry will need to place greater reliance upon professional foresters within and outside the Division of Forestry to evaluate these plans before they are approved."

Forester Raymond touched on the controversial nature and problems of private timber cutting in the redwood area:

Mr. Raymond: "Some of the cutting that has been publicly condemned is the clear cutting of trees. Because of unstable soils, considerable wind throws of trees have occurred in selectively cut areas. To prevent this loss, the operators applied for and received approval for alternate plans which permit block cutting followed by seeding or planting to provide for a new forest crop. This type of operation is a sound silviculture practice under certain conditions, but it has to be evaluated and applied under professional forestry direction."

It was Forester Raymond's contention that the role of the professional forester is a key factor in the success of the development, practice, and application of forest practice rules and forest management plans. Approximately half of the forest lands in California are privately owned. These 8½ million acres are under the combined ownership of 30,000 people. This statistic is misleading, in view of the fact that almost half of this acreage is under the management of 23 large industrial tree farms which have made rapid strides and now have reached sustained yields from their properties. These industrial tree farms all employ professional foresters.

State Forester Raymond indicated that the main problem concerns the 4½ million acres comprised of small firms, ranchers, and absentee owners and investors, who have little or no knowledge about the value of their timber and property. This group of landowners represents the largest problem with respect to improper forest use. Because of their lack of knowledge, these owners have absorbed financial loss and have suffered damage to their properties. The general public has also suffered because these properties have been damaged by soil erosion, fire, stream and watershed damage, etc. These conditions exist despite the

efforts of the forestry division to provide help with their advisory services. The division is able to work with only a portion of the owners.

In urging passage of the bill, Mr. Raymond concluded his statement as follows:

Mr. Raymond: "This bill is not sponsored by our agency; it has been promoted by the Society of American Foresters, to which most foresters of the Division of Forestry belong. Nonetheless, in principle we endorse this bill like the State Foresters of seven other states have done with respect to similar legislation. I believe that the licensing of professional foresters will help maintain the importance of forestry in California, contribute to the success of this state forestry program, improve the forestry services that are needed by thousands of owners, and benefit the operations of your state forestry agency."

The value of a professional forester, a man with the proper education, training, and experience, was pointed out by Robert Kleiner, a member of the Society of American Foresters, and also a consulting forester. He gave three examples showing the indispensable nature of this service for a person who wants his property evaluated. He indicated that an inexperienced man would not have the necessary knowledge as to locations, would not know where to look for boundaries, etc. He related an example of one case in which an inexperienced person made a survey and classified the land as brush and range land, with the value estimated on that basis. After this land was sold, the seller prepared to take legal action because the property actually had a valuable stand of timber on it. This error resulted from the fact that the boundaries were not clear, and the party making the survey did not take this into consideration. It was pointed out that an experienced forester would have raised the question of the improper boundaries, and would have called attention to the difficulties involved in making a proper evaluation until the land survey itself were made.

Referring to another situation, Mr. Kleiner demonstrated the dangers of having an inexperienced man "cruise" his timber for the purpose of selling trees to a lumber mill. Reports in this case were made by two "cruisers" and a comparison of the reports showed that there were wide variances in the timber quantities estimated by the two. When a comparison of these reports was made it was obvious that the second report was merely a copy of the first, using exaggerated figures with respect to the timber contained on the property. Both the landowner and the prospective buyer could have ended up in court had the error not been corrected.

The third type of situation concerns the appraisal of the real estate irrespective of the timber. If the real estate brokers making the appraisals are inexperienced in forest matters, and do not know timber values, their appraisal could be far enough off to hurt the property owner and/or the property buyer. It was pointed out that a real estate broker would ordinarily consult an experienced forester when making his appraisal of the property.

In connection with Mr. Kleiner's testimony, Senator Pittman raised the following question:

Senator Pittman: "I happen to be a real estate broker and I am curious about the relationship you have indicated. A real estate broker active in this type of work normally hires a timber firm to take care of that chattel of personal property. Would this bill exclude real estate brokers from appraising the land?"

Mr. Kleiner: "No, I don't think this bill would exclude the appraisal by professional brokers or could exclude them from the services they now render, but I think it should be pointed out that there are foresters trained to assist in and to appraise timber or forest lands and forest values, and I think in these examples if these appraisers had foresters to advise them, these mistakes would not be made."

The chairman of the committee suggested that the bill could be restrictive:

Chairman Short: "Of course, you might want to take a good look at this part in this section, 7802, which bags a lot of people, including evaluation, and I think you want to make the boundary clear and real stiff and permanent. I don't think they want to be limited. Do they want to be limited?"

Senator Pittman: "It would be a little touchy."

Chairman Short: "There are a lot more real estate brokers than foresters."

Continuing testimony on the types of problems that crop up when unqualified people give advice, Walter Bemis, a professional forester, indicated how people using this kind of service suffer. He stated that in one section of northern California an individual advertised in the phone book, and his business cards indicated, that he was competent to furnish services common to the forestry profession. Mr. Bemis testified that he had observed this gentleman's work, and had seen him apply chemicals to take care of an infestation where the insects had actually left the trees.

He stated that a person posing as a forester had induced two elderly women who had inherited a 5,000-acre tract of timber to allow him to represent them. The results of this person's activities to date indicate that he has sold the timber for these elderly women for less than half of the going rate. He has negotiated sales contracts which were disadvantageous to them and has received eight promises to do cultural work of which he has insufficient knowledge.

Mr. Bemis cited a third case concerning an absentee owner living in South America. The virgin timber on this person's property had been burned over. This individual had been given permission to harvest the timber and prepare the area for reforestation. The arrangement between the so-called expert and the absentee owner was made by mail. The net result of this transaction was that the owner received one-fourth of the actual value of the merchantable timber, and the presumed expert endeavored to charge the owner three times the going rate in preparing the ground for reforestation. This resulted in a loss of almost \$25,000 to this owner.

Mr. Bemis cited other examples wherein the owners of forest land had followed the advice of the so-called experts and had suffered

financial loss and irreparable harm to their property after following such advice.

Additional testimony in favor of the bill was given by Mr. Herbert Sampert, Chairman of the Licensing Committee for the Society of American Foresters. Mr. Sampert is employed by the University of California School of Forestry. He teaches logging, engineering, production, and is also in charge of the university research forest. He dealt with the various aspects of the bill, and indicated that he felt that the public employees who were excluded by the bill would voluntarily become members.

Further testimony was given by Mr. Grant Morse, Assistant Regional Forester, United States Forest Service. In part, he stated:

Mr. Morse: "We believe such a law can offer to the client of the professional consultant forester the same kind of protection that is given by licensing legislation to the client or patient of the doctor, the dentist, the lawyer. The increasing demand upon land managers for all of the products of forest lands—water, recreation, wildlife, and forage, as well as timber and other wood products—places a grave responsibility on the forestry profession to do an even better job. The profession must constantly provide a high level of performance, etc. It should prevent untrained and unqualified persons from offering professional forestry services to clients who have no basis for judging their qualifications as professional foresters."

He concluded his statement by saying:

Mr. Morse: "I have carefully studied the provisions of SB 991 and believe it will be of real benefit to the state in meeting those objectives if passed into law."

Additional testimony, representing the thinking of the timber owners, was given by Mr. John Callaghan, Secretary-Manager of the Forest Protective Association. This organization generally represents the mill owners and some of the large manufacturers who own most of the private timberland in the state. His organization was in favor of the bill because forestry is a prime industry in the state, and the utilization of timber resources is becoming more complex. It was his opinion that licensing would raise the standards of the profession and be a benefit to the general public.

Chairman Short raised the question of the financing of the registration and licensing project, and was answered by Mr. Sampert:

Chairman Short: "Do you have a budget? Have you worked this out to determine that you can support and sustain this and if you can get assistance from the Attorney General's office, legal assistance, then you have to pay it at the rate of \$12 an hour, which is kind of cheap, frankly, but the rate of \$12 an hour is what you will have to pay. . . . You are setting up a five-man board. One has to be a layman. That, you know, under the law. How are you going to support it?"

Mr. Sampert: "That's a long question."

Chairman Short: "You have to pay the members of the board, you know. You just don't have enough money here to do the job."

Mr. Sampert: "We have not prepared a budget as such. We feel that in view of the experience of other professional groups, some of which have a license fee of less than \$25, we feel that this figure of \$25 was, we will call it, a happy medium."

Chairman Short: "How many members do they have that pay this \$25?"

Mr. Sampert: "Substantially more."

The chairman suggested that it would be problematical whether they could get by for \$25 a year, and that \$100 a year might be more realistic. The question of exclusions was referred to throughout the hearing by all of the witnesses. All witnesses indicated that they felt all of the foresters would become registered and licensed, as a matter of principle.

The exclusions in SB 991 are as follows: Section 7810: the provisions of this chapter do not apply to the following persons: A. Any person performing the services of a professional forester who is employed by the federal government, or any political subdivision or agency thereof, or an employee of the State of California, or political subdivision or agency thereof. B. Any landowner, his agent, or employee who performs the services of a professional forester on lands owned by such individual landowners.

The size of the group to be registered becomes a large factor, upon examination of these exclusions and evaluation of the testimony of witnesses.

The testimony of Tobe Arvola indicated that half of the foresters of the state are employed by private industry and the other half are publicly employed. If this estimate is taken to be correct, and judged in connection with testimony that there are approximately 1,400 foresters within the State of California, then half of them would be excluded because they are employed by political subdivisions. The other exclusion, providing exemption for a landowner or an employee of a landowner would, of itself, eliminate the bulk of the remaining 700 foresters.

The testimony and statement of John Callaghan, Secretary-manager, California Forest Protective Association, takes on more significance when this exclusion is considered. He pointed out, appropriately, that SB 991 does not require that a landowner or his employee obtain a professional forester's license to practice forestry on his own lands.

The testimony of the State Forester, F. H. Raymond, indicated that approximately half of the acreage in private forests is under the management of 23 large industrial tree farms. It would then appear logical that there could be no more than 300 to 350 foresters who would come under the licensing provisions of the proposed act. It appears that either the exclusions should be eliminated and that all persons in this work should become registered and licensed, or that the license fee should be raised to a minimum of \$150 a year, which would make the fee the second largest in the Department of Professional and Vocational Standards. It would be the largest fee charged to any profession.

Comparison With Laws of Other States

The information received from the States of Michigan, South Carolina, Georgia, Alabama, and Florida was helpful to the committee and

should be compared with the proposed SB 991. The bills received from the states were very similar to SB 991; each of them provided for registration, each set forth the definition of a registered or licensed forester, each of them spelled the exclusions, each listed the requirements for becoming a forester, each was governed by a board, and each of them provided for a minimum license fee. The license fees ranged from \$10 in the States of Florida, Alabama, and Georgia, to \$15 in the State of South Carolina and \$25 in the State of Michigan. In Florida the registration was permissive; in the other four states, where information was received, registration of those covered was mandatory.

The exclusions in the Michigan act had the effect of nullifying the legislation. They provided that so long as an individual did not set himself forth as a registered forester, or use the term, he could engage in the same activities that a registered forester might. The act reads, in part: "Nothing contained in this action will be construed as preventing any person, firm, partnership, or corporation from practicing forestry, landscape architecture, or from managing woodlands, forestry trees, or from operating the removal of any products therefrom or planting trees on any part of land in any manner desired."

We were able to ascertain that in the State of South Carolina there are a total of 315 registered foresters. Figures are not available for the four other states. All of the acts had a so-called grandfather clause, which permitted those who had been practicing in the field to secure coverage under the act, either by being blanketed in or by taking an examination. Each of the acts provided for minimum education requirements of four years study in an accredited school. All provided for the substitution of experience for education. In some of the states, a written examination was required of those who had the college education; in one, this was not a requirement. Each of the states indicated that the laws had been in effect for a short time, and that their experience in this connection was not sufficient to allow them to render any opinions.

Numerous letters and statements were received by the committee and are made part of the record as an appendix to this report.

RECOMMENDATIONS OF THE COMMITTEE

It is the conclusion of the committee that the size of the group that would be covered by the mandatory provisions of the proposed legislation is much too small to support a regulatory and licensing agency without extremely high licensing fees. Experience with other programs that provide for permissive registration is poor. In our opinion the large fee required to license foresters would be self-defeating and a barrier to voluntary registration.

In view of the fact that the State Division of Forestry does oversee the practice of good land management, and that the services of many public agencies are available for this purpose, it should follow that the public benefit is adequately protected. If not, then perhaps additional employees should be hired by the state for this purpose. The committee feels that the registration of foresters is neither feasible nor advisable at this time.

APPENDIX

SENATE BILL

No. 991

Introduced by Senator Christensen

March 18, 1963

REFERRED TO COMMITTEE ON GOVERNMENTAL EFFICIENCY

An act to add Chapter 12.5 (commencing with Section 7800) to Division 3 of the Business and Professions Code, relating to the licensing and regulation of professional foresters, creating a State Board of Registration for Professional Foresters, prescribing its organization, powers and duties, and making an appropriation therefor.

The people of the State of California do enact as follows:

SECTION 1. Chapter 12.5 (commencing with Section 7800) is added to Division 3 of the Business and Professions Code, to read:

CHAPTER 12.5. PROFESSIONAL FORESTERS

Article 1. General Provisions

7800. This chapter may be known and cited as the Professional Foresters Law.

7801. "Board," as used in this chapter, means the State Board of Registration for Professional Foresters.

7802. "Professional forester," as used in this chapter, means a person who, by reason of his knowledge of the natural sciences, mathematics and the principles of forestry, acquired by forestry education, performs services including, but not limited to, consultation,

LEGISLATIVE COUNSEL'S DIGEST

SB 991, as introduced, Christensen (Gov. Eff.). Professional foresters.

Adds Ch. 12.5 (commencing with Sec. 7800), Div. 3, B. & P.C.

Creates within the jurisdiction of the Department of Professional and Vocational Standards a State Board of Registration for Professional Foresters consisting of five members appointed by the Governor for four-year terms.

Vests board with power to license and regulate professional foresters. Prohibits a person from engaging in activity as a professional forester without such a license.

investigation, evaluation, planning, or responsible supervision of forestry activities when such professional services require the application of forestry principles and techniques.

Article 2. Exclusions

7810. The provisions of this chapter do not apply to the following persons:

(a) Any person performing services of a professional forester who is employed by the federal government, or any political subdivision or agency thereof, or an employee of the State of California, or any political subdivision or agency thereof.

(b) Any landowner, his agent, or employee who performs services of a professional forester on lands owned by such individual landowner.

Article 3. Administration

7820. There is in the Department of Professional and Vocational Standards a State Board of Registration for Professional Foresters consisting of five members appointed by the Governor.

7821. Each member of the board shall be a resident of this State and qualified under the terms of this chapter as a forester.

7822. Of the five members appointed to the board, one shall be a practicing consulting forester of at least 10 years practice in the field of professional forestry and not more than two of the appointees shall be employed by public agencies.

7823. The first members of the board shall be appointed within 60 days after the date when this chapter becomes effective. Of the members first appointed the terms of each shall expire as follows: the term of one member January 15, 1965, the term of two members January 15, 1966 and the term of two members January 15, 1967.

After the first appointees, each member of the board shall hold office for a term of four years, and shall serve until the appointment and qualification of his successor or until six months have elapsed since the expiration of the term for which he was appointed, whichever first occurs.

Vacancies occurring in the membership of the board for any cause shall be filled by appointment for the unexpired term within 30 days after such vacancy.

7824. The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty.

7825. The board shall meet at Sacramento, within 30 days after its members are appointed, for the purpose of electing officers and, within 60 days of the first meeting, adopt rules to govern its action. Thereafter, the board shall not hold less than three regular meetings each year, once in June, once in October and once in February for the purpose of transacting such business as may properly come before it. At the June meeting of each year the board shall elect officers consisting of a chairman and a vice chairman.

Special meetings of the board may be held at such times as the board may provide in its rules. Three members of the board may call a meeting at any time.

7826. Three members shall constitute a quorum at a board meeting.

Due notice of each meeting and the time and place thereof shall be given each member in the manner provided in the rules.

7827. Any member or committee of the board may administer oaths and may take testimony and proof concerning all matters within the jurisdiction of the board.

7828. The board is vested with all functions and duties relating to the administration of this chapter, except those functions and duties vested in the director under the provisions of Division 1 (commencing with Section 100) of this code.

7829. Each member of the board shall receive a per diem and expenses as provided in Section 103.

7830. The board, with the approval of the director, shall appoint an executive secretary who may not be a member of the board and may employ such other clerical and technical assistance as may be necessary properly to administer the work of the board in accordance with civil service regulations.

Upon recommendation of the board, and with the approval of the Director of Finance, the director shall employ investigators and attorneys to assist the board in prosecuting violations of this chapter, whose compensation and expenses shall be payable only out of the Professional Foresters Fund.

7831. The executive secretary shall keep a complete record of all applications for licensing and the board's action thereon and shall prepare annually a roster showing the names, places of business, and residence of all licensed professional foresters. A copy thereof shall be furnished to each professional forester licensed under the provisions of this chapter. Copies of such roster shall be available on application to the secretary, at such price per copy as may be fixed by the board.

7832. The board, in addition to the usual periodic reports, shall within 30 days prior to the meeting of the general session of the Legislature submit to the Governor a full and true report of its transactions during the preceding biennium, including a complete statement of the receipts and expenditures of the board during the period.

A copy of the report shall be filed with the Secretary of State.

All records shall be public records.

Article 4. Application of Chapter

7850. It is unlawful for any person to engage in the business or act in the capacity of a professional forester within the state without having a license therefor, unless such person is particularly exempted from the provisions of this chapter.

7851. Any person who acts in the capacity of a professional forester without a license, and any person who conspires with another person to violate any of the provisions of this chapter, is guilty of a misdemeanor.

7852. No person engaged in the business or acting in the capacity of a professional forester may bring or maintain any action in any court of this state for the collection of compensation for the performance or any act or contract for which a license is required by this chapter without alleging and proving that he was a duly licensed pro-

fessional forester at all times during the performance of such act or contract.

Article 5. Licensing

7860. Under rules and regulations adopted by the board, the executive secretary may investigate and qualify applicants for professional foresters' licenses by written or oral examination, or both.

7861. To obtain an original license, an applicant shall submit to the executive secretary an application in writing under oath containing the statement that the applicant desires the issuance of a license under the terms of this chapter.

The application shall be made on the form prescribed by the board in accordance with the rules and regulations adopted by the board and shall be accompanied by the fee fixed by this chapter.

7862. The board shall require an applicant to show such degree of experience, and such general knowledge of the profession of forestry as the board deems necessary for the protection of the public.

An applicant shall meet all of the following qualifications:

(a) Be at least 23 years of age.

(b) Be of good moral character and have a good reputation for honesty and integrity.

(c) Be a four-year forestry school graduate.

(d) Furnish evidence of two years or more experience satisfactory to the board evidencing that the applicant is competent to practice as a professional forester.

(e) Successfully pass an examination or examinations prescribed by the board.

7863. Examinations shall be given by the board as often as it deems necessary, but at least once every six months.

7864. An applicant failing in an examination may be examined again upon filing a new application after a six-months lapse and on paying the application fee. After two failures, the applicant shall wait one year before taking an additional examination or examinations.

7865. From the effective date of this chapter until 180 days thereafter have expired, the board shall waive the examination in the case of any applicant as well as the requirement of subdivision (a) of Section 7862, if the applicant is practicing in the profession of forestry and has done so for six years during the last 10-year period and accompanies such application with letters from two practicing professional foresters who have carried on such profession in the state for at least 10 years, certifying to the qualifications of the applicant and his experience. One year of college education may be substituted for one year of experience, not to exceed four years of the required six years of experience in the practice of the profession of forestry.

7866. If information brought to the attention of the board is such that in the board's discretion, it would be proper to deny the application, the board shall forthwith notify the applicant to show cause within not more than 30 days, why the application should not be denied. The proceedings shall be conducted in accordance with the provisions of Chapter 5 (commencing with Section 11500) of Part

1 of Division 3 of Title 2 of the Government Code, and the board shall have all the powers granted therein.

7867. Should an application for an original license be denied for any of the reasons provided in this article, or should any applicant for an original license, after having been notified to do so, fail to appear for the examination at the time set therefor, without cause, the fees paid by the applicant in connection with the filing of such an application shall be forfeited and shall be credited to the board as an earned fee. Any reapplication for a license shall be accompanied by the fixed fee for this chapter.

7868. The license shall be signed by the licensee, shall be non-transferable and shall be displayed in the licensee's main office or chief place of business. Satisfactory evidence of the possession of his license and the current annual renewal thereof shall be exhibited by the licensee upon demand.

Article 6. Licenses and Seals

7880. Each applicant who has passed the examination and otherwise qualified as a professional forester shall, upon payment of the license fee, be issued a license as a professional forester. The license shall be signed by the chairman and the executive secretary of the board, and shall be issued under the seal of the board.

7881. A duplicate license to replace one lost, destroyed, or mutilated, may be issued, subject to the rules and regulations of the board, upon payment of the duplicate license fee.

7882. The board shall maintain at the office of the board in Sacramento, open to public inspection during office hours, a complete, indexed record of all applications, licenses issued, licenses renewed and all revocations, cancellations, and suspensions of licenses.

7883. Each professional forester licensed under the provisions of this chapter shall, upon receipt of a license, obtain a seal of the design authorized by the board, bearing the licensee's name and number of his license. It shall be unlawful to use this seal unless the certificate of the licensee is currently in full force and is not suspended, revoked, or expired.

7884. All reports, coming within the purview of this chapter shall be signed by the licensee issuing the report, and shall bear his seal, and it shall be unlawful for any such report to be issued without such a signature and seal affixed.

7885. Any license issued under the provisions of this chapter shall expire on June 30th of each year.

A license may be renewed without penalty by the filing of a renewal application with the board not later than June 30th of each year. To be effective, such renewal application shall be made upon forms prescribed by the board and shall be accompanied by the annual renewal fee prescribed in this chapter. Otherwise, a license, application for renewal of which has not been so filed on or before June 30th of each year, shall automatically be suspended until a renewal application is properly filed, and shall be renewable only if such renewal application is filed with the board not later than September

30th of each year and is accompanied by the penalty fee prescribed herein, in addition to the current renewal fee.

7886. The filing of a renewal application within the time, in the form and with the fees prescribed in this article, authorizes operation as a professional forester by the licensee until the actual issuance of the renewal license for the ensuing fiscal year; provided, that the license of such applicant is not otherwise under suspension by reason of the decision of the board in a disciplinary proceeding.

Article 7. Disciplinary Proceedings

7900. The board may upon its own motion and shall upon the verified complaint in writing of any person, investigate the actions of any licensee within the State and may temporarily suspend or permanently revoke any license if the holder, while a licensee or applicant hereunder, is guilty of or commits any one or more of the acts or omissions constituting cause for disciplinary action.

7901. All accusations against licensees shall be filed within two years after the act or omission alleged as the ground for disciplinary action. The proceedings under this article shall be conducted in accordance with the provisions of Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code and the board shall have all the powers granted therein.

7902. The decision may:

(a) Provide for the immediate complete suspension by the licensee of all operations as a professional forester during the period fixed by the decision.

(b) Permit the licensee to complete any or all contracts shown by competent evidence taken at the hearing to be then uncompleted.

(c) Impose upon the licensee compliance with such specific conditions as may be just in connection with his operations as a professional forester disclosed at the hearing and may further provide that until such conditions are complied with no application for restoration of the suspended or revoked license shall be accepted by the board.

7903. A licensee shall be subject to disciplinary action who:

(a) Has been convicted of a felony.

(b) Is not of good moral character.

(c) Has been found guilty by the board of any deceit, misrepresentation, violation of contract, fraud, or gross incompetence in his practice.

(d) Fails or refuses, without legal excuse, to prosecute his services with reasonable diligence causing material injury to another.

(e) Has been guilty of any fraud or deceit in obtaining his license.

(f) Aids or abets any person in the violation of any provision of this chapter.

(g) Fails in any material respect to comply with the provisions of this chapter.

7904. The profession of forestry is hereby declared to be one requiring the actual and nondelegated services of the forester, and a licensed professional forester may use the services of nonlicensed assistants only to the extent that he may be able to certify that he has personally been in charge of the work involved.

7905. Every person is guilty of a misdemeanor and for each offense of which he is convicted is punishable by a fine of not more than five hundred dollars (\$500) or by imprisonment not to exceed three months, or by both fine and imprisonment, who:

(a) Unless exempt from licensing under this chapter, practices or offers to practice forestry in this State without having a valid license.

(b) Presents as his own the license of another.

(c) Knowingly gives false evidence of any kind to the board, or to any member thereof, in obtaining a license.

(d) Impersonates or uses the seal of any other professional forester.

(e) Uses an expired or revoked license.

(f) Represents himself as, or uses the title of licensed professional forester, or any other title representing himself as practicing or offering to practice forestry unless he is qualified by licensing as a professional forester, under this chapter.

(g) Violates any provision of this chapter.

Article 8. Revenue, License Renewals

7920. The fees received under this chapter shall be deposited in the Professional Forester License Fund, which fund is hereby created.

7921. The money paid into the Professional Forester License Fund is continuously appropriated to the board for the purpose of carrying out the provisions of this chapter.

7922. The director shall designate a sum not to exceed 10 percent of the total income of the State Board of Registration for Professional Foresters, for each fiscal year to be transferred to the Professional and Vocational Standards Fund as the board's share of the cost of administration of the department.

7923. The amount of fees prescribed by this chapter is that fixed by the following schedule:

(a) The application fee for an original license is fifteen dollars (\$15).

(b) The registration fee for a professional forester is twenty-five dollars (\$25), for each certificate issued.

(c) The duplicate certificate fee is one dollar (\$1).

(d) The annual renewal fee for professional foresters shall be twenty-five dollars (\$25).

(e) The penalty for failure to apply for a renewal of a license is five dollars (\$5) for each month of delinquency.

AMENDED IN SENATE APRIL 25, 1963

SENATE BILL

No. 991

Introduced by Senator Christensen

March 18, 1963

REFERRED TO COMMITTEE ON GOVERNMENTAL EFFICIENCY

An act to add Chapter 12.5 (commencing with Section 7800) to Division 3 of the Business and Professions Code, relating to the licensing and regulation of professional foresters, creating a State Board of Registration for Professional Foresters, prescribing its organization, powers and duties, and making an appropriation therefor.

The people of the State of California do enact as follows:

SECTION 1. Chapter 12.5 (commencing with Section 7800) is added to Division 3 of the Business and Professions Code, to read:

CHAPTER 12.5. PROFESSIONAL FORESTERS

Article 1. General Provisions

7800. This chapter may be known and cited as the Professional Foresters Law.

7801. "Board," as used in this chapter, means the State Board of Registration for Professional Foresters.

7802. "Professional forester," as used in this chapter, means a person who, by reason of his knowledge of the natural sciences, mathematics and the principles of forestry, acquired by forestry education, performs services including, but not limited to, consultation, investigation, evaluation, planning, or responsible supervision of forestry activities when such professional services require the application of forestry principles and techniques.

Article 2. Exclusions

7810. The provisions of this chapter do not apply to the following persons:

(a) Any person performing services of a professional forester who is employed by the federal government, or any political subdivision or agency thereof, or an employee of the State of California, or any political subdivision or agency thereof.

(b) Any landowner, his agent, or employee who performs services of a professional forester on lands owned by such individual landowner.

Article 3. Administration

7820. There is in the Department of Professional and Vocational Standards a State Board of Registration for Professional Foresters consisting of five members appointed by the Governor.

7821. Each member of the board shall be a resident of this State and qualified under the terms of this chapter as a forester.

7822. Of the five members appointed to the board, one shall be a practicing consulting forester of at least 10 years practice in the field of professional forestry and not more than two of the appointees shall be employed by public agencies.

7823. The first members of the board shall be appointed within 60 days after the date when this chapter becomes effective. Of the members first appointed the terms of each shall expire as follows: the term of one member January 15, 1965, the term of two members January 15, 1966 and the term of two members January 15, 1967.

After the first appointees, each member of the board shall hold office for a term of four years, and shall serve until the appointment and qualification of his successor or until six months have elapsed since the expiration of the term for which he was appointed, whichever first occurs.

Vacancies occurring in the membership of the board for any cause shall be filled by appointment for the unexpired term within 30 days after such vacancy.

7824. The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty.

7825. The board shall meet at Sacramento, within 30 days after its members are appointed, for the purpose of electing officers and, within 60 days of the first meeting, adopt rules to govern its action. Thereafter, the board shall not hold less than three regular meetings each year, once in June, once in October and once in February for the purpose of transacting such business as may properly come before it. At the June meeting of each year the board shall elect officers consisting of a chairman and a vice chairman.

Special meetings of the board may be held at such times as the board may provide in its rules. Three members of the board may call a meeting at any time.

7826. Three members shall constitute a quorum at a board meeting.

Due notice of each meeting and the time and place thereof shall be given each member in the manner provided in the rules.

7827. Any member or committee of the board may administer oaths and may take testimony and proof concerning all matters within the jurisdiction of the board.

7828. The board is vested with all functions and duties relating to the administration of this chapter, except those functions and duties vested in the director under the provisions of Division 1 (commencing with Section 100) of this code.

7829. Each member of the board shall receive a per diem and expenses as provided in Section 103.

7830. The board, with the approval of the director, shall appoint an executive secretary who may not be a member of the board and may employ such other clerical and technical assistance as may be necessary properly to administer the work of the board in accordance with civil service regulations.

Upon recommendation of the board, and with the approval of the Director of Finance, the director shall employ investigators and attorneys to assist the board in prosecuting violations of this chapter, whose compensation and expenses shall be payable only out of the Professional Foresters Fund.

7831. The executive secretary shall keep a complete record of all applications for licensing and the board's action thereon and shall prepare annually a roster showing the names, places of business, and residence of all licensed professional foresters. A copy thereof shall be furnished to each professional forester licensed under the provisions of this chapter. Copies of such roster shall be available on application to the secretary, at such price per copy as may be fixed by the board.

7832. The board, in addition to the usual periodic reports, shall within 30 days prior to the meeting of the general session of the Legislature submit to the Governor a full and true report of its transactions during the preceding biennium, including a complete statement of the receipts and expenditures of the board during the period.

A copy of the report shall be filed with the Secretary of State.

All records shall be public records.

Article 4. Application of Chapter

7850. It is unlawful for any person to engage in the business or act in the capacity of a professional forester within the State without having a license therefor, unless such person is particularly exempted from the provisions of this chapter.

7851. Any person who acts in the capacity of a professional forester without a license, and any person who conspires with another person to violate any of the provisions of this chapter, is guilty of a misdemeanor.

7852. No person engaged in the business or acting in the capacity of a professional forester may bring or maintain any action in any court of this State for the collection of compensation for the performance ~~or any act of any act~~ or contract for which a license is required by this chapter without alleging and proving that he was a duly licensed professional forester at all times during the performance of such act or contract.

Article 5. Licensing

7860. Under rules and regulations adopted by the board, the executive secretary may investigate and qualify applicants for professional foresters' licenses by written or oral examination, or both.

7861. To obtain an original license, an applicant shall submit to the executive secretary an application in writing under oath containing the statement that the applicant desires the issuance of a license under the terms of this chapter.

The application shall be made on the form prescribed by the board in accordance with the rules and regulations adopted by the board and shall be accompanied by the fee fixed by this chapter.

7862. The board shall require an applicant to show such degree of experience, and such general knowledge of the profession of forestry as the board deems necessary for the protection of the public.

An applicant shall meet all of the following qualifications:

(a) Be at least 23 years of age.

(b) Be of good moral character and have a good reputation for honesty and integrity.

(c) Be a four-year forestry school graduate.

(d) Furnish evidence of two years or more experience satisfactory to the board evidencing that the applicant is competent to practice as a professional forester.

(e) Successfully pass an examination or examinations prescribed by the board.

7863. Examinations shall be given by the board as often as it deems necessary, but at least once every six months.

7864. An applicant failing in an examination may be examined again upon filing a new application after a six-months lapse and on paying the application fee. After two failures, the applicant shall wait one year before taking an additional examination or examinations.

7865. From the effective date of this chapter until 180 days thereafter have expired, the board shall waive the examination in the case of any applicant as well as the requirement of subdivision ~~(a)~~ (c) of Section 7862, if the applicant is practicing in the profession of forestry and has done so for six years during the last 10-year period and accompanies such application with letters from two practicing professional foresters who have carried on such profession in the State for at least 10 years, certifying to the qualifications of the applicant and his experience. One year of college education may be substituted for one year of experience, not to exceed four years of the required six years of experience in the practice of the profession of forestry.

7866. If information brought to the attention of the board is such that in the board's discretion, it would be proper to deny the application, the board shall forthwith notify the applicant to show cause within not more than 30 days, why the application should not be denied. The proceedings shall be conducted in accordance with the provisions of Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the board shall have all the powers granted therein.

7867. Should an application for an original license be denied for any of the reasons provided in this article, or should any applicant

for an original license, after having been notified to do so, fail to appear for the examination at the time set therefor, without cause, the fees paid by the applicant in connection with the filing of such an application shall be forfeited and shall be credited to the board as an earned fee. Any reapplication for a license shall be accompanied by the fixed fee for this chapter.

7868. The license shall be signed by the licensee, shall be nontransferable and shall be displayed in the licensee's main office or chief place of business. Satisfactory evidence of the possession of his license and the current annual renewal thereof shall be exhibited by the licensee upon demand.

Article 6. Licenses and Seals

7880. Each applicant who has passed the examination and otherwise qualified as a professional forester shall, upon payment of the license fee, be issued a license as a professional forester. The license shall be signed by the chairman and the executive secretary of the board, and shall be issued under the seal of the board.

7881. A duplicate license to replace one lost, destroyed, or mutilated, may be issued, subject to the rules and regulations of the board, upon payment of the duplicate license fee.

7882. The board shall maintain at the office of the board in Sacramento, open to public inspection during office hours, a complete, indexed record of all applications, licenses issued, licenses renewed and all revocations, cancellations, and suspensions of licenses.

7883. Each professional forester licensed under the provisions of this chapter shall, upon receipt of a license, obtain a seal of the design authorized by the board, bearing the licensee's name and number of his license. It shall be unlawful to use this seal unless the certificate of the licensee is currently in full force and is not suspended, revoked, or expired.

7884. All reports, coming within the purview of this chapter shall be signed by the licensee issuing the report, and shall bear his seal, and it shall be unlawful for any such report to be issued without such a signature and seal affixed.

7885. Any license issued under the provisions of this chapter shall expire on June 30th of each year.

A license may be renewed without penalty by the filing of a renewal application with the board not later than June 30th of each year. To be effective, such renewal application shall be made upon forms prescribed by the board and shall be accompanied by the annual renewal fee prescribed in this chapter. Otherwise, a license, application for renewal of which has not been so filed on or before June 30th of each year, shall automatically be suspended until a renewal application is properly filed, and shall be renewable only if such renewal application is filed with the board not later than September 30th of each year and is accompanied by the penalty fee prescribed herein, in addition to the current renewal fee.

7886. The filing of a renewal application within the time, in the form and with the fees prescribed in this article, authorizes operation as a professional forester by the licensee until the actual issuance of the renewal license for the ensuing fiscal year; provided, that the li-

cense of such applicant is not otherwise under suspension by reason of the decision of the board in a disciplinary proceeding.

Article 7. Disciplinary Proceedings

7900. The board may upon its own motion and shall upon the verified complaint in writing of any person, investigate the actions of any licensee within the state and may temporarily suspend or permanently revoke any license if the holder, while a licensee or applicant hereunder, is guilty of or commits any one or more of the acts or omissions constituting cause for disciplinary action.

7901. All accusations against licensees shall be filed within two years after the act or omission alleged as the ground for disciplinary action. The proceedings under this article shall be conducted in accordance with the provisions of Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code and the board shall have all the powers granted therein.

7902. The decision may:

(a) Provide for the immediate complete suspension by the licensee of all operations as a professional forester during the period fixed by the decision.

(b) Permit the licensee to complete any or all contracts shown by competent evidence taken at the hearing to be then uncompleted.

(c) Impose upon the licensee compliance with such specific conditions as may be just in connection with his operations as a professional forester disclosed at the hearing and may further provide that until such conditions are complied with no application for restoration of the suspended or revoked license shall be accepted by the board.

7903. A licensee shall be subject to disciplinary action who:

(a) Has been convicted of a felony.

(b) Is not of good moral character.

(c) Has been found guilty by the board of any deceit, misrepresentation, violation of contract, fraud, or gross incompetence in his practice.

(d) Fails or refuses, without legal excuse, to prosecute his services with reasonable diligence causing material injury to another.

(e) Has been guilty of any fraud or deceit in obtaining his license.

(f) Aids or abets any person in the violation of any provision of this chapter.

(g) Fails in any material respect to comply with the provisions of this chapter.

7904. The profession of forestry is hereby declared to be one requiring the actual and nondelegated services of the forester, and a licensed professional forester may use the services of nonlicensed assistants only to the extent that he may be able to certify that he has personally been in charge of the work involved.

7905. Every person is guilty of a misdemeanor and for each offense of which he is convicted is punishable by a fine of not more than five hundred dollars (\$500) or by imprisonment not to exceed three months, or by both fine and imprisonment, who:

(a) Unless exempt from licensing under this chapter, practices or offers to practice forestry in this State without having a valid license.

- (b) Presents as his own the license of another.
- (c) Knowingly gives false evidence of any kind to the board, or to any member thereof, in obtaining a license.
- (d) Impersonates or uses the seal of any other professional forester.
- (e) Uses an expired or revoked license.
- (f) Represents himself as, or uses the title of licensed professional forester, or any other title representing himself as practicing or offering to practice forestry unless he is qualified by licensing as a professional forester, under this chapter.
- (g) Violates any provision of this chapter.

Article 8. Revenue, License Renewals

7920. The fees received under this chapter shall be deposited in the Professional Forester License Fund, which fund is hereby created.

7921. The money paid into the Professional Forester License Fund is continuously appropriated to the board for the purpose of carrying out the provisions of this chapter.

7922. The director shall designate a sum not to exceed 10 percent of the total income of the State Board of Registration for Professional Foresters, for each fiscal year to be transferred to the Professional and Vocational Standards Fund as the board's share of the cost of administration of the department.

7923. The amount of fees prescribed by this chapter is that fixed by the following schedule:

(a) The application fee for an original license is fifteen dollars (\$15).

(b) The registration fee for a professional forester is twenty-five dollars (\$25), for each certificate issued.

(c) The duplicate certificate fee is one dollar (\$1).

(d) The annual renewal fee for professional foresters shall be twenty-five dollars (\$25).

(e) The penalty for failure to apply for a renewal of a license is five dollars (\$5) for each month of delinquency.

STATEMENT OF THE STATE FORESTER *

Senate Bill No. 991

Mr. William Montgomery, consultant to your committee, has asked that I submit a statement with respect to S.B. 991 relating to the licensing of professional foresters. As State Forester, I assume you would expect me to inform you about (1) the importance of forestry in California, (2) forestry programs related to this bill, (3) the problems brought about by inadequate forestry knowledge available to some owners and (4) the effect of this proposed bill on your state forestry agency.

Forestry in California

Forestry is one of the most important economic activities in California. We have over 17 million acres of commercial timber, half of which is privately owned. With 339 billion board feet, we rank second among the states in standing timber volume. This enables us to be the second highest producer of timber with about 5.5 billion board feet cut each year. About 16 percent of the nation's lumber manufacture and substantial quantities of other wood products originate in this state.

Value of the annual timber products harvested is on the order of 270 million dollars, and over 2½ billion dollars are added by enterprises dependent upon wood. This industry supports about a quarter of a million of all kinds of jobs in California.

Professional foresters have a vital role in this economic sector. The concept of growing perpetual crops of timber, which forms the basis for the continuance of this forest industry, is put into practice by these highly trained men. They are employed in the management of both public and private forest lands, and in forest fire protection, forest pest control, and other programs of state and federal agencies. Forests are important, too, for many other purposes—for protection of our watersheds, for outdoor recreation, and as a home for fish and wildlife. Hugo Fisher, Administrator of the Resources Agency, recently said, "I believe that the most important crop, in the long run, is the water that these lands produce." He based this statement on the fact that 85 percent of our water supply in California is produced or affected by the watersheds lying within the commercial forest area. Foresters are skilled in the application of management practices to use and enhance the multiple benefits these lands offer.

Related Forestry Programs

The public interest in these forest lands has been long recognized by the State of California. This is evidenced through our programs for forest fire protection, forest pest control, production and distribution of tree planting stock, forest advisory services and demonstrations and research, and in regulation of forest harvesting practices on private lands.

* Prepared for hearing of Senate Factfinding Committee on Business and Commerce. Sacramento, April 7, 1964, by F. H. Raymond, State Forester.

Probably the closest connection with the proposed licensing of foresters is with regard to the latter; i.e., the regulation of private forest practices by the state. This program, which is authorized by the Forest Practice Act (Sections 4901-4973.5, Public Resources Code), sets forth minimum standards for the harvesting of timber. Four forest districts are established under law and each has its separate rules. These rules govern practices pertaining to fire prevention and control, protection of residual trees and soil, prevention and control of damage by forest pests, and restocking of the land with trees. The act also requires timber operators to *obtain permits* from the State Forester to conduct such operations, and further *requires inspections of operations by forest officers of the Division of Forestry*, and establishes certain enforcement measures.

The rules are developed locally by forest practice committees appointed by the Governor, whose members represent timber owners and operators. Hearings are held to develop the rules at which timber owners, operators, and private foresters make recommendations as to scope and content. Upon promulgation by the committees and adoption by the State Board of Forestry, the rules have the force of law.

Under the act, timber owners are permitted to deviate from specific rule requirements through *approved alternate plan procedures*, or by *forest management plans* that are more efficient substitutes for the forest practice rules. These two methods provide the flexibility that is occasionally needed to meet the diverse forest growing conditions found in California and to meet special management objectives. However, these plans must incorporate practices that are equal to or exceed forest practice rule requirements and must be approved by both the local forest practice committee and the State Board of Forestry.

As forestry becomes more intensive in California, I expect that more and more timber operations will use the alternate plan or forest management plan to govern their practices. Today, there are some 41 alternate plans on file with the Board of Forestry. Foresters are often used by private operators to develop these plans, and the execution of such practices like seeding and planting is sometimes contracted to private consulting foresters. It is becoming quite apparent that the forest practice committees and the Board of Forestry will need to place greater reliance upon professional foresters within and outside the Division of Forestry to evaluate these plans before they are approved.

As an example of this, there is quite a controversy today about private timber cutting in the redwood area. Some of the cutting that has been publicly condemned is the clear cutting of trees. Because of unstable soils, considerable windthrow of trees has occurred in selectively cut areas. To prevent this loss, the operators applied for and received approval for alternate plans which permit block cutting followed by seeding or planting to provide for the new forest crop. This type of operation is a sound silvicultural practice under certain conditions, but it has to be evaluated and applied under professional forestry direction.

I would say that in such a program as the regulation of forest practices, the professional forester employed by the industry or as a consultant, is a key factor in its success—in the development and applica-

tion of the forest practice rules, alternate plans, and forest management plans.

Inadequate Forestry Knowledge of Owners

Now, despite state regulation, I would not want to mislead you in believing that good forest practices can be legislated. State regulation cannot serve as a substitute for good forest management; it involves a great deal more than what is covered by current regulations. In fact it would be impractical, if not impossible, to draft rules covering every aspect of forest management under the many complex conditions that exist in California. Regulations are intended to only establish minimum standards to favor continuance of forest productivity and merely to set the limits within which an operation must be conducted to meet this objective.

To achieve optimum forest management, we need in addition to a favorable economic climate, an understanding government, an informed public, knowledgeable timber owners and operators, and greater dependence on professional forestry skills. Basically, these are human factors that are difficult to cope with.

The 8.5 million acres of private forests in California are owned by about 30 thousand people. About 42 percent of this acreage is under management of 23 large industrial tree farms, which are making rapid strides in sustained yield from their properties. All of them employ professional foresters.

The hard core of the problem of improper forest use is with the other 4.6 million acres. These lands mostly belong to small firms, ranchers, rural residents, absentee owners, and investors, who usually have little knowledge about the value of their timber, its potential, how it might be properly protected, improved, harvested, and marketed. Without adequate knowledge many of these owners have absorbed financial loss and irreparable damage to their properties when they entered into transactions for the cutting of their timber with timber buyers and gypo loggers, some of whom have claimed to be foresters. These agents also have promoted many owners to embark on unwise ventures to try to convert their forest land to agricultural use, which is permitted by law with only limited controls. The general public interest has suffered also because of problems caused by soil erosion, fire hazards, stream and watershed damage, and loss of esthetic values caused by such operations.

Throughout the years we have received many complaints of this nature. As best we can we investigate them and try to apply the laws under our jurisdiction, but sometimes it is too late or the laws do not offer a complete solution. I shall not cite any cases since you have heard or will receive specific testimony on this from other witnesses.

This abuse of forest land has continued despite the fact that the Division of Forestry does offer limited advisory services on forest management to these owners. We can only work with a portion of them and only go so far in giving them advice and assistance. Usually, we try to refer as many as we can to private consulting foresters.

Effect on the Division of Forestry

I believe that this bill will not have any material effect upon the internal operations of the Division of Forestry. Public agencies such as ours are exempted under the provisions of the present bill.

Exclusive of supervisors, we employ 50 professional foresters in technical programs. Although they will not have to be licensed, I feel certain that all these men, plus a number of other professional foresters in the division, will want to do so.

It will be particularly advantageous to the individuals concerned and to the state for some of them to become licensed. These are managers of our three state forests having active management programs, forest practice inspectors who are often called upon to testify in court and hearings, and the foresters that advise and assist owners with regard to forest management.

Conclusion

This bill is not sponsored by our agency; it has been promoted by the Society of American Foresters to which most foresters of the Division of Forestry belong. Nonetheless, in principle I endorse this bill, like the state foresters of seven other states have done in respect to similar legislation. I believe that the licensing of professional foresters will help maintain the importance of forestry in California, contribute to the success of this state's forestry programs, improve the forestry services that are needed by thousands of owners, and benefit the operations of your state forestry agency.

TESTIMONY BEFORE THE SENATE FACT FINDING COMMITTEE ON BUSINESS AND COMMERCE

Sacramento, California, April 7, 1964, Regarding Senate Bill No. 991

Mr. Chairman and Members of the Committee:

My name is Henry J. Vaux, Dean of the School of Forestry, University of California at Berkeley. From 1957 to 1961 I was Chairman of the Membership Committee, Society of American Foresters, Washington, D. C., and currently I am chairman of that society's committee on programs in forestry education. That society is the only national association of professional foresters in the United States and has as one of its objectives the advancement and protection of the standards of professional forestry. I mention these affiliations in order to qualify myself as a witness before this committee. My testimony, however, is offered as that of an individual and I do not speak on behalf of the organizations I have mentioned.

Passage of Senate Bill 991 relating to the licensing and regulation of professional foresters would, in my opinion, provide a valuable means for safeguarding public interests which are important in the State of California. In support of this opinion I would like to testify to four related points: (1) the proper protection and management of forest lands is recognized as in the public interest; (2) owners of forest land are dependent on the counsel of foresters in deter-

mining what practices to apply on their lands; (3) the forest protection and management practices proper for particular areas can only be formulated by foresters with intensive training in the natural sciences and in technical forestry subjects; and (4) licensing of professional foresters as proposed in Senate Bill 991 would serve the public interest by certifying to forest landowners and other members of the public that licensees possessed these essential scientific and technical qualifications.

The Public Interest in Forest Protection and Management

The California Legislature has recognized the existence of a public interest in the forest lands of the state. There are approximately 42½ million acres of commercial and non-commercial forest land in California, accounting for about 42 percent of the total land surface of the state. Each year, these lands yield upwards of 6 billion board feet of forest products. In 1960 over 88,700 people were directly employed in harvesting and processing industries engaged in wood manufacture. These same lands yield more than 97 percent of the water runoff comprising California's basic water supply. They are also the environment for more than 100 million man-days of recreation use each year, or roughly 6 days of recreation use per year per inhabitant of the state.

With respect to such lands, the Legislature has stated: "It is in the public interest and to the benefit of the state that forest and vegetative cover be maintained and preserved on forest and watershed lands to conserve water and soil and to prevent destructive floods." (Section 4006.5, Public Resources Code.) The Legislature has also acted "to declare the existence of a public interest in the forest resources and timberlands of this state; to declare the necessity of good forest practices in the harvesting of forest resources to conserve and maintain the productivity of the timberlands in the interests of the economic welfare of the state and the continuance of the forest industry." (Section 4901, Public Resources Code.) In the same section, the Legislature has further declared: "The public interest is affected by the management of forests, timberlands, watersheds and soil resources of the state, and it is the policy of this state to encourage, promote and require such development, use and management of forests and timberlands as will maintain the continuous production of forest products."

Section 4361, Public Resources Code, states: "It is hereby declared to be in the interest of the welfare of the people of the State of California that the need for wood, lumber, poles, piling, wood pulp and other forest products, augmented by the growth in population, requires all forest lands to be kept in fully productive condition. . . . It is further declared to be in the interest of the people of California that the state determine feasible means and methods for reforesting nonproducing forest lands to the end that all forest lands will be eventually brought up to their maximum growth capacity."

Thus, the existence of a public interest in the proper protection, management and reforestation of forest lands in the state has been, and is, clearly recognized by existing legislation.

Landowners and the Public Dependent on Professional Advice

Almost half—46½ percent—of the commercial forest land in California is privately owned, much of it in relatively small tracts. For example, in Mendocino County in 1957 there were 3,865 owners of forest tracts less than 5,000 acres in size. In aggregate these people owned 54 percent of the private commercial forest in the county. Only a handful of these owners were qualified foresters and almost 90 percent of them were not personally connected with forestry or timber products businesses. Thus, in the case of Mendocino County there are more than 3,500 forest owners who must rely on the counsel of qualified foresters if they are to carry out on their lands those practices of forest production, forest management, and reforestation which will protect both their own interests and those of the public which the Legislature has recognized.

The situation which I have described for Mendocino County is representative of that in the other major forested counties of the state. Thus, large numbers of landowners in California are dependent on professional foresters for advice essential to proper management of their lands. Certification of foresters by the means proposed in Senate Bill 991 appears to be a feasible way of providing some assurance to such landowners that the advice they receive on forest protection, forest management and reforestation matters is based on adequate professional background.

Intensive Training Needed for Professional Forestry Practice

The need for certification of the qualifications of professional foresters results from the fact that the practice of forestry is a complex activity for which extensive training in scientific and technical subjects is essential. The growth of a forest, its effectiveness as a protection for watersheds, its response to timber harvesting, and the proper methods for reforesting it all depend on a complicated set of interrelations. The kind of soil on which the forest grows, the species of trees and shrubs which compose it, the kind of microclimate which prevails in each specific forest tract, and the kinds and numbers of animals and insects present in the forest, all affect strongly what is required to protect and manage the forest and to reforest nonproducing areas. Moreover, throughout California there is great variability from place to place in each of these characteristics. The soils which are typical of one valley may behave quite differently from those typical of the next valley. The microclimate on one side of a ridge may produce very different forest conditions from that on the opposite side. Thus, the forester must be able to analyze each forest situation in terms of its basic components. He cannot rely on "cookbook" formulas, whether he is fighting fire or insects, planning a harvesting operation, or designing a program for rehabilitating a denuded area.

The intensive training needed to produce a professional forester who is qualified to interpret complex forestry problems and to prescribe forest practices is represented by the curricula of the 28 accredited schools of forestry in the United States. These schools, each of which is attached to a major university or college, have developed the needed training programs through 65 years of experience in professional forestry education. Although the curricula of these 28 schools are not

identical, they show great uniformity in the kinds of scientific and technical subject matters which they include. Virtually all require professional forestry students to complete one or more courses in the following basic natural and social sciences: botany, chemistry, mathematics, soil science, economics and physics. Most of them also require zoology and geology.

After completion of this scientific foundation, forestry curricula all require intensive study of forest mensuration and statistical methods, silviculture, wood technology, valuation, finance, and economics. In addition, virtually all require intensive courses in forest ecology, forest protection, entomology, and pathology. These studies which are universally recognized as the minimum educational preparation of the professional forester require at least four years of university-level study to complete. Men without this preparation or its substantial equivalent do not have the scientific and technical knowledge to make competent decisions in matters of forest protection, forest management, and reforestation.

Thus, the programs of professional forestry education which have been long established in the United States serve to define quite specifically the particular scientific and technical knowledge which is essential for the competent practice of forestry as a profession. These existing programs could also serve as the background against which the qualifying examinations provided for in Section 7860 of Senate Bill 991 could be established in an adequate and equitable manner.

In this connection, it may be noted that both the California State Personnel Board and the U.S. Civil Service Commission use such examinations to establish the professional qualifications of all persons appointed to professional forester positions in the public services.

Licensing Would Insure Minimum Standards of Competence

Since forestry decisions can only be properly made by people possessing a sound scientific and technical background, and since large numbers of California forest landowners must rely on professional foresters to provide the competent guidance needed if the use of their land is to sustain the public interests established by the Legislature, I believe it is important that the state assume some responsibility for the competence of foresters through its licensing procedures. In the absence of some such basis for certifying competence, landowners can all too easily be misled by unqualified practitioners and the public interest in forest lands may consequently be jeopardized.

The School of Forestry at the University of California has over the past 50 years made continuing efforts to establish and maintain high standards of professional education. Its faculty continually makes improvements in the program designed to make its graduates highly competent insofar as scientific and technical training can assure it. However, I believe that high standards of professional education are, by themselves, insufficient to guarantee high standards of professional practice. High educational standards must be complemented by some means of insuring that persons who have not attained the professional competence equivalent to that of the educational standard are not permitted to designate themselves as professional foresters. Senate Bill 991, if adopted, would serve this important end.

HENRY J. VAUX

UNITED STATES DEPARTMENT OF THE INTERIOR
NATIONAL PARK SERVICE

March 19, 1964

MR. ALAN SHORT, *Chairman*

Senate Factfinding Committee on Business and Commerce
California Legislature, State Capitol
Sacramento, California 95814

Dear Mr. Short,

I submit the following statement rather than appear in person before the Senate Factfinding Committee on Business and Commerce regarding the hearing on April 7, 1964, on Senate Bill 991.

As a professional forester employed by the National Park Service, Department of the Interior, my personal position is that I am not interested in registration as a professional forester and would not apply for the license. I do not plan to pursue private professional forestry upon retirement, nor do I participate in consulting or professional activities in addition to my duties with the National Park Service. The Federal Civil Service trend is, however, to recognize registration and licensing of professional personnel.

On the other hand, I *support* the registration of those professional foresters practicing privately. I believe that there is a dual necessity for licensing foresters. The public should have the assurance of competent professional services. This can be provided by licensing. The state government can be equally assured of competence by the same licensing process and required qualifications.

Sincerely,

JOHN M. MAHONEY, *Member*
Society of American Foresters

HUMBOLDT STATE COLLEGE DEPARTMENT OF FORESTRY
ARCATA, CALIFORNIA

April 4, 1964

MR. ALAN SHORT, *Chairman*

Senate Factfinding Committee on Business and Commerce
State Capitol, Sacramento, California

Dear Chairman Short:

I respectfully submit herewith a recommendation for the support of Senate Bill 991 pertaining to the registration of professional foresters.

The profession of forestry is growing today more rapidly than ever before. About 17,000 college-trained graduates of four-year forestry schools are employed by the conservation agencies of federal and state governments and by private forest industries. More than 14,000 of these professional foresters are members of the Society of American Foresters, a professional society striving to improve the profession in the United States.

The nation's forestry schools are now graduating annually about 1,600 foresters with bachelor's degrees, 350 with master's degrees, and 80 with the doctorate. The Dana report on forestry education in the United States indicates that the five-year curriculum for the bachelor's degree in forestry is needed to provide the broad coverage of subject matter needed to educate the professional forester to meet the challenge of his profession.

At Humboldt State College about 300 students are enrolled in the forestry curriculum and are educated at state expense. From 35 to 50 students will graduate in this program each year. The curriculum is being revised periodically to meet professional needs. The concept of integrated management of natural resources is recognized in order to meet the demands on the forester to manage forest lands for all goods and services. The master's degree is now being offered.

The State of California should follow the lead of other states and pass a registration act for the benefit of professional foresters serving the public good.

EDWARD E. STURGEON
Coordinator of Forestry
Humboldt State College

**STATEMENT OF GRANT A. MORSE, ASSISTANT REGIONAL FORESTER, U. S.
FOREST SERVICE, BEFORE THE SENATE FACTFINDING COMMITTEE
COMMERCE, APRIL 7, 1964—SACRAMENTO, CALIFORNIA**

While the proposed forester licensing bill SB 991 appropriately excludes employees of the federal government, we in the U.S. Forest Service see advantages to the passage of such legislation. We believe such a law can offer to the client of the professional consulting forester the same kind of protection that is given by licensing legislation to the client or patient of the doctor, the dentist, the lawyer. Members of the forestry profession have done much to assure a strong resource base upon which the social structure and the economy of California depends. The increasing demand upon land managers for all of the products of forest lands—water, recreation, wildlife, and forage as well as timber and other wood products—places a grave responsibility on the forestry profession to do an even better job. The profession must consistently provide a high level of performance to assure increasing production of goods and services for California's increasing population. Licensing can help in meeting that obligation. It should prevent untrained and unqualified persons from offering professional forestry services to clients who have no basis for judging their qualifications as a professional forester. To that extent it will help upgrade the level of management of California's forest lands. At the same time it will provide a degree of protection to the landowner who pays for services and whose decisions should be based on sound technical forestry advice.

I have carefully studied the provisions of SB 991 and believe it will be of real benefit to the state in meeting those objectives if passed into law.

STATEMENT BY JOHN CALLAGHAN, SECRETARY-MANAGER, CALIFORNIA
FOREST PROTECTIVE ASSOCIATION, SAN FRANCISCO, CALIFORNIA
BEFORE SENATE FACTFINDING COMMITTEE ON BUSINESS AND
COMMERCE APRIL 7, 1964—SACRAMENTO, CALIFORNIA

Relative to SB 991 (1963 Legislature) Licensing of Professional Foresters

My name is John Callaghan. I am secretary-manager of the California Forest Protective Association. Members of this association own most of the private industrially operated timberland of California.

Their lands are under long-term forest management which will result in their continuing to produce a substantial portion of the timber which provides the basic economy of many counties in northern California. The woods product industry directly supports between 80,000 and 100,000 employees in California and directly supplies 20 percent to 40 percent of all employment in several counties.

Because California was blessed with a tremendous quantity of virgin forests, the major need in forest management in years past has been for access so that the high-quality old-growth timber could be harvested before it succumbed to insects, fire or disease. The major forestry job involved has been to determine methods and rates of harvesting best suited to the particular forest and economic conditions encountered and to permit leaving the land in a productive condition. Private industry has employed several hundred foresters to plan and supervise this process. The timber industry has also sponsored and supported a State Forest Practice Act under which forest practice rules have been developed to reasonably assure that on all harvested timberlands, other crops of timber to supply the state's economy would grow. As timberlands come under more intensive management an increasing number of specific forest practice proposals, alternate to the general rules, may be expected, for forestry is too complex a subject to be fully legislated. Increasingly then, professional forestry assistance will be required to assure that forest practices are in compliance with the law.

Private commercial timberlands occupy slightly more than 8 million acres in California and constitute somewhat less than half of the commercial timberland of the state. Since they have, for many years, produced 75 percent to 80 percent of the state's timber production, a high percentage of them have had at least one harvest operation. On these lands, where new crops of timber are growing, the need for professional forest management, to insure that the lands produce the kinds and quantities of material for which they are best suited, is increasing. Increasingly heavy investments are being made in pulp, plywood, flakeboard, hardboard and other manufacturing plants. These require an adequate supply of a great variety of raw wood materials. The economics of wood products manufacturing and marketing will increasingly require that each forest acre produce.

SB 991, which provides for the licensing of professional foresters, appropriately does not require that a landowner or his employee obtain a professional forester's license to practice forestry on his own lands. However, it does seem probable that a licensing procedure will tend to insure the maintenance of and perhaps raise the standards of

the forestry profession. Thus timber owners will be assured of obtaining competent and effective forestry assistance in the increasingly complex job of raising millions of acres of trees under a great variety of soil, climatic and topographic conditions.

For this reason, it is my feeling that SB 991 should receive favorable consideration. I believe most major timber owners would agree with me.

17 Highland Boulevard
Berkeley 7, California
March 20, 1964

THE HONORABLE ALAN SHORT
California Legislature
State Capitol
Sacramento, California 95814

Dear Senator Short:

I wish to thank you for sending me on March 6 a "Notice of Hearing" to be held on April 7, 1964, relative to the registration of professional foresters. I regret that I will not be able to appear in person. However, I am opposed to Senator Christensen's Senate Bill 991 for the reasons given below and *wish this letter to be made a part of the hearing record.*

I am retired from the U.S. Forest Service after 37 years service and for the past seven years have been engaged in consulting forestry work for private landowners. I have discovered that the amount of consulting forestry work in California is extremely limited. The preponderance of private forest land is held by large timber companies. These companies, almost without exception, have foresters on their payroll. The acreage controlled by large organizations will increase in the future.

The small timberland owner cannot afford the services of a consulting forester. Service to this type of owner must be furnished by foresters in public employ. This type of service is proffered by the Agricultural Extension Service, Soil Conservation Service and the farm foresters employed by the State Division of Forestry. As time goes on, these services must be enlarged.

In view of the foregoing, I can see no real need to license foresters in California. The cost of administering such a program would be out of proportion to any benefits that might accrue. Licensing might benefit the earnings of a few consulting foresters, but I do not believe it would improve the services now available to timberland owners. In fact, there is a good chance that licensing would restrict the services available to them in the future.

Very truly yours,

RUSSELL W. BEESON

LICENSING OF FORESTERS NEEDED TO PROTECT LANDOWNERS¹

I am Walter P. Bemis of Sacramento, a member of, and appearing on behalf of the Licensing Committee of the Northern California Section of the Society of American Foresters. In my job as a public forester, I advise and assist small landowners on how they might apply the principles of forest management to their properties. As such I have become familiar with many cases where owners have been misled by nonprofessional advice and assistance.

The following cases are generally representative of the conduct of individuals who portray themselves as foresters but have little knowledge of the profession and still less ethics.

I. One individual maintains a tree service in the high Sierras of Placer County. His business cards and advertisements in the yellow pages of the phone book (see appendix) are designed to make the public believe that he is competent to furnish many services common to the forestry profession. His yellow page ad insinuates that he has been licensed, as proof of his competence. In actuality he has no formal forestry training and his forestry employment experience was limited to a beginning fire control job of little responsibility working for a public agency. I have personally observed his work while he pretended to be a forest entomologist and observed that on one property he negligently or knowingly applied chemicals (insecticides supposedly) to trees that had been infested but where the brood had already left the trees. On other occasions he has treated many trees that were not infested after convincing the owner that they might be.

This individual also wrongly claims to be knowledgeable in silviculture. Silviculture is the art of producing and tending a forest; the application of the knowledge of the many environmental factors in controlling forest establishment, composition, and growth. All professional foresters and many of the other residents in the area regard this individual as a confidence man.

II. Two elderly women inherited a 5,000-acre timber estate in the Counties of Nevada and Placer. An individual convinced them that he should represent them as their forester. The individual had purchased timber from the deceased owner in the past and had some knowledge of the values he wished to control. This would-be forester was successful in negotiating a timber management and sale contract and a Christmas tree sale contract with the owners. This person lacked the formal training of a forester and also had little forestry experience and is apparently unethical. The results to date are:

1. He has sold timber to buyers other than those named in the sales agreement.
2. He sold the owners' timber for less than one-half of the going rate.
3. In general, he has negotiated sales contracts for the landowners which are not advantageous for them.
4. He has promised to do cultural (silvicultural) work on the owners' Christmas tree stands without knowledge of how to do it.

¹ Statement submitted by Walter P. Bemis to Senate Factfinding Committee on Business and Commerce, April 7, 1964, Sacramento, with regard to S.B. 991.

5. He has proved himself to be incompetent in carrying out many forestry managerial duties that he agreed to accomplish and other duties which would be assumed for his position.

III. One case involves an absentee owner living in Brazil. In his case a central Sierra virgin stand of timber was burned over. An entrepreneur posing as a forester received the endorsement of a public employee and was given permission to harvest the timber and to prepare the area for reforestation. The arrangements were made by mail and the landowner was convinced that the scorched timber had little value and therefore agreed to sell it for one-fourth its actual value. Also the operator charged three times the going rate for preparing the ground for reforestation. As a result of the misrepresentation and unethical practices the property owner lost \$24,300 and was hard pressed to finance the tree planting.

The above example with some changes was repeated a number of times during the catastrophic timber fires which swept the Central Sierras from 1959-1962.

IV. A forest property owner in Nevada County who is a mechanic by trade was approached by a person claiming to be an expert in Christmas tree stand management. This "expert" promised to use his professional knowledge to make the stand healthier and more productive by thinning in discretion; also he promised to provide the owner with some revenue. The expert sold himself well by using scientific terms which were foreign to the landowner.

The cutter felled trees that were nearly of timber size and removed the tops for Christmas trees; also, the removal of other trees was not accomplished scientifically to benefit the stand. To make matters worse the landowner was never paid and cannot locate the cutter.

V. Another case occurred in Sierra County's Sierra Valley where the landowner was principally a dairyman. The property owner was approached by a Reno entrepreneur who promised to practice his knowledge of forestry and harvest Christmas trees only where they were too thick to grow into timber size. The result was that the operator cut down large Jeffrey pines which were 16"-18" in diameter just to get the tops. A brief investigation revealed that this "knowledgeable forester" had read some articles in a Christmas tree growers magazine but was usually engaged in selling used cars in Reno. Ironically, the landowner had previously denied Christmas tree cutters entry because "they are not usually very trustworthy."

VI. In the Counties of Shasta, Trinity and Siskiyou, one self-appointed expert canvasses forest properties to determine timber values. Where the properties have been recently logged and where little of the timber is large enough to be legally merchantable, this expert handles the situation as the following example depicts:

The owner of a young, healthy stand of fastgrowing trees was approached by this self-appointed forestry expert and told that his trees should be harvested. The timber owner was further advised that his timber stand was decadent, infested with insects and disease and also needed thinning. Moreover, the owner was advised that he should obtain a conversion affidavit so that trees smaller than legal size could be harvested. In this case, the young stand was not cut since the owner was

unwilling to go on record as intending to convert their land to something other than timber growth.

An adjacent forest landowner was not so wise and believed the "expert." As a result his land was "slicked off"; the land was never converted to another use as per the land conversion affidavit and its growth potential has been lost for many years.

There are a number of such examples throughout the Sierra and Cascade Ranges and in total they will have a substantial impact on California's ability to produce timber.

VII. In this case an elderly woman in her seventies who owned property in Butte County was approached by two small timber operators professing they were foresters and interested in the saw timber stumpage on her property. One offer was for \$4,500; the other, \$11,500. Since the offers varied considerably, the owner approached a forest consultant firm and asked them to examine the lands and handle the sale of her timber in a businesslike manner. They conducted an inventory, placed the timber on the market, and at a total cost of \$800, obtained \$24,000 for the client. The successful bidder was one of the original negotiators for the stumpage.

I have personally observed that the above cases have many variations and occur with alarming frequency.

STATEMENT

Presented to the Senate Factfinding Committee on Business and Commerce
State Capitol, Sacramento, California

By: Robert E. Kleiner, President, Western Timber Services, Inc.
Arcata, California.

Re: Senate Bill 991, Professional Foresters Law.

Date: Tuesday, April 7, 1964.

The firm I represent employs five professional foresters. These consultants work on assignments for a large range of private, industrial and public agency clients in California, Oregon, and other states. In the 12 years that our firm has been in business in California our professional foresters have come in contact with a great number of people interested in or concerned with the field of forestry. These contacts have convinced me that the registration of professional foresters by the State of California is a measure which will definitely protect and serve the public interest.

I respectfully request the opportunity of describing several "type situations" that I can recall which well illustrate how the best interests of the public have not been served because of actions of persons who offered services connected with forestry although they were not fully qualified as professional foresters. These "type situations" are based upon actual incidents but they represent situations which I have recollection of that have occurred repeatedly.

Type Situation 1—A man without the training or the experience of a professional forester was hired to examine and evaluate several parcels of timbered or other wild land which were to be sold. This assignment was performed on a weekend or part-time basis. One parcel was in an area where very few survey corners could be found and, accordingly, it was very difficult to locate the property accurately. This man classified the parcel as brush and range land and evaluated it accordingly. After sale a later survey indicated that the property actually had a valuable stand of timber worth a lot more than the sale price. The seller prepared to take legal action against the buyer alleging that the examiner had been misled as to the location of the property. Fortunately, still later surveys indicated that this charge was not correct.

The important lesson from this situation was that the man who made the examination and evaluation was not qualified to do a job which required the judgment and experience of a professional forester. Furthermore, an experienced forester would have included in his report a description of the survey problem he encountered with recommendations that sale be delayed until a survey by a licensed surveyor could be made.

Type Situation 2—An absentee landowner sold his timber to certain buyers after having it cruised by Cruiser "A." The buyers later offered it for sale to a third party based upon a cruise report by Cruiser "B." That second report was almost a copy of that made by the first cruiser

with one important exception; the timber quantity figures on the second report were far in excess of those listed on the first. Comparison of the two reports indicated that the second was probably copied from the first but that the figures which determined the price for the resale offering had been greatly increased. This appeared to be a situation of a false report, an altered report, or a representation of timber volumes and values based upon something other than a complete examination and cruise.

The important lesson from this situation is that almost anyone can prepare a report of this type without any qualifications as to education and experience required by state registration laws. Further, if a false report is so prepared by a person not qualified there does not exist the disciplinary provisions of the proposed act which would dissuade such actions. I feel sure that in many instances individuals or companies have suffered damage because of the circumstances of situations very similar to this one.

Type Situation 3—A real estate appraisal firm contracted for the appraisal of a number of timbered properties. In their appraisal they made direct comparisons of the prices paid for other timbered tracts sold on a per acre basis with the parcels being appraised without properly allowing for the differences in timber volumes and quality. As a result, some of the parcels were overappraised and did not sell and some of those which sold were probably underappraised and sold at prices far below their market value.

The important lesson from this situation is that persons unfamiliar with timber values performed an appraisal in such a manner that the best interests of the owner were not served. A registered professional forester should have been retained to consult on this appraisal assignment or, the timber appraisal should have been the responsibility of a qualified forester. Appraisal is a very important part of a forester's work and the problems peculiar to timber appraisal require the training and qualifications of a professional forester.

SUMMARY

The forest resources of our state are becoming of increasing importance for the wood products they account for, for the recreational opportunities they offer, for the vital purposes of watershed protection, and for their many other influences on our everyday life. The people need the services of trained and qualified professional foresters in the management of these forest resources, in the planning of their best use, in the sale and purchase of timbered properties, in the determination of values, in the preparation and administration of timber sale contract, and in many other regards. I feel certain that the needs for these services will be well served by the provision for the registration of professional foresters under state law.

I thank you,

ROBERT E. KLEINER

EXAMPLES ABLE TO BE CONFIRMED OF WRONGFUL FORESTER ACTIVITIES

1. An erstwhile logger with limited timber cruising knowledge reporting in Mattele area on timber volumes with notarized signature on reports claiming "Notarized Cruise."
2. A real estate agent typing out on other paper valid cruise data of a recognized timber cruiser presenting said paper as the cruise report.
3. A disgruntled employee with access to company files divulging cruise information to a rival company.
4. A sometime employee of the United States Forest Service represented himself as a forester, sold his ideas and self to a landowner in form of a management plan which in essence was a gimmick to gain a fee for an ordinary complete cutting of the timber.
5. An individual, since in trouble with the law for fraud, taking valid cruise data, modifying the information for his purposes caused undue expense to several landowners.
6. A timber cruiser uses a "seal" of official appearance, misleads many individuals.
7. A recognized timber cruising firm, out-of-state, stating within reports that the cruise is a "certified cruise" by the firm, thus implying undue validity.
8. A logger with knowledge of logging procedure, but not any technical forestry nor little savvy on field procedures of forestry matters, who served his employer as logging advisor, stated in superior court he was the company forester. Court accepted testimony of more than fact knowledge.

GEORGIA STATUTES

FORESTERS—STATE BOARD OF REGISTRATION.

An Act to create a board to be known as the State Board of Registration for Foresters; to provide for the qualification of members of said board; to provide for the appointment of the members of said board; to provide for their terms of office; to provide for the organization of said board; to provide for the powers and duties of said board; to provide for the registration of foresters; to provide for the recording of licenses; to provide for the definition of the practice of forestry; to provide for the revocation of licenses; to provide for fees; to provide for reciprocity; to repeal all conflicting laws; and for other purposes.

Be it enacted by the General Assembly of Georgia, and it is hereby enacted by authority of the same:

Section 1. General Provisions. (a) No person shall use in connection with his name or otherwise assume, use or advertise any title or description tending directly or indirectly to convey the impression that he is a registered forester, without first having been licensed and registered as a registered forester as hereinafter provided.

(b) Except as hereinafter specifically authorized, no person shall engage in the practice of professional forestry as defined in this Act, or in any manner advertise or hold himself out as engaged in such practice, without first being licensed as a registered forester under this Act.

(c) Notwithstanding paragraph (b) or any other provisions of this Act, nothing herein shall be construed as preventing or prohibiting any person from managing or otherwise conducting forestry practices on land owned, leased, rented or held by such person; nor shall anything herein prohibit any regular employee or official of any person, corporation, agency, institution or other entity from engaging in professional or other forestry practices on lands owned, leased, rented or held by such person, corporation, agency or other entity; nor shall anything herein prohibit any graduate of a school of forestry from practicing forestry under supervision as hereinafter authorized, so as to qualify for licensing as provided in Section 12 hereof.

(d) It is the purpose of this Act to protect the public by improving the standards relative to the practice of professional forestry.

Section 2. As used herein, the following terms shall have the meaning and definitions hereafter stated:

(a) "Registered forester" shall mean a person who has registered and qualified under this law to engage in professional forestry practices as hereinafter defined.

(b) "Professional forestry" or "Practice of professional forestry" shall mean any professional service relating to forestry, such as investigation, evaluation, development or forest management plans or responsible supervision of forest management, forest production, silviculture, forest utilization, forest economics, or other forestry activities in connection with any public or private lands. Provided, that forestry instructional and educational activities shall be exempted. Provided further, however, any person, who on the effective date of this Act, shall have been engaged in the active practice of forestry as defined herein for at least ten years with such practice to be acceptable to the board as defined in Section 12 (b), shall be eligible for registration as a registered forester without reference to the requirements set forth in Section 12 (a) of this Act, provided that he file application for registration with the board within six months from the effective date of this Act. The board shall issue licenses only to those applicants who meet the requirements of this section. Provided that no person shall be eligible for registration as a registered forester who is not of good character and reputation. Provided further, that employees of the State and Federal government assisting farmers in agricultural programs shall be exempt from the provisions of this Act.

(c) "Board" shall mean the State Board of Registration for Registered Foresters, provided for by this Act.

Section 3. State Board of Registration for Foresters; appointment of members; terms: A State Board of Registration for Foresters is hereby created whose duty it shall be to administer the provisions of this Act. The board shall consist of five foresters, who shall be selected and appointed by the Governor of Georgia from among ten nominees recommended by the Georgia Chapter of the Society of American For-

esters and shall have the qualifications required by Paragraph IV of this Act. Every member of the board shall receive a certificate of his appointment from the Governor and before beginning his term of office shall file with the Secretary of State his written oath of affirmation for the faithful discharge of his official duty. The five members of the initial board will be appointed for terms of one, two, three, four and five years, respectively. On the expiration of the term of any member of the initial board, the Governor shall in the manner hereinbefore provided appoint for a term of five years a registered forester having the qualifications required by Paragraph IV of this Act to take the place of the member whose term on said board is expiring. If the Governor fails to make appointment in 90 days after expiration of any term, the board shall make the necessary appointment. Each member shall hold office until the expiration of the term for which such member is appointed or until a successor shall have been duly appointed and shall have qualified.

Section 4. Qualifications of members of the board. Each member of the board shall be a citizen of the United States and a resident of Georgia, a member or Fellow of the Society of American Foresters, and shall have been engaged in the practice of forestry for at least ten years.

Section 5. Compensation and expenses of board members. Each member of the board shall receive a nominal sum of ten dollars per diem when actually attending to the work of the board or of any of its committees and for the time spent in necessary travel and, in addition thereto, shall be reimbursed for all actual traveling, incidental and clerical expenses necessarily incurred in carrying out the provisions of this Act, paid by the State Treasurer out of the general fund.

Section 6. Removal of members of the board; vacancies: The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty. Vacancies in the membership of the board shall be filled for the unexpired term by appointment only as provided in this Act.

Section 7. Organization and meetings of the board. The original members of said board shall be named and appointed by the Governor within 30 days after the passage of this Act. The board shall hold a meeting within 30 days after its members are first appointed and thereafter shall hold at least two regular meetings each year. Special meetings shall be held at such time and place as the by-laws of the board may provide; provided that not more than one meeting may be held during any one calendar month. Notice of all meetings shall be given in such manner as the by-laws may provide. The board shall elect or appoint annually the following officers: A chairman and a vice-chairman. The Joint Secretary of the State Examining Boards shall serve as secretary of the board herein created in the same manner as provided by Section 84-101 and 102 of the Georgia Code. A quorum of the board shall consist of not less than three voting members.

Section 8. Powers of the Board. The Board shall have the power to make all by-laws and rules, not inconsistent with the Constitution and laws of this State, which may be reasonably necessary for the proper performance of its duties and the regulation of the proceedings before it. The Board shall adopt and have an official seal. In carry-

ing into effect the provisions of this Act, the Board may, under the hands of its chairman and the seal of the Board, subpoena witnesses and compel their attendance and may also require them to produce books, papers, documents, etc. in a case involving the revocation of a license or practicing or offering to practice under the title of registered forester without a license. Any member of the Board may administer oaths or affirmation to witnesses appearing before the Board. Such witnesses officially called by the Board shall receive the same compensation and shall be reimbursed for expenses in the same amount as the members of the Board as outlined in Section V of this Act. If any person shall refuse to testify or produce any books, papers, or documents, the Board may present its petition to any court of competent jurisdiction, setting forth the facts, and thereupon such court shall, in a proper case, issue an attachment for contempt against such person requiring him to show cause why he should not be held in contempt; provided, such person shall be permitted to purge himself of contempt by compliance with such order as the Court may render.

Section 9. Receipts and disbursements. The Secretary of the Joint Examining Board shall receive and account for all monies derived under the provisions of this Act, and shall pay the same monthly to the State Treasurer.

Section 10. Records and reports. The board shall keep a record of its proceedings and a register of all applications for registration; which register shall show the name, age, and residence of each applicant; the date of the application; the place of business of such applicant; his educational and other qualifications; whether or not an examination was required; whether the application was rejected; whether a license was granted; the date of the action of the board; and such other information as may be deemed necessary by the board. The records of the board shall be prima facie evidence of the proceedings of the board set forth therein, and a transcript thereof, duly certified by the secretary of the board under seal, shall be admissible in evidence with the same force and effect as if the original were produced. Annually, as of June thirtieth, the board shall submit to the Governor a report of its transactions of the proceeding year.

Section 11. Roster of registered foresters. A roster showing the names and places of business of all registered foresters qualified according to the provisions of this Act, shall be prepared by the Secretary of the Joint Examining Boards during the month of March of each year. Copies of this roster shall be mailed to each person so registered, placed on file with the Secretary of State, and furnished to the public upon request.

Section 12. (a) General Requirements for Registration. The minimum qualifications and requirements for registration as a registered forester shall be as follows: (1) Graduation from a school, college, or department of forestry approved by the Board, and a specific record of an additional two years' or more experience in forestry work of a character satisfactory to the Board indicating that the applicant is competent to practice forestry. Such two years' experience need not be obtained on lands owned, leased, rented or held by the applicant or by any person, corporation, agency, entity or institution by which such applicant is employed, so long as said applicant works under su-

pervision of a registered forester or under other supervision acceptable to the Board. (2) Graduates of schools of forestry not approved by the Board may be licensed after two years' of experience of a character satisfactory to the Board and under the supervision of a Registered Forester or under other supervision acceptable to the Board, and who shall have successfully passed a written examination designed to show knowledge and skill approximating that obtained by graduation from a school, college or department of forestry approved by the Board. The Board shall issue licenses only to those applicants who meet the requirements of this Section; provided, however, that no person shall be eligible for registration as a registered forester who is not of good moral character and reputation.

(b) It shall be the duty of the Board by rule of regulation to define "supervision" and "experience" as used in this Act, and in so doing, the Board shall consider and give effect to the directness, immediacy, scope, extent, quality and constancy of such supervision, and as to "experience," the nature, quality and extent thereof.

Section 13. Application and registration fees. Applications for registration shall be made on forms prescribed and furnished by the board; shall contain statements made under oath, showing the applicant's education and a detailed summary of his technical work, and shall contain not less than five references, of whom three or more shall be foresters having personal or professional knowledge of his forestry experience. The registration fee for a license as a "Registered Forester" shall be ten dollars, five dollars of which shall accompany the application, the remaining five dollars of which to be paid before issuance of license. Should the applicant fail or refuse to remit the said remaining five dollars within thirty days after being notified, in the usual manner, that the applicant has successfully qualified, the applicant shall forfeit the right to have a license so issued and said applicant may be required to again submit an original application and pay an original fee therefor. Should the board deny the issuance of a license to any applicant the initial fee deposited shall be retained by the board as an application fee.

Section 14. Examination. When written examinations are required, they shall be held at such time and place as the board shall determine. The methods of procedure shall be prescribed by the board. A candidate failing on examination may apply for re-examination at the expiration of six months and will be re-examined without payment of additional fee. Subsequent examination will be granted upon payment of a fee to be determined by the board.

Section 15. Licenses. The board shall issue a license upon payment of a registration fee as provided for in this Act to any applicant, who, in the opinion of the board, has satisfactorily met all of the requirements of this Act. Licenses shall show the full name of the registrant, shall have a serial number and shall be signed by the chairman of the board and the Secretary of the Joint Examining Boards under seal of the board. The issuance of a license by the board shall be evidence that the person named herein is entitled to all the rights and privileges of a registered forester while the said license remains unrevoked or unexpired. Plans, maps, specifications and reports issued by a registrant shall be endorsed with his name and li-

cense number during the life of the registrant's license, but it shall be a misdemeanor for anyone to endorse any documents with said name and license number after the license of the registrant named thereon has expired or has been revoked, unless said license shall have been renewed or reissued. It shall be a misdemeanor for any registered forester to endorse any plan, specification, estimate, or map unless he shall have actually prepared such plan, specification, estimate or map or shall have been in the actual charge of the preparation thereof.

Section 16. Expiration and renewals. Licenses shall expire on the last day of the month of December following their issuance or renewal and shall become invalid on that date unless renewed. It shall be the duty of the Secretary of the Joint Examining Boards to notify, at his last registered address, every person registered under this Act, of the date of expiration of his license and the amount of the fee that shall be required for its renewal for one year; such notice shall be mailed at least one month in advance of the date of the expiration of said license. The annual renewal fee shall be five dollars. Renewal of licenses for the following year may be affected at any time during the month of December of the year in which the license has been issued or renewed by the payment of the renewal fee. Such licenses may also be renewed during the ensuing ten months by the payment of an additional fee of fifty cents for each month or fraction thereof that payment of the fixed renewal fee is delayed beyond the month of December. The Board shall make an exception to the foregoing renewal provisions in the case of a person who is in the armed services of the United States.

Section 17. Firms, partnerships, and corporations. Registration shall be determined upon a basis of individual personal qualifications. No firms, company, partnership or corporation can be licensed.

Section 18. (a) Any non-resident of Georgia, or any person within six months after becoming a resident of Georgia, who has been licensed as a registered forester under the laws of another state, may be licensed and registered under the laws of Georgia by reciprocity without having to qualify under the other provisions of this Act subject to the following conditions: (1) That the requirements and qualifications for licensing and registration under the laws of the state in which such person is licensed are substantially equivalent to those of Georgia, to be determined by the Board. (2) That such state permits licensing of foresters registered in Georgia on terms substantially equivalent to those of this Section, to be determined by the Board. (3) Notwithstanding the foregoing, the Board may decline to license by reciprocity any such person on an individual basis where the Board determines that such applicant does not possess good character, has been guilty of fraud in making application under the laws of Georgia or of any other state, or where the Board determines by examination or otherwise that such applicant is not in fact qualified to become licensed as a registered forester.

(b) Any person desiring to become registered under this Section shall make application under oath on blanks to be furnished by the Board, shall accompany such application with the same fee now or hereafter required for licensing and registration under Section 13 hereof, as amended, and shall cause to be sent to the Board a certificate from

the proper authority of the state under which such person is already registered certifying thereto.

(c) Any license issued under this Section shall be subject to all provisions of this Act governing expiration, renewal, renewal fees, revocation, and any and all other provisions of law now or hereafter governing or relating to registered foresters.

Section 19. Revocations and re-issuance of licenses. The board shall have the power to revoke the license of any registrant who is found guilty by the board of gross negligence, incompetency, or misconduct in the practice of forestry. The board is empowered to designate a person or persons to investigate and report to it upon any charges of fraud, deceit, gross negligence, incompetency or other misconduct in connection with any forestry practice against any registrant, as may come to its attention. Such person or persons so designated by the board shall receive the same compensation and shall be reimbursed for expenses in the same amount as the Board as outlined in Section V of this Act. Any person may prefer charges of fraud, deceit, gross negligence, incompetency or misconduct in connection with any forestry practice, against any registrant. Such charges shall be in writing, shall be sworn to by the person making them and shall be filed with the Secretary of the Joint Examining Records. All charges, unless dismissed by the board as unfounded or trivial, shall be heard by the board within three months after the date on which they shall have been preferred. The time and place for said hearing shall be fixed by the board, and a copy of the charges, together with a notice of the time and place of the hearing, shall be personally served on, or mailed to the last known address of such registrant, at least thirty days before the date fixed for the hearing. At any hearing, the accused registrant shall have the right to appear personally and by counsel, to cross-examine witnesses appearing against him, and to produce evidence and witnesses in his own defense. If, after such hearing three or more members of the board vote in favor of finding the accused guilty, the board shall revoke the license of such registered forester. Any applicant whose license has been revoked as above may apply for a review of the proceedings with reference to such revocation of his license by any court of competent jurisdiction. The only record to be considered in such appeal shall be the record made before the board. New evidence must be presented to the board, in session, before it may be used in court proceedings. The board, for reasons it may deem sufficient, may reissue a license to any person whose license has been revoked by three or more members of the board who vote in favor of such re-issuance. A new license, to replace any license revoked, lost, destroyed, or mutilated, may be issued, subject to the rules of the board, and a charge of three dollars made for such issuance.

Section 20. Any person violating the provisions of Section 1 of this Act, as amended, or any person refusing upon request to surrender to the Board or any duly authorized agent thereof any license of such person, or any person displaying his license after revocation thereof, or expiration thereof for nonpayment of renewal fees or any other cause, or any person who shall present or attempt to use as his own the license of another, or any person who shall give any false or forged evidence of any kind to the Board or any member thereof in obtaining

a license, or any person who shall attempt to use an expired or revoked license, or any person, firm, partnership, or corporation who shall violate any of the provisions of this Act, shall be guilty of a misdemeanor, and upon conviction thereof shall be punished as provided by law. The Board, or such person or persons as may be designated by the Board to act in its stead, is empowered to prefer charges for any of the violations of this Act in any person of contempt jurisdiction, and where reasonable ground existed to believe or suspect the guilt of the accused, such person bringing charges shall be immune from liability in damages or otherwise, notwithstanding that the accused was acquitted thereof. It shall be the duty of all duly constituted officers of the law, of this State, or any political subdivision thereof, to enforce the provisions of this Act and to prosecute any persons, firms, partnerships, or corporations violating the same. The Attorney General of the State and his assistants shall act as legal advisor to the Board and render such legal assistance as may be necessary in carrying out the provisions of this Act.

Section 21. Repealing clause. That all laws and parts of laws in conflict with the provisions of this Act be and the same are hereby repealed. If any provision of this Act shall be held unconstitutional, the same shall not apply to other provisions thereof.

MICHIGAN LAW

[No. 78.]

AN ACT to provide for the registration and regulation of foresters; to create a state board of registration for foresters and to prescribe its powers and duties; to authorize imposition and collection of fees; to authorize appropriations and disbursements therefrom; and to provide penalties for the violation of provisions of this act.

The People of the State of Michigan enact:

338.721 Registered forester act; licenses; construction of act. [M.S.A. 13.215(1)]

Sec. 1. No person shall use in connection with his name or otherwise assume, use or advertise any title or description tending to convey the impression that he is a registered forester, unless he shall be licensed as hereinafter provided. Nothing contained in this act shall be construed as preventing any person, firm, partnership or corporation from practicing forestry, landscape architecture, or managing woodlands, forests or trees or from operating the removal of any products therefrom, or planting trees on any plat of land, in any manner desired. This act is for the benefit and protection of the public.

338.722 Same; definitions. [M.S.A. 13.215(2)]

Sec. 2. As used in this act:

(1) The term "forester" means a person who, by reason of his knowledge of the natural sciences, mathematics and the principles of forestry, acquired by forestry education, as set forth in section 12 (1)

of this act, and/or practical experience, is qualified to engage in the practice of professional forestry as hereinafter defined;

(2) The term "registered forester" means a person who has been licensed pursuant to this act;

(3) The term "practice of professional forestry" means professional forestry services, including but not limited to consultation, investigation, evaluation, planning or responsible supervision of any forestry activities when such professional service requires the application of forestry principles and techniques; and

(4) The term "board" means the state board of registration for registered foresters.

338.723 State Board of registration for foresters; membership, appointment, term. [M.S.A. 13.215(3)]

Sec. 3. A state board of registration for foresters is hereby created whose duty it shall be to administer the provisions of this act. The board shall consist of 5 foresters who shall be selected and appointed by the governor of Michigan by and with the advice and consent of the senate, and who shall possess the qualifications set forth under section 4 of this act. Each qualified member of the board shall receive a certificate of his appointment from the governor and before beginning his term of office shall file with the secretary of state his written oath or affirmation for the faithful discharge of his official duties. The 5 members of the initial board shall be appointed for terms of 1, 2, 3, 4 and 5 years, respectively. At least 2 members of the board shall be residents of the Upper Peninsula. On the expiration of the term of any member of the initial board, the governor shall, in the manner hereinbefore provided, appoint for a term of 5 years a registered forester having the qualifications set forth in section 4 of this act to take the place of the member whose term on said board is expiring. Each member shall hold office until the expiration of the term for which such member is appointed and until a successor shall have been duly appointed and qualified.

338.724 Same; qualifications of members. [M.S.A. 13.215(4)]

Sec. 4. Each member of the board shall be a citizen of the United States and a resident of this state, qualify as a forester under the terms of this act, and shall have been engaged in the practice of professional forestry for at least 10 years.

338.725 Same; compensation; expenses. [M.S.A. 13.215(5)]

Sec. 5. Each member of the board shall receive not to exceed \$10.00 per day when actually attending to the work of the board or of any of its committees and for the time spent in necessary travel and, in addition thereto, may be reimbursed for all actual traveling and incidental expenses necessarily incurred in carrying out the provisions of this act.

338.726 Same; removal; vacancies. [M.S.A. 13.215(6)]

Sec. 6. The governor may remove any member of the board for official misconduct or habitual or wilful neglect of duty in the manner provided by law. Vacancies in the membership of the board shall be filled for the unexpired term in the same manner as for an appointment for a full term.

338.727 Same; appointment; meetings; officers; quorum. [M.S.A. 13.215(7)]

Sec. 7. The members of the initial board shall be named and appointed by the governor within 30 days after the effective date of this act. The board shall hold a meeting within 30 days after its members are first appointed and thereafter the board shall hold at least 2 regular meetings each year.

Meetings shall be held at such time and place as the by-laws of the board may provide. Notice of all meetings shall be given in such manner as the by-laws may provide. The board shall elect annually the following officers: A chairman, a vice-chairman and a secretary. A quorum of the board shall consist of a majority of the qualified members serving thereon.

338.728 Same; by-laws; rules; seal; witnesses. [M.S.A. 13.215(8)]

Sec. 8. The board shall have the power to make all by-laws and rules reasonably necessary for the proper performance of its duties and the regulations of the proceedings before it, pursuant to Act No. 88 of the Public Acts of 1943, as amended, being sections 24.71 to 24.82, inclusive, of the Compiled Laws of 1948, and Act No. 197 of the Public Acts of 1952, as amended, being sections 24.101 to 24.110, inclusive, of the Compiled Laws of 1948. The board shall adopt and have an official seal. Any member of the board may administer oaths or affirmations to witnesses appearing before the board. If any person shall refuse to testify or to produce any books, papers or documents, the board may present its petition to any court of competent jurisdiction, setting forth the facts, and thereupon such court may, in a proper case, issue its subpoena to such person, requiring his attendance before said court and there to testify or to produce such books, papers and documents as may be deemed necessary and pertinent thereto. Any person failing or refusing to obey the subpoena of said court may be proceeded against in the same manner as for refusal to obey any other subpoena of said court.

338.729 Same; disposition of receipts; payment of expenses. [M.S.A. 13.215(9)]

Sec. 9. All moneys received by said board shall be paid to the state treasurer in accordance with the provisions of law and state regulation. Bills for all expenses incurred by the board, including such clerical help as shall be needed, shall be approved by said board and be paid in accordance with the accounting laws of the state within the appropriation made therefor by the legislature: Provided, That in no case shall the board expend in any fiscal year more moneys than the amount of fees collected.

338.730 Same; records; registry of applicants, contents; report. [M.S.A. 13.215(10)]

Sec. 10. The board shall keep a record of its proceedings and a register of all applications for registration, which register shall show the name, age and residence of each applicant; the date of the application; an address for the receipt of mail and the place of business of such applicant; his educational and other qualifications; whether or

not an examination was required; whether the application was rejected; whether a license was granted; the date of the action of the board; and such other information as may be deemed necessary by the board. Annually, as of June thirtieth, the board shall submit to the governor a report on its transactions.

338.731 Roster; distribution, filing. [M.S.A. 13.215(11)]

Sec. 11. A roster showing the names and places of business of all registered foresters qualified according to the provisions of this act shall be prepared by the secretary of the board during the month of March of each year. Copies of such roster shall be mailed to each person so registered, placed on file with the secretary of state and made available to the public upon request.

338.732 Foresters; qualifications of applicants for registration. [M.S.A. 13.215(12)]

Sec. 12. (a) The following shall be considered as minimum evidence satisfactory to the board that the applicant is qualified for registration as a registered forester: (1) Graduation from a university or college with a curriculum in forestry acceptable to the board, including 1 3-credit course in each of the following subjects: Silviculture, forest protection, forest management, forest economics, and forest utilization; and a record of an additional 2 years' or more experience in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry; or (2) successfully passing a written examination designed to show knowledge approximating that obtained through graduation from an acceptable 4-year curriculum in forestry, and a record of 4 years or more of active practice in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry: Provided, That after 5 years from the effective date of this act no person shall qualify as a registered forester unless such person shall have graduated from a university or college with a curriculum in forestry acceptable to the board, and who has a record of an additional 2 years or more of experience in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry; or (3) any person who shall have been engaged in the practice of professional forestry as defined in section 2 of this act for at least 10 years in a period of 15 years immediately preceding the effective date of this act shall be eligible for registration as a registered forester without reference to the requirements set forth in subdivisions (1) and (2) hereof: Provided, That such person files application for registration with the board within 14 months from the effective date of this act.

(b) No person shall be eligible for registration as a registered forester who is not of good character and reputation. The completion of the junior year of a curriculum in forestry in a university or college acceptable to the board shall be considered as equivalent to 2 years of the practice of professional forestry; the completion of the senior year of a curriculum in forestry, without graduation, in a university or college acceptable to the board, shall be considered as equivalent to 3 years of the practice of professional forestry.

338.733 Applications for registration; form, fees.**[M.S.A. 13.215(13)]**

Sec. 13. Applications for registration shall be made on forms prescribed and furnished by the board, shall contain statements made under oath as to citizenship, residence and the applicant's education and detailed summary of his technical work, and shall contain names of not less than 5 persons, of whom 3 or more shall be foresters having personal or professional knowledge of his forestry experience. The forms shall also contain a code of ethics prepared and approved by the board. The registration fee for a certificate as a "registered forester" shall be fixed by the board, but not to exceed \$25.00, $\frac{1}{2}$ of which fee shall accompany the application, the balance to be paid before issuance of the certificate. Should the applicant fail or refuse to remit the said remaining balance within 30 days after being notified by registered mail, that the applicant, has successfully qualified, the applicant shall forfeit the right to have a certificate so issued and said applicant may be required to again submit an original application and pay an original fee therefor. Should the board deny the issuance of a certificate of registration to any applicant, the fee deposited shall be retained by the board as an application fee.

338.734 Examinations; re-examinations, fees. [M.S.A. 13.215(14)]

Sec. 14. When written examinations are required, they shall be held at such time and place as the board shall determine. The methods of procedure shall be prescribed by the board, a candidate failing an examination may apply for re-examination at the expiration of 6 months and shall be entitled to 1 re-examination without payment of an additional fee. Subsequent examinations may be granted upon payment of a fee to be determined by the board, but not in excess of \$25.00.

338.735 Licenses; issuance, endorsement of number on plans, maps, specifications and reports. [M.S.A. 13.215(15)]

Sec. 15. The board shall issue a license upon payment of the registration fee as provided for in this act to any applicant who, in the opinion of the board, has satisfactorily met all the requirements of this act. Licenses shall show the full name of the registrant, shall have a serial number and shall be signed by the chairman and secretary of the board under seal of the board. The issuance of a license by the board shall be evidence that the person named therein is entitled to all the rights and privileges of a registered forester while the said license remains unrevoked or unexpired. Plans, maps, specifications and reports issued by a registrant shall be endorsed with his name and license number during the life of the registrant's license, but it shall be a misdemeanor for anyone to endorse any documents with said name and license number after the license of the registrant named thereon has expired or has been revoked, unless said license shall have been renewed or reissued. It shall be a misdemeanor for any registered forester to endorse any plan, specification, estimate or map unless he shall have actually prepared such plan, specification, estimate or map shall have been in the actual charge of the preparation and/or responsible therefor.

338.736 Same; renewal, fees, exceptions. [M.S.A. 13.215(16)]

Sec. 16. Licenses shall expire 1 year after the date of their issuance or renewal and shall become invalid on that date unless renewed. It shall be the duty of the secretary of the board to notify, at his last registered address, every person registered under this act of the date of the expiration of his license and the amount of the fee that shall be required for its renewal for 1 year; such notice shall be mailed at least 3 months in advance of the date of the expiration of said license. The fee for renewal of licenses shall be \$10.00. The board shall make an exception to the foregoing renewal provisions in the case of a person while on active duty in any of the armed forces of the United States.

338.737 Registration; determination of eligibility. [M.S.A. 13.215(17)]

Sec. 17. Registration shall be determined upon a basis of individual personal qualifications. No firm, company, partnership, corporation or public agency shall be licensed as a registered forester.

338.738 Registered forester; use of title by reciprocity. [M.S.A. 13.215(18)]

Sec. 18. A person not a resident of and having no established place of business in Michigan, or who has recently become a resident thereof, may use the title of registered forester in Michigan provided: (1) Such person is legally licensed as a registered forester in his own state or country and has submitted evidence to the board that he is so licensed and that the requirements for registration therein are at least substantially equivalent to the requirements of this act; and (2) the state or country in which he is so licensed observes these same rules of reciprocity in regard to persons originally licensed under the provisions of this act.

338.739 Revocation of license; preferment of charges, court review, replacement license, fees. [M.S.A. 13.215(19)]

Sec. 19. The board shall have the power to revoke the license of any registrant who is found guilty by the board of fraud, deceit, gross negligence, incompetency or misconduct in the practice of professional forestry.

Any person may prefer charges of fraud, deceit, gross negligence, incompetency or misconduct in connection with any forestry practice against any registrant. Such charges shall be in writing, shall be sworn to by the person making them and shall be filed with the secretary of the board. All charges shall be heard by the board pursuant to its rules and regulations and subject to the requirements of Act No. 197 of the Public Acts of 1952, as amended, being sections 24.101 to 24.110, inclusive, of the Compiled Laws of 1948. Any applicant whose license has been revoked by the board may apply for a review of the proceedings with reference to such revocation of his license by any court of competent jurisdiction, pursuant to said Act No. 197 of the Public Acts of 1952, as amended. A quorum of the board, for reasons it may deem sufficient, may reissue a license to any person whose license has been revoked. A new license to replace any license revoked,

lost, destroyed or mutilated may be issued, subject to the rules of the board, and upon payment of a fee of \$3.00.

338.740 Violation of act, penalty; duties of officers. [M.S.A. 13.215(20)]

Sec. 20. Any person who shall practice or offer to practice the profession of forestry as a registered forester in this state, without being registered in accordance with the provisions of this act, or any person who shall use in connection with his name or otherwise assume, use or advertise any title or description tending to convey the impression that he is a registered forester, without being registered in accordance with the provisions of this act, or any person who shall present or attempt to use as his own the license of another, or any person who shall give any false or forged evidence of any kind to the board or any member thereof in obtaining a license, or any person who shall attempt to use an expired or revoked license, or any person, firm, partnership or corporation who shall violate any of the provisions of this act, shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than \$100.00. The board, or such person or persons as may be designated by the board to act in its stead, is empowered to prefer charges for any violations of this act in any court of competent jurisdiction. It shall be the duty of all duly constituted officers of the law of this state to enforce the provisions of this act and to prosecute any persons, firms, partnerships or corporations violating the same. The attorney general of the state or his designated assistant shall act as legal advisor of the board and render such assistance as may be necessary in carrying out the provisions of this act.

Approved May 26, 1955.

[No. 169 of 1958.]

AN ACT to amend section 12 of Act No. 78 of the Public Acts of 1955, entitled "An act to provide for the registration and regulation of foresters; to create a state board of registration for foresters and to prescribe its powers and duties; to authorize imposition and collection of fees; to authorize appropriations and disbursements therefrom; and to provide penalties for the violation of provisions of this act," being section 338.732 of the compiled Laws of 1948.

The People of the State of Michigan enact:

Section amended

Section 1. Section 12 of Act No. 78 of the Public Acts of 1955, being section 338.732 of the Compiled Laws of 1948, is hereby amended to read as follows:

338.732 Registered forester; qualifications of applicant; education, examination, experience. [M.S.A. 13.215(12)]

Sec. 12. (a) The following shall be considered as minimum evidence satisfactory to the board that the applicant is qualified for registration as a registered forester: (1) Graduation from a university or college with a curriculum in forestry acceptable to the board, including 1

3-credit course in each of the following subjects: Silviculture, forest protection, forest management, forest economics, and forest utilization; and a record of an additional 2 years' or more experience in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry; or (2) successfully passing a written examination designed to show knowledge approximating that obtained through graduation from an acceptable 4-year curriculum in forestry, and a record of 4 years or more of active practice in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry: Provided, That after 5 years from the effective date of this act no person shall qualify as a registered forester unless such person shall have graduated from a university or college with a curriculum in forestry acceptable to the board, and who has a record of an additional 2 years or more of experience in forestry work of a character satisfactory to the board, and indicating that the applicant is competent to practice professional forestry; or (3) any person who shall have been engaged in the practice of professional forestry as defined in section 2 of this act for at least 10 years in a period of 25 years immediately preceding the effective date of this act and is of the age of 70 years or more shall be eligible for registration as a registered forester without reference to the requirements set forth in subdivisions (1) and (2) hereof: Provided, That such person files application for registration with the board within 3 months from the effective date of this amendatory act.

(b) No person shall be eligible for registration as a registered forester who is not of good character and reputation. The completion of the junior year of a curriculum in forestry in a university or college acceptable to the board shall be considered as equivalent to 2 years of the practice of professional forestry; the completion of the senior year of a curriculum in forestry, without graduation, in a university or college acceptable to the board, shall be considered as equivalent to 3 years of the practice of professional forestry.

Approved April 18, 1958.

ALABAMA LAW

(Act 533, 1957 General Acts, as Amended by Act 141, Acts of Alabama 1961, Approved September 15, 1961)

To create a Board to be known as the State Board of Registration for Foresters; to provide for the qualification of members of said Board; to provide for the appointment of the members of said Board; to provide for their terms of office; to provide for the organization of said Board; to provide for the powers and duties of said Board; to provide for the registration of Foresters; to provide for the recording of licenses; to provide for the definition of the practice of Forestry; to provide for the revocation of licences; to provide for fees for the issuance and recording of such licenses; to provide for reciprocity; to create a special fund to be known as the "Professional Foresters Fund"; and to regulate expenditures therefrom; to repeal all laws in conflict with this Act; and to make an appropriation.

Be It Enacted by the Legislature of Alabama :

Section 1. GENERAL PROVISIONS: Any person using in connection with his name or otherwise assuming, using or advertising any title or description tending to convey the impression that he is a Registered Forester, shall be licensed as hereinafter provided. Nothing contained in this Act shall be construed as preventing any person, firm, partnership or corporation from practicing forestry; or managing timberlands, woodlands or forest, or any timberlands, woodlands or forest in which such person owns any interest, or from operating the removal of any products therefrom, in any manner desired. It is the intention of this Act to be for the benefit and protection of the public.

Section 2. DEFINITIONS: That the term "Registered Forester" as used in this Act shall mean a person, who, by reason of his knowledge of the natural sciences, mathematics, and the principles of Forestry acquired by professional Forestry Education and/or practical experience, is qualified to engage in Forestry practice as hereinafter defined. The "Practice of Professional Forestry" within the meaning and intent of this Act includes any professional service, such as consultation, investigation, evaluation, planning, or responsible supervision of any Forestry Activities in connection with any public or private lands, wherein the public welfare and property is concerned or involved when such professional service requires the application of Forestry principles and data. The term "Board" as used in this Act shall mean the State Board of Registration for Registered Foresters, provided for by this Act.

Section 3. STATE BOARD OF REGISTRATION FOR FORESTERS: Appointment of members, and the terms of office for such members; a State Board of Registration for foresters is hereby created whose duty it shall be to administer the provisions of this Act. The Board shall consist of five Foresters, who shall be selected and appointed by the Governor of Alabama from among ten nominees recommended by the Alabama Chapter of the Society of American Foresters and shall have the qualifications required by Section 4 of this Act. Each member of the Board shall receive a certificate of his appointment from the Governor, and before beginning his term of office shall file with the Secretary of State his written oath of affirmation for the faithful discharge of his official duties. The five members of the initial Board shall be appointed for terms of one, two, three, four and five years, respectively, and in making the appointment the Governor shall designate the term for which each of said members is appointed as provided for above. At the expiration of the term of any member of the initial Board, the Governor shall in the same manner as hereinabove provided appoint for a term of five years a Registered Forester having the qualifications required by Section 4 of this Act of succeed the member whose term on said Board is expiring. Nothing contained in this Act shall prohibit any member whose term expires to be reappointed to succeed himself on said Board. If the Governor fails to make appointment in 90 days after expiration of any term, the Board

shall make the necessary appointment from nominees submitted as hereinabove provided and who meet the qualifications set out by Section 4 of this Act. Each member of said Board shall hold office until the expiration of the term for which such member is appointed or until a successor shall have been duly appointed and shall have qualified.

Section 4. QUALIFICATIONS OF MEMBERS OF THE BOARD: Each member of the Board shall be a citizen of the United States and a resident of the State of Alabama, a member or fellow of the Society of American Foresters, and shall have been engaged in the practice of the profession of Forestry for the last ten years prior to such appointment.

Section 5. COMPENSATION AND EXPENSES OF BOARD MEMBERS: Each member of the Board shall receive a nominal sum of \$10.00 per diem when actually attending to the work of the Board or any of its committees and for the time spent in necessary travel, and in addition thereto, shall be reimbursed for all actual traveling, incidental and clerical expenses necessarily incurred in carrying out the provisions of this Act. Such compensation and expenses shall be paid out of the "Professional Foresters Fund" in the manner prescribed herein.

Section 6. REMOVAL OF MEMBERS OF THE BOARD; VACANCIES: The Governor may remove any member of the Board for misconduct, incompetency or neglect of duty. Vacancies in the membership of the Board shall be filled for the unexpired term by appointment only in the manner provided by this Act for the appointment of members of the Board.

Section 7. ORGANIZATION AND MEETINGS OF THE BOARD: The members of said Board shall be named and appointed by the Governor within 60 days after the passage of this Act. The Board shall hold a meeting within 30 days after its members are first appointed and thereafter shall hold at least two regular meetings each year. Special meetings shall be held at such time and place as the by-laws of the Board may provide; provided that not more than one meeting may be held in any one calendar month. Notice of all meetings shall be given in such manner as the by-laws may provide. The Board shall elect or appoint annually the following officers: a Chairman, Vice Chairman and a Secretary, who shall each be members of the Board. A quorum of the Board shall consist of not less than three voting members.

Section 8. POWERS OF THE BOARD: The Board shall have the power to make all by-laws and rules, not inconsistent with the constitution and laws of this state which may be reasonably necessary for the proper performance of its duties and the regulations of the proceedings before it. The Board shall adopt and have an official seal. In carrying into effect the provisions of this Act, the Board may, under the hand of its Chairman and the seal of the Board, subpoena witnesses and compel their attendance and may also require them to produce books, papers, or documents in a case involving the revocation of a license or practicing or offering to practice under the title of Regis-

tered Forester without a license. Any member of the Board may administer oaths of affirmation to witnesses appearing before the Board. Such witnesses officially called by the Board shall receive the same compensation and shall be reimbursed for expenses in the same amount as the members of the Board as provided and set out in Section 5 of this Act. If any person shall refuse to appear as a witness before said Board, or refuse to testify, refuse to produce any books, papers, or documents, the Board may present its petition to the Circuit Court of the County in which the State Capitol is located, setting forth the facts, and thereupon such Court shall, in a proper case, issue a subpoena to such person, requiring his attendance before such Circuit Court and there to testify or to produce such books, papers and documents, as may be deemed necessary and pertinent by the Board. Any person failing or refusing to obey the subpoena or order of said Circuit Court may be proceeded against in the same manner as for refusal to obey any other subpoena or order of said Court.

Section 9. RECEIPTS AND DISBURSEMENTS: The Secretary of the Board shall receive and account for all moneys derived under the provisions of this Act, and shall pay the same monthly to the State treasurer, who shall keep such moneys in a separate fund to be known as the "Professional Foresters Fund." Such fund shall be kept separate and apart from all other moneys in and treasury, and shall be paid out only by warrant of the comptroller upon the State treasurer, upon itemized vouchers approved by the Chairman and attested by the Secretary of the Board. All moneys in the "Professional Foresters Fund" are hereby specifically appropriated for the use of the Board. The Secretary of the Board shall give surety bond to the State in such sum as the Board may determine. The premium on said bond shall be regarded as a proper and necessary expense of the Board and shall be paid from the "Professional Foresters Fund."

The Board may employ such clerical and other assistants as are necessary for the proper performance of its work, or, in lieu of employing clerical assistants, the Board may contract with any state department or agency to furnish the board with such clerical assistance as the Board deems necessary. The compensation of such assistants, or the cost of contracting for such clerical assistance, shall be paid out of the "Professional Foresters Fund" in the manner prescribed herein.

The Board is authorized to accept all gifts, bequests, and donations from any source whatsoever, and such gifts, bequests, and donations shall be used or expended in accordance with their terms or stipulations, but in the absence of any such terms or stipulations, such gifts, bequests, or donations may be used or expended for such purposes as the Board may determine.

Except as otherwise provided herein, the Board may make expenditures for any purpose which, in the opinion of the Board, is reasonably necessary for the proper performance of its duties under the provisions of this act, including the expenses of the Board's delegates to any annual conventions of, and membership dues to, the Society of American Foresters. Provided, however, that under no circumstances shall the total amount of warrants issued by the com-

troller in payment of the expenses and compensation provided for by this Act exceed the amount of the examination and registration fees, license fees, donations and other moneys collected by the Board as herein provided.

Section 10. RECORDS AND REPORTS: The Board shall keep a record of its proceedings and a register of all applications for registration which register shall show the name, age and residence of each applicant; the date of the application; the place of business of such applicant; his educational and other qualifications; whether or not an examination was required; whether or not the application was rejected; whether or not a license of registration was granted, the date of the action by the Board; and such other information as may be deemed necessary by the Board. The records of the Board shall be prima facie evidence of the proceedings of the Board set forth therein, and a transcript thereof, duly certified by the Secretary of the Board under seal, shall be admissible in evidence with the same force and effect as if the original were produced. Annually, as of the thirtieth day of September each year, the Board shall submit to the Governor a report of its transactions of the preceding year, and shall transmit to him as a part of said report a complete statement of the receipts and expenditures of the Board and the statement shall be attested by the Chairman and the Secretary of the Board.

Section 11. ROSTER OF REGISTERED FORESTERS: A Roster showing the names and place of business of all registered foresters qualified according to the provisions of this Act, shall be prepared by the Secretary of the Board during the month of March of each year. Copies of this roster shall be mailed to each person so registered, placed on file with the Secretary of the State and, furnished to the public upon request.

Section 12. GENERAL REQUIREMENTS FOR REGISTRATION: The following shall be considered as minimum evidence satisfactory to the Board that the applicant is qualified for registration as a Registered and licensed Forester: (1) Graduation from a curriculum in Forestry of four years or more in a school or college approved by the Board, or accredited by the Society of American Foresters, and a specific record of an additional one year or more experience in Forestry work of a character satisfactory to the Board, and indicating that the applicant is competent to practice Forestry; (1-a) Graduation from a curriculum in Forestry of four or more years in a school or college not approved by the Board, or accredited by the Society of American Foresters, and a specific record of an additional one year or more experience in Forestry work of a character satisfactory to the Board, and indicating that the applicant is competent to practice Forestry and successfully passing a written and/or oral examination designed to show knowledge and skill approximating that obtained through graduation from an accredited and approved four-year curriculum in Forestry; (2) Or successfully passing a written and/or oral examination designed to show the knowledge and skill approximating that obtained through graduation from an accredited and approved four year curriculum in Forestry, and a specific record of six

years or more of active practice in Forestry work of such character that is satisfactory to the Board; and indicating that the applicant is competent to practice Forestry and to be placed in responsible charge of such work, provided, that after September 13, 1962, no person shall qualify as a Registered Forester or be granted a license to practice Forestry by the Board excepting that person who shall have graduated from a curriculum in Forestry of four years or more in a school or college approved by the Board or accredited by the Society of American Foresters or has graduated from a curriculum in Forestry of four years or more in a school or college not approved by the Board or accredited by the Society of American Foresters and successfully passed a written and/or oral examination designed to show the knowledge and skill approximating that obtained through graduation from an accredited and approved four-year curriculum in Forestry and who in addition to the educational or examination requirements just set out has a specific record of an additional two years or more of experience in Forestry work of a character satisfactory to the Board, and indicating that the applicant is competent to practice Forestry. The Board shall issue licenses only to those applicants who meet the requirements of this Section, and to none other, provided, that no person shall be eligible for registration as a registered or licensed Forester who is not of good character and reputation. In considering the qualifications of applicants, Forestry teaching in Department, school or college of Forestry, shall be construed as Forestry work. The completion of the Junior year of a curriculum in Forestry in a school or college approved by the Board or accredited by the Society of American Foresters shall be considered as equivalent to two years of active practice; the completion of the Senior year of a curriculum in Forestry, without graduation, in a school or college approved by the Board or accredited by the Society of American Foresters shall be considered as the equivalent to three years of active practice.

Section 13. APPLICATION AND REGISTRATION FEES: Application for Registration shall be made on forms prescribed and furnished by the Board; shall contain statements made under oath, showing the applicant's education and a detailed summary of his technical work, and shall contain not less than five references, of whom three or more shall be Foresters having personal or professional knowledge of his Forestry experience. The registration fee for a license as a "Registered Forester" shall be ten dollars, five dollars of which shall accompany the application, the remaining five dollars of which to be paid upon issuance of license. Should the applicant fail or refuse to remit the said remaining five dollars within 30 days after being notified, in the usual manner, that the applicant has successfully qualified, the applicant shall forfeit the right to have a license so issued under that application, and said applicant may be required to again submit an original application and pay an original fee therefor. Should the Board deny the issuance of a license to any applicant, the initial fee deposited shall be retained by the Board as an application fee.

Section 14. EXAMINATION: When written and/or oral examinations are required, they shall be held at such time and place as the Board may determine. The methods of procedure shall be prescribed

by the Board. A candidate failing on examination may apply for reexamination at the expiration of six months and will be reexamined without payment of additional fee. Subsequent examination will be granted upon payment of a fee to be determined by the Board, not to exceed five dollars in each instance.

Section 15. **LICENSES:** The Board shall issue a license upon payment of a registration fee as provided for in this Act to an applicant, who, in the opinion of the Board has satisfactorily met all of the requirements set out by this Act. Licenses shall show the full name of the Registrant, shall have a serial number, and shall be signed by the Chairman of the Board. The issuance of a license by the Board shall be evidence that the person named therein is entitled to all of rights and privileges of a registered forester while the said license remains unrevoked or unexpired. Plans, maps, specifications and reports issued by a Registrant shall be endorsed with his name and license number during the life of the Registrant's license, but it shall be a misdemeanor for any one to endorse any document with said name and license number after the license of the Registrant named therein has expired or has been revoked, unless said license shall have been renewed or reissued. It shall be a misdemeanor for any registered forester to endorse any plan, specification, estimate or map unless he shall have actually prepared such plan, specification, estimate or map, or shall have been in the actual charge of the preparation thereof.

Section 16. **EXPIRATION AND RENEWALS:** Licenses shall expire on the thirtieth day of September next following their issuance or renewal and shall become invalid on that date unless renewed. It shall be the duty of the Secretary of the Board to notify, at his last registered address, every person registered under this Act of the date of the expiration of his license and the amount of the fee that shall be required for its renewal for one year; such notice shall be mailed at least one month in advance of the date of the expiration of said licenses. The Board shall each year, prior to issuing renewal notices for the ensuing year, fix the annual renewal fee for licenses, which renewal fee shall not exceed the sum of ten dollars. Renewal of licenses for the following year may be affected at any time during the month of September of the year in which such license has been issued or renewed by the payment of the renewal fee so fixed by the Board. Such licenses may also be renewed during the ensuing ten months by the payment of an additional fee of fifty cents for each month, or fraction thereof, that payment of the fixed renewal fee is delayed beyond the month of September. The Board shall make an exception to the foregoing renewal provision in the case of a person who is in the Armed Services of the United States.

Section 17. **FIRMS, PARTNERSHIPS AND CORPORATIONS:** Registration shall be determined upon a basis of individual, personal qualifications. No Firms, Companies, Partnerships or Corporations can be licensed under this Act.

Section 18. **RECIPROCITY:** A person not a resident of, and having no established place of business, in Alabama, or who has recently become a resident thereof may use the title of Registered Forester pro-

vided: (1) Such person is legally licensed as a Registered Forester in his own State or Country and has submitted evidence to the Board that he is so licensed; (2) The State or Country in which he is so licensed observe these same rules of reciprocity in regard to persons licensed under the provisions of this Act.

Section 19. REVOCATIONS AND REISSUANCE OF LICENSES: The Board shall have the power to revoke the license of any Registrant who is found guilty by the Board of gross negligence, incompetency, or misconduct in the practice of Forestry. The Board is empowered to designate a person or persons to investigate and report to it upon any charges of fraud, deceit, gross negligence, incompetency or other misconduct in connection with any Forestry practice against any Registrant, as may come to its attention. Such person or persons so designated by the Board shall receive the same compensation and shall be reimbursed for expenses in the same amount as the Board as outlined in Section 5 of this Act. Any person may prefer charges of fraud, deceit, gross negligence, incompetency or other misconduct in connection with any Forestry practice against any Registrant. Such charges shall be in writing, shall be sworn to by the person making them, and shall be filed with the Secretary of the Board. All charges, unless dismissed by the Board as unfounded or trivial, shall be heard by the Board within three months after the date on which they shall have been preferred. The time and place for said hearing shall be fixed by the Board, and a copy of the charges, together with a notice of the time and place of the hearing, shall be personally served on, or mailed to the last known address of such registrant, at least 30 days before the date fixed for the hearing. At any hearing, the accused Registrant shall have the right to appear personally and by counsel, to cross-examine witnesses appearing against him, and to produce evidence and witnesses in his own defense. If, after such hearing three or more members of the Board vote in favor of finding the accused guilty, the Board shall revoke the license of such Registered Forester. Any applicant whose license has been revoked as above may apply for a review of the proceedings with reference to such revocation of his license by the aforementioned Circuit Court and from there by appeal to the Supreme Court of Alabama. The only record to be considered by either the said Circuit Court or by the Supreme Court shall be the record made before the Board. New evidence must be presented to the Board, in session, before it may be used in Court proceedings. The Board, for reasons it may deem sufficient, may reissue a license to any person whose license has been revoked when three or more members of the Board vote in favor of such reissuance. A new license to replace any license revoked, lost, destroyed, or mutilated, may be issued, subject to the rules of the Board, and a charge of three dollars for such issuance.

Section 20. VIOLATIONS AND PENALTIES: Any person who shall practice or offer to practice the profession of Forestry as a Registered Forester in this State, without being registered or exempted in accordance with the provisions of this Act, or any person who shall use in connection with his name or otherwise assume, use or advertise any title or description tending to convey the impression that he

is a registered Forester, without being registered or exempted in accordance with the provisions of this Act, or any person who shall present or attempt to use as his own the license of another, or any person who shall give any false or forged evidence of any kind to the Board or any member thereof in obtaining a license, or any person who shall attempt to use an expired or revoked license, or any person, firm, partnership or corporation, who shall violate any of the provisions of this Act, shall be guilty of a misdemeanor, and upon conviction thereof shall be fined not less than one hundred dollars nor more than five hundred dollars for each offense. The Board, or such person or persons as may be designated by the Board to act in its stead, is empowered to prefer charges for any of the violations of this Act in any Circuit Court in any County in this State in which such violations may have occurred. It shall be the duty of all duly constituted officers of the law, of this State, or any political subdivision thereof, to enforce the provisions of this Act and to prosecute any persons, firms, partnerships or corporations violating the same. The Attorney General of the State and his assistants shall act as legal advisers of the Board and render such legal assistance as may be necessary in carrying out the provisions of this Act.

All fines collected for the violation of any provisions of this Act shall be paid over to the Secretary of the Board to be by him delivered to the State Treasurer to be placed in the "Professional Foresters Fund" in the same manner as funds received for the issuance of licenses.

Section 21. REPEALING CLAUSE: All laws and parts of laws in conflict with the provisions of this Act be, and the same are hereby repealed. If any provisions of this Act shall be held unconstitutional, the same shall not apply to other provisions hereof.

Section 22. EFFECTIVE DATE: This Act shall become effective immediately upon its passage and approval by the Governor, or upon its otherwise becoming a law.

**BY-LAWS OF THE STATE BOARD OF REGISTRATION FOR FORESTERS
AS ADOPTED BY THE BOARD AT ITS MEETING
ON MARCH 11, 1958**

PREAMBLE

Act No. 533, approved September 13, 1957, which was passed by the Alabama Legislature in 1957 to create a State Board of Registration for Foresters, shall be the Constitution of that Board. As authorized in Section 8 of Act No. 533, the State Board of Registration for Foresters hereby adopts the following by-laws for the conduct of its business.

ARTICLE 1—BOARD

1. Name: The name of this Board shall be the State Board of Registration for Foresters. For the purpose of brevity in the succeeding by-laws, this organization shall be hereinafter referred to as the Board.

2. Officers: The officers of the Board shall be a Chairman, Vice-Chairman, and a Secretary. The latter office is to be held by a person who is also a member of the Board.

3. Meetings: Regular meetings of the Board shall be held in the City of Montgomery, one on the fourth Wednesday in January and the other on the fourth Wednesday in July. Special meetings may be called from time to time by the Chairman when, in his opinion, it is necessary provided that not more than one meeting shall be held in any one calendar month and that the Secretary shall notify each Board member in writing of the time and place of the special meeting at least forty-eight hours in advance of the meeting date, and provided further that the time and meeting place are convenient to at least four members of the Board. Special meetings may be held at points in Alabama other than the City of Montgomery.

4. Quorum: Three members of the Board shall at all regular and special meetings constitute a quorum for the transaction of business.

5. Election of Officers: At the regular meeting in July of each year the Board shall elect a Chairman, Vice-Chairman, and a Secretary, who shall take office the following October 1 and shall serve until the following September 30, or until such times as their successors shall have been duly elected.

6. Seals: The Seal of the Board shall be circular in form and 2 inches in diameter and in accordance with the following design approved by the Board on March 11, 1958:

All official papers, registration certificates, and other formal documents of the Board shall bear the imprint of this seal.

Each registered forester may use an impression seal, as adopted by the Board, on his plans, maps, specifications, and reports. The seal for registrants adopted by the Board shall be circular in form, $1\frac{1}{2}$ inches in diameter, and shall bear the name of the registrant and his license number. The official seal for registrants shall be similar to the seal shown in the following illustration:

ARTICLE II—DUTIES

1. Chairman: The Chairman shall, when present, preside at all meetings, shall appoint all committees and shall sign all certificates and other official documents. He shall call a special meeting of the Board when, in his opinion, business necessitates. The chairman shall, annually as of September 30, prepare the report as required by law for submission to the governor. He shall notify all State Boards of Registration for Foresters, now existing or that may be created, and that are known to the Board, of the reciprocity provisions of the Act. He shall each year, prior to August 1, notify the Chairman, Alabama Chapter, Society of American Foresters to submit to the Governor in writing, with copy to the Board, the names of ten registered foresters from whom one will be appointed to serve on the Board for period of five years. He shall otherwise perform all duties pertaining to the office of Chairman.

2. Vice-Chairman: The Vice-Chairman shall perform the duties of the Chairman during his absence from a Board meeting, or incapacity, or absence from the State.

3. Secretary: The Secretary, with the assistance of such clerical help as may be provided, shall conduct and care for all correspondence in the name of, and shall keep a record of the proceedings of the Board, shall attest all certificates of registration, and shall notify members of the Board of all regular and special meetings, unless such notice is waived in writing by all members of the Board, and shall perform any other duties required by law or that may be assigned to him by the Board.

4. Rules and Regulations Committee: The Rules and Regulations Committee shall consist of one member, and shall from time to time consider and recommend to the Board such amendments to the by-laws and modification of the rules and regulations governing examinations, registration, and procedure as will give the best operating results. All proposed revisions of the by-laws, rules and regulations of procedure must be referred to this committee for a report and said committee shall report to the Board its recommendations relative to rules and regulations.

5. Public Information Committee: The Public Information Committee shall consist of the Chairman. It shall be the duty of this committee to pass upon and recommend to the Board data for publication and circulation setting forth the policy, purpose and principles of the Board.

6. Examination Committee: The Committee on Examinations shall consist of one or more members. It shall be the duty of this Committee to prepare and recommend to the Board for its approval the nature and scope of all the examinations to be held by the Board.

7. Special Committees: The duties of all special committees shall be as directed by the Chairman at the time of appointment and such committees shall cease to function as soon as the work assigned them shall have been completed and approved by the Board.

8. Presiding Officers: In the absence of the Chairman and Vice-Chairman, the members present at a meeting shall elect a presiding officer.

ARTICLE III—PROCEDURE

1. Order of Business: The order of business of the Board shall be as follows:

- (a) Call meeting to order
- (b) Reading of minutes
- (c) Communications (written or oral)
- (d) Committee reports
 1. Rules and Regulations Committee
 2. Public Information Committee
 3. Examination Committee
 4. Special Committees

- (e) Unfinished business
- (f) New business
- (g) Reading and considering applications
- (h) Adjournment

2. Rules or Order: Robert's Rules of Order shall govern the procedure of the Board, except as may otherwise be provided by the by-laws and when not in conflict with the requirements of the Act.

3. Suspension of Rules: The Board, by unanimous consent of those present may, if circumstances require, waive or suspend temporarily any of the provisions of these by-laws, for the expedition of the business or conduct of the Board, provided, however, the minutes of the meeting at which such suspension is made shall show clearly and definitely the reasons for such suspension.

ARTICLE IV—AMENDMENTS

1. Amendments: Amendments to the by-laws must be presented by a member of the Board in writing at a regular or special meeting of said Board, and may be adopted at the meeting at which such amendments are presented. Copies of the proposed amendments must be submitted in writing to each member of the Board one week prior to the Board meeting.

ARTICLE V—VOTING

1. Voting: A majority vote of the Board members shall govern the action of the Board. The presiding officer shall vote on any motion presented before the Board. If only three members are present, then a unanimous vote will be required on any matter presented to the Board for official action.

ARTICLE VI—FUNDS

1. Funds: All funds received by the Secretary shall be paid monthly to the State Treasurer, who shall keep such moneys in a separate fund to be known as the "Alabama Professional Foresters Fund." Such fund shall be paid out only by warrant of the Comptroller upon the State Treasurer, upon itemized vouchers approved by the Chairman and attested by the Secretary of the Board.

RULES

Adopted by the State Board of Registration for Foresters

Rule 1 It shall be the policy of the Board that no member shall discuss the business and transactions of the Board, outside the Board meeting, except confidentially with another member of the Board.

Rule 2 Any person may obtain an audience with the Board by directing a request, in writing, to the Chairman, stating his reasons therefor, provided that the request is approved by the Chairman.

Rule 3 A resident of Alabama, licensed in another state, cannot practice in Alabama under the reciprocity provision.

Rule 4 If a person is registered in another state and moves his residence to Alabama, he may be granted reciprocity, but such provision expires when the license expires.

Rule 5 An applicant who is a resident of a state which does not have licensing law, will not be granted reciprocity in Alabama, even though he does hold a license or licenses from another state or states.

Rule 6 Any registrant who becomes delinquent in the payment of his license renewal fee as of September 30 shall be notified prior to October 10 of his delinquency and the penalty therefor, beginning October 1. On July 1 of the following calendar year, which is nine months after the date of expiration and one month prior to expiration of renewal period, the delinquent shall again and finally be notified of his delinquency and that payment of license fee and penalties must be received by the Board prior to July 31, or lose the right to renew his license.

Rule 7 Requests for information concerning the financial affairs of the Board shall be released only by the *Secretary of the Board* and then only upon receipt of written request. The office manager is authorized to release to any person upon request only that information which has been released by the Board through the *Publicity Chairman*, and/or through the *Roster of Registered Foresters* and the *Annual Report of the Board to the Governor*. The *Foresters Registration Record* shall be used as a reference in the event a registrant's name does not currently appear in the published Roster.

Rule 8 An initial application for reciprocity shall be acted upon by the Board. An application for renewal of reciprocity shall be handled administratively by the office manager. The office manager will report to the Board all renewals handled between meetings.

Rule 9 At each regular meeting of the Board, and at any special meeting when so directed by the Chairman, the office manager will present to the Board, in accordance with the established agenda of the meeting, the number of foresters registered to date; deaths of any registrants reported or known; movement of domicile of any registrants to other states; a report on the renewals of reciprocity handled administratively; the number of registrants delinquent in payment of fees; the number of applications requiring action by the Board; the needs for equipment and supplies and estimated cost of each item; the status and condition of the Board's property; a financial statement as of the end of the month immediately preceding the meeting; and any other information or items considered pertinent to the deliberations of the Board.

Rule 10 Professional experience as set forth in Section 12 (1) shall be acquired after graduation.

Rule 11 A revoked, expired, or invalid license shall not be displayed in any public office or place of business by any registrant, person or firm in connection with the practice of forestry. Any violation of this rule will be cause for the Board to require the possessor of said license to surrender the same to the Board.

Rule 12 The Board shall issue a new license identified by the same number as that of the original to replace any license lost, destroyed,

or mutilated upon receipt by the Board of a written request and a fee of three dollars from the licensee, provided the Board's records show the original license is valid. This new license shall bear the signatures of current officers, the date of reissue, and below the license number the following:

"Original license approved _____ (date)."

Rule 13 Any release, article, manuscript or other material concerning Board policy, controversial matters or the philosophy of licensing, which is prepared by a Board member for presentation or publication and is represented as having approval of the Board, shall be submitted to the Chairman in five copies. The Chairman will then submit a copy to each Board member for approval or disapproval. On the concurrence of three members of the Board, the Chairman shall then have authority to release the material for publication or presentation. A Board member will be considered as approving the material submitted unless he expresses a written opinion to the contrary within two weeks from the date of the Chairman's letter of transmittal. Board members may make addresses, radio and television presentations, and prepare articles for restricted distribution if their statements are confined to factual data and do not disclose confidential information. Articles prepared by the Chairman, which are strictly in the field of reporting and are confined to factual data, may or may not be submitted to Board members for approval prior to publication.

CODE OF ETHICS FOR THE PROFESSION OF FORESTRY

Adopted by the Society of American Foresters, November 12, 1948

The purpose of these canons is to formulate guiding principles of professional conduct for foresters in their relations with each other, with their employers, and with the public. The observance of these canons secures decent and honorable professional and human relationships, establishes enduring mutual confidence and respect, and enables the profession to give its maximum service.

Professional Life

1. The professional forester will utilize his knowledge and skill for the benefit of society. He will cooperate in extending the effectiveness of the forestry profession by interchanging information and experience with other foresters, and by contributing to the work of forestry societies, associations, schools, and publications.

2. He will advertise only in a dignified manner, setting forth in truthful and factual statements the services he is prepared to render for his prospective clients and for the public.

Relations With the Public

3. He will strive for correct and increasing knowledge of forestry and the dissemination of this knowledge, and will discourage and condemn the spreading of untrue, unfair, and exaggerated statements concerning forestry.

4. He will not issue statements, criticism, or arguments on matters connected with public forestry policies, without indicating, at the same time, on whose behalf he is acting.

5. When serving as an expert witness on forestry matters, in a public or private fact finding proceeding, he will base his testimony on adequate knowledge of the subject matter, and render his opinion on his own honest convictions.

6. He will refrain from expressing publicly an opinion on a technical subject unless he is informed as to the facts relating thereto, and will not distort or withhold data of a substantial or other nature for the purpose of substantiating a point of view.

Relations With Clients, Principals, and Employers

7. He will be loyal to his client or to the organization in which he is employed and will faithfully perform his work and assignments.

8. He will present clearly the consequences to be expected from deviations proposed if his professional forestry judgement is overruled by non-technical authority in cases where he is responsible for the technical adequacy of forestry or related work.

9. He will not voluntarily disclose information concerning the business affairs of his employers, principals, or clients, which they desire to keep confidential, unless express permission is first obtained.

10. He will not, without the full knowledge and consent of his client or employer, have an interest in any business which may influence his judgement in regard to the work for which he is engaged.

11. He will not, for the same service, accept compensation of any kind, other than from his client, principal, or employer, without full disclosure, knowledge, and consent of all parties concerned.

12. He will engage, or advise his client or employer to engage, other experts and specialists in forestry and related fields whenever the client's or employer's interests would be best served by such actions, and will cooperate freely with them in their work.

Relations With Professional Foresters

13. He will at all times strive to protect the forestry profession collectively and individually from misrepresentation and misunderstanding.

14. He will aid in safeguarding the profession against the admission to its ranks, of persons unqualified because of lack of good moral character or of adequate training.

15. In writing or in speech, he will be scrupulous to give full credit to others, in so far as his knowledge goes, for procedures and methods devised or discovered and ideas advanced or aid given.

16. He will not intentionally and without just cause, directly or indirectly, injure the reputation or business of another forester.

17. If he has substantial and convincing evidence of unprofessional conduct of a forester, he will present the information to the proper authority for action.

18. He will not compete with another forester on the basis of charges for work by underbidding through reduction of his quoted fee after being informed of the fee quoted by a competitor.

19. He will not use the advantages of a salaried position to compete unfairly with another forester.

20. He will not attempt to supplant another forester in a particular employment, after becoming aware that the later has been definitely engaged.

21. He will not review the work of another forester, for the latter's employer, without the other's knowledge, unless the latter's connection with the work has been terminated.

22. He will base all letters of reference or oral recommendation on a fair and unbiased evaluation of the party concerned.

23. To the best of his ability he will support, work for, and adhere to the principles of the merit system of employment.

24. He will not participate in soliciting or collecting financial contributions from subordinates or employees for political purposes.

25. He will uphold the principle of appropriate and adequate compensation for those engaged in forestry work, including those in subordinate positions, as being in the public interest and maintaining the standards of the profession.

FLORIDA LAW

CHAPTER 61-260

HOUSE BILL NO. 1684

AN ACT to create and establish a board for the optional registration of foresters; providing for the qualifications and appointment of its members; granting authority to examine qualifications of applicants for registration; to collect fees for such registration; to issue certificate and title registered forester to qualified applicants and providing for penalties for unauthorized use of the title registered forester.

WHEREAS, in order to safeguard health, life and property, establish professional standards, promote and safeguard the management and perpetuation of one of Florida's greatest natural resources, it is desirable to establish by law certain professional standards which must be met by all persons who engage in the public practice of forestry as registered foresters, and

WHEREAS, this act is primarily for the benefit and protection of the public, and

WHEREAS, qualifications for registration require attainment of certain professional standards of training, experience and demonstrated ability, as well as integrity of character, NOW, THEREFORE,

Be It Enacted by the Legislature of the State of Florida:

Section 1. *General provisions.*—Any person practicing or offering to practice the profession of forestry in this state as a registered forester shall be required to submit evidence that he is qualified so to practice, and may be registered as hereinafter provided; and it is unlawful for any person to practice the profession of forestry in this state as a registered forester unless such person is duly registered, and to use in connection with his name or otherwise assume, use, or advertise any title or description tending to convey the impression that he is a registered forester, as hereinafter defined, unless such person has been duly registered.

Section 2. *Definitions.*—The term registered forester as used in this act means a person who, by reason of his knowledge of the natural sciences, mathematics, economics, and the principles of forestry, acquired by professional training and/or practical experience, is qualified to engage in forestry practices as herein defined, and has been duly registered.

The terms forestry practices or practice of forestry as used in this act mean any professional service (such as consultation, investigation, evaluation, planning, or responsible supervision of any forestry activity) which requires the application of special knowledge of the principles of forestry. Provided, however, that nothing in this act shall be construed as applying to any vocational class of forest workers, including, but not limited to, such classes as timber cruisers, timber

markers, naval stores woods riders, vocational forestry teachers and agents, fire guards, lookouts, and employees of forest industry plants and logging operators.

The term board as used in this act means the state board of registration for foresters.

The term responsible charge as used in this act means the direction of professional foresters' services in evaluation, investigation, or research, requiring initiative, technical knowledge, professional skill, and independent judgment in the practice of forestry.

Section 3. State board of registration for foresters; appointment of members; terms.—A state board of registration for foresters is hereby created whose duty it is to administer the provisions of this act. The board shall consist of five (5) foresters who shall be appointed by the governor. Nominees for appointment to the board may be recommended to the governor by the offices of the Florida chapter of the society of American foresters, which nominees shall be at least three (3) in number for each position, and who shall have the qualifications required by section 4 of this act, and the governor may make appointments from the persons so nominated. Every member of the board shall be commissioned by the governor and before beginning his term of office shall file with the secretary of state his written oath or affirmation for the faithful discharge of his duties. The five (5) members of the board shall be appointed for terms as follows: one (1) for one (1) year, one (1) for two (2) years, one (1) for three (3) years and two (2) for four (4) years. On the expiration of the term of any member of the board the governor shall, in the manner herein provided, appoint for a term of four (4) years a registered forester having the qualifications required by section 4 of this act to take the place of the member whose term on said board is expiring. Each member shall hold office until the expiration of the term for which such member has been appointed or until his successor shall have been duly appointed and qualified. Appointments to fill vacancies caused by death or resignation shall be for the unexpired term only.

Section 4. Qualifications of members of the board.—Each member of the board shall be a citizen of the United States and a citizen and resident of this state, and shall have been engaged in the practice of forestry as herein defined, or in the teaching of forestry, for at least ten (10) years, during at least five (5) years of which he shall have been in responsible charge of such activity, and after the initial appointment to the board shall be registered under the provisions of this act.

Section 5. Compensation and expenses of board members.—The members of the board shall receive no compensation for their services but shall be entitled to any per diem or travel expenses as provided by section 112.061, Florida Statutes.

Section 6. Removal of members of the board.—The governor may remove any member of the board as prescribed under section 15 of article IV of the state constitution.

Section 7. *Organization and meetings of the board.*—The board shall have its headquarters in Tallahassee, Leon county. It shall hold at least two (2) regular meetings each year. The two (2) regular meetings shall be held in Tallahassee, Leon county. Special meetings of the board shall be held at such time and place within the state as the by-laws of the board shall provide. The board shall elect or appoint annually the following officers: a chairman and a vice-chairman from the board; and a secretary who need not be a member of the board. A quorum of the board shall consist of three (3) members.

Section 8. *General powers of the board.*—The board shall have the power to make all bylaws and rules, not inconsistent with the constitution and laws of this state, which are reasonably necessary for the proper performance of its duties and the regulation of the proceedings before it. The board shall adopt and have an official seal. In carrying into effect the provisions of this act, the board may, under the hand of its chairman and the seal of the board, subpoena witnesses and compel their attendance and may also require them to produce books, papers, documents, etc., in a case involving the revocation or suspension of registration. Any member of the board may administer oaths or affirmations to witnesses.

Section 9. *Receipts and disbursements.*—The secretary of the board shall receive and account for all moneys derived under the provisions of this act, and shall pay the same to the state treasurer, who shall keep such moneys in a separate fund to be known as the registered foresters licensing fund. Such fund shall be kept separate and apart from all other moneys in the treasury, and shall be paid out only by warrant of the comptroller upon the treasurer, upon itemized vouchers, approved by the chairman and attested by the secretary of the board. The comptroller be and he is hereby authorized to retain and withdraw out of the funds collected hereunder 10% of the gross amount collected, as a service charge. The secretary of the board shall give a surety bond to the state in such sum as the board may determine. The premium on said bond shall be regarded as a proper and necessary expense of the board and shall be paid out of the registered foresters licensing fund. The board is authorized to negotiate with the state forester of the Florida board of forestry to act as secretary of the board and furnish such clerical assistance as is needed to carry out the duties of the board. The board is further authorized to reimburse the Florida board of forestry for such clerical services in accordance with procedures prescribed in this section.

The board may employ counsel and clerical or other assistants as are necessary for the proper performance of its work and may make expenditures of this fund for any purpose which, in the opinion of the board, is reasonably necessary for the proper performance of its duties under this act. Under no circumstances shall the total amount of warrants issued by the comptroller in payment of the expenses and compensation provided for in this act exceed the amount in the hands of the state treasurer known as the registered foresters licensing fund, and such appropriations as may be made by the legislature.

Section 10. *Records and reports.*—The board shall keep a record of its proceedings and a register of all applications for registration and of any action taken thereon. The records of the board shall be prima facie evidence of the proceedings of the board set forth therein, and a transcript thereof, duly certified by the secretary of the board under seal, shall be admissible in evidence with the same force and effect as if the original were produced. Annually, as of December 31, the board shall submit to the governor a report of its transactions of the preceding year, and shall also transmit to him a complete statement of the receipts and expenditures of the board, attested by its chairman and secretary.

Section 11. *Roster of registered foresters.*—A roster of the names and places of business of all registered foresters qualified hereunder shall be prepared annually by the secretary of the board. Copies of this roster shall be placed on file with the secretary of state, and furnished to the public upon request.

Section 12. *General requirements for registration.*—

(1) Any graduate with a bachelor's, master's or doctor's degree from a school or college of forestry accredited by the national society of American foresters and who in addition to such education, shall have a specific record of two (2) years or more of active practice of forestry work, indicating that the applicant is qualified to be placed in responsible charge of such work, and who is of good moral character and integrity, shall be eligible.

(2) Any person who is not a graduate of a school or college of forestry accredited by the national society of American foresters shall be eligible to take a written or oral examination or both to determine his qualifications for registration as a registered forester provided he submits to the board evidence verified by oath and satisfactory to the board that he:

- (a) Is twenty-one (21) years of age or older;
- (b) Is of good moral character and integrity;
- (c) Has been employed or engaged in the practice of forestry for at least seven (7) years and during that time has been in responsible charge of forestry work for at least two (2) years.

Any applicant who shall pass such written or oral examination, or both, in a manner satisfactory to the board shall be eligible for registration as a registered forester.

(3) Any person, who, on the effective date of this act, has been engaged in the active practice of forestry, as defined in section 2 of this act, for at least seven (7) years, with no substitution of education for active practice, and who is of good moral character and integrity, shall be eligible for registration as a registered forester without reference to the requirements set forth in subsections (1) and (2) of this section, provided that he file application for registration with the board within two (2) years from the effective date of this act, or men in military service within one (1) year after release.

(4) In considering the qualifications of applicants under subsections (1) and (2) of this section, responsible charge of forestry teaching in

a department, school, or college of forestry may be regarded as responsible charge of forestry work. The satisfactory completion of each year of an approved course in forestry in a ranger school or college of forestry shall be considered the equivalent of one (1) year of active practice.

Section 13. *Application and registration fees.*—Applications for registration shall be made on forms prescribed and furnished by the board; shall contain statements made under oath, showing among other things, the applicant's education and a detailed summary of his technical work, and shall contain not less than five (5) references, who possess professional qualifications necessary for such membership, and who have personal or professional knowledge of his forestry experience. The application fee for a certificate of registration as a registered forester shall be five dollars (\$5.00), which shall accompany the application. An additional fee of five dollars (\$5.00) shall be paid upon issuance of the certificate of registration. Should the applicant fail or refuse to remit the certificate fee within thirty (30) days after being notified in the usual manner that the applicant has successfully qualified, he shall forfeit the right to have the certificate so issued and said applicant may be required to again submit an original application fee therefor. Should the board deny the issuance of a certificate of registration to any applicant, the initial application fee deposited by the applicant shall be retained by the board.

Section 14. *Examinations.*—Examinations shall be held at such time and place as the board shall determine. The method of procedure for examinations shall be prescribed by the board and shall test the applicant's knowledge of natural sciences, mathematics, economics and principles of forestry, and his ability to conduct forestry practices as herein defined. A candidate failing an examination may apply for re-examination at the expiration of six (6) months and will be re-examined upon payment of an additional fee of five dollars (\$5.00).

Section 15. *Certificate.*—The board shall issue a certificate of registration upon payment of registration fee as provided for in this act to any applicant who has satisfactorily met all the requirements of this act. The certificate shall authorize the practice of forestry. Certificates of registration shall show the full name of the registrant, shall have a registration number, and shall be signed by the chairman and the secretary of the board under seal of the board. The issuance of a certificate of registration by the board shall be evidence that the person named therein is entitled to all rights and privileges of a registered forester, while the said certificate remains unrevoked or unexpired. Plans, maps, specifications, reports, and other instruments issued by a registrant shall be endorsed with his name and registration number.

Section 16. *Expiration and renewals.*—All certificates of registration shall expire on December 31 following their issuance or renewal and shall become invalid on that date unless renewed. The board shall, each year, fix the annual renewal fee for certificates of registration, which fee shall not exceed the sum of five dollars (\$5.00). Renewal of certificates of registration for the following year may be ef-

fectured at any time during the month of December of the year in which such certificate has been issued by the payment of the renewal fee so fixed by the board. Such certificates may be later renewed by the payment of an additional fee of fifty cents (\$.50) for each month, or fraction thereof, that payment of the fixed renewal fee is delayed beyond the month of December. The board, in its discretion, may make an exception in meritorious cases.

Section 17. *Reciprocity*.—A person not a resident and having no established place of business in Florida, or who has recently become a resident thereof, may use the title of registered forester provided:

(1) Such person is legally licensed as a registered forester in his own state or county, and has submitted evidence to the board that he is so licensed.

(2) The state or county in which he is so licensed observes these same rules of reciprocity in regard to persons licensed under the provisions of this act.

(3) That requirements for registration in his own state or county are comparable to those set forth in this act and acceptable to the board.

Section 18. *Revocations and re-issuance of certificates*.—The board shall have the power after notice and hearing to revoke, or to suspend for such period less than one (1) year as the board may determine, the certificate of registration of any registrant who is found guilty of violating the code of ethics adopted by the board, gross negligence, incompetency, or professional misconduct in the practice of forestry. The board is empowered to designate a person or persons to investigate and report to it upon any charges of fraud, deceit, gross negligence, incompetency, or professional misconduct in connection with any forestry practices against any registrant as may come to its attention. Any person preferring such charges against any registrant shall submit them in writing and under oath to the secretary of the board. All charges, unless dismissed by the board as unfounded and trivial, shall be heard by the board within three (3) months, where practicable, after the date on which they have been preferred, and the board shall dispose of them as speedily as is feasible. The time and place for said hearing shall be fixed by the board, and a copy of the charges, together with a notice of the time and place of hearing, shall be personally served on, or mailed by registered or certified mail to the last known address of, such registrant, at least thirty (30) days before the date fixed for the hearing. At any hearing, the accused registrant shall have the right to appear personally and by counsel, to cross-examine witnesses appearing against him, and to produce witnesses and evidence in his own defense. If, after such hearing, a majority of the board present votes in favor of finding the accused guilty, the board shall revoke or suspend the certificate of registration of such registered forester. The board, upon petition being filed by the applicant for restoration and hearing being held thereon, may reissue a certificate of registration to any person whose certificate has been revoked, or may restore the certificate of any person whose certificate has been

suspended, by vote of three (3) or more members of the board who favor such reissuance or restoration. A new certificate of registration, to replace any certificate revoked or suspended, may be issued subject to the rules of the board, and a charge of five dollars (\$5.00) made for such reissuance. A new certificate, to replace any certificate lost, destroyed, or mutilated, may be issued, subject to the rules of the board, and a charge of one dollar (\$1.00) made for such reissuance.

Section 19. *Violations.*—It is unlawful for any person to practice or offer to practice the profession of forestry as a registered forester in this state, without being registered in accordance with the provisions of this act; or to present or attempt to use as his own the certificate of another; or to give any false or forged evidence of any kind to the board or any member thereof in obtaining a certificate of registration; or to use or attempt to use in any manner an expired, revoked, or suspended certificate of registration; or to endorse any plan, specification, estimate, map or other instrument as a registered forester unless he shall have actually prepared such plan, specification, estimate, map or other instrument, or shall have been in actual responsible charge of the preparation thereof, or to violate any other provisions of this act. The board, or such person or persons as may be designated by the board to act in its stead, is empowered to prefer charges for any of the violations of this title in any court of any county of this state having jurisdiction. Nothing contained in this act shall be construed as preventing any landowner, lessee, or owner of any timber rights, whether as an individual, firm, partnership, or corporation from managing his own timberlands, woodlands, or forest, or from operating the removal of any products therefrom, in any lawful manner desired. It shall be the duty of all duly constituted officers of the law of this state, or any political subdivision thereof, to enforce the provisions of this act to prosecute any persons, firms, partnerships, or corporations violating the same, by using the title registered forester without being duly registered. The attorney general of the state shall act as legal advisor of the board and render such legal assistance as may be necessary in carrying out the provisions of this act. The board may, at its discretion, employ such other legal assistance as it may deem necessary.

Section 20. *Penalties.*—Any person, firm, partnership, or corporation violating any of the provisions of this act shall be guilty of a misdemeanor, and shall, upon conviction, be punished as for the commission of a misdemeanor.

Section 21. If any provision of this act shall be held unconstitutional, the same shall not apply to other provisions hereof.

Section 22. All laws or parts of laws, in conflict herewith are hereby repealed.

Approved by the Governor June 16, 1961.

Filed in Office Secretary of State June 16, 1961.

SOUTH CAROLINA LAW

An Act To Create The State Board Of Registration For Foresters And To Define Its Powers And Duties; To Provide For The Registration And Licensing Of Foresters; To Define The Practice Of Forestry; And To Provide Penalties For Violations Thereof.

Be it enacted by the General Assembly of the State of South Carolina:

SECTION 1. (a) No person shall use in connection with his name or otherwise assume, use or advertise any title or description tending directly or indirectly to convey the impression that he is a registered forester, without first having been licensed and registered as a registered forester as hereinafter provided.

(b) Except as hereinafter specifically authorized, no person shall engage in the practice of professional forestry as defined in this act, or in any manner advertise or hold himself out as engaged in such practice, without first being licensed as a registered forester under this act.

(c) Notwithstanding paragraph (b) or any other provision of this act, nothing herein shall be construed as preventing or prohibiting any person from managing or otherwise conducting forestry practices on land owned, leased, rented or held by such person; nor shall anything herein prohibit any regular employee or official or any person from engaging in professional or other forestry practices on lands owned, leased, rented or held by such person, nor shall anything herein prohibit any person from practicing forestry under supervision as hereinafter authorized, so as to qualify for licensing as provided in Section 12 of this act; also, notwithstanding the provisions of Subsections (a) and (b) of Section 1 of this act, any landowner or person in possession of lands in this State under lease may employ any person whom he may desire for services relating to forestry such as consultation, evaluation, protection, measurements or determining the number of board feet in trees located or situated upon the land whether such person be a registered forester or not; also, notwithstanding paragraph (b), Section 1, or any other provision of this act, nothing herein shall be construed as preventing or prohibiting professional employees of public agricultural agencies from rendering forestry information, education, demonstration and conservation planning in line of duty; *provided* that such employees do not represent themselves to be professional foresters unless properly licensed or registered under the provisions of this act.

(d) It is the purpose of this act to protect the public by improving the standards relative to the practice of professional forestry and the provisions of this act shall apply to State Foresters.

(e) Nothing herein provided shall prohibit any forestry work by unlicensed persons working under the supervision of a registered forester.

SECTION 2. (a) "Registered forester" shall mean a person who has registered and qualified under this act to engage in professional forestry practices as hereinafter defined.

(b) "Forestry" or "practice of forestry" shall mean any professional service relating to forestry, such as consultation, investigation, evaluation, planning or responsible supervision of forest management, protection, silviculture, measurements, utilization, economics, education, or other forestry activities in connection with any public or private lands.

(c) "Board" shall mean the State Board of Registration for Foresters, provided for by this act.

SECTION 3. A State Board of Registration for Foresters is hereby created whose duty it shall be to administer the provisions of this act. The board shall consist of five foresters, who shall be appointed by the Governor of South Carolina from among ten nominees recommended by the Foresters Council of South Carolina and who shall have the qualifications required by Section 4 of this act. Each member of the board shall be commissioned by the Governor and, before beginning his term of office, shall file with the Secretary of State his written oath of affirmation for the faithful discharge of his official duty. The five members of the initial board will be appointed for terms of one, two, three, four and five years, respectively, such terms beginning on the first day of the first month following the effective date of this act. On the expiration of the term of any member of the initial board, three nominees recommended by the Foresters Council of South Carolina shall be submitted to the Governor from which he shall appoint for a term of five years a registered forester having the qualifications required by Section 4 of this act to take the place of the member whose term on the board is expiring. Any vacancy occurring for a reason other than the expiration of office shall be filled by the Governor from three nominees recommended by the Foresters Council of South Carolina to fill the unexpired term of such member. If the Governor fails to make appointment in ninety days after expiration of any term, the board shall make the necessary appointment. Each member shall hold office until the expiration of the term for which such member is appointed or until a successor shall have been duly appointed and shall have qualified.

SECTION 4. Each member of the board shall be a citizen of the United States and a resident of South Carolina and shall have been engaged in the practice of forestry for at least ten years.

SECTION 5. Every member of the board shall receive a per diem allowance when actually attending to the work of the board or any of its committees and for the time spent in necessary travel and, in addition thereto, shall be reimbursed for all actual traveling, incidental and clerical expenses necessarily incurred in carrying out the provisions of this act.

SECTION 6. The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty.

SECTION 7. The original members of the board shall be named and appointed by the Governor within thirty days after the passage of this act. The board shall hold a meeting within thirty days after its members are first appointed, elect its officers, and thereafter shall

hold at least two regular meetings each year. Special meetings shall be held at such time and place as the bylaws of the board may provide. Notice of all meetings shall be given in such manner as the bylaws may provide. The board shall elect or appoint annually the following officers: a chairman, a vice-chairman, and a secretary.

SECTION 8. The secretary of the board shall give a surety bond to the State in such sum as the board may determine. The premium on such bond shall be regarded as a proper and necessary expense of the board and shall be paid out of the fund of the Board of Registration for Foresters. The secretary shall receive such salary as the board shall determine in addition to the expenses provided for in Section 5 of this act.

SECTION 9. The board shall have the power to adopt and amend all bylaws and rules of procedure, not inconsistent with the Constitution and laws of this State, which may be reasonably necessary for the proper performance of its duties and the regulation of the proceedings before it. The board shall adopt and have an official seal. In carrying into effect the provisions of this act, the board may, under the hand of its chairman and seal of the board, subpoena witnesses and compel their attendance and may also require the production of books, papers, and documents in a case involving the revocation of a license or practicing or offering to practice without a license under the title of registered forester. Any member of the board may administer oaths or affirmations to witnesses appearing before the board. Such witnesses officially called by the board shall receive the same compensation and shall be reimbursed for expenses as is provided for witnesses in the court of common pleas in the county in which this board may sit.

SECTION 10. The board shall keep a record of its proceedings and a register of all applications for registration, which register shall show: the name, age, and residence of each applicant; the date of the application; the place of business of such applicant; his educational and other qualifications; whether or not an examination was required; whether the application was rejected; whether a license was granted; the date of the action of the board; and such other information as may be deemed necessary by the board. The records of the board shall be prima facie evidence of the proceedings of the board set forth therein, and a transcript thereof duly certified by the secretary of the board under seal shall have the same force and effect as if the original were produced. Annually, as of June thirtieth, the board shall submit to the Governor a report of its transactions of the preceding year.

SECTION 11. A roster, showing the names and places of business of all registered foresters qualified according to the provisions of this act, shall be prepared by the secretary of the board during the month of July of each year. Copies of this roster shall be mailed to each person so registered, placed on file with the Secretary of State, and furnished to the public on request.

SECTION 12. The following shall be considered as minimum evidence satisfactory to the board that the applicant is qualified for a registration as a registered forester :

(1) Graduation from a curriculum in forestry of four years or more in a department, school or college approved by the board, and a specific record of an additional two years' or more experience in forestry of a character satisfactory to the board, and indicating that the applicant is competent to practice forestry ; or

(2) Successfully passing a written examination designed to show knowledge and skill approximating that obtained through graduation from an approved four-year curriculum in forestry, and a specific record of six years or more of practice in forestry of a character satisfactory to the board, and indicating that the applicant is competent to practice forestry.

(3) Any person who, on the effective date of this act, shall have been engaged in the practice of forestry as defined in Section 2 of this act, for at least eight years, shall be eligible for registration as a registered forester without reference to the requirements set forth in Items (1) and (2) of this section, provided that he file application for registration with the board within six months from the effective date of this act, or the organization of the board. The board shall issue licenses only to those applicants who meet the requirements of this section. *Provided*, that no person shall be eligible for registration as a registered forester who is not of good character and reputation. The completion of the junior year of a curriculum in forestry in a school or college approved by the board shall be considered as equivalent to two years of practice ; the completion of the senior year of a curriculum in forestry, without graduation, in a school or college approved by the board shall be considered as equivalent to three years of practice.

SECTION 13. Applicants for registration shall make application on forms prescribed and furnished by the board. The applications shall contain statements made under oath showing the applicant's education and a detailed summary of his technical work and shall include not less than five references, of whom three or more shall be foresters having personal or professional knowledge of his forestry experience. The registration fee for a license as a registered forester shall be fifteen dollars, ten dollars of which shall accompany the application, the remaining five dollars of which is to be paid upon issuance of license. Should the applicant fail or refuse to remit the remaining five dollars within thirty days after being notified that he has successfully qualified, the applicant shall forfeit the right to have a license issued and the applicant may be required to again submit an original application and pay an original fee therefor. Should the board deny the issuance of a license to any applicant, the initial fee deposited shall be retained by the board as an application fee.

SECTION 14. The secretary of the board shall receive and account for all moneys derived under the provisions of this act and shall pay them to the State Treasurer, who shall keep such moneys in a separate fund to be known as the fund of the State Board of Registration for Foresters. Such fund shall be kept separate and apart from all other

moneys in the State Treasury and shall be paid out only by warrants regularly drawn by the chairman and secretary of the board. All moneys in the fund of the State Board of Registration for Foresters are hereby specifically appropriated for the use of the board. Under no circumstances shall the total amount of warrants issued by the Comptroller General in payment of the expenses and compensation provided for in this act exceed the amount of the examination, registration and renewal fees collected as herein provided.

SECTION 15. When written examinations are required, they shall be held at such time and place as the board shall determine. The methods of procedure shall be prescribed by the board. A candidate failing on examination may apply for re-examination at the expiration of six months and will be re-examined without payment of an additional fee. Subsequent examination will be granted upon payment of a fee to be determined by the board.

SECTION 16. The board shall issue a license upon payment of a registration fee as provided for in this act to any applicant who, in the opinion of the board, has satisfactorily met all of the requirements of this act. Licenses shall show the full name of the registrant, shall have a serial number and shall be signed by the chairman and the secretary of the board under seal of the board. The issuance of a license by the board shall be evidence that the registrant is entitled to all the rights and privileges of a registered forester while his license remains unrevoked or unexpired. Plans, maps, specifications and reports issued by a registrant shall be endorsed with his name and license number and it shall be a misdemeanor for anyone to endorse any documents after his license has expired or has been revoked. It shall be a misdemeanor for any registered forester to endorse any plan, specification, estimate, or map unless he shall have actually prepared such plan, specification, estimate, or map or shall have been in actual charge of the preparation thereof.

SECTION 17. Licenses shall expire on the last day of the month of June following their issuance or renewal and shall become invalid on that date unless renewed. It shall be the duty of the secretary of the board of notify, at his last registered address, every person registered under this act, of the date of the expiration of his license and the amount of the fee that shall be required for its renewal for one year. Such notice shall be mailed at least one month in advance of the date of the expiration of such license. The board shall, each year, prior to issuing notices for the ensuing year, fix the annual renewal fee for licenses, which fee shall not exceed the sum of ten dollars. Renewal of licenses for the following year may be effected at any time during the month of June of the year in which such license has been issued or renewed by the payment of the renewal fee so fixed by the board. Such licenses may also be renewed during the ensuing ten months by the payment of an additional fee of fifty cents for each month or fraction thereof that payment of the fixed renewal fee is delayed beyond the month of June. The board shall make an exception to the foregoing renewal provisions in the case of a person who is in the armed services of the United States.

SECTION 18. Registration shall be determined upon a basis of individual personal qualifications. No firm, company, partnership, or corporation shall be licensed.

SECTION 19. Any person of good moral character licensed to practice forestry by any other state or country whose requirements are commensurate with the requirements of this State may, upon payment of fifteen dollars, be registered and licensed to practice forestry in this State, with renewal privileges as set forth in Section 17 of this act.

SECTION 20. The board shall have the power to revoke the license of any registrant who is found guilty by the board of gross negligence, incompetency, or misconduct in the practice of forestry. The board is empowered to designate a person or persons to investigate and report to it upon any charges of fraud, deceit, gross negligence, incompetency or other misconduct in connection with any forestry practice against any registrant, as may come to its attention. Any person may prefer charges of fraud, deceit, gross negligence, incompetency or misconduct in connection with any forestry practice, against any registrant. Such charges shall be in writing, shall be sworn to by the person making them and shall be filed with the secretary of the board. All charges, unless dismissed by the board as unfounded or trivial, shall be heard by the board within three months after the date on which they shall have been preferred. The time and place for the hearing shall be fixed by the board, and a copy of the charges, together with a notice of the time and place of the hearing, shall be personally served on, or mailed to the last known address of such registrant, at least thirty days before the date fixed for the hearing. At any hearing, the accused registrant shall have the right to appear personally and by counsel, to cross-examine witnesses appearing against him, and to produce evidence and witnesses in his own defense. If, after such hearing, the boards finds the accused guilty, the board shall revoke the license of such registered forester. Any applicant whose license has been revoked may apply for a review of the proceedings with reference to such revocation of his license in the circuit courts of this State. Such review shall be upon the record made before the board. Petition for review of this act of the board shall be served upon the board within ten days from the date of the service of the order or decision of the board upon such person. Upon service upon it of a petition for review, the board shall within fifteen days certify the record made before it to the clerk of the circuit court. The board, for reasons it may deem sufficient, may reissue a license to any person whose license has been revoked. A new license to replace any license revoked, lost, destroyed, or mutilated, may be issued, subject to the rules of the board. A charge of three dollars shall be made for such issuance.

SECTION 21. Any person violating the provisions of this act shall be deemed guilty of a misdemeanor and, upon conviction, shall be fined or imprisoned in the discretion of the court.

SECTION 22. All acts or parts of acts inconsistent herewith are repealed.

SECTION 23. This act shall take effect upon approval by the Governor.

In the Senate House the 18th day of May.

In the Year of Our Lord One Thousand Nine Hundred and Sixty-One.

EDGAR A. BROWN,
President Pro Tempore of the Senate.

SOLOMON BLATT,
Speaker of the House of Representatives

Approved the 23rd day of May, 1961.

ERNEST F. HOLLINGS,
Governor.

**SOUTH CAROLINA STATE BOARD OF REGISTRATION FOR FORESTERS
BYLAWS, REGULATIONS AND PROCEDURES OF THE SOUTH
CAROLINA STATE BOARD OF REGISTRATION FOR FOR-
ESTERS AS ADOPTED NOVEMBER 17, 1961, AND AMENDED
TO DATE SHOWN ON LAST SHEET.**

Pursuant to the powers granted in the Act approved May 23, 1961, the South Carolina State Board of Registration for Foresters hereby adopts the following rules, regulations and procedures for the furtherance of the Act:

1. **Headquarters:** William J. Barker, Clemson College, Clemson, South Carolina, or
2. **Officers:** The Board will elect officers each year at the regular summer meeting to serve for one year commencing at the following regular winter meeting (Section 7). The following officers will be elected:
 - a. **Chairman**—Whose duties shall be:
 - (1) To preside at meetings of the Board.
 - (2) To appoint all committees.
 - (3) To sign all certificates and other official documents.
 - (4) To call special meetings as required.
 - (5) To submit to the Governor, as of June 30, each year, a report of the Board transactions for the preceding year.
 - (6) To notify all other State Boards of Registration for Foresters of the reciprocity provision of the Act (Section 19).
 - (7) With Secretary, sign all warrants to pay for legal expenses of Board (Section 14).
 - (8) Perform all duties pertaining to the office of the Chairman.
 - b. **Vice Chairman**—Whose duties shall be:
 - (1) To perform duties of the Chairman during his absence.
 - (2) To publicize action, policy, purpose and principles of the Board.
 - c. **Secretary**—Whose duties shall be:
 - (1) To give a surety bond to the State in amount of \$3,000.00, premium to be paid for out of the fund of the Board (Section 8).

- (2) Receive and account for all money (Section 14).
 - (3) With Chairman sign warrants.
 - (4) To conduct and care for all correspondence in the name of the Board.
 - (5) To keep a record of the proceedings of the Board (Section 10).
 - (6) To keep a record of filing of applications for licenses and all other evidence of qualifications, including examination papers and other pertinent documents submitted by each applicant and an official register of all Certificates of Registration and of renewals.
 - (7) To give notice in writing of the expiration of any license to the holder thereof and keep the Register up to date (Section 17).
 - (8) A roster will be prepared during the month of July each year, showing names and places of business of all registered foresters. Copies will be mailed to each registrant and it will be placed on file with the Secretary of State (Section 11).
 - (9) To attest all Certificates of Registration.
 - (10) To notify members of meetings.
 - (11) Any other duties required by law or that may be assigned by the Board.
3. *Meetings:* Regular meetings of the Board for examining applicants or reviewing applications, and for other business will be held in Columbia in July and January if practical on dates designated by the Chairman.
Special meetings of the Board will be called by the Chairman by giving ten (10) days notice of the meeting to members.
4. *Quorum:* Three (3) members of the Board shall constitute a quorum but no action may be taken without three (3) votes in accord.
5. *Seals:* The Seal of the Board was adopted at the meeting on October 13, 1961. It shall be used on all official papers, registration certificates and other formal documents of the Board.
Each registered forester may use an impression seal or stamp on his plans, maps, specifications and reports. The seal shall be circular, 1 and $\frac{5}{8}$ inches in diameter and the stamp shall be 1 and $\frac{3}{4}$ inches in diameter both of which are standard size.
6. *Committees:* The Chairman shall appoint committees as needed by the Board (Section 9).
7. *Application for Registration:* (Section 13) Requests for registration will be made to the Secretary, State Board of Registration for Foresters, Clemson College, Clemson, South Carolina. Application forms will be supplied upon request.
Applicants shall supply all information requested on the forms or otherwise required and must execute the form. In each case, the applicant must provide unequivocal proof that he meets requirements for registration. Failure to follow the instructions will necessitate rejection of the application or its return for completion.

Fee for registration will be \$15.00 (Section 13). Applications will be accompanied by check or money order in amount of \$10.00 and the remaining \$5.00 will be paid within 30 days after being notified that he has successfully qualified. Failure to pay the \$5.00 (second payment) within thirty (30) days may require the applicant to reapply in which case the original fee (\$10.00) will be forfeited and a second payment of \$10.00 must accompany the second application.

8. *Requirements for Registration:* (Section 12) (1) (2) (3) will, with other provisions of the Act, completely govern actions of the Board in considering each application. Specific rulings and interpretations will be added to those listed below as the need for them arises.

Section 12 (1) :

Schools accredited by the Society of American Foresters will automatically be accepted by the Board. Other schools will be considered as they come up.

Two or more years experience must be subsequent to date of receiving degree in Forestry except in unusual circumstances as approved by the Board.

Section 12 (2) :

The passing grade on all written examinations shall be 70%.

Section 12 (3) :

Time limit for applying under this section is hereby set as May 17, 1962.

At least 8 years experience in the practice of forestry shall mean professional services relating to forestry (Section 2, b).

The Board will consider each applicant on the basis of his qualifications as they meet requirements of the Act.

9. *Expiration and Renewal:* (Section 17) Licenses shall expire on the last day of June, each year, and shall become invalid on that date unless renewed. At least one month prior to expiration date of any license, the Secretary will notify each registrant of the date of expiration of his license and the fee required for its renewal for one year. The annual renewal fee until changed by the board is hereby set at \$5.00. Renewal payment must be made during the month of June each year or within the ensuing 10 months by payment of an additional fee of 50¢ for each month or fraction thereof beyond the month of June. The Board will make an exception to the foregoing renewal provisions in the case of a person who is in the Armed Services of the United States.

10. Registration will be determined on a basis of individual, personal qualifications and no firm, company, partnership, or corporation shall be licensed. (Section 18).

11. *Reciprocity (Section 19):* Any person of good moral character licensed to practice forestry by any other state or country whose requirements are commensurate with the requirements of this state may upon payment of \$15.00 fee, be registered to practice forestry in this state.

Any applicant, a resident of another state who wishes to be registered in South Carolina must first be registered in the State of residence provided there is a State Board of Registration in that State except in unusual cases as determined by unanimous consent of the Board.

12. *Information:* All correspondence regarding registration should be addressed to Mr. William J. Barker, Secretary, State Board for Registration for Foresters, Clemson College, Clemson, South Carolina.
13. *Statement of Guiding Definitions:* The following definitions will guide the Board in evaluating applications for a license as Registered Forester. For other forestry definitions the Board will be guided by FORESTRY TERMINOLOGY, published by Society of American Foresters.
 - a. Professional—Webster Unabridged:
“The occupation, if not purely commercial, mechanical, agricultural or the like, to which one devotes oneself; a calling in which one professes to have acquired some special knowledge used by way of instructing, guiding, or advising others or of serving them in some art.”
 - b. Forestry—SAF “FOREST TERMINOLOGY”
“The scientific management of forests for the continuous production of goods and services.”
 - c. Forestry—Webster Unabridged:
“The science and art of forming, caring for or cultivating forests; the management of growing timber.”
 - d. Forester—SAF “FOREST TERMINOLOGY”
“A person who has been professionally educated in forestry or who possess qualifications for the practice of forestry essentially equivalent to graduation from a recognized school of forestry.”
 - e. Forester—Webster Unabridged:
“A person who is trained in forestry, especially one in charge of public or private forests or charged with the promotion of the interests of forestry.”
14. *Activities:* (services) which are not considered by the Board to be qualifying under Section 2(b) of the Act.
 - a. Marking timber as a member of a crew without responsibility for determination of objectives, volumes, values or other purposes for which the timber is being marked is not considered professional forestry service.
 - b. Business managers, administrators, plant managers and accountants are not considered to be engaged in professional forestry service unless such a person is responsible for the application and practice of forest management and forest economics.
 - c. Sealing of forest products is not considered to be professional forestry service. Measurement in terms of forestry is defined as the science of the measurement of volume, growth and development of individual trees and stands and the determination of various products obtainable from them.

- d. Management of woodyards, and the duties incident thereto, is not considered to be professional forestry service or responsible supervision of the forestry specialties enumerated in the Act.
 - e. Cutting, hauling, loading, storing and processing forest products are not considered professional forestry services.
 - f. Forest protection for purpose of professional forestry service will be limited to those persons specializing in the formulation of plans and programs and the administration of all activities concerned with the prevention and control of damage to forests from fire, insects, disease, or other injurious and destructive agencies. Forest workers or forest fire fighters including tractor plow operators, fire or crew bosses, dispatchers, lookouts, scouts, crewforemen, forest pest control workers, and the like, will not be considered as serving in a professional capacity.
 - g. Silvicultural practices such as reforestation and timber stand improvement will not be considered professional services unless the applicant has responsibility of technical determinations and not just physical labor involved in applying the practice.
 - h. The buying and selling of woodlands, or the products therefor, shall not be considered professional forestry services unless such dealer, broker or real estate operator shall also be actively engaged in forest management and such operations are part of the forest management function.
 - i. Compassmen and tallymen in timber cruising parties are not considered to be performing professional forestry services.
15. *Training and Apprenticeship Periods:* It is the consensus of the Board that an applicant cannot initially transfer from unrelated activity to a forestry activity and be immediately qualified to perform professional forestry services. A substantial period (at least one year) of education, training and apprenticeship is considered to be a prerequisite.

With Amendments to August 24, 1962

ENGINEERING GEOLOGISTS

ENGINEERING GEOLOGISTS

SENATE BILL 1349

Senate Bill 1349 was introduced at the 1963 session of the Legislature and referred to the Senate Factfinding Committee on Business and Commerce for interim study. The bill sets up a registration for the field of engineering geology and regulates its operations. It also increases the membership on the board of Civil Professional Engineers to provide for a place on said board by an engineering geologist. In addition, the term "engineering geology" is defined, and the educational and experience qualifications are set forth, along with an examination procedure. Under the proposed bill, a registrant will be required to have either a graduate degree in geology, or its equivalent where no such degree was given, or seven years of professional geological experience, in order to qualify.

A hearing on the bill was held in Sacramento on April 7, 1964. At the present time the County of Los Angeles, the County of Orange, and the City of Los Angeles have local ordinances dealing with the registration for engineering geologists. These county and city jurisdictions passed these ordinances because of the necessity to secure competent data on building sites. It was felt that some of the building fiascos could have been avoided had there been competent engineering geology surveys, and had geologists advised the contractors before construction started. The proponents contend that more and more hillside land is being developed, and landslides and earth movements could be prevented with the proper geological information that engineering geologists could supply.

The primary opposition to the bill comes from those geologists who are practicing in other specialties, and principally from those in the petroleum industry. Hearing testimony and correspondence both indicate that these professionals feel the definition in the proposed bill to be restrictive. They feel that it might have the effect of preventing them from practicing in their chosen fields. It was apparent during the hearing that there might not be an enmity of feeling if a bill were drafted that would incorporate all fields of geology and provide for registration of all geologists. There have been meetings with the various groupings and societies in this field in an effort to resolve their differences, but thus far no answer has been formulated.

The local ordinances in Southern California were adopted as an outgrowth of a requirement that written specifications and geological studies be presented to these governmental jurisdictions before a building permit would be issued. After some of the early reports were studied, it became apparent that these had been prepared by people who did not have the necessary background and experience in this type of work. Because of this, it was necessary for the Los Angeles County Board of Supervisors to pass an ordinance establishing the Los Angeles County Engineering Geologists Qualifications Board. This provides that the board establish minimum standards of experience

and training for the qualification of engineering geologists, that the board examine and evaluate candidates applying for certification, and issue the appropriate certification to those found properly qualified. The board also acts as a board of review for the interpretation of data opinions and conclusions contained in the reports.

Committee staff investigation discovered that the registration requirements of the three political subdivisions overlap in some aspects, with resulting problems. Certain geologists are certified and have passed the requirements in one area, and some of these have been unable to secure registration in another area.

The question concerning the work of an engineering geologist and the limits of his field was answered by a statement from John A. Lambie, the Los Angeles County Engineer, presented by Harvey T. Brandt, the Chief Deputy County Engineer of Los Angeles:

"Although engineering geology is a branch of the geological sciences, it is noteworthy that the somewhat unique professional responsibilities of the engineering geologist make it necessary to define the scope of his work separately. Engineering geology may be defined as the application of geologic knowledge, principles, and techniques in the observation and evaluation of the influence of earth materials in the planning, construction, and maintenance of earth slopes and engineering structures. In the application of this knowledge and these principles and techniques, the engineering geologist is primarily a geologist. However, to make his work effective, he must think like an engineer and translate this geologic knowledge into terms an engineer can use for the design of structures. For this reason, registration as an engineering geologist should include requirements for a substantial working knowledge of civil engineering soil mechanics."

The influx of people into southern California has created a critical situation with respect to use of available land for homesites. While this problem is crucial in the Los Angeles metropolitan area, it is apparent that the San Francisco Bay area is beginning to feel the same acute pains that are now being experienced in a more dramatic fashion in southern California. The testimony of Harvey Brandt on this particular aspect of the problem was enlightening:

"The continuing utilization of marginal land and hillside areas for building construction sites, not only in Los Angeles and adjacent counties but throughout the state, requires proper building procedures and soil evaluation methods in order to insure that structures will be built on stable foundation material. These procedures cover many potential landslide areas, unstable soil, soil compaction, erosion control, grading and excavating, and drainage control."

Mr. Brandt's testimony with respect to the hillside areas in the Los Angeles area sharpened the focus on the problems:

"On the hundreds of acres of hillside areas remaining undeveloped in Los Angeles County, many present such serious geologic problems that building construction must be prevented. When conditions warrant, the county engineer requires plans to be sub-

mitted. In checking grading plans, particular attention is given to compliance with the engineering geologist's recommendations, methods of compaction, slopes of banks, drainage devices, and proper erosion control methods. Sewage and sewage disposal facilities, both on the property directly concerned and on nearby properties, need careful consideration because the accumulation of subsurface drainage water, for example, from private disposal facilities may cause subsidence or slippage of surface soil."

Additional testimony indicated a great need for better geologic maps, which would provide basic knowledge for the public engineering staffs, and facilitate careful planning for future expansion and/or development. Existing maps are for the most part of little use for engineering purposes, since they largely emphasize mineral economics or academic geology. They are on too small a scale, and do not have sufficient detail regarding geologic structure, landslides, and the distribution and engineering properties of the soil and rock units, as Mr. Brandt carefully noted.

Since 1960, the Los Angeles County Board of Supervisors, in cooperation with the United States Geological Survey Department and the California State Division of Mines and Geology, has been engaged in a geological mapping program. The results to date of this survey have shown that home construction is not feasible and should be prevented in what might be regarded as some highly desirable living areas. Mr. Brandt stated that on the coastal 10 square miles of the Malibu Beach area there are 83 existing landslides, some of which are presently active; 30 of these are greater than five acres in area, and one is approximately 1,500 feet wide and one-half mile in length. The San Gabriel Mountains has a slide with an area of two square miles. A study of the Palos Verdes area indicated 150 landslides. Each of these areas would be otherwise regarded as choice residential property, and construction in these localities would have led to complications and serious problems had the mapping program not been underway. When the survey is completed, these maps will be available to the public, engineers, subdividers, etc., so that the best use can be made of the available lands for expansion in the area.

Mr. Brandt gave it as his opinion that the problems were sufficiently great to preclude viewing this question as a local matter, and that it could best be resolved through state registration and regulation. In his view, the provisions of the proposed bill will assist the people of California in developing hillside and marginal areas, by assuring the existence of a competent system of qualified engineering geologists. Mr. Brandt foresees a further advantage in that all professionals engaged in this type of work will thereby attain an equality of status:

"The complexity and economic significance of hillside development work requires the cooperative evaluation exchange of data between the design engineer, soils engineer, and the engineering geologist. The highest level of cooperation can be obtained when the three groups are of equal professional status."

He pointed out that more and more of the "flatland" and favorable hillside areas have been developed with the coming of additional millions of people to California. Developers are now looking to all land,

no matter how rugged or marginal, for improvement as building sites. For the safety and welfare of the citizens, this development will require the most careful control and evaluation by highly qualified engineering geologists. Mr. Brandt concluded his testimony by remarking that certification and regulation of engineering geologists can be more efficiently and effectively handled at the State level.

Mr. H. R. Taber, President of the Association of Engineering Geologists, represented his organization at the hearing and testified in favor of the bill. Mr. Taber stated that his organization represented 270 practicing geologists in the State of California. It was their feeling that conditions in the southern California area particularly have demonstrated the need for registration and for adequate reports. It was their opinion that local regulation would not be as good as statewide regulation.

Testimony by Mr. Martin Van Couvering, who spoke on behalf of the American Institute of Professional Geologists, brought out the differences of opinion between the various organizations and the clash in viewpoints. He stated, in part:

"The attitude of most of the geologists in the State has been against registration until fairly recently. In fact, until the State came up against the problems they are now concerned with and if you had taken a ballot a year ago or so you would find an overwhelming vote against registration but we don't believe in division within the geological profession, particularly by the exclusion of some geologists. We feel content and so our opposition here is based upon this matter of division, not upon the problem of the engineering geologist."

During the testimony at the hearing, the various phases of geology were alluded to, but never specified. This was brought up and covered when the chairman asked Mr. Van Couvering some questions.

Senator Short: "Mr. Van Couvering, are there two different types of geologists?"

Mr. Van Couvering: "Largely through experience, I mean in geology, there isn't much difference until someone graduates and goes out into the field. When you go out you find yourself employed in the mining end of it or a job in petroleum or whatever it may be and you have got to do the thing that comes along. Then you just naturally get into a group, more or less, and begin to specialize but we can't all do the same thing."

Senator Short: "Would you say that there are three types of geology? I have heard the term engineering and then you mentioned mining and petroleum."

Mr. Van Couvering: "Many more than that. There are marine geologists and oh, I won't try to go into them now but I am sure that if I had time and a pencil and a paper I could probably give you 20 different categories of geologists."

Senator Short: "You have indicated that the basic educations are the same or similar in all cases."

Mr. Van Couvering: "Yes."

Senator Short: "After the education then you specialize?"

Mr. Van Couvering: "Yes."

Senator Short: "Specialize to what extent? If you wanted a degree, a higher degree, such as to become a petroleum geologist, is there a particular course that would lead to a master's or a doctor's degree that you know of, that is a higher degree?"

Mr. Van Couvering: "No, but there is naturally such a tendency because, as you know, in one line and another it isn't a question of school degrees, it is a question of much more than that, of what kind of work you are engaged in. Now, as to these differences, if you wish to I will be glad to write you and say what they do and what they are."

There was further discussion, pro and con, on the divisions within the geological profession. Senator Backstrand clarified the matter as follows:

Senator Backstrand: "In order to summarize and make the comparison, it is like a person going to medical school. They have principally the same background, physiology and so forth, and after they graduate they then drift into various specialties that concerns the medical profession."

Mr. Van Couvering: "That's an excellent analysis."

The testimony of Peter Gester, Chairman of the San Joaquin Geological Society Legislative Committee, again referred to the opposition by geological groups, which is predicated mainly on the problems raised by a possible division within the profession.

The San Joaquin Geological Society is headquartered in Bakersfield and has 219 members. The membership is composed primarily of geologists in the petroleum industry, but does include some in the mining, engineering, and groundwater fields, as well as teachers and government employees. This group felt that the passage of SB 1349 could and would have the effect of depriving people already in these specialized fields of the right to practice in their chosen specialty. The testimony and presentation indicated that this would decrease the stature now held by geologists in the fields of petroleum, mining, paleontology, and geophysics. As a substitute, the society submitted a proposed bill which would register all geologists and provide for the method of registration and for the administration of the act. Basically, this bill would set up a separate bureau within the Department of Professional and Vocational Standards, for the sole purpose of registering and regulating the geological profession. In this and other respects this would differ from SB 1349, which places the engineering geologists under the Board of Professional Engineers.

The testimony of Mr. Gester and the San Joaquin Geological Society was supported by John E. Kilkenny, president of the American Association of Petroleum Geologists, Pacific Section. This group has a membership of 15,000, including an active membership of 1,050 in California, and Mr. Kilkenny felt that they represented the largest single group of geologists in the state. He testified as follows:

"Our group opposes this bill because we feel that it will fragment the profession of geology. Secondly, there are many of our members who practice petroleum geology part time and engage in the field of engineering geology. A number of them are licensed

under the various cities and counties of southern California, but they would not be permitted to practice under the Senate Bill 1349 if that becomes a law."

He stated, in effect, that his association supported registration, but not as outlined in SB 1349.

"We believe it is to the best interest of the people of California that a bill be passed, but we feel that it should be an overall bill that would encompass all geologists and take care of the provisions that the engineering geologists want. For the benefit of the public we feel that the bill should include all geologists and there should not be a specialization of the engineering geologists as opposed to an overall bill."

Senator Gibson interjected the question of control initiated by the state:

Senator Gibson: "Do you believe you would like to come under provisions of an act here where the government supervises and gives examinations and controls your whole being, you might say, from here on in? Would you like to be free from the government? After all, there is one basic thing as far as the state licensing people in the State of California, it is the interest of the public. If there is none, we have no right whatsoever to act."

Mr. Kilkenny: "I appreciate your statement. I think that most geologists would rather be free, but a feeling of most of our members right now is that the profession is coming under a certain amount of abuse, and we feel that it would benefit the public to have a law that would regulate us. We hope not too severely, so that it wouldn't destroy our freedom, but yet we want it to serve the purpose."

Mr. Kilkenny was questioned by the various committee members as to the application of any such law and how the categories would be handled.

Senator Gibson: "Will you please attempt to glean out the categories that you would need after you once get licensed?"

Mr. Kilkenny: "Well, I think personally it should be as simple as possible. I feel that a geologist should be licensed and then live up to their code of ethics."

Senator Gibson: "Well, how do you think it should be established to have the best protection of the public?"

Mr. Kilkenny: "Well, I believe the present engineering bill would be a guide. As to how regulation would be necessary, we have different kinds of engineers, civil, electrical and so on."

Senator Pittman: "Thank you very much."

Additional testimony on the aspects of the bill was given by Mr. Arthur Spaulding, who is a member of the American Institute of Professional Geologists, the American Association of Petroleum Geologists, the American Institute of Mining Engineers and the Society of Petroleum Engineers. His organization was objecting to the bill that was introduced, SB 1349, as such. His testimony indicated that they were not opposed to regulation.

Senator Pittman: "Let me ask you this: Is it your desire to participate in licensing or registration, as it may be? Could that be stimulated from the desire to do this on your own, or is it stimulated because of the action of other people wanting to be?"

Mr. Spaulding: "I think both."

Senator Pittman: "You are all going to have to get together."

Mr. Spaulding: "This is a part of the proposal, to combine with the Association of Geologists, and, in fact, we do have an offer to these people to join with us on our committees so that we can prepare legislation which would be reasonable to all geologists, but my interest has been stimulated by both my individual reasons and also by my associates'."

Senator Backstrand: "I think what we have to keep in mind is that as legislators we are not in the business of trying to protect a particular profession against others that might want to encroach in that profession. I mean, in your order of the present enterprise system, this is taken care of in the marketplace. However, we are in the business of trying to protect the public. I believe this is particularly what Senator Gibson has in mind. I think most of us who have been around here for some time have seen occasions where a particular group would wish to be licensed or accredited or registered, or that they have something up on the competitors so that they can have inter-road into the inter sanctorum with their customers, and then they would end up and sooner or later they end up in a situation where they keep increasing the standards and increasing the standards to where eventually they want to keep competition out."

The question of how a new agency would be supported became quite apparent in discussing the fee schedule with the various witnesses. The number of potential licensees ranges from a low of 270 to a high of 1,200. The board budget was not worked out and information had to be gleaned from the Department of Professional and Vocational Standards as to the operation of a typical agency of this size. In questioning and discussion by the committee:

Senator Pittman: "We were talking this morning, something along this line about a \$25 fee. Our Chairman, Senator Short, just arrived. We were now talking about the number of people and the fees we pay, Senator."

Senator Short: "Well, as I mentioned this morning, it has been our experience that on these boards, commissions and bureaus, that they first set up a yearly fee at rock bottom and then they are back the next year and the next year and the next and the next asking for more because it does cost money. It costs money to support members of the board, it costs money for secretarial services, it costs money for—because you want to have the Attorney General or one of his deputies, and all this is chargeable to the organization. We have had an association this morning, where possible 500 licensed members were to set up their own board at \$25 a year. Well, they are so far off base that they haven't even begun. But we as members of the Committee, would like you to do is to get a balance sheet of what it will cost to administer the num-

ber of people that you expect to license, with some kind of projection for the future."

One of the witnesses indicated that this was the reason that they were trying to become a part of the Professional Engineers Board. It seems apparent from the witnesses, aside from the Association of Engineering Geologists, that it would be impractical to set up another agency in the Board of Civil Engineers. The sole unqualified opposition to SB 1349 and the licensing of geologists came from the California Legislative Council of Professional Engineers, which represents 18 member organizations. Their organization was represented by Mr. Donald R. Wright, secretary of the association. Their position is as follows:

"After careful consideration of the proposed measure our committee report and our official position indicates that this proposed legislation would infringe upon the Civil Engineers Act, and that it is difficult to determine the difference between 'geology' and 'engineering geology'.

"Civil engineers in general, and specifically civil engineers specializing in soils work, utilize the services of geologists. Merely because some geologists specialize in investigations affecting civil engineering facilities, it does not necessarily mean that a special classification should be established.

"If the committee should find that it is in the public interest to provide licensing and/or registration for geologists, we would have no particular objection. It is our opinion that the title 'engineering geologist' is misleading to the public."

Subsequent testimony by Mr. George D. Roberts, a member of the Association of Engineering Geologists in San Francisco, indicated support for SB 1349 with some modification.

Mr. George D. Roberts: "I am for the bill with some modifications. I believe those modifications are up to the gentlemen here, not the legislators. I might say that I graduated as an engineer of mines and put in almost 30 years at this, about half as an engineer and the other time working as a geologist, and all in all it is kind of confusing. It is helpful to some of these people because it is sort of a subsidy. It would seem to me that if they were selected by the civil engineers board, at least for a few years, that would take care of most of our problems. Mr. Brandt showed a very good example of what is going on down in Los Angeles. We have bigger problems in the Bay area. We have quakes up there and they are building right on the faults, the San Andreas fault, and they are doing all kinds of things. These people, some of these people, are trying to horn in on others."

In the addendum to the committee report, there are letters from professors of geology and distinguished members in the profession. These letters, pro and con, are worthy of consideration and are of course subject to rebuttal by the testimony of the witnesses.

RECOMMENDATIONS OF THE COMMITTEE

After careful consideration of the testimony of those appearing before the committee at its hearing, and after careful review of the material subsequently presented to the committee, it is the consensus that the public welfare can best be served by a registration and licensing of geologists, and that all geologists in the State of California should be so registered and licensed.

Inasmuch as all geologists receive the same academic training, it is the opinion of the committee that there should be a separate bureau or board within the Department of Professional and Vocational Standards, and that the licensing and regulation of geologists should be handled by a Board of Geologists, and not the Board of Civil Engineers. If all practicing geologists in the State of California are licensed and regulated, then the committee feels that their number is sufficient to warrant the setting up of a separate agency, having a fee in keeping with other fees in the department. The Board of Geologists should have the authority to issue certificates of competency in the various specialties within the field of geology.

The committee further concludes that growth and land-use problems in the state are quite apparent and show a compelling need for adequate and competent geological reports. State regulations would fix statewide standards so that those communities, builders, and developers requiring these services could have access to a group of qualified people to fulfill their needs.

APPENDIX

SENATE BILL

No. 1349

Introduced by Senator Rodda

April 23, 1963

REFERRED TO COMMITTEE ON BUSINESS AND PROFESSIONS

An act to amend Sections 6710, 6711, and 6712 of, and to add Chapter 12.5 (commencing with Section 7800) to Division 3 of, the Business and Professions Code, relating to the registration and regulation of engineering geologists and making an appropriation therefor.

The people of the State of California do enact as follows:

SECTION 1. This chapter is enacted in order to introduce qualifying criteria in a presently unregulated professional field. Such action recommends itself through benefits to the safety, health, and welfare of the people of California. These benefits are in the fields of engineering geology as related to civil engineering problems including the conservation of ground waters within the State.

SEC. 2. Section 6710 of the Business and Professions Code is amended to read:

6710. There is in the Department of Professional and Vocational Standards a State Board of Registration for Civil and Professional Engineers, which consists of 9 10 members appointed by the Governor.

SEC. 3. Section 6711 of said code is amended to read:

6711. Each member of the board shall be a citizen of the United States. Seven members shall be registered under this chapter, one member shall be licensed under the Land Surveyors' Act (commencing with Section 8700 of this code), *one member shall be registered under the Engineering Geologist Act (Chapter 12.5, commencing with Sec-*

LEGISLATIVE COUNSEL'S DIGEST

S.B. 1349, as introduced, Rodda (B. & P.). Engineering geologists.

Amends Secs. 6710, 6711, and 6712, adds Ch. 12.5 (commencing with Sec. 7800) Div. 3, B. & P.C.

Provides for the registration and regulation of engineering geologists by the State Board of Registration for Civil and Professional Engineers. Increases the membership of that board from nine to ten by adding an engineering geologist thereto.

tion 7800, of Division 3), and one member shall be a public member who is not registered under this act ~~or~~, licensed under the Land Surveyors' Act, *or registered under the Engineering Geologist Act*. Each member, except the public member, shall have at least 12 years active experience and shall be of good standing in his profession. Each member shall be at least 30 years of age, and shall have been a resident of this State for at least five years immediately preceding his appointment.

SEC. 4. Section 6712 of said code is amended to read:

6712. Members of the State Board of Registration for Civil and Professional Engineers in office when this act takes effect shall continue as members of the State Board of Registration for Civil and Professional Engineers without change in their terms so that the terms of said members presently in office shall expire as follows: the term of one member, January 15, 1952; the term of two members, January 15, 1953; the term of two members, January 15, 1954, and the term of two members, January 15, 1955. Thereafter, all appointments to said board shall be for a term of four years, and vacancies shall be filled by appointment for the unexpired term. Each such member appointed to fill a new term or vacancy shall be a registered professional engineer in the same branch as his predecessor.

The term of the first land surveyor member shall expire January 15, 1960. Thereafter all such appointments shall be for a term of four years, and vacancies shall be filled by appointment for the unexpired term.

The Governor shall, on or before January 1, 1962, appoint the first public member of the board, and his term shall expire January 15, 1965. Thereafter all such appointments shall be for a term of four years, and vacancies shall be filled by appointment for the unexpired term.

The Governor shall, on or before January 1, 1964, appoint the first engineering geologist member of the board, and his term shall expire January 15, 1966. Thereafter all such appointments shall be for a term of four years, and vacancies shall be filled by appointment for the unexpired term.

Each member shall hold office until the appointment and qualification of his successor or until six months shall have elapsed since the expiration of the term for which he was appointed, whichever first occurs. No person shall serve as a member of the board for more than three consecutive terms, but this provision shall not apply to any member in office on September 7, 1955.

SEC. 5. Chapter 12.5 (commencing with Section 7800) is added to Division 3 of said code, to read:

CHAPTER 12.5. ENGINEERING GEOLOGIST

Article 1. General Provisions

7800. This chapter of the Business and Professions Code constitutes the chapter on engineering geologists. It may be cited as the Engineering Geologist Act.

7801. "Board," as used in this chapter, means the State Board of Registration for Civil and Professional Engineers.

7803. "Engineering geology," as used in this chapter, refers to the application of geologic data, techniques, and principles to the study of naturally occurring rock, soil materials, and ground water for the purpose of assuring that geologic factors affecting the planning, design, construction, operation, and maintenance of civil engineering works and the conservation of ground water resources are recognized, adequately interpreted, and utilized.

7804. "Engineering geologist," as used in this chapter, refers to a person who practices engineering geology.

7805. Only a person registered under the provisions of this chapter shall be entitled to take and use the title "engineering geologist."

7806. The term "responsible charge of work" means the independent control and direction by the use of initiative, skill and independent judgment of engineering geological work or the supervision of such work.

7807. A subordinate is any person who assists a registered engineering geologist in the practice of engineering geology without assuming the responsible charge of work.

7808. A qualified engineering geologist is a person who possesses all the qualifications specified in Section 7841 for registration except that he is not registered.

Article 2. Administration

7810. The board is vested with power to administer the provisions and requirements of this chapter and may make and enforce such rules and regulations which are reasonably necessary to carry out its provisions.

7811. Each engineering geologist member of the board shall be a citizen of the United States, at least 30 years of age, and shall have been a resident of this State for at least five years immediately preceding his appointment. After the first appointee, each engineering geologist member shall be registered under this chapter, shall have at least 12 years, active experience, and shall be of good standing in his profession.

7812. In selecting the first engineering geologist appointee to the Board of Registration for Civil and Professional Engineers, the Governor shall select a person who meets all the qualifications for registration. Thereafter, he shall appoint persons registered under this chapter.

7814. The secretary of the board shall keep a complete record of all applications for registration and the board's action thereon, and, between July 1 and December 1 in each even-numbered year, shall prepare a roster showing the names and addresses of all registered engineering geologists. Between July 1 and December 1 in each odd-numbered year he shall prepare a supplemental roster showing changes in and additions to the roster. The roster shall be a part of the roster of registered professional engineers and engineering geologists issued by the board.

A copy of the roster and the supplemental roster shall be filed with the Secretary of State and with the clerk of each county in the State,

and a copy of each shall be furnished to each engineering geologist registered under the provisions of this chapter. Copies of each shall be available on application to the secretary, at such price per copy as may be fixed by the board.

All records shall be public records.

Article 3. Scope of Regulation

7830. It is unlawful for anyone other than an engineering geologist registered under this chapter to stamp or seal any plans, specifications, plats, reports, or other documents with the seal or stamp of an engineering geologist, or to in any manner use the title "engineering geologist" unless registered hereunder.

7831. It is unlawful for anyone to stamp or seal any plans, specifications, plats, reports, or other documents with the seal after the certificate of the registrant, named thereon, has expired or has been suspended or revoked, unless the certificate has been renewed or re-issued.

7832. Any person practices engineering geology and is subject to the provisions of this chapter when he professes to be an engineering geologist or is in responsible charge of engineering geology work.

7832.1. This chapter does not prohibit one or more engineering geologists from practicing through the medium of a sole proprietorship, partnership, or corporation. In a partnership all partners must be registered as engineering geologists or civil engineers, or hold certificates to practice architecture in the State of California. In a corporation, the president and all directors shall be registered as engineering geologists or civil engineers, or hold certificates to practice architecture in the State of California.

7832.2. This chapter does not prevent or prohibit an individual, firm, company, association or corporation engaged in any business other than the practice of engineering geology from employing an engineering geologist to perform professional services in engineering geology incidental to the conduct of their business.

7833. All engineering geology plans, specifications, reports or documents shall be prepared by a registered engineering geologist or by a subordinate employee under his direction. In addition, they shall be signed by him or stamped with his seal, either of which shall indicate his responsibility for them.

7834. Officers and employees of the United States of America practicing solely as such officers or employees are exempt from registration under the provisions of this chapter.

7835. A subordinate to an engineering geologist registered under this chapter, insofar as he acts solely in such capacity, is exempt from registration under the provisions of this chapter. This exemption, however, does not permit any such subordinate to practice engineering geology in his own right or to use the title "engineering geologist."

7836. A civil engineer empowered to practice civil engineering in this state under provisions of Chapter 7 (commencing with Section 6700) of Division 3 of this code insofar as he practices civil engineering in its various branches is exempt from registration under the provisions of this chapter.

Article 4. Registration

7840. An application for registration as an engineering geologist or certificate as engineering geologist-in-training shall be made to the board on a form prescribed by it and shall be accompanied by the application fee fixed by this chapter.

7841. An applicant for registration as an engineering geologist shall have all the following qualifications:

(a) Be of good moral character.

(b) Meet one of the following educational requirements fulfilled at a school or university whose geological curricula meet criteria established by rules of the board:

(1) Graduation with a major in geology.

(2) Completion of sufficient courses in the geological sciences to qualify for a geology major in that school or university.

(3) Completion of 30 semester units in geological science courses leading to a major in geology, of which at least 24 units are in the third or fourth year, or graduate courses.

(c) Have at least seven years of professional geological work which shall include:

(1) At least four years of professional geological work under the supervision of a qualified geologist or a registered civil engineer. A qualified geologist is one who has had a minimum of five years' experience in responsible charge of geological studies.

Each year of undergraduate study in the geological sciences shall count as one-half year of training up to a maximum of two years, and each year of graduate study or research counts as a year of training.

Teaching in the geological sciences at college level shall be credited year for year toward meeting the requirement in this category, provided that the total teaching experience includes six semester units of third or fourth year or graduate courses.

(2) At least three full years of professional work in the field of engineering geology under the supervision of a registered engineering geologist, or a registered civil engineer, except that prior to January 1, 1967, a person applying for registration shall qualify under this subdivision if his work is under the supervision of a qualified engineering geologist.

The ability of the applicant shall have been demonstrated by his having performed the work in a responsible position. For out-of-state applicants, the adequacy of the supervision and experience shall be determined by the board.

(d) Successfully pass an examination.

7842. An applicant for registration as an engineering geologist-in-training shall have all the following qualifications:

(a) Be of good moral character.

(b) Have the educational requirements specified in paragraph (1) of subdivision (b) of Section 7841.

(c) Successfully pass an examination.

7843. The board shall waive the examination requirement for a certificate as an engineering geologist for one who complies with all of the following:

(a) Who makes written application to the board under this section not later than one year following the effective date of this chapter.

(b) Who has at least three full years of professional work in the field of engineering geology under the supervision of a qualified engineering geologist or a registered civil engineer, or who has been in responsible charge of work. The ability of the applicant shall have been demonstrated by his having performed the work in a responsible position. For out-of-state applicants, the adequacy of the experience shall be determined by the board.

(c) Who complies with the provisions (a) and (b) of, and paragraph (1) of subdivision (c), of, Section 7841.

7844. Examination for registration shall be held at regular or special meetings of the board, at the times and places within the state as the board shall determine.

The work of the board relating to examination and registration may be divided into subcommittees. The scope of examinations and the methods of procedure may be prescribed by rule of the board.

7845. Examinations shall be designed to conform to the following general principle: One division of the examination shall test the applicant's knowledge of subjects fundamental to engineering geology, including geology and other earth sciences, mathematics and the basic sciences; and another division of the examination shall test the applicant's ability to apply his knowledge and experience and to assume responsible charge in the professional practice of engineering geology.

7846. An applicant for a certificate as an engineering geologist-in-training shall, upon making a passing grade in that division of the examination prescribed in Section 7845, relating to subjects fundamental to engineering geology, be certified as an engineering geologist-in-training.

No renewal or other fee, other than the application fee, shall be charged for this certification.

Such certification shall become invalid when (a) the holder has qualified as an engineering geologist as provided in this chapter; or (b) on the 30th day of June of the 8th year after the date of issuance, if the holder has not at that time secured registration as an engineering geologist.

7847. An engineering geologist-in-training certificate does not authorize the holder thereof to practice or offer to practice engineering geology or to assume responsible charge of engineering geology work, in his own right, or to use the title specified in Section 7803.

7848. An applicant failing in an examination may be examined again upon filing a new application and the payment of the application fee fixed by this chapter.

7849. The board, upon application therefor, on its prescribed form, and the payment of the application and registration fees fixed by this chapter, which fees shall be retained by the board, may issue a certificate of registration as an engineering geologist to any person holding a certificate of registration issued to him by any state or country when the applicant's qualifications meet the requirements of this chapter and the rules established by the board and may in such case waive the written examination required by this chapter.

7850. A temporary authorization for the practice of engineering geology may be granted, for a specific project, upon application and payment of the fee prescribed in Section 7887 for a period not to exceed 60 consecutive days in any calendar year; provided:

(a) He maintains no place of business in this State.

(b) He is legally qualified to practice engineering geology in the state or country where he maintains a place of business.

(c) The applicant demonstrates by means of an individual appearance before the board satisfactory evidence of adequate knowledge in that phase of engineering geology for which the applicant proposes to practice under the temporary authorization.

(d) If the applicant can satisfy the board that the completion of the specific project for which the authorization is granted will require more than 60 consecutive calendar days, the board may extend the authorization to a period not to exceed a total of 120 days.

Upon completion of these requirements as necessary, the secretary on direction of the board shall issue a temporary authorization to the applicant.

7851. In determining the qualifications of an applicant for registration, a majority vote of the board is required.

7852. Any applicant who has passed the examination and has otherwise qualified hereunder as an engineering geologist, upon payment of the registration fee fixed by this chapter shall have a certificate of registration issued to him as an engineering geologist.

A certificate of registration for an engineering geologist shall be signed by the president and secretary and issued under the seal of the board.

7853. If an applicant for registration as an engineering geologist or for a certificate as an engineering geologist-in-training is found by the board to lack the qualifications required for admission to the examination for such registration or certificate, the board shall, notwithstanding the provisions of Section 153 of this code, refund to him one-half of the amount of his application fee.

7854. Each engineering geologist registered under this chapter may, upon registration, obtain a seal of the design authorized by the board bearing the registrant's name, number of his certificate, and the legend "engineering geologist."

7855. A duplicate certificate of registration to replace one lost, destroyed, or mutilated may be issued subject to the rules and regulations of the board. The duplicate certificate fee fixed by this chapter shall be charged.

7856. An unsuspended, unrevoked and unexpired certificate and endorsement of registry made under this chapter is presumptive evidence in all courts and places that the person named therein is legally registered.

Article 5. Disciplinary Proceedings

7860. The board may receive and investigate complaints against registered engineering geologists, and make findings thereon.

By a majority vote, the board may reprove, privately or publicly, or may suspend for a period not to exceed two years, or may revoke the certificate of any engineering geologist registered hereunder:

(a) Who has been convicted of a felony, arising from or in connection with the practice of geology, or of a crime involving moral turpitude, in which case the certified record of conviction shall be conclusive evidence thereof.

(b) Who has not a good character.

(c) Who has been found guilty by the board of any deceit, misrepresentation, violation of contract, fraud or incompetency in his practice.

(d) Who has been found guilty of any fraud or deceit in obtaining his certificate or violation of any provision of this chapter.

(e) Who aids or abets any person in the violation of any provisions of this chapter.

(f) Who violates any provision of this chapter.

7861. The proceedings under this article shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the board shall have all the powers granted.

7862. The board may reissue a certificate of registration, certification, or authority, to any person whose certificate has been revoked if a majority of the members of the board vote in favor of such reissuance for reasons the board deems sufficient.

7863. A plea or verdict of guilty or a conviction following a plea of nolo contendere made to a charge of a felony is deemed to be a conviction within the meaning of this article. The board may order the certificate suspended or revoked, or may decline to issue a certificate, when the time for appeal has elapsed, or the judgment of conviction has been affirmed on appeal, or when an order granting probation is made suspending the imposition of sentence, irrespective of a subsequent order under the provisions of Section 1203.4 of the Penal Code allowing such person to withdraw his plea of guilty and to enter a plea of not guilty, or setting aside the verdict of guilty, or dismissing the accusation, information or indictment.

7864. The adjudication of insanity or mental illness, or the voluntary commitment or admission to a state hospital of any certificate holder for a mental illness shall operate as a suspension of the right to practice of such certificate holder under this chapter, such suspension to continue until restoration to or declaration of sanity and until it is satisfied that, with due regard for the public interest, said person's right to practice may be safely restored.

Article 6. Offenses Against the Chapter

7870. The board shall have the power, duty and authority to investigate violations of the provisions of this chapter.

7871. It shall be the duty of the respective officers charged with the enforcement of laws and ordinances to prosecute all persons charged with the violation of any of the provisions of this chapter.

It shall be the duty of the secretary of the board, under the direction of the board, to aid such officers in the enforcement of this chapter.

7872. Every person is guilty of a misdemeanor and for each offense of which he is convicted is punishable by a fine or not more than five hundred dollars (\$500) or by imprisonment not to exceed three months, or by both fine and imprisonment :

(a) Who, unless he is exempt from registration under this chapter, practices or offers to practice engineering geology in this State according to the provisions of this chapter without legal authorization.

(b) Who presents or attempts to file as his own the certificate of registration of another.

(c) Who gives false evidence of any kind to the board, or to any member thereof, in obtaining a certificate of registration.

(d) Who impersonates or uses the seal of any other practitioner.

(e) Who uses an expired or revoked certificate of registration.

(f) Who shall represent himself as, or use the title of, registered engineering geologist, or any other title whereby such person could be considered as practicing or offering to practice engineering geology, unless he is qualified by registration as an engineering geologist under this chapter.

(g) Who manages, or conducts as manager, proprietor, or agent, any place of business from which engineering geology work is solicited, performed or practiced, unless such work is supervised or performed by a registered engineering geologist.

(h) Who violates any provision of this chapter.

Article 7. Revenue

7880. A certificate of registration as an engineering geologist expires at 12 p.m. on June 30 of each even-numbered year, if not renewed. To renew an unexpired certificate, the certificate holder shall, on or before June 30, of each even-numbered year, apply for renewal on a form prescribed by the board, and pay the renewal fee prescribed by this chapter.

7881. Except as otherwise provided in this article, certificates of registration as an engineering geologist may be renewed at any time within five years after expiration on filing of application for renewal on a form prescribed by the board and payment of the renewal fee in effect on the last preceding regular renewal date. If the certificate is renewed more than 30 days after its expiration, the certificate holder, as a condition precedent to renewal, shall also pay the delinquency fee prescribed by this chapter. Renewal under this section shall be effective on the date on which the application is filed, on the date on which the renewal fee is paid, or on the date on which the delinquency fee, if any, is paid, whichever last occurs. If so renewed, the certificate shall continue in effect through the date provided in Section 7880 which next occurs after the effective date of the renewal, when it shall expire if it is not again renewed.

7882. A suspended certificate is subject to expiration and shall be renewed as provided in this article, but such renewal does not entitle the holder of the certificate, while it remains suspended and until it is reinstated, to engage in the activity to which the certificate relates, or in any other activity or conduct in violation of the order or judgment by which it was suspended.

7883. A revoked certificate is subject to expiration as provided in this article, but it may not be renewed. If it is reinstated after its expiration, the holder of the certificate, as a condition precedent to its reinstatement, shall pay a reinstatement fee in an amount equal to

the renewal fee in effect on the last regular date before the date on which it is reinstated, plus the delinquency fee, if any, accrued at the time of its revocation.

7884. Certificates of registration as an engineering geologist which are not renewed within five years after expiration may not be renewed, restored, reinstated, or reissued thereafter. The holder of such certificate may apply for and obtain a new certificate, however, if:

(a) He is of good moral character.

(b) No fact, circumstance, or condition exists which, if the certificate were issued, would justify its revocation or suspension.

(c) He takes and passes the examination, if any, which would be required of him if he were then applying for the certificate for the first time.

The board may, by regulation, provide for the waiver or refund of all or any part of the application fee in those cases in which a certificate is issued without an examination pursuant to the provisions of this section.

7885. The department shall receive and account for all money derived under the operation of this chapter and, at the end of each month, shall report such money to the State Controller and shall pay it to the State Treasurer, who shall keep the money in a separate fund known as the Professional Engineer's Fund. All necessary expenses incurred in carrying out the provisions of this chapter shall, in accordance with law, be paid from the Professional Engineer's Fund.

7886. The department may make refunds of all fees in accordance with Section 158 of this code.

7887. The amount of the fees prescribed by this chapter shall be fixed by the board in accordance with the following schedule:

(a) The fee for filing each application for registration as an engineering geologist at not less than twenty-five dollars (\$25) and not more than forty dollars (\$40) and for each application for certification as engineering geologist-in-training at not less than fifteen dollars (\$15) and not more than twenty-five dollars (\$25).

(b) The registration fee for engineering geologist shall be fixed at an amount equal to the renewal fee in effect on the last regular renewal date before the date on which the certificate is issued, except that, with respect to certificates which will expire less than one year after issuance, the fee shall be fixed at an amount equal to 50 percent of the renewal fee in effect on the last regular renewal date before the date on which the certificate is issued. The board may, by appropriate regulation, provide for the waiver or refund of the initial certificate fee where the certificate is issued less than 45 days before the date on which it will expire.

(c) The duplicate certificate fee at not less than one dollar (\$1) and not more than three dollars (\$3).

(d) The temporary registration fee for engineering geologist at not less than ten dollars (\$10) and not more than forty dollars (\$40).

(e) The renewal fee for an engineering geologist shall be fixed by the board at not more than sixteen dollars (\$16) and not less than eight dollars (\$8).

(f) The delinquency fee for a certificate is an amount equal to the renewal fee in effect on the date of its expiration.

TESTIMONY GIVEN IN REGARD TO
SENATE BILL 1349
STATE REGISTRATION OF ENGINEERING GEOLOGISTS

Sacramento, California

April 7, 1964

JOHN A. LAMBIE, *Los Angeles County Engineer*,

Presented by HARVEY T. BRANDT, *Chief Deputy Engineer*

Thank you for the opportunity to present testimony to your committee in regard to Senate Bill 1349, pertaining to state registration of engineering geologists. *The Los Angeles County Board of Supervisors*, on March 31, 1964, upon recommendation of County Engineer John A. Lambie, adopted a motion "*strongly urging the passage of Senate Bill 1349 for establishing registration for engineering geologists on a statewide basis similar to the certification procedures for civil engineers and land surveyors.*" The County of Los Angeles *recommends* this bill as being necessary to insure the *orderly development of safe building sites* in the foothill and mountain areas.

Although engineering geology is a branch of the geological sciences, it is noteworthy that the somewhat unique professional responsibilities of the engineering geologist make it necessary to define the scope of his work separately. Engineering geology may be defined as the application of geologic knowledge, principles and techniques in the observation and evaluation of the influence of earth materials in the planning, construction and maintenance of earth slopes and engineering structures. In the application of this knowledge and these principles and techniques, the engineering geologist is primarily a geologist. However, to make his work effective, he must think like an engineer and translate this geologic knowledge into terms an engineer can use for the design of structures. For this reason, registration as an engineering geologist should include requirements for a substantial working knowledge of civil engineering and soil mechanics.

The continuing utilization of marginal land and hillside areas for building construction sites, not only in Los Angeles and adjacent counties but throughout the state, requires proper *building procedures and soil evaluation methods* in order to insure that structures will be built on stable foundation material. These procedures cover many complex problems including the stability of existing and potential landslide areas, unstable soil, soil compaction, erosion control, grading and excavating, and drainage control.

Before the adoption of a grading ordinance by the Los Angeles County Board of Supervisors, many capable and conscientious builders and developers were careful to follow sound engineering practices in making cuts and fills and in proving adequate soil compaction and erosion control. Others, accustomed only to flatland sites, began leveling

shelves for hillside homes without sufficiently understanding the type of soil, geology and drainage factors involved. Individual homeowners and even developers were sometimes unaware that on hillside lots many problems must be solved beyond providing level or suitably graded locations for building foundations.

To prevent property damage which could occur from unregulated grading practices and to insure that proper considerations be given to such problems as erosion, compaction, slope cuts and drainage, the board of supervisors adopted a grading ordinance effective March 22, 1957. To date, our department has issued over 4,000 grading permits covering some 85,000,000 cubic yards of earthwork.

On the hundreds of acres of hillside areas remaining undeveloped in Los Angeles County, *many present such serious geologic problems that building construction must be prevented.* When conditions warrant, the county engineer requires to be submitted, with the building permit application, a geologic report prepared by an engineering geologist approved by the Los Angeles County Engineering Geologist Qualifications Board. Under the requirements of the subdivision ordinance, engineering geologic reports may also be required prior to consideration of a tentative subdivision map by the regional planning commission's subdivision committee. In checking grading plans, particular attention is given to compliance with the engineering geologist's recommendations, methods of compaction, slopes of banks, drainage devices, and proper erosion control methods. Sewage and sewage disposal facilities, both on the property directly concerned and on nearby properties, need careful consideration because the accumulation of subsurface drainage water, for example, from private disposal facilities may cause subsidence or slippage of surface soil.

Since the beginning of the major development of building sites in the foothill and mountainous areas of Los Angeles County, it has been apparent that, in addition to administrative controls, engineering geologic maps are essential to provide basic knowledge of the county's "problem" areas. These maps are indispensable to the more detailed studies of building areas performed by the private consultants and to the county for its land use studies, road and tunnel facilities, and other engineering works. The nature and distribution of the soil and rock formations, as well as the geologic structural features of a particular area, have a profound effect on slope stability, subsidence, erosion, ground water seepages, grading excavation and other problems. Most of the existing geologic maps have been inadequate for engineering uses because the emphasis had been placed on the mineral economics or academic geology rather than on the engineering aspects. These existing maps usually are of too small a scale and lack the necessary details regarding landslides, geologic structure, and the distribution and engineering properties of the soil and rock units.

Recognizing that in order to properly plan and control both county projects and private construction good geologic base maps were essential, the Los Angeles County Board of Supervisors, in October of 1960, initiated a continuing cooperative geologic mapping program with the United States Geological Survey Department and with the California State Division of Mines and Geology. The United States Geological Survey Department has undertaken the mapping of portions

of the western Santa Monica Mountains, beginning with the critical Malibu Beach Quadrangle. The California State Division of Mines and Geology has undertaken the mapping of portions of the Palos Verdes Hills and the foothills of the San Gabriel Mountains.

In the coastal 10 square miles of the Malibu Beach quadrangle, most of which is highly desirable living area, 83 existing landslides have been located, some of which are presently active. Thirty of these are over five acres in area, and one is approximately 1,500 feet wide and one-half mile in length. The Palos Verdes study has located some 150 landslides and in the San Gabriel Mountains a slide with an area of two square miles has been mapped. Upon completion of this cooperative engineering geological mapping program, these engineering geological maps will be made available to developers, subdividers, engineers and the general public.

Detection and evaluation of the problems for which solutions must be found in order to provide stable soils for building sites are items requiring thoroughly competent engineering geologists. The County of Los Angeles is painfully aware of the fact that a disregard for these problems can be disastrous.

The Department of County Engineer has, for several years, been requiring written reports and geologic studies for most hillside development work within its jurisdictional area. It was apparent, after studying some of the earlier reports, that they had been prepared by persons who lacked the necessary background and experience in this type of work. In order to prevent such unqualified persons continuing to represent themselves as being capable of evaluating geological hazards and recommending corrective remedies, it was necessary for the Los Angeles County Board of Supervisors to enact an ordinance establishing the Los Angeles County Engineering Geologist Qualifications Board. The ordinance provides that Engineering Geologist Qualifications Board serve to (1) establish minimum standards of experience and professional training for qualification of engineering geologists, (2) examine and evaluate candidates applying for certification and to issue appropriate certification to those found to be properly qualified, and (3) in special cases, act as a board of review to provide for interpretation of data, opinions and conclusions contained in geological reports.

The provisions of Senate Bill 1349 will accomplish the first two functions of the engineering geologist qualifications board and in this way assist the people of California in developing hillside and marginal areas by assuring that the competent assistance of qualified engineering geologists will be provided. Another aspect of the registration of engineering geologists is that of equal professional levels. The complexity and economic significance of hillside development work requires the cooperative evaluation and exchange of data between the design engineer, soils engineer and the engineering geologist. The highest level of this cooperation can be obtained when the three groups are of equal professional status.

Certification and regulation of *engineering geologists* can be more *efficiently and effectively* handled at a state level.

Two members of the Los Angeles County Engineering Geologist Qualifications Board are practicing engineering geologists. Although

these members are of the highest caliber, this function could be construed as a conflict of interest.

Orange County and the City of Los Angeles maintain separate engineering geologist qualifications boards, creating the necessity for an engineering geologist to obtain three certificates in order to practice in southern California. Although the certificate requirements are essentially the same, it is possible for an applicant to become qualified through examination by one local agency and then fail to qualify with another.

As more and more of the "flatland" and favorable hillside areas are developed with the coming of additional millions of people to California, developers are looking to *all* land, no matter how rugged or marginal, for improvement as building sites. For the safety and welfare of the citizens, this development will require the most careful control and evaluation by highly qualified and experienced engineering geologists.

As in the case of the engineering profession, the work performed by the engineering geologist directly affects the safety and welfare of the people of California. It is therefore our recommendation that the practice of engineering geology be regulated by State registration.

JOHN A. LAMBIE
County Engineer

LOS ANGELES ORDINANCE REGULATING ENGINEERING GEOLOGISTS

Ordinance No. 7754

An Ordinance adding Article XXX to Ordinance No. 4099, the Administrative Code, relating to the Engineering Geologist Qualifications Board.

The Board of Supervisors of the County of Los Angeles do ordain as follows:

Section 1. Article XXX is added to Ordinance No. 4099, entitled "the Administrative Code of the County of Los Angeles, adopted May 19, 1942, to read:

Article XXX

ENGINEERING GEOLOGIST QUALIFICATIONS BOARD

Section 451. A Board designated as the Engineering Geologist Qualifications Board is hereby established. The Board shall consist of five regular members and one ex-officio member. The five regular members of the Engineering Geologist Qualifications Board shall be appointed by the Board of Supervisors. Two members shall be qualified by education, training, experience and prominence in the field of engineering geology, two members shall be qualified by education, State registration, experience, and prominence in the field of civil engineering, and one member shall be qualified by education, training, experience and prominence in the field of soil mechanics. The ex-officio member shall be the County Engineer of Los Angeles County or his duly authorized representative.

Section 452. The Board of Supervisors shall appoint all regular members of the Qualifications Board, subject to the right of the said Board, to remove any member at its pleasure, for a minimum of three (3) years or until an office becomes vacant due to death or resignation, or until qualified successors are appointed or as exempted below.

Appointments shall be for a full term of three (3) years or for the remainder of an unexpired term as the case may be, except that two of the initial appointments shall be for two (2) years duration and three of the initial appointments shall be for three (3) years duration.

Section 453. Chairman and Vice Chairman. At the first meeting and annually thereafter the Qualifications Board shall choose from among its members a chairman and a vice chairman such other officers as it sees fit to serve for one year. The County Engineer or his representative shall act as secretary to the Qualifications Board.

Section 454. As used in this article, "Qualifications Board" means the Los Angeles County Engineering Geologist Qualifications Board created by this article.

As used in this article, "engineering geology" is the application of geologic knowledge, principles, and techniques in the observation and evaluation of the influence of earth materials, including ground water, in the planning, construction and maintenance of earth slopes and engineering structures.

Section 455. The Qualifications Board shall hold at least one regular meeting each month. Any combination of regular members numbering three (3) constitutes a quorum. At a meeting at which a quorum is present, the expressed concurrent will or vote of a majority of those members of the Qualifications Board participating or voting, as the case may be, but in no event less than two (2), shall be the will or action of the Qualifications Board.

Section 456. The members of the Qualifications Board shall receive the compensation provided from time to time in the current Salary Ordinance. In the absence of any provision therefor in said current Salary Ordinance, the members of the Qualifications Board shall serve without compensation, except when required to travel in the performance of their duties, they shall be reimbursed for their necessary travel expenses, including transportation, meals and lodging in accordance with applicable provisions of this Ordinance.

Section 457. The Qualifications Board shall recommend to the Board of Supervisors for adoption, rules and regulations for the procedures of the Qualifications Board of this County. These rules and regulations shall be available to the public.

Section 458. A person shall not submit any engineering geological reports required by County Ordinances unless he has applied for and obtained a valid certificate of registration issued by the Qualifications Board as provided in this article. This requirement shall become effective six (6) months after the effective date of this article.

Section 459. The Qualifications Board shall examine each applicant and determine his qualifications to prepare and submit geological reports based on minimum standards established by the Qualifications Board. The Qualifications Board shall certify those applicants who pass

the examination successfully and issue the applicant a certificate of registration.

Section 460. The Qualifications Board shall maintain a roster of persons holding valid certificates of registration issued pursuant to this article. Such roster shall be available to the public.

Section 461. It shall be the duty of every holder of a certificate of registration issued by the Qualifications Board to comply with all requirements and conditions of registration as set forth by the Board of Supervisors.

Section 462. Should the Qualifications Board after holding a public hearing as required by Section 463, find that a certificate of registration has been obtained by fraud or misrepresentation, it shall immediately revoke such certification.

Should the Qualifications Board find that the holder of a certificate of registration has violated any of the requirements of the Qualifications Board, the Qualifications Board may, at its discretion, suspend or revoke the certificate, or deny a renewal thereof, or deny a new certificate to the same person.

The signing and presentation of an engineering geological report, as required by County Ordinances, which was not prepared by or under the immediate direction of the geologist submitting the report, shall be cause for revocation of a certificate of registration.

The Qualifications Board shall consider charges against the holder of any certificate of registration concerning professional competence and may, where the facts warrant, suspend or revoke the registration.

Section 463. The Qualifications Board shall not deny, suspend or revoke a certificate of registration until the Qualifications Board has given the holder thereof at least ten (10) days notice to appear before the said Qualifications Board and show cause why his certificate should not be suspended or revoked. In showing such cause he may be represented by an attorney and may introduce evidence.

Section 464. The Qualifications Board shall also serve as a Board of Review to provide for interpretation of data, opinions, conclusions or any one or more thereof included in and adequacy of geological reports.

Section 465. The Qualifications Board shall keep a record of its decisions and findings.

Section 466. The Qualifications Board shall compile and keep current a list of cities and other public agencies maintaining satisfactory examination and qualification procedures for engineering geologists who submit reports on geology involving engineering matters.

Section 467. Any applicant who fails to appear for examination after being duly notified, or any applicant who fails to pass the Qualifications Board's examinations satisfactorily, may reapply for examination after the expiration of thirty (30) days. Should such person fail to pass the second time, the Qualifications Board may refuse a third application for examination until after the expiration of six (6) months from the date of the first examination.

Section 468. Each applicant for a certificate of registration shall pay a fee of Five Dollars (\$5.00) for each examination to the Department of County Engineer at the time of filing and acceptance of his application therefor.

(a) When an applicant fails to take the examination for good cause shown, he may apply for and receive a refund of eighty per cent (80%) of his application fee.

(b) Every certificate of registration provided for by this article, unless sooner revoked, shall expire one year after the date of issuance, and each such certificate may be renewed prior to its expiration by payment of Two and One Half Dollars (\$2.50) renewal fee on or before the date of expiration.

Section 2. This ordinance shall be published in the Journal of Commerce & Independent Review, a newspaper printed and published in the County of Los Angeles.

FRANK G. BONELLI,
Chairman of the Board of Supervisors
of the County of Los Angeles.

Attest: GORDON T. NESVIG,

Clerk of the Board of Supervisors of the County of Los Angeles.

I hereby certify that at its meeting of March 15, 1960, the foregoing ordinance was adopted by the Board of Supervisors of said County of Los Angeles by the following vote, to wit:

Ayes: Supervisors Kenneth Hahn, Ernest E. Debs, Burton W. Chace, Warren M. Dorn, and Frank G. Bonelli.

Noes: None.

GORDON T. NESVIG,
Clerk of the Board of Supervisors
of the County of Los Angeles.

Effective date April 15, 1960.

Re: Hearings on proposed Registration Bill (SB 1349)

Dear Sir:

In reference to your notice of hearing for April 7, 1964, it will not be possible for my staff personnel to be present. We enclosed a copy

of our excavation and grading code and requirements pertaining to engineering geologists in our letter of October 22, 1963.

We stated our position in the above letter; however, I will elaborate to clarify our problem and possibly better illustrate our need of setting standards for professional performance of engineering geologists to protect the public health and safety.

The County of Orange, California, is approximately 782 square miles in area, of which approximately 542 square miles is unincorporated. Over 90 percent of this unincorporated area is composed of moderate to very high relief and is considered hillside area. The whole county has experienced a 225.6 percent increase of population between 1950 and 1960. If our population growth continues at the present rate of 8,000 people per month we will have over 3 million people by 1985. A large percentage of this future growth will reside in foothill and mountainous areas. On much of this terrain, geological hazards are inherent and their effects have to be neutralized or eliminated if extensive damage to public and private property is to be avoided.

We not only need qualified engineering geologists in our hillside residential and commercial development, but also in the construction of public and private roads, dams, reservoirs, bridges, tunnels, flood control works, railroads and schools. We are aware of considerable damage to public and private properties and waste of taxpayers' money due to the lack of qualified geologic control in these fields of construction.

Water is a premium and a necessity in the development of our county specifically and southern California generally. We need qualified engineering geologists to assist in the development and management of ground water basins and in the control of pollution in our potable supplies.

In order that we may insure the public that we have qualified engineering geological control of our hillside development, we have established an engineering geologist qualification board in our grading ordinance. These engineering geologists are qualified by the board by reason of knowledge and experience in their profession. Only those found qualified by the board are allowed to submit reports based on the minimum standards established by the board. However, those qualified by the boards in the City and County of Los Angeles are not necessarily accepted by the board here in Orange County. State registration will reduce or prevent multiplicity of these local boards.

We feel that stability per se cannot be governed by legislation, ordinances, or governmental agencies. Each site or problem must be investigated on its own merit by qualified investigators. State registration for engineering geologists will set standards and qualifications for their professional performances and will clarify their legal responsibilities.

Very truly yours,

C. W. DONOHUE

THE HONORABLE ALAN SHORT, *Chairman*
Senate Factfinding Committee on Business and Commerce
California State Senate
Sacramento, California

Dear Senator Short :

My name is Martin Van Couvering and my address is 1560 Knollwood Terrace, Pasadena, California 91103. I am a consulting petroleum geologist and engineer, licensed under the Professional Engineers Act of the State of California. My engineer's certificate number is P-281, and I have been a member of the American Association of Petroleum Geologists for 40 years.

I am appearing before your committee on behalf of the American Institute of Professional Geologists, a newly-formed nationwide geological society of which I am the president. (Reference is made to our information brochure, "All About AIPG," and our basic documents, which are submitted herewith. (In order that my remarks may have greater meaning to you, I should like to describe the American Institute of Professional Geologists to you and illustrate some of its goals.

The American Institute of Professional Geologists was formed last November to meet the needs of practicing geologists in every field of specialization for an organization which would raise professional standards, enhance and preserve the standing of the profession with the public, and insure the protection of the public welfare from non-professional practices of geology. To achieve these aims, the code of ethics, constitution and by-laws of the institute set forth very exacting qualifications for membership (for example, a minimum of 12 years of professional experience).

Because of the romance which attaches to our profession, and because we deal largely in forecasting the unknown, our profession has always been prone to invasion by charlatans and otherwise incompetent pseudogeologists. Also, as in any other profession, there have been cases where competent geologists have disregarded professional ethics in the conduct of their business. Finally, in recent years, certification and registration of geologists have become quite important in many states. The

American Institute of Professional Geologists is solely a professional society, and, as such, we believe we may render valuable service in elevating the legal status of geologists in such areas.

To obtain these objectives, and at the request of most of the scientifically-oriented geological societies in California (whose memberships comprise the great majority of California geologists), the California Section of the American Institute of Professional Geologists has assumed the role of spokesman in *opposing passage of Senate Bill 1349*.

Accordingly, I wish to state that we oppose Senate Bill 1349 because the bill is too circumscribed: it would accord legal status to a *small segment* of the geological profession and totally ignore a vastly larger group of no less competent earth scientists. It also disregards the fact that there are no sharp lines of definition between many of the fields of geological specialization, and individual geologists often are proficient in more than one field. The obvious result of such preferential and parochial registration is the division of the geological profession into distinct and probably alien factions. At a time when geologists should be striving for unity in the interest of upgrading their standards, to the benefit of the general public, we are confronted with a proposal which can only lead to misunderstanding and dissension among geologists themselves. Such fractionation of the profession would be detrimental to the public welfare.

In the interest of offering constructive advice to the committee, while at the same time opposing Senate Bill 1349, the California Section of the American Institute of Professional Geologists submits that the registration of all qualified geologists is preferable to the division of the profession by passage of Senate Bill 1349. We certainly recognize the need which engineering geologists feel for registration, but we suggest to them that universal registration of all qualified geologists in California would fulfill that need and bring harmony to the profession. We therefore recommend that consideration of Senate Bill 1349 be postponed until a more general and suitable bill is introduced.

To expedite this program, the California Section of the American Institute of Professional Geologists has appointed a legislative committee, consisting of representatives from the various geological societies. Mr. Arthur O. Spaulding is chairman of this committee, which intends to work diligently toward multilateral registration. The Legislative Committee of the California Section of the American Institute of Professional Geologists has had its first meeting, and Mr. Spaulding will report on its progress.

Thank you for the opportunity you have provided me in addressing you.

Yours very truly,

MARTIN VAN COUVERING

WASHINGTON UNIVERSITY

Re: Senate Bill 1349

MR. ALAN SHORT, *Chairman*Senate Factfinding Committee on Business and Commerce
State Capitol
Sacramento, California 95814

Gentlemen:

The importance of Senate Bill 1349, providing for the registration of *engineering geologists*, cannot be overemphasized. The public's safety and protection against nonqualified "experts" in those areas where civil engineering projects into critical "fields" of the geological disciplines, is an absolute necessity.

Some states have seen fit to require the registration and licensing of *mining and petroleum geologists*, who may or may not also be called engineering geologists; but in many, perhaps in most instances these same specialists may NOT be qualified by training or experience to pass judgements upon foundations, damsites, vehicular tunnels, landslide problems, and ground water hydrology, to mention just a few examples.

The same may be said of civil engineers and soils engineers, although some of the latter may have been exposed to geological training where their discipline overlaps that of the engineering geologist.

My experience as an engineering geologist, both as a consultant and teacher, since 1933, and as a registered professional engineer, has given me a firm conviction of the importance of permitting only qualified geologists and/or engineering geologists, to pass judgements of a technical nature on civil engineering projects. It is fair to state that close to fifty percent of my consulting work involves errors in judgement and understanding of fundamental geological principles made by persons not qualified to make geological decisions relative to civil engineering projects.

This does not imply that no geologists other than engineering geologists may contribute to such projects. For example; the geophysicist, the geochemist, the X-ray mineralogist, the ground water geologist or hydrologist, and others in highly specialized geological disciplines, may play a most important role in contributing essential information to the engineering geologist. However, many of these specialists may NOT be qualified by experience and training to assume the geological responsibility involved in highway geology, tunnel problems, damsite foundations, landslide investigations and similar fields of engineering geological applications.

In view of my experience in more than fourteen foreign countries, and throughout the United States, I speak with some feeling on this subject.

As former chief geologist for the Pennsylvania Turnpike Commission; and such present affiliations as consultant for Parsons Brinckerhoff Quade and Douglas (New York); Ammann & Whitney (New York) the Board of Consultants for the Tennessee Valley Authority; Elec-

troconsult (Milano, Italy); Wabash Drilling Company (Missouri), and others: and with experience as a consultant on the St. Lawrence Seaway; for the World Bank in Lebanon; for the California Division of Highways; on the Fort Ritchie Project in Maryland; NORAD in Colorado; SAC in Nebraska; several missile sites; the Autopista in Venezuela, and many others (see Who's Who); it is my conviction that your Senate Bill 1349 is extremely important to the public safety and welfare of the citizens of the State of California.

The qualifications of engineering geologists in California should be examined closely and standards of examination, training, and experience determined in large part by such qualified personnel as may be found on the roster of the *Association of Engineering Geologists* with headquarters in Sacramento.

It is my hope that a strong and wise licensing law may find favor with your committee, to the benefit of all Californians.

Very truly yours,

ARTHUR B. CLEAVES
Professor, Engineering Geology
at Washington University (St. Louis)

STATEMENT OF MR. JOHN E. KILKENNY

To the Senate Factfinding Committee on Business and Commerce

April 7, 1964

Mr. Chairman—Members of the Committee:

My name is John E. Kilkenny and I am employed by the Union Oil Company of California, P.O. Box 7600, Los Angeles, California, in the capacity of domestic geological coordinator.

In behalf of the Pacific Section of the American Association of Petroleum Geologists, which I have served as president during the year 1963-64, I wish to make a statement to your honorable body opposing Senate Bill 1349.

In order that the committee may be acquainted with the organization that I represent, I should like to review for you the structure of our society and the size and scope of its membership.

The Pacific Section of the American Association of Petroleum Geologists is affiliated with and subordinate to the American Association of Petroleum Geologists, a worldwide organization having a membership of 14,907 geologists as of March 1964. The Pacific Section in turn consists of 1,015 active members, 825 of whom currently reside and practice in California. Many of our members belong not only to the parent Pacific Section but also to its subsidiary societies, namely the Coast Geological Society, the San Joaquin Geological Society, the Northern California Geological Society, and the Sacramento Petroleum Association. With this brief introduction, it should be evident that the organization which I represent as president constitutes a significant body of practicing geologists in California.

The Pacific Section of AAPG opposes Senate Bill 1349 on the grounds that the bill, if passed, would restrict the practice of certain phases of geology in California and, further, would divide the geological pro-

fession into two antagonistic elements. As presently worded, S.B. 1349 would confine the practice of ground water geology, for example, to those who would be licensed as engineering geologists. Thus, other able geologists, especially those experienced in petroleum exploration and production, would be proscribed from practicing ground water geology unless they first qualified as engineering geologists. Under S.B. 1349 petroleum geologists do not possess the minimum qualifications and experience to so qualify. As we believe there are as many, if not more, petroleum geologists who are competent in the field of ground water geology as there are engineering geologists, passage of S.B. 1349 would work to the advantage of the few at the expense of the many. Indeed, certain petroleum geologists depend almost entirely for their livelihood on income derived from ground water studies. These geologists would be prevented by S.B. 1349 from earning their living unless they first obtained licenses as engineering geologists.

The Pacific Section of AAPG has a far more fundamental objection to S.B. 1349. Passage of the bill would permit a comparatively small segment of the geological profession in California to obtain licenses to practice, whereas a much larger group would remain unlicensed. This is not to deny the need of the engineering geologists to obtain registration and status equivalent to that of the civil engineers with whom they so closely associate, but it is our feeling that registration of engineering geologists alone would lead to alarming disunity within the profession. We may cite, by way of example, the two basic professions—medicine and law. In both these traditional vocations the practitioner is first and foremost a doctor and a lawyer, and secondarily a specialist. In the same way, we believe that an earth scientist should be a geologist first and an engineering geologist, petroleum geologist, economic geologist, mineralogist, mining geologist, etc., only after he has presented acceptable basic credentials. Should the engineering geologists be successful in their movement for registration, we may expect other geological specialists to seek similar recognition and ultimately the total fragmentation of the profession.

The Pacific Section of AAPG believes that the public health, safety and welfare of California would be best served by the registration of all qualified geologists in the state. The Pacific Section agrees with the Association of Engineering Geologists that engineering geologists should be registered so that they may enjoy the same status as do the engineers with whom they work. Overriding this necessity, however, is the need for unity in the profession and the Pacific Section regards S.B. 1349 as a wedge which would split geologists with essentially the same background, and in many cases training, into two disparate groups. Because the Pacific Section is sympathetic to the needs of the engineering geologists, we do not seek to abolish efforts to achieve geological registration and we respectfully urge your honorable body to postpone consideration of S.B. 1349 until a substitute bill designed to register all qualified geologists can be introduced. Such a bill is currently in preparation under the sponsorship of the American Institute of Professional Geologists.

Thank you for the privilege of allowing me to address you.

STATEMENT BY ARTHUR O. SPAULDING

To the Senate Factfinding Committee on Business and Commerce

April 7, 1964

Mr. Chairman—Members of the Committee:

My name is Arthur O. Spaulding and I am employed by the City of Los Angeles as the city's oil administrator. I am a member of the Society of Petroleum Engineers of the American Institute of Mining Engineers, and a member of the American Association of Petroleum Geologists. For the year 1963-64 I have held the elective office of secretary for the Pacific Section, American Association of Petroleum Geologists. Recently I have been appointed by Martin Van Couvering as the Chairman of the Legislative Committee, California Section, American Institute of Professional Geologists.

I am appearing before you in order to report progress in connection with the preparation of a bill which would be a substitute for Senate Bill 1349 to which the AIPG Legislative Committee has declared its opposition. Before I submit such a progress report I should like to tell you something of the makeup of our committee, in that, from what Mr. Van Couvering has told you, the American Institute of Professional Geologists is an organization which, hopefully, will field a membership from all walks of the geological profession. To be properly representative then, our committee should be composed of various kinds of geologists.

Our chief problem in staffing a legislative committee now is that there has been very little time to assemble it. Only recently has the American Institute of Professional Geologists been requested to carry the ball for a number of geological groups in California, and we have found it difficult to collect a diversified committee of geologists in time to plan constructively for this public hearing. In any event, the AIPG Legislative Committee presently consists of the following members:

1. Mr. Tom Baldwin, of the Humble Oil and Refining Co., a member of the AAPG and former Pacific Section president.
2. Mr. Harold Clark, retired chief reservoir engineer from the conservation Committee of California Oil Producers; member of both AAPG and the Society of Petroleum Engineers of AIME.
3. Mr. Linn F. Adams, exploration manager for the Standard Oil Company in La Habra.
4. Dr. James A. Noble, formerly on the staff of Caltech, now a consulting mining geologist, and a member of the Society of Economic Geologists.
5. Dr. Thomas L. Bailey, general geological and ground water consultant and a member of AAPG.

(It should be worth noting, in connection with Dr. Bailey, that he derives a substantial proportion of his income from activities which the Association of Engineering Geologists cherish as their own professions. Dr. Bailey would be unable to continue practice if S.B. 1349 were passed and he were not registered under this bill.)

6. Mr. Elmo W. Adams, consulting geologist and registered engineer; a member of both AAPG and AIME.

7. Mr. Robert H. Paschall, Senior Mineral Deposit Evaluation Engineer for the State of California; a member of both AAPG and AIME.

From this list it is evident that our committee consists of a wide spectrum of geological interests with heavy accent on petroleum geology, naturally, because of the preeminence of petroleum as a mineral commodity in California. As our committee matures, we hope to have a greater range of geological representation and to this end we have invited the Association of Engineering Geologists to participate in objective discussions. To date the latter group has not answered our invitation and has remained silent on our suggestion that they join with the American Institute of Professional Geologists to secure multilateral registration.

On April 2, 1964, the Legislative Committee of the AIPG held a meeting in order to discuss the legislative goals for the AIPG in California. Consonant with the objectives which have been described for the AIPG by Mr. Van Couvering, the primary purpose of our committee has been to consider legislation which would register all qualified members of the geological profession in California. I am happy to report to you at this time that a preliminary draft of such legislation has been prepared and is currently under modification by our committee. The chief revision which we contemplate in this early draft of legislation is the elimination of the descriptions of any geological specialties which may be practiced by geologists in California. In order that our proposed legislation would have universal appeal among all practicing geologists, we believe it appropriate not to define, as an elemental part of our bill, any of the so-called specialties of petroleum geologist, engineering geologist, mining geologist, etc. Rather, we would establish simple criteria for the registration of all geologists who meet certain minimum standards. Should there be a desire for emphasis upon specialties, such as engineering geologists and petroleum geologists, these might be better defined at a later date or in a subsidiary bill. Unfortunately, our work is not in such a stage of completion that we may furnish your committee with a draft of our proposal so that you might consider it in comparison with S.B. 1349. But it is our hope that before the 1965 General Session of the California State Legislature our committee will have completed such an all inclusive bill to register all qualified geologists in California.

We respectfully solicit your committee's indulgence until a date later in 1964 when we may present such a bill to you for your consideration.

RESOLUTION

Passed and Adopted by San Joaquin Geological Society

December 9, 1963

WHEREAS, San Joaquin Geological Society has reviewed State of California Senate Bill 1349 entitled, "A Proposed Act to Register and Regulate Engineering Geologists," and

WHEREAS, It is believed that the passage of Senate Bill 1349 in its present form would be inimical to the best interests of the geological profession in the State of California, and

WHEREAS, San Joaquin Geological Society recognizes the need for the registration and regulation of professional geologists and believes that assistance and encouragement should be given to the passage of legislation which would benefit the geological profession as a whole.

IT IS HEREBY RESOLVED that the San Joaquin Geological Society shall:

1. Inform the Pacific Section of the American Association of Petroleum Geologists and the Business and Commerce Committee of the Senate of the State of California and any other interested parties of its opposition to Senate Bill 1349.
2. Indicate to the Pacific Section of the American Association of Petroleum Geologists and to the Business and Commerce Committee of the Senate of the State of California that it is in favor of acceptable legislation which would provide for the registration and regulation of all professional geologists.

Senate Factfinding Committee on Business and Commerce
Senator Alan Short, Chairman

HEARING ON S.B. 1349, APRIL 7, 1964

Testimony of H. R. Taber, President, Association of Engineering Geologists

As President of the Association of Engineering Geologists, representing some 270 practicing geologists in the State of California, I wish to express the support of the association for S.B. 1349 under consideration by this committee. Written statements, previously submitted by W. I. Gardner and P. J. Guthrie, cochairmen of the association committee on registration, express the policy of the association on this legislation. Suggested changes in S.B. 1349 as outlined by Mr. Guthrie are to meet two objectives.

First, the deletion of the phrase "or a registered civil engineer" in lines 35 and 36, Section 2841 (1) is to implement the essential qualification that an engineering geologist have training under direction of a geologist.

Second, the balance of the deletions are intended to have the effect of restricting the proposed legislation to protection of the title "engineering geologist" without restricting the practice of geology or the use of the titles "Geologist," "groundwater geologist," "petroleum geologist" or other title. We believe that a law implementing such title protection would not conflict with existing definition of "civil engineering" or definitions of field expressed by other geologists; such conflicts would no doubt occur under a law regulating the practice of engineering geology. It is our opinion that regulation of the use of the title "engineering geologist" would enable those jurisdictions, agencies and organizations within which the need arises, to specify that certain work be done by an engineering geologist without requiring that all work within the State and within an arbitrary definition be performed by a licensed engineering geologist.

It is not the intention of the association to hinder efforts of the geologic profession as a whole in seeking or attaining registration under the laws of the State of California. We believe that such legislation could be integrated with the "Engineering Geologists Act" at such time as this may be desirable. We do believe, in addition, that there is present need for legislation recognizing and regulating the field of engineering geology on a statewide level.

The urgency of such regulation is demonstrated by existing local regulation and the overriding consideration of the public welfare. Conditions arising, particularly in southern California, in the past few years have prompted the officials of local governmental agencies to require submission of geologic reports in addition to engineering reports for certain types of projects; and further, that the submission of such geologic reports be by engineering geologists approved by the local agency. In view of the facts that the conditions leading to this situation are closely related to intensive urbanization and that such urbanization may now occur in almost any portion of the state, it is apparent that such local regulation of a professional field may proliferate rapidly. In addition to the very real possibility of wide variations in standards, there would be almost certain confusion to the public, to the agencies and to the practicing professionals in an activity regulated by several tens of local agencies. We believe that the required regulation can be administered more economically and effectively by an existing State agency which has the present responsibility of statewide regulation of related professional practice.

Existing local regulation is, of course, a manifestation of the underlying consideration of the public interest, i.e., regulation was found necessary to the public safety and welfare. In addition to this publicly recognized relationship of engineering geology to public welfare, a review of major news events within the past year further indicates how the assessment of geologic conditions is of concern to the public safety and the economy. These events have been associated with situations as diverse as dam foundations, reservoir conditions, landslides and nuclear developments. We believe it to be evident that the assessment of geologic conditions and factors furnished to professional engineers is an integral part of the engineering works and should thus be recognized as a professional activity by the State. The responsibility of the engineering geologist for a vital part in engineering projects would thus be established and standards set for practice in his field.

The association believes that S.B. 1349 with the modifications suggested by the Association would effectively control a now unregulated field in the public interest; that it would be a supplement to and not interfere with the Civil Engineers Act and that it would not preclude licensing of any other part or the whole of the geologic profession.

Association of Engineering Geologists

SOUTHERN CALIFORNIA EDISON COMPANY

Edison Building—P.O. Box 351

Los Angeles 53, California

April 3, 1964

SENATOR ALAN SHORT, *Chairman*Senate Factfinding Committee On Business and Commerce
State Capitol

Gentlemen :

As chief civil engineer and head of the civil engineering division for the Southern California Edison Company, I am directly accountable to management for the design of all company civil engineering facilities. Within my organization are two engineering geologists whom I must depend upon for advice in regard to the multiplicity of geologic problems which intimately relate to the safe design, construction, and maintenance of civil engineering features.

It is readily obvious and I have found that there must be a close working relationship between the engineering geologist and the civil engineer and that there should be a common responsibility by the two disciplines to protect the public health, safety, and welfare. Such responsibility can only be realized by establishing standards for professional performance.

I urge passage of this legislation.

R. W. DENNIS

Chief Civil Engineer

ROBERT D. DALTON, JR., *President*

6 April 1964

SENATOR ALAN SHORT

Business and Professions Committee
State Capitol Building
Sacramento 14, California

Dear Senator Short :

We are taking this opportunity to comment on your committee's interim study of S.B. 1349 (1963 legislative session) concerning the registration of "engineering geologists".

Because of our interest in all matters which may effect the protection to the public provided by the "engineer's act" we have made a careful study of the matter you are about to consider. We will not presume to comment on the general subject of registration for geologists but will comment only on those facets of the proposed legislation which we feel are not consistent with the public interest.

Our first objection is to the title itself. "Engineering geologist" carries with it the implication that the holder of such a title, if not

an engineer, certainly has an engineering background. The proposed legislation, however makes no provision for either engineering education or training.

The stated reason for the legislation and the definition appear to continue the fiction that an "engineering geologist" is somehow qualified to perform engineering services despite the fact that he is not so trained.

It is our contention that no person should perform civil engineering functions unless properly educated, experienced, examined and licensed. The "engineering geologist" as described in the proposed bill will be allowed to perform some civil engineering functions without meeting any of these requirements.

The proposed inclusion of a geologist on the Board of Registration for Civil and Professional Engineers creates another problem. While it is recognized that geology is a scientific field and has much direct relationship to civil engineering problems, geologists, in general are not engineers. A geologist member of the board would not be in a position to properly function in the duties relating to engineering and would provide the public with a source of confusion of identity.

In the interest of brevity, we will not cite specific objections to the wording in S.B. 1349. There are many, but most are directed to the general objections above, however, we would like to state that if the committee should find that it is in the public interest to provide registration for geologists, we feel that very careful study is warranted to insure that the field is limited to the area for which the registrants are trained and that the public is protected from a confusion in title and function.

Very truly yours,

ROBERT D. DALTON, JR., *President*

March 23, 1964

THE HONORABLE ALAN SHORT, *Chairman*
Senate Factfinding Committee on Business and Commerce
The State Senate
State Capitol
Sacramento, California

Dear Sir:

We, the undersigned officers of the Pacific Section Society of Economic Paleontologists and Mineralogists, a geological society, which has a membership of 126 practicing professional geologists, wish to bring to your attention that Senate Bill 1349, as presently composed and worded to register a small segment of the geological profession, is not in the best interest of the public health, welfare, and safety, and it restricts the rights of practice and tends to divide and separate fields of professional geologists.

We are in support of a bill which is now being prepared to register all qualified geologists who, in the interest of public health, safety, and

welfare, may be required to register or who may wish to register under the Business and Professions Code of the State of California.

We urge that action on S.B. 1349 be deferred until a bill is prepared which would register all qualified geologists.

Sincerely,

RICHARD L. PIERCE
President
JAMES I. WATKINS

Re: Senate Bill 1349
Registration of Engineering Geologists in California

Gentlemen:

I am very interested that California is considering a bill for the registration of engineering geologist. Such a bill would be of great service to the general public, the State of California, the engineering profession, and the geology profession. It would serve as a model for the rest of the United States and would probably stimulate the passage of legislation in many states.

In Tennessee, I feel that we badly need registration of geologists, and, therefore, urge that you give favorable consideration to this legislation which will, in turn, help us to take similar action in the future in Tennessee.

Yours very truly,

DIVISION OF GEOLOGY
W. D. HARDEMAN, *State Geologist*

ELMO W. ADAMS, CONSULTING GEOLOGIST
747 Winchester Drive, Burlingame, California

March 31, 1964

SENATOR ALAN SHORT, *Chairman*

Senate Factfinding Committee on Business and Commerce
State Capitol
Sacramento, California 95814

Dear Senator Short:

Thank you for the notice of hearing on Senate Bill 1349 pertaining to registration of engineering geologists, said hearing to be held April 7th in Room 2040, State Capitol, commencing at 1:30 p.m.

The writer as president and representative of the Northern California Geological Society, wishes to testify on this bill. Please place me on the agenda and provide me with necessary instructions.

I am submitting herewith the statement I wish to make.

1. There are probably in excess of 2,000 geologists practicing in the State of California. Senate Bill 1349 is designed to register about 300 geologists practicing as engineering geologists.
2. Geology is a diverse and rapidly growing science. Professional geologists in California practice many specialties, each requiring a variety of disciplines. Each job requires different proportions of mineralogy, petrology, stratigraphy, structure, paleontology, geophysics, hydrology, and the many other branches of geology. Definition of the limits of a branch or specialty is almost impossible.
3. Senate Bill 1349, in attempting to define "engineering geology," in Section 7803,* correctly describes some of the ordinary activities of many petroleum geologists in exploring for and developing oil and natural gas resources.
4. S.B. 1349 would provide legal status for a restricted title in geology and would tend to infer that other geological titles are less worthy, would provoke dissention among those practicing geology due to overlapping and conflicting fields. Claimed infringement in working areas and titles would make administration difficult and would continuously require additional regulation to properly administer such a law.
5. Because of the nature of geologists' work in dealing with natural resources and their relationship to the public's evergrowing needs and requirements, it would be in the public interest and for the benefit of the safety, health, and welfare of the people of California to register geologists as a profession. Any bills to register geologists should provide for all geologists who wish to register or who may be required to register in the interest of public welfare, health, and safety.

* Section 7803. The application of geologic data, techniques, and principles to the study of naturally occurring rock, soils, materials, and groundwater for the purpose of assuring that geologic factors affecting the planning, design, construction, operations, and maintenance of civil engineering works, and the conservation of groundwater resources are recognized, adequately interpreted, and utilized.

6. Submittal of S.B. 1349 by the engineering geologists has prompted other geologists practicing in California to carefully review the effect of registration on their profession and relationships to the public. Many geologists from different specialties now agree that registration should provide for all geologists. Such a bill is in preparation. It is believed that such a bill can receive acceptance of a large segment of the profession, and be ready to submit to the Legislature prior to January 1, 1965.

I hope that you will include in your recommendations and findings that it would be in the interest of public welfare, safety, and health for your Committee to recommend that a bill registering all geologists would better serve the people of California than a bill to register a small segment of geologists.

Thank you for allowing me to present my comments and thoughts on this subject.

Sincerely,

ELMO W. ADAMS, *President*
Northern California Geological Society

CONSULTING ENGINEERS ASSOCIATION OF CALIFORNIA

800 West Colorado Boulevard, Los Angeles 41, California

HUGH C. CARTER, *President*

RALPH M. WESTCOTT, *Executive Director*

SENATOR ALAN SHORT

Chairman, Business and Professions Committee

2040 State Capitol

Sacramento, California

Dear Mr. Short:

SB 1349—*Registration of Engineering Geologists*

The Consulting Engineers Association of California has considered SB 1349 providing for registration of engineering geologists, and wishes to bring to your attention some aspects of the bill which need careful consideration.

The copy of the bill which we have had available for study is dated April 23, 1963. It may be that some changes of which we are not aware have been made which would improve the bill. In any event, it is our hope that our comments will be taken as being constructive.

We believe that enactment of SB 1349 would not be in the best interest of the safety, health, and welfare of the people of California if it is passed in such form as to permit geologists to engage in the practice of engineering. The educational and experience requirements for registration do not include qualifications in engineering. Briefly, the scope of practice as can be construed from "Scope of Regulation" is not compatible with the education and experience required under "registration."

We believe that the civil engineer exemption clause will lead to difficulties in interpretation and administration if it includes the phrase "insofar as he practices civil engineering in its various branches." We

believe that for the legislation to be satisfactory, a registered civil engineer should be exempt from registration under the provisions of an act providing for the registration of geologists.

If it can be shown that there is a real need for registration of geologists, the Consulting Engineers Association of California is not opposed to such registration. In the event that it should be decided that there is a real need for the registration of geologists, the Consulting Engineers Association of California is desirous of being of assistance in preparing legislation which will truly be in the best interest of the safety, helath and welfare of the people of California.

Very truly yours,

HUGH CARTER, *President*

March 26, 1964

ALAN SHORT, *Chairman*
Senate Factfinding Committee on Business
and Commerce
State Capitol
Sacramento, California 95814

Gentlemen:

The forthcoming hearing on Senate Bill 1349 has been brought to my attention.

Here in South Dakota, we are not acutely aware of the grave problems that are present every day in your great State of California in the field of engineering geology. In every news media every day we hear about the failure of some structure that has served or would serve the public. The public of course, finances these structures, and are entitled to get the most out of their expenditure. To get the most, their interests should be protected by having qualified, competent, registered engineering geologists on the job in their behalf working hand in hand with the other qualified, competent, registered personnel e.g., civil, mechanical et al. engineers.

My work as an engineering geologist in South Dakota is concerned mainly with the management and administration of the Water Rights Law. I can readily see although, the myriad of problems that could come up in our state by not having qualified engineering geologists to assist in the planning and construction of water resource projects of any size, just to mention one particular field.

The records of the past centuries have shown a need for the registration of doctors, lawyers, and other fields that directly affect the safety and welfare of the public. Why shouldn't registration of engineering geologists follow the same thinking and course of action that these areas have taken?

California Senate Bill 1349 has my wholehearted support, and I sincerely urge your support.

Sincerely,

WILLIAM H. MILLER
Engineering Geologist
1001 E. Dakota
Pierre, South Dakota 57501

December 17, 1963

MR. ALAN SHORT, *Chairman*
Business and Commerce Committee
807 North San Joaquin Street
Stockton, California

Dear Sir:

I wish to express strong opposition to Senate Bill 1349 (Registration . . . of Engineering Geologists . . .). I am a graduate geologist (USC), presently employed as a supervisory geologist by Humble Oil and Refining Company and have been continuously employed as a geologist in California for 27 years.

I am a past president (1960) of the Pacific Section American Association of Petroleum Geologists (1,500 members and affiliates in California). I am presently a candidate for vice president of the National American Association of Petroleum Geologists (15,000 members, with worldwide coverage). In these capacities I have been responsible for various studies of the problems involved in registration or licensing of members of our profession.

In my opinion, our organization (75 percent of the professional geologists in the United States) would be unfairly discriminated against by Senate Bill 1349.

The Legislative Committee of the American Association of Petroleum Geologists is presently preparing a model law to serve the purposes of licensing in those states that desire such action. We feel the advantages of uniformity in professional standards will be best served by conforming as far as possible within our state to such a model law.

I, therefore, am opposed to the present Senate Bill 1349, which would cover only a very small splinter of my profession, and in effect would create a "Protective Guild" for members of that splinter group.

Yours sincerely,

T. A. BALDWIN

CHARLES E. PRICE, GEOLOGIST
6257 Fairwood Avenue, Las Vegas, Nevada 89107

March 24, 1964

ALAN SHORT, *Chairman*
Senate Factfinding Committee on Business
and Commerce
State Capitol, Sacramento,
California 95814

Sirs:

I am writing to urge approval of the California Senate Bill 1349, providing for the registration of engineering geologists.

As you may know, engineering geologists are registered here in Nevada. By means of this registration, we have been able to ensure

that the practitioners are well qualified technically, and that they perform their duties in an ethical manner.

Our rapidly expanding economy in southern Nevada requires the services of increasing numbers of engineering geologists, and while many California consulting engineering firms operate here, they cannot provide us with qualified registered geologists. Should registration be come available to consulting geologists in California, many of these men will undoubtedly become registered here also, under our reciprocity agreements.

Senate Bill 1349 will thus have the effect of not only safeguarding the public in California, but will also aid the State of Nevada by providing us with a "roster" of qualified engineering geologists on which we can draw to consult on our construction projects.

Sincerely,

CHARLES E. PRICE

COUNTY OF SONOMA

OFFICE OF SURVEYOR AND ROAD COMMISSIONER

DONALD B. HEAD, County Surveyor and Road Commissioner

April 2, 1964

SENATOR ALAN SHORT

Chairman, Senate Factfinding Committee on

Business and Commerce

Sacramento, California 95814

Dear Sir:

I have reviewed SB 1349 concerning the licensing of engineering geologists. It appears to be a very good bill as it would require qualifications in this particular field of geology. With this requirement it appears that the selection of a qualified person would be assured. At the same time the licensed person would be responsible.

Yours very truly,

DONALD B. HEAD

County Surveyor and Road Commissioner

PRIVATE EMPLOYMENT AGENCIES

PRIVATE EMPLOYMENT AGENCIES

Two employment agency bills were referred to the Senate Factfinding Committee on Business and Commerce, AB 1885, introduced by Assemblyman Meyers, and SB 1037 sponsored by Senator Gibson. AB 1885 would amend the Labor Code to provide for minimum education and experience standards applicable to those qualifying for an employment agency license. The applicant would be required to have four years of college and six months experience in an employment agency, or three years of college and two years of experience, or any combination of college time and experience equivalent to five years, or a total of five years experience.

SB 1037 would remove the licensing and regulation of employment agencies from the jurisdiction of the Department of Industrial Relations, and establish a new agency for the purpose within the Department of Professional and Vocational Standards. Under this bill, regulation would be in the hands of an appointed board similar to those of other bureaus existing within the Department of Professional and Vocational Standards. In addition, the controversy provision relative to nonpayment of fees, embodied in present legislation, would be eliminated.

Background of the Subject

Employment agency licensing, as we know it in California, dates from the year 1913. With but minor exceptions, the present licensing provisions are the same as were originally enacted in that year. The 1913 law was amended in 1923 and again in 1957. The California licensing law does not differ substantially from the laws of the other 49 states.

Private employment agencies are an obvious outgrowth of the needs of industry to find qualified employees. The earliest agencies were utilized to supply domestics, workmen in the lumber and mining industries, and laborers for the construction of the great railroad systems. The private agencies are generally a product of and expand during the times of relative prosperity. Public employment agencies, on the other hand, develop as a result of adverse business conditions and in periods of recession or depression.

The U.S. Employment Service, which dates from 1907, was established to furnish job information to immigrants upon their arrival in our country. During World War I, federal funds were expended to establish 800 federal employment offices to help staff the wartime projects. The Employment Service in California, operated by the State, is subsidized by the federal government.

There are approximately 3,000 private employment agencies licensed by the State of California at the present time. These agencies fall into six different categories—general agencies and five specialties as follows: theatrical and motion picture agencies; labor contractors; nurses'

registries; artists managers; and farm labor contractors. At the present time there is a move on the part of the private employment agency associations to secure legislation which will remove the government from the employment agency business. There have been numerous articles in the business publications expounding the theory in support of this view. In addition, articles and speeches have been printed in the "Congressional Record," and legislative hearings in the Congress are contemplated. Needless to say, the private employment agencies face aggressive competition from the State Employment Service.

The bills submitted to the committee for further investigation deal with the subject of the general employment agency. There are approximately 1,200 of these general agencies licensed by the state today. These agencies commonly supply the clerical and technical help for our defense industries: engineers, computer operators, and the newer type of jobs in the space field. There are also some agencies specializing in domestic help and babysitters, but the vast majority are concentrated in the clerical, technical, and administrative areas.

The number of general agencies has grown with the population of the state. In 1940, 258 agencies were licensed and, as previously stated, there are almost 1,200 licensees today. In 1962, the general employment agencies made a total of 520,294 individual placements. For these services, they received a total of \$16,336,600.

The trend in private agencies over the years has been from the worker-type or manual worker-type of agency to the present clerical and service-type placement. Obviously, conditions that existed in 1913 do not exist today. The "shanghai" that was famous in San Francisco, where "crimps" doped individuals and placed them aboard the sailing ships, is of course a thing of the past. The unholy alliance between employment managers and agencies, which resulted in fee splitting and a constant turnover of jobs to fatten both their pockets, does not exist in the same degree or in the same fashion as it did in those years. Fee splitting, false advertising, and misrepresentation do still exist, to some extent. But it is primarily the changed emphasis in placement by the private employment agencies that calls forth the urgent request on our part for new regulation.

The stress in the field of commercial placements as opposed to manual labor type of placements can be traced in large measure to the growth of unions in the State of California. Many employer associations and labor groups in effect operate their own hiring halls and employment agencies. Moreover, the public employment agencies have dominated the general labor field since their growth during World War II. As for the special agencies, the legislation under consideration by the committee would exclude them and have no effect on their licensing.

The subject of employment agency licensing has been scrutinized by many committees of the State Legislature during the past years. On the one hand, the private agencies and their associations have been pressing for a change in regulations which they feel will meet their needs; and on the other hand, labor unions and some allied groups have also been active in behalf of proposals which would limit the fee an agency could charge for securing a job for a worker, and in some instances have sought their outright abolishment.

Testimony of Witnesses

The private agencies were ably represented by a spokesman from the California Employment Agencies Association, which claims a membership of 450 out of the approximately 1,200 licensees in the State of California.

With respect to AB 1885, only one industry spokesman appeared to support the bill: Mr. Mervin Kaney, partner in the K & M Personnel Agency of Sacramento. He urged its passage and recommended that the committee incorporate a recommendation favorable to its passage in this report. Mr. Kaney testified, in part:

"There is nothing that I have been able to find in the code that says that any Tom, Dick or Harry cannot go out and open an employment agency if he provides the proper bond and license. Educational background is not important. I personally believe that it should be. Experience is not important. Anybody, a dress clerk in a department store or anybody else can go out and open up and take the welfare of the applicants into their hands before they have been in business but a very short time. I do think that while I do not believe AB 1885 is the answer to all fields, employmentwise or any other business, I do believe that it is the first step forward into setting up a better practice throughout the industry."

Mr. Terry Feil, of the Business and Commerce Agency of the State, speaking on behalf of Assemblyman Meyers, indicated that the bill had been patterned after the minimum qualifications which the Department of Employment sets up for its employment counselors. Mr. James Rubey, president of the California Employment Agencies Association, opposed this bill.

But Mr. Rubey spoke in support of SB 1307, urging the change in regulation from the Department of Industrial Relations to an independent agency in the Department of Professional and Vocational Standards:

"Public welfare demanded that employment agencies come under state regulation, which they did in effective terms, in 1913. In commenting upon the law, which was enacted in response to that situation, the Bureau of Labor Statistics, in its 16th biennial report for 1913-14, said, 'Two years ago the bureau drafted and succeeded in having passed one of the most drastic laws for the regulation of private employment agencies.' At that time both public and private agencies were regulated by the bureau and in the same report the bureau added, 'In order to make free employment bureaus a real success, it will be necessary to further restrict'—and I hope the committee will listen—'and eventually eliminate private employment agencies.' Thus, on the record 50 years ago the state regulatory authority made no bones about its opposition and downright hostility to the industry to the ultimate extent of wanting us out of business."

In continuation, Mr. Rubey indicated that while the official language has changed, the understanding between the Department of Industrial Relations and the employment agency industry is not what it should be:

"Now, while our present-day regulatory authority is the Labor Commissioner of California, he tempers official language a great deal with respect to this quotation. We regret that there still remains much hostility on the part of the regulatory authority towards our industry."

State Labor Commissioner Sigmund Arywitz replied to these assertions of the association as follows:

"We do not have a hostility to the agency. We do have a good working relationship, but we do seek to be firm; we seek to be effective; we seek to correct abuses where we find them. Now I might belabor the point of the need for regulation, but I would like to cite from a Supreme Court decision which states, 'The abuses which have grown up in this line of business have been long recognized and have been subject both to legislative acts and judicial decision. It has now become definitely settled that statutes regulating employment agencies fall within the police power of the state.'"

The association in its presentation commented on the changing economy of the State of California, and asserted that the counseling done by the employment agencies has led to better practices in the placement of technical and varied personnel, quite distinct from the type of operation envisioned when present legislation was enacted. They also strongly asserted that they have independently attempted to raise the standards in the industry, with little or no help from the licensing body.

Mr. Rubey: "Our association has adopted a strong code of ethics and I believe that you gentlemen have copies submitted with the brief, to which members subscribe as a condition of membership. This code is enforced among members and every attempt is made to gain compliance by nonmembers. Through this procedure, we have been successful in resolving many situations to the satisfaction of all concerned, without bringing them to the attention of the Labor Commissioner. In 1958, the association also founded the California Institute for Employment Counseling which administers accreditation examinations based on placement and personnel practices and on the Labor and Administrative Codes and other laws pertinent to employment agencies. The program is administered by the Institutes Board of Trustees composed of licensed and practicing agency owners."

The agencies feel strongly that they are not seeking an escape from regulations, but that they want to have a new bureau which will establish new standards and better service to the public. It was the consensus that new regulations should be in keeping with the needs of the modern employment agency, job seeker, and employer. It is their belief that the present regulation and licensing does not meet these goals. Mr. Rubey concluded his testimony as follows:

"We definitely do not believe that the licensing standards as proposed in Senate Bill 1037 would not deter any reasonably qualified individual from going into the employment agency business.

Our primary reason for speaking in qualified opposition to Assembly Bill 1885 is because we believe the standards it proposes are unnecessarily restrictive. The potential of this industry is great and the problem is not one of too many employment agencies, but one of competent employment agency management."

In urging the enactment of SB 1037, the association presented additional testimony by Jean Widdicombe, owner of an employment agency in Whittier; Mr. Robert Livingston, an employment agency operator in Sacramento; and Mr. James Pierce, who operates employment agencies in Los Angeles and Pasadena, California. They were all opposed to the present regulatory and licensing body under which they are controlled. The following testimony by Jean Widdicombe was typical:

"This is probably the one thing on which we all can agree, and that is that there should be a transfer of authority out from under the Division of Labor Law Enforcement. This is essential to the successful continuing operation of employment agencies in the service of the people of California. And now, with us it isn't a question of whether we are going to be licensed or not. We are merely requesting a transfer or requesting to be put under the Division of Professional Standards. We want to be licensed. We have been licensed for many years. With us, it is a question of would the public be better served if the agency were under the Division of Labor Law Enforcement? All you have to have today to secure a license is \$100, two friends down the street, a bond for a \$1,000 and evidence of good moral character. The Labor Commissioner may cause an investigation but he isn't required to. So far as we know, this is the only vocational or professional license issued by the state without any qualifying standards of competence. Really, we can only compare it with a license for fishing or hunting. You don't qualify for it, you just buy it. All the regulation is done after issuance. Now, every year 30 percent of the entire industry of some thousand agencies comes in for new licenses."

The chairman inquired as follows:

"Supposing they inaugurated a program of giving examinations to applicants to make sure that they knew at least the state's laws on the subject of employment agencies and other pertinent matters, pertinent to the business and operation, and running of the business. Would you be for that?"

Miss Widdicombe answered:

"This is definitely one of the conditions of the bill. This is why we are here. We have felt this way for years and this is the culmination of a lot of effort in this direction. We definitely want qualifying examinations."

Chairman Short asked:

"Have you asked the Labor Commissioner to do something like that?"

Miss Widdicombe answered :

"Yes, we have. We have got 30 percent of these licenses issued without any qualifications or examination from the commissioner's office and he can't do much about that because he is given no authority. In 1961, our association brought up AB 509, which was an examination bill, into the Assembly. At that time, and at all times, the commissioner vigorously and successfully opposed adoption of these things. He has said that 'Anyone with a sixth-grade education can operate an employment agency.' Now, over the period of years, the Labor Commissioner has neither advanced ideas of his own nor has he endorsed suggestions developed within the industry for writing competency standards into the law. We have been available for conferences right in San Francisco. We have made it clear to the division in which we operate that we are anxious to do something in this line, and yet there has, up to this point, been no cooperation. The commissioner's disinterest and actual opposition to legislation intended to provide protection to the the public from the practices and activities of incompetent agency licensees is the major reason why we are convinced that nothing short of transference to another authority will make it possible to carry out such a program. I would like to go aside and say that I mentioned before that there is a philosophical difference. The Division of Labor Law Enforcement has always been, and possibly should be, labor oriented. Historically, labor and employment agencies have not seen eye to eye, have not been philosophically close. It is almost an impossibility to be regulated by an authority, I refuse to use hostility, but by an authority which is uninformed and unrealistic about the practical aspects of running an employment agency."

The agency owners in their testimony stressed their desire to have a board as opposed to a bureau chief, and the following testimony was recorded in this connection. Chairman Short questioned:

"Supposing you had a regulatory board within the Division of Labor Law Enforcement. You had two people from employment agencies, two people, well, someone having the job that Mr. Arywitz does and someone else from the division and a layman to make policy. How would that go?"

Mr. Robert Livingston, First Vice President of the California Employment Agencies Association and owner of an agency, answered:

"I think your answer at the moment, Senator, to that is as we have stated in the previous presentation. We feel we can do better and serve better under the Division of Vocational and Professional Standards. Our first preference is to be under a different department."

In the course of the public hearing, Senator Backstrand inquired as follows:

"I am consumed with curiosity and the sixth grade education requirement and you, I believe, spoke to the effect that it was like getting a hunting license. I was wondering whether there were

any statistics concerning the turnover in this particular field. How many agencies continue on year after year? How many of them are in for six years? If somebody has some figures, I would be most interested."

Mr. Kenneth Buck, Executive Secretary, California Employment Agencies Association, replied:

"Out of approximately a thousand licenses outstanding, issued by the Division, we estimated at any given time only about 750 operate. The turnover rate in the industry is about 30 percent per year. Each year 30 percent either change hands, come into existence or leave the field."

Senator Backstrand then asked:

"To what do you attribute this turnover?"

Mr. Buck stated:

"Predominantly, Senator, not only to poor business but the employment industry has not been good over the last few years. But we attribute more to incompetency. Of course, we do have a low capitalization income for this industry. Frankly, we feel that anyone who wants to come into the industry, who has the merits to do so and so long as there is a measure of competency, they can come in. But many simply don't know the business, Senator. That's the problem."

Further testimony dealing with the question of competency was offered by Mr. James R. Pierce, Past President of the California Employment Agencies Association. He urged the enactment of S.B. 1037, and stated:

"This is the heart of the bill, to make sure competent people are operating employment agencies in California. Poor practices which now exist in the employment agency field, in an overwhelming majority of cases, can be traced to lack of knowledge. Almost always we find that agency owners do not intentionally violate either the law or accepted standards of practice. They simply are uninformed."

Hearings on Controversies

The association urged that another section be added to SB 1037 to eliminate the so-called "controversy procedure" included in Section 1647 of the Labor Code. Agency witnesses were of the opinion that this law is archaic and should be abolished. Labor Code Section 1647 states that "in all cases of controversy arising under this chapter the parties involved shall refer the matters in dispute to the Labor Commissioner, who shall hear and determine the same, subject to an appeal within 10 days after determination." This has been the subject of a great deal of discussion and necessary clarification. The crux of the problem arises from the fact that the simple failure to pay a fee has been ruled a controversy within the meaning of the statute by the Attorney General's office. As a result, although an applicant has secured a job through the efforts of an employment agency, and has

signed a contract in writing agreeing to pay a fee for same, and does not deny owing same, both the applicant and the agency must appear before the Labor Commissioner or one of his agents for a hearing to determine that the fee is actually due. Administratively, the Labor Commissioner's office has tried to take the position that where no dispute existed, and where the applicant either admitted owing the fee or did not answer a request for information or appear in hearing, no controversy did exist. In 1953, legislation was introduced giving the Labor Commissioner the authority to certify that no controversy exists. The courts subsequently ruled that the language of the statute was ambiguous and not clear and negated the intent in the passing of this legislation. Consequently, in order for an employment agency to reach the courts and reduce their fee to judgment, they must have filed an application for hearing with the Labor Commissioner, secured his ruling that the fee is due, and then appear in court to affirm same. They cannot sue or attach without going through this process. The agencies feel that the Labor Commissioner's office is most exacting and that the process is time consuming. The testimony of Kenneth Buck on this matter was most illuminating:

"Let's take a very hypothetical but often occurring situation. This is what must happen before an agency can do more than ask politely for its fee: Since the commissioner is adverse to awarding a determination for the full fee short of 90 days, which is defined as a permanent position, it is not practical to file a request for a hearing until the applicant has been on the job for at least 60 days. After you file the request for hearing, you then, of course, assemble the documents and the statements and then you wait an average of 30 days more for the scheduled hearing, during which time a great many debtors, as we say in the business, 'skip.' At the hearing the representatives of the agencies must appear and prove that all documents are valid. Now, this is crossing the 't's' and dotting the 'i's.' For those on whom service has been effected there is an average 30-day period for the proposed determination. That is, after the hearing has been scheduled, the determination is not until a full month thereafter. Then, after the determination another 10-day period must lapse to allow for appeal to the Commissioner and after that there is a second delay waiting for a possible appeal by the defendant in that particular action to the Superior Court, which is available to them through the Labor Code. So it is now 140 days since the debt was incurred and this is a period during which, in many cases, the employment agencies have not received a nickel. Only at this point does the agency pull up level with other creditors in the business community in his ability to collect contract fees."

His testimony was further enlightening in that he stated:

"California is the only state with a controversy procedure. In other states a contract between an employment agency and its clients is regarded in the same manner as are other contracts and the differences between principals are resolved by the judiciary."

Mr. Buch concluded his testimony by stating:

"We do believe that the transference of authority, as proposed by Senate Bill 1037, is sound. We think it is necessary and essential to the public interest. We believe that the examination for who come into the employment agency field is vital and we do not believe that the regulatory authority and the administration of those examinations is advisable under the current mode of relations between this industry and the Labor Commissioner. We do not believe that the controversy procedure is any longer needed and that it should be repealed. Now, we are in no sense inflexible and we are not suggesting, Senator, that we should be without regulation."

Response to Committee Survey

It is interesting to note in connection with this legislation and the testimony that, prior to the hearing, the committee staff selected 50 employment agencies throughout the state, at random, covering every geographical area, for the purpose of eliciting information. The seven following questions were asked: How long have you operated an agency?; how many controversies have you submitted to the Labor Commissioner?; would you consider his decision fair?; did you receive courteous treatment?; how often has your agency been inspected by the Labor Commissioner?; what, in your opinion, should be the minimum qualifications for securing an employment agency license?; and, do you feel that the public can better be served if you are regulated by a different department or board?

Of the agencies contacted, about 90 percent responded. One-third of those replying indicated a desire for a change of regulatory authority; one-third were satisfied with the present type of regulation; and one-third were noncommittal and indicated that they did not care whether they were regulated by the Labor Commissioner or a new agency. The comment on one of the responses was interesting:

"My son, who is a partner, and who manages the northern California offices, does not think the change suggested should be made. There is good reason for this stand on his part. He and some of the older agencies owners think, and probably with good cause, that most of the complaints against the employment agencies are caused by actions in the southern part of the state. There are many more of them and many of the licensees are from the eastern United States where things may be different and also the size of this market, plus the extreme competition."

Out of all the questionnaires returned, only one agent stated that he did not receive courteous treatment from the Labor Commissioner's office, and the overwhelming majority felt that his decisions were fair.

Many of the replies indicated that they felt the Labor Commissioner was biased in favor of the worker and, in effect, bent over backwards to see that every "t" was crossed and every "i" was dotted. It was evident in checking over the testimony that little emphasis was placed upon the role of the worker and the protection afforded to him by employment agency regulations. The unemployed worker is quite weak in sales resistance, and could easily be subjected to unfavorable and unfair treatment if stringent regulations were not enforced. A maga-

zine article stated that when an applicant pays an employment agency fee, he is not buying just a week's salary, but a career and certainly his self-respect if he has been hunting work for any length of time. Under these conditions, no fee looks too high and no contract appears too unfair in view of the growing prospects ahead. The records also indicate that fee splitting, false advertising, and misrepresentation still exist, but the chiseler of today is much more sophisticated than the culprit of 1913.

Testimony of State Labor Commissioner

A great deal of the ill feeling existing between the private agencies and the Labor Commissioner is a question of communication and also a question of semantics. At the conclusion of the association's testimony, Commissioner Arywitz commented upon their presentation and pointed out that the Labor Code is the basic law of the state for the protection of the working man. He testified:

"The placement goes to the welfare of the wage earner and his family and the welfare of the wage earner and his family is something that is the concern of the Labor Code. There are many other sections of the Labor Code which may not deal directly with the question of an employer-employee relationship, but at the time that a person is jobless and is looking for employment is a time when he is extremely vulnerable. This is the argument that I have used in the past and I know, from my own experience, that he is most vulnerable to the point where every promise is a plausible one and where he will sign things that are put before him because his mind is on the job. He is in danger of having some misrepresentation. Senator Backstrand asked the question before about what kinds of skills would be necessary and experience, and the answer was given to him that an agency might take a job out of the "help wanted" ad and send the applicant on. Well, this is one of the things we are concerned about, but this is a policing question. This is a question of honesty and integrity. This is not a question of experience, of knowledge of professional aptitude; it is a question of, is the agency operator giving the jobseeker a fair shake? I concede that a great many of the agencies, the overwhelming majority of them, operate ethically and honorably and we have no problems. The 'bad apples' referred to in previous testimony are the ones that we have problems with, but the 'bad apples' are guilty of misrepresentation and of fraud, of taking advantage of the applicant. They are not guilty of lack of knowledge, but they are guilty of misusing the knowledge that they have. The Division of Labor Law Enforcement is responsible for enforcing most of the law dealing with employer-employee relationship and it does have experts in the fields, and the courts have recognized these experts. It has a general knowledge and experience with the whole area of what goes on after the employee has a job and it brings this knowledge to bear in its activity and relationship with the employment agencies and I would imagine after 51 years of dealing with employment agencies, that there is a great body of experience that has been built up in the Division of Labor Law

Enforcement that cannot easily be transferred over to another agency, but it is because of these experts that the labor agency was designated as the administrative body in the regulation of employment agencies in 32 states out of the 46 that have laws dealing with the matter."

Commissioner Arywitz's testimony indicated that where the employment agencies are not regulated by the labor agency of a state, such regulation is mainly in the hands of local bodies and, as in the New England states, the town meeting tradition prevails. He indicated that only in the state of Michigan is there a separate bureau covering the licensing of private employment agencies.

When the question of emphasis was raised, Commissioner Arywitz's testimony was to the point:

"I note that the proponents of the bill do accept the need for regulation, but rather the question seems to be a difference as to who was to do the regulating and where should the emphasis be. Should it be for the protection of the public jobseeker or the employer to whom the jobseeker is sent or should that emphasis be on the benefit of the employment agency business. I think that we would agree that while we should not be unmindful of the interest of the business, our record is not one of hostility. The present law is designed primarily to protect the applicant and to protect the employer. In other words, to protect the employer and employee relationship. Much has been made of the fact that you have a hunting license given by the Division of Labor Law Enforcement. This is not the case."

The Labor Commissioner's testimony stated that his office does exercise control before a licensing and does make a thorough investigation. In discussing the composition of a regulatory board and the possible transference of regulation from the Division of Labor Law Enforcement to the Department of Professional and Vocational Standards, Commissioner Arywitz testified:

"It is my belief that where there is a regulatory body and the regulatory body is concerned with the public interest, the public interest ought not to be subordinated to the interest of the industry. I believe it to be essentially for these reasons basically that I have opposed AB 509 and, for this reason, I feel any such board should be a board who represents the interest of the public and should not have a built-in majority of the industry itself."

The commissioner laid particular stress on the question of the qualifying examination sought by the association and the standards being urged for the occupation. He agreed that there should be standards and professional training, and discussed the question of educational qualifications, experience, and skills. He was not opposed to qualifications, and indicated that there should be an understanding of the industry if an examination were necessary to qualify for a license. He felt that there should be basic training, an understanding of personnel management, and a demonstrated ability to test for aptitude and skills. In addition, there should be minimum educational requirements as well as professional training. He was of the opinion, however, that all of

this experience and education would not guarantee a successful operation. His testimony was very direct on this point:

"I talk to many people in the business and I know that many of them, who are outstandingly successful, who have the big agencies, and play a leading role in the communities have told me that they went into this business and without any special knowledge of the business. They had business ability, though, and I think again, Senator Backstrand, this answers your question. There are about 200 agencies a year that go out of business, but it is because of lack of financing and lack of normal skills of business, I would imagine, and our division handles bankruptcies and insolvencies that includes about the same average. There is in California a great turnover in all small businesses, restaurants, construction businesses; we have a tremendous lot of this and it is because of failing to understand business and just no business ability and you can't test for business ability and there is certainly nothing in the standards that would indicate that business ability would be screened out and so only somebody who is financially able to be successful would be able to get a license."

The question of the operating efficiency of a new agency which might regulate in this field was discussed. At the present time, the licensing and regulatory work, including controversies, is handled by three deputy labor commissioners, three investigators, and four clerks. In addition to this staff there are part-time functions discharged by the Labor Commissioner, attorneys, additional deputy labor commissioners, investigators, and clerks. The commissioner was of the opinion that the cost of operating a new agency would, by reason of its separate nature, be greater than that experienced under the Division of Labor Law Enforcement. The division is set up to serve the public in many ways, and discharges many responsibilities in the community in addition to its functions with reference to employment agencies. As a result, the general overhead of the department covers employment agency work. If a separate board were to be set up in another department, this additional expense would be allocated directly to the agency, and the coverage in the state would suffer because eight people could not possibly cover the work in the employment agency field. San Francisco, the bay area, and the Los Angeles area alone would take this many people, according to the opinion expressed.

Results of Labor Commissioner Hearings

There has been previous discussion about the alleged cumbersome controversy procedure, wherein agencies must submit collection matters to the commissioner for hearing before they have access to the courts. It was pointed out that the staff of the Division of Labor Law Enforcement has been handling these matters for over 60 years, and that in the hearing procedure many agency violations are uncovered and the enforcement of the law is enhanced. In some instances it is an educational procedure. The commissioner drew attention to the fact that the courts are overcrowded, and that in many instances the courts looked to the Division of Labor Law Enforcement for guidance in these matters.

With reference to the complaints of time lapse in the handling of controversies by his office, the Labor Commissioner indicated that his staff has endeavored to work out procedures to smooth the operation and to expedite matters. The figures concerning controversies submitted to the commissioner for adjudication are of interest; there were approximately 5,000 such controversies in 1963, and of this amount 2,041 resulted in the award of the full fee to the agency involved, while 753 resulted in the award of a partial fee. Thus in 60 percent of the cases the agency did receive a fee. Of the balance, 333 decisions denied the fee to the agency. One thousand cases were dismissed at the request of the agencies, subsequent to their notification of the division that the matter had been resolved to mutual satisfaction, and that dismissal was desired. The remainder of 1,278 were not handled because it was not possible to effect service of the notice to appear upon the applicant.

Of the total number of cases heard by the Division of Labor Law Enforcement, 414 decisions were appealed to the commissioner when one of the parties objected to the preliminary decision, 331 being appealed by the agency and 83 by the worker. In 164 cases the original determination was sustained; this involved 102 employment agency appeals and 62 worker appeals. In the remainder of the cases, the appeal was upheld and a new determination made. The commissioner pointed out that if the Labor Commissioner's office were bypassed there is good reason to believe that these matters would be resolved by default. The worker might be afraid to go to court, either because he had a fear of the courts or had never been there. A court hearing, by its very nature, is more formal. Under such circumstances the worker could feel ill at ease. He would be more likely to feel that he would receive consideration and fair treatment through the more informal procedures of the commissioner's office.

At the conclusion of his testimony, Commissioner Arywitz was questioned by the various members of the committee. Senator Backstrand asked:

"Mr. Arywitz, in part of your testimony you stated that this bill and other bills have been presented and this is sort of part of a program of them trying to get away from the Labor Commissioner and in some other agency for policing and/or standards. Now, if things have been working as well as your testimony seems to indicate, how do you account for the fact that over the years they have had this continuous program of trying to move in the other direction? Is that just an accident or how do you account for that?"

Commissioner Arywitz answered:

"No, Senator, I think that there have been, always been, a great many people in the business and this association has spearheaded this and they have been trying for a great many years to go into self-regulation."

Senator Backstrand then asked:

"And you are opposed to self-regulation?"

Mr. Arywitz replied:

"Well, in this field I am because I think the language of the Supreme Court clearly shows their impression that policing power by the state is very definitely needed in this field."

Senator Backstrand asked:

"Would this apply to dentists and doctors and lawyers and others?"

Mr. Arywitz stated:

"No, because this is a professional matter. Remember that there are very high standards and they do very good jobs policing themselves and their activities as practitioners. In other words, in the field of the practice of medicine there isn't a question of misrepresentation of employment or dishonesty, but professional competency."

Senator Luther Gibson said:

"Of course, there are other people in the professions, not professions necessarily, that are licensed by the state and other organizations are licensed not only just the medical profession, many other types of professions are being licensed at this time in the State of California. How many have you got altogether?"

Chairman Short answered:

"Thirty boards."

Senator Gibson stated:

"It seems to be doing some good or we wouldn't be having those boards at the present time. I think it is a good thing to try to elevate these professions, whether you call it a profession whether you call it something else, but I think it is a good thing to have themselves disciplining their own industry."

Mr. Arywitz answered:

"Well, I don't think we want to derogate them. I have no argument with the Department of Professional and Vocational Standards. I merely want to point out that I think the Division of Labor Law Enforcement is best suited to do this because of its experience in the field and because of its activities in the general area of employer-employee relationships. Because of this I feel that this agency is best qualified."

Senator Gibson said:

"Your work has been very fine. You have been helpful to us on many a problem concerning this type of legislation. I have enjoyed what you have had to say. I think it is very helpful and I still have nothing but praise. You said something about the number of people on the board being laymen because people from the industry would not be interested in the public. That is the ethical part of it. You believe that the only thing they will be interested in is their own profession. Well, I would say that we have an at-

torney here, our chairman of this committee, who is a professional man and he has ethics which he lives up to and I think he is trying to develop in the people in these various professions the high standards of ethics within themselves, and I think the better way to do that is to put them out to pasture, let them see what has to be done to regulate themselves so that they don't have to rely entirely upon the government to do everything for them."

Mr. Arywitz said:

"There is a problem here of the protection of the applicants. It is because of the jobseeker, because of the relationship to the job, that we are concerned."

Chairman Short said:

"I might say, Mr. Arywitz, I didn't interrupt you while you were making your presentation for two reasons: one, it was an excellent presentation and; secondly, you weren't redundant, you really covered the field, and I think you did a very fine job sustaining the position that you have taken. Now, my only reason for asking for this information is that I think there should be some kind of examination for people going into the employment agency field. I think there is a possibility of setting up a board right in the Department of Industrial Relations. Two-two-and-one is what I would suggest, the one meaning the laymen, where they talk with such things as fees, for example. This might not be something you like but they would have the authority to do something along that line."

Numerous letters were received by the committee. The letters were pro and con with respect to employment agency operations and the matter of their remaining under the wing of the Labor Commissioner or being placed under a new agency.

Subsequent to the hearing, the committee staff met with representatives of the Employment Agency Association to further discuss the problems of the industry; it also met with the staff of the Division of Labor Law Enforcement to seek further views with respect to their position. In addition, the chairman of the committee addressed the annual meeting of the California State Employment Agencies Association in Long Beach. In his remarks he outlined the probable recommendations that would be made to the Legislature in 1965.

RECOMMENDATIONS OF THE COMMITTEE

It is the recommendation of the committee that regulation and licensing of private employment agencies remain within the Department of Industrial Relations, Division of Labor Law Enforcement.

It is further recommended that the controversy procedure contained in Section 1647 of the Labor Code be so amended as to provide that simple failure to pay a fee shall not be regarded as a controversy.

It is also recommended that an employment agency licensing and policymaking board be established, and that this board be granted broad powers to regulate private employment agencies. The board should consist of five members: two members from the employment agencies; two members from the general public; and as fifth member and chairman, the Labor Commissioner. This board would have powers to set minimum qualifications for licensing; to set minimum standards for agency operation; it should have disciplinary powers; it would act as the appeals board in controversy matters; it should have the authority to set the procedures for controversy hearings by the Labor Commissioner and/or his agents; it should have the authority to entertain disputes and set a fee where an applicant complains of an excessive charge, or asserts that the fee is not properly correspondent to the work performed by the agency; the board should have the authority to base its decision on services rendered and/or performed by the agency.

APPENDIX

AMENDED IN SENATE JUNE 15, 1963

AMENDED IN ASSEMBLY MAY 30, 1963

CALIFORNIA LEGISLATURE, 1963 REGULAR (GENERAL) SESSION

ASSEMBLY BILL

No. 1885

Introduced by Mr. Meyers

March 14, 1963

REFERRED TO COMMITTEE ON CIVIL SERVICE AND STATE PERSONNEL

An act to add ~~Section 1582.05~~ SECTIONS 1582.05 AND 1582.06 to the Labor Code, relating to employment agencies.

The people of the State of California do enact as follows:

SECTION 1. Section 1582.05 is added to the Labor Code, to read:

1582.05. An applicant for a license as an employment agency shall have one of the following qualifications:

- (a) Four years of college and six months of experience.
- (b) Three years of college and two years of experience.
- (c) Any other period of college time computed and compared with matching experience and one year of experience.
- (d) Five years of experience.

The experience required by this section may be obtained in any industry, state, or employment agency position wherein the primary function of the individual is the hiring and or placement of personnel.

Any person who is licensed on May 31, 1963, may continue to be granted a renewal of his license although he does not meet the requirements of this section so long as he meets the other requirements of this article, and does not fail to renew his license for any period in excess of six months.

SEC. 2. Section 1582.06 is added to said code, to read:

1582.06. *If the applicant applying for the license is other than an individual, the operating manager shall meet the requirements of Section 1582.05.*

If such individual ceases for any reason whatsoever, to be connected with the licensee to whom the license is issued, the licensee shall notify the Labor Commissioner in writing within 10 days from such cessation, association or employment. If a notice is given the license shall remain in force for a reasonable length of time to be determined by rules of the Labor Commissioner.

If the licensee fails to notify the Labor Commissioner within the 10-day period, at the end of the period his license shall be immediately suspended. The license shall be reinstated in the same manner as for the issuance of a new license.

SENATE BILL

No. 1037

Introduced by Senator Gibson

March 25, 1963

REFERRED TO COMMITTEE ON BUSINESS AND PROFESSIONS

An act to add Chapter 20 (commencing with Section 9800) to Division 3 of the Business and Professions Code, and to amend Section 1710.37 of, and to add Sections 1699.1, 1699.2, 1699.3, 1699.4, 1699.5, 1699.6, 1699.7, 1699.8, and 1699.9 to, and to repeal Sections 1698, 1700.14 and 1710.18 of, and Chapter 1 (commencing with Section 1550) of Part 6 of Division 2 of, the Labor Code, relating to employment agencies, creating the Employment Agency Licensing Bureau, prescribing its organization, powers, and duties, and making an appropriation therefor.

The people of the State of California do enact as follows:

SECTION 1. Chapter 20 (commencing with Section 9800) is added to Division 3 of the Business and Professions Code, to read:

CHAPTER 20. EMPLOYMENT AGENCIES

Article 1. General Provisions

9800. This chapter of the Business and Professions Code constitutes the chapter on employment agencies. It may be cited as the "Employment Agency Act."

9801. As used in this chapter, "person" means any individual, company, society, firm, partnership, association, corporation, manager, contractor, subcontractor, or their agents or employees.

LEGISLATIVE COUNSEL'S DIGEST

SB 1037, as introduced, Gibson (B. & P.). Employment agency.

Adds Ch. 20 (commencing with Sec. 9800), Div. 3, B. & P.C.; amends, adds and repeals various secs., Lab.C.

Creates within the Department of Professional and Vocational Standards an Employment Agency Licensing Bureau under the direction of the Director of Professional and Vocational Standards. Vests in the bureau the power to license and regulate employment agencies.

Creates an Employment Agency Advisory Board, consisting of five members appointed by the Governor for four-year terms, to assist the director in carrying out his functions under act.

9802. As used in this chapter, "employment agency" or "agency" means:

(a) The business of conducting, in any capacity, an intelligence office, employment agency, registry, or any agency, business or office which procures, offers, promises or attempts to procure employment or engagements for others or employees for employers, or for the registration of persons seeking to procure or retain employment or engagement, or for giving information as to where and of whom such help, employment or engagement may be procured, or for providing employment or engagements where a fee or other valuable consideration is exacted, or attempted to be collected, directly or indirectly, for such services, regardless of where such business is conducted.

(b) Any person, service, bureau, organization, club, or school, which by advertisement or otherwise offers, as one of its main objects or purposes, to procure employment for any person who will pay for its services, or that collects dues, tuition, or membership or registration fees of any sort, where the main object of the person paying the same is to secure employment.

(c) Any person who acts as a labor contractor.

(1) A labor contractor is any person, who, for a fee or other compensation, employs an individual to render personal services to, for or under the direction of a third person.

(2) "Bona fide employees" or "employees," when used with reference to the employees of a labor contractor, refers to the employees rendering services to the labor contractor and not to the individuals employed by the labor contractor to render personal services to, for or under the direction of a third person.

(3) "Employer," when used with reference to an applicant for employment through a labor contractor, refers to the person to or for whom or under whose direction the personal services are rendered.

(4) A central hiring establishment, intelligence office, registry, agency or place maintained without cost to applicants for employment by groups of employers or groups of employers and employees, or a person licensed under Chapter 9 (commencing with Section 7000) of Division 3 of this code, does not constitute a labor contractor within the meaning of this chapter.

(5) A person employing individuals to render personal services to, for or under the direction of a third person is not a labor contractor within the meaning of this chapter if every individual, whom such person employs, receives for his services a remuneration in excess of two hundred dollars (\$200) per month.

(6) A person employing individuals to render part-time or temporary personal services to, for or under the direction of a third person in business offices or in industrial establishments is not a labor contractor within the meaning of this chapter if the person employing the individuals, in addition to wages or salaries, pays federal social security taxes, state and federal unemployment insurance, carries workmen's compensation insurance as required by state law, and sustains responsibility for the acts of his employees while rendering services to, for or under the direction of a third person. The person employing individuals to render part-time or temporary personal services shall not send

the employees to any place where a strike, lockout or labor dispute exists.

(d) Any person who conducts for gain any trade school or classes of instruction for the teaching in whole or in part of any trade, art, science, or occupation requiring special skill, and who, for gain or hire, furnishes or agrees to furnish in connection therewith facilities or information to pupils and employers of labor whereby the labor or services of any such pupils are engaged to be employed in the trade, art, science or occupation thus taught to stipulated wages or other valuable consideration. But nothing contained in this section applies to trade schools or classes of instruction conducted by or in connection with any public schools, public institution, parochial school, charitable school or institution, private business schools teaching shorthand, typing, book-keeping, mechanical and other usual business subjects or trade schools connected therewith or any school employing teachers having certificates issued by the public school authorities to teach any particular trade, art, science or occupation.

9803. As used in this chapter, "fee" means:

(a) Any money or other valuable consideration paid or promised to be paid for services rendered or to be rendered by any person conducting an employment agency under this chapter.

(b) Any money received by any person in excess of that which has been paid out by him for transportation, transfer of baggage, or board and lodging for any applicant for employment.

(c) The difference between the amount received by a labor contractor and the amount paid out by him to the person employed to render personal services to, for or under the direction of a third person.

9804. As used in this chapter, "registration fee" means any charge made, or attempted to be made, for registering or listing an applicant for employment, or any charge for letter writing, résumé preparation, cost of photograph or filmstrip, costume, or any charge of a like nature made, or attempted to be made without having a bona fide order for the placement of the applicant in a position.

9805. As used in this chapter, "license" means a license issued by the director to carry on the business of an employment agency under this chapter, or an employment agency manager's license.

9806. As used in this chapter, "licensee" means a person who holds a valid, unrevoked, and unforfeited license under this chapter.

9807. As used in this chapter, "manager" means a person licensed as an employment agency manager and under whose direction, control, charge or supervision an office of a licensed employment agency is operated.

9808. As used in this chapter, "department" means the Department of Professional and Vocational Standards.

9809. As used in this chapter, "director" means the Director of Professional and Vocational Standards.

9810. As used in this chapter, "bureau" means the Employment Agency Licensing Bureau.

9811. As used in this chapter, "chief" means the Chief of the Employment Agency Licensing Bureau.

9812. As used in this chapter, "board" means the Employment Agency Advisory Board.

9813. Nothing in this chapter shall include a nonprofit organization or corporation, organized for the purpose of economic adjustment, civic betterment, and the giving of vocational guidance and placement to its members, when all of the following conditions exist:

(a) None of the directors, officers or employees thereof receive any profit other than a nominal salary for services performed for the organization or corporation.

(b) No fee is charged for employment services other than a membership fee or dues entitling the person paying the same to full participation and benefits of the organization or corporation.

(c) Membership dues or fees charged are used solely for maintenance of the organization or corporation.

9814. Nothing in this chapter shall include a nonprofit organization or corporation which has been formed in good faith for the promotion and advancement of the general professional interests of its members and which maintains a placement service principally engaged in securing employment for such members with the State or any county, city, district or other public agency under contracts providing employment for one year or longer, or any organization or corporation exempted by Section 9813.

9815. Any organization or corporation charging membership fees or dues and engaged in furnishing employment to its members shall, in order to be exempt under Sections 9813 and 9814, file on or before the first day of April of each year with the director, a copy of its bylaws and constitution, together with a sworn statement setting forth:

(a) The place of business.

(b) The names and addresses of officers, directors and employees and the salaries they receive.

(c) The various benefits furnished to members.

(d) The membership and placement fees and dues charged or collected by such organization or corporation from its members.

9816. Nothing in this chapter shall include a farm labor contractor, as defined or licensed under Chapter 3 (commencing with Section 1682) of Part 6 of Division 2 of the Labor Code.

9817. Nothing in this chapter shall include an artists' manager, as defined or licensed under Chapter 4 (commencing with Section 1700) of Part 6 of Division 2 of the Labor Code.

9818. Nothing in this chapter shall include a nurses' registry, as defined or licensed under Chapter 5 (commencing with Section 1710) of Part 6 of Division 2 of the Labor Code.

9819. All rules and regulations contained on the effective date of this act in Group 3 (commencing with Section 11875) of Chapter 6 of Title 8 of the California Administrative Code shall remain in effect until amended or repealed by the director.

Article 2. Administration

9830. There is in the Department of Professional and Vocational Standards an Employment Agency Licensing Bureau under the supervision and control of the director. The director shall administer and enforce the provisions of this chapter.

The Governor shall appoint, subject to confirmation by the Senate, a chief of the bureau at a salary to be fixed and determined by the director with the approval of the Director of Finance. The chief shall serve under the direction and supervision of the director.

Before a chief is appointed the Governor shall give due consideration to any person or persons recommended by the board.

Every power and duty granted to or imposed upon the director under this chapter may be exercised or performed in the name of the director by a deputy or assistant director and by the chief, subject to such conditions and limitations as the director may by rule or otherwise prescribe.

9831. The director, in accordance with the State Civil Service Act, may appoint and fix the compensation of such clerical, inspection, investigation, and auditing personnel, as well as an assistant chief, as may be necessary to carry out the provisions of this chapter. All such personnel shall perform their respective duties under the supervision and direction of the chief.

All personnel shall be paid for services rendered from the Employment Agency Licensing Bureau Fund.

9832. The chief shall gather evidence of violations of this chapter and of any rule or regulation established hereunder by persons engaged in business as employment agencies who fail to obtain licenses and shall gather evidence of violations and furnish the same to prosecuting officers of any county or city for the purpose of prosecuting all violations occurring within their jurisdiction.

The chief, for the purpose of gathering evidence of violations of law or of this chapter or of any rule or regulation established hereunder, shall investigate the business and examine the books, accounts, records and files used therein by the licensee and for such purpose the chief shall have free access to the offices and places of business, books, accounts, records, papers, files, safes and vaults of all licensees.

The chief, with the approval of the director, may require the attendance of witnesses and examine under oath all persons whose testimony he requires relative to the affairs of a licensee or to the subject matter of any examination, investigation, or hearing.

9833. The director may establish and enforce such rules and regulations as may be reasonable or necessary for the examination and licensing of applicants, for the conduct of licensees and for the general enforcement of the various provisions of this chapter in the protection of the public. The director shall distribute to each licensee and each applicant for a license copies of this chapter and of such rules and regulations. Such rules and regulations shall be adopted, amended, or repealed in accordance with the provisions of the Administrative Procedure Act.

The willful violation of any rules and regulations established for the conduct of licensees is sufficient ground for revocation of the license of a licensee, or other disciplinary action.

9834. The director shall keep in his office in a suitable record provided for the purpose all applications for licenses, accompanying certificates, statements and documents and all bonds required to be filed under this chapter. The record shall state whether or not a license has been issued under the application and bond, and if revoked the date of filing the order of revocation, and if reinstated the date of filing

the order of reinstatement. The director shall keep a list of all persons, whose licenses have been revoked. In the record all licenses issued shall be indicated by their serial numbers as well as by the name and address of the licensee. The record shall be open for inspection as a public record in the office of the director.

The director shall adopt a seal for his own use. The seal shall have the words "Employment Agency Licensing Bureau, State of California" thereon. The care and custody of the seal shall be in the office of the director.

9835. There is in the Employment Agency Licensing Bureau an Employment Agency Advisory Board, which consists of five members appointed by the Governor.

9836. Four members of the board shall be qualified examinees named in licenses of employment agencies licensed pursuant to this chapter, except that each of the four members first appointed shall have been named as a licensee on the license of an employment agency pursuant to Chapter 1 (commencing with Section 1550) of Part 6 of Division 2 of the Labor Code for a period of three consecutive years immediately prior to the effective date of this act. One member shall be a public member who is not licensed under the provisions of this chapter.

9837. Each member of the board shall be appointed for a term of four years and shall hold office until the appointment and qualification of his successor or until six months shall have elapsed since the expiration of the term for which he was appointed, whichever first occurs.

The terms of the members first appointed shall expire as follows: one member, September 1, 1964; two members, September 1, 1965; and two members, September 1, 1966.

Vacancies occurring in the membership of the board for any cause shall be filled by appointment for the balance of the unexpired term.

No member shall serve more than two terms of office.

9838. The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty.

9839. The board shall meet at least four times each year. All meetings of the board shall be open and public.

Three members shall constitute a quorum for the transaction of business.

The board shall elect from its members, each for a term of one year, a chairman, a vice chairman, and a secretary and may appoint such committees as it deems necessary to carry out its duties.

9840. The bureau shall furnish to the board such secretarial, clerical, and other personnel as may be necessary to assist the board in carrying out its duties under this chapter. The chief shall attend all board meetings.

9841. Each member of the board shall serve without compensation except that he shall be reimbursed for his traveling expenses necessarily incurred in the performance of his duties.

9842. The board shall:

(a) Inquire into the needs of the employment agency business, the functions of the bureau and the matter of the policy thereof, and make such recommendations with respect thereto as, after consideration, may be deemed important and necessary for the welfare of the State, the

welfare of the public, and the welfare and progress of the employment agency business.

(b) Confer and advise with the director as to how the bureau may best serve the State, the public, and the employment agency business.

(c) Consider and make appropriate recommendations on its own initiative as to changes in, or additions to or deletions of rules and regulations which the director has adopted as, after consideration, may be deemed important and necessary.

(d) Consider and make appropriate recommendations in all matters submitted to it by the director or the chief.

(e) Confer and advise with the director and the chief in the preparation of any rules and regulations to be adopted, amended or repealed.

(f) Assist the director and the chief in the collection of such necessary information and data as the director or the chief may deem necessary to the proper administration of this chapter.

(g) Confer and advise with the director and chief in the preparation of examinations.

Article 3. Licensing and Examination

9850. No person shall open or operate any employment agency unless he has procured an employment agency license therefor from the director. Such license shall be posted in a conspicuous place in the agency.

9851. The director shall issue three types of licenses:

(a) An employment agency license.

(b) An employment agency manager's license.

(c) A temporary employment agency license.

9852. A written application for an employment agency license shall be made to the director in the form prescribed by the director and shall include:

(a) The name and address of the applicant. The names and addresses of each partner, from applicant partnerships, and each officer, from applicant corporations, shall be stated.

(b) The full address of the place where the business of the employment agency is to be conducted.

(c) The business or occupation engaged in by the applicant for at least two years immediately preceding the date of application.

(d) The proposed name of the agency. The director may reject any proposed name which is the same or similar to that of a licensed employment agency.

(e) Such questions and information as will assure the director of the applicant's eligibility to hold a license.

(f) The names and addresses of all persons, except bona fide employees on stated salaries, financially interested, either as partners, associates or profit sharers, in the operation of the agency in question, together with the amount of their respective interests.

(g) The name and address of the candidate, or candidates, for examination. The candidate for examination shall be one of the persons named in subdivision (a) above. In the event of partnerships or corporations, each partner, or officer, may be a candidate for examination.

(h) Such other information as the director may require.

The application shall be accompanied by affidavits of at least two reputable residents of the city or county in which the employment agency is to be conducted that the applicant is a person of good moral character.

9853. A written application for an employment agency manager's license shall be made to the director in the form prescribed by the director and shall include:

- (a) The name and address of the applicant.
- (b) The business or occupation engaged in by the applicant for at least two years immediately preceding the date of application.
- (c) Such questions and information as will assure the director of the applicant's eligibility to hold license.
- (d) Such other information as the director may require.

The application shall be accompanied by affidavits of at least two reputable residents of the city or county in which the applicant resides that the applicant is a person of good moral character.

9854. To be eligible for application for a license, the applicant shall be:

- (a) In the opinion of the director, of good moral character.
- (b) At least 21 years of age.
- (c) A citizen of the United States.
- (d) A person whose license has not been revoked within three years from the date of application.
- (e) A person with a minimum of one year's experience with an employment agency. The applicant may be required to prove to the satisfaction of the director that this experience requirement, whether gained in California or out of state, meets in general the definition of the functions of "manager" as outlined in Section 9807.
- (f) A graduate from a four-year high school, except that the director may establish proof satisfactory to them that the applicant is possessed of a four-year high school education in point of intellectual competency and achievement.

9855. Upon receipt of an application for a license, the director shall cause an investigation to be made as to the character and responsibility of the applicant and of the premises designated in such application as the place in which it is proposed to conduct an employment agency. The director shall have the authority to approve or reject any proposed premises, if, in its opinion, such premises would endanger the health, welfare, safety or morals of applicants for employment, or would tend to reflect unfavorably on the employment agency business. However, the director shall not grant a license to conduct an employment agency:

- (a) In rooms used for living purposes.
- (b) Where boarders or lodgers are kept.
- (c) Where meals are served.
- (d) Where persons sleep.
- (e) In connection with a building or premises where intoxicating liquors are sold or consumed.
- (f) In connection with poolhalls or soft drink parlors.
- (g) To a person whose license has been revoked within three years from the date of application.

9856. The director, upon proper notice and hearing, may refuse to grant a license. Such proceedings shall be conducted in accordance

with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code and the director shall have all the power granted therein.

9857. No license of any type shall be issued until an applicant named in subdivision (a) of Section 9852 or the applicant named in subdivision (a) of Section 9853 shall have successfully passed a qualifying examination.

9858. The director shall prepare, or cause to be prepared, administer, grade or review qualifying examinations for all candidates as stipulated in Section 9857 for any type of license. Such examinations shall be held at least twice each calendar year at such places throughout the state as may be designated by the director. Such examinations shall include subject matter selected by the director to demonstrate the applicant's ability, knowledge and proficiency to conduct or manage an employment agency. Examinations shall be practical in character, and of such length and scope as the director deems necessary. The examination shall be written: both questions and answers shall be in the English language. The examination procedure, method of grading, general average required to be obtained by successful applicants, and other details of the examinations not expressly covered by this chapter shall be determined by the director.

9859. The examination papers of any person shall be kept by the director for the period of one year and may then be destroyed. Such papers shall be open to inspection during the one-year period only by the director, the board, the chief, their clerical assistants, the applicant or his attorney, and by a court of competent jurisdiction in a proceeding where the contents of the papers are properly involved.

9860. Every type of license when issued shall designate:

- (a) The type of license.
- (b) The name of the licensee.
- (c) The number and date of issuance of the license.
- (d) The name of the qualified examinee or examinees.
- (e) In addition, the employment agency license shall designate:
 - (1) The city, street and number of the premises in which the employment agency is authorized to carry on its business.

9861. No license shall protect any other than the person to whom it is issued or any places other than those designated in the license. No license shall be transferred or assigned to any person unless written consent is obtained from the director.

9862. The director may grant permission to establish branch offices to any licensed agency. No branch office may be established without written permission from the director.

9863. The location of an employment agency or its branch offices shall not be changed without written consent from the director.

9864. Every license issued shall run to and including the _____ day of _____ next following the date thereof unless sooner revoked by the director, and may be renewed each year upon the filing of an application of renewal.

9865. All applications for renewal of an employment agency license shall state the name and address of all persons, except bona fide employees on stated salaries financially interested either as partners, associates or profit sharers, in the operation of the employment agency.

9866. All valid, unforfeited and unrevoked employment agency licenses, on the effective date of this chapter, may be renewed from year to year without the necessity for the licensee or licensees to qualify under subdivisions (e) and (f) of Section 9854 and Section 9857. Twenty-four months after the effective date of this chapter, this section shall apply only to the main office of any licensed agency and will exclude branch offices. No license may be renewed under this section if there is a change in the licensee or licensees, or in the amount of their respective interests.

9867. Twenty-four months after the effective date of this chapter every office of every employment agency shall be operated under the direct and personal supervision of a licensee as stipulated in Section 9857 or Section 9866. No such licensee shall direct or supervise more than one office of any employment agency unless written consent is obtained from the director. Such consent shall be valid only for the unexpired term of the license. The director may, upon request, consider renewal of such consent at the time of renewal of the employment agency license.

9868. In case of the death of an individual licensee who leaves a going employment agency business as part of his estate the director shall, upon proper application prescribed by it, issue a temporary license to the personal representative, or to the nominee of the personal representative, of the deceased licensee. In the case of the dissolution by death of a licensed copartnership, the director shall, upon proper application, issue to the surviving partner or partners, a temporary license.

The application shall be in writing and subscribed and sworn to by the person to whom the temporary license is to be issued. The application shall be accompanied by the bond provided for in Article 4 (commencing with Section 9880) and the temporary license fee specified in Article 7 (commencing with Section 9930).

This article shall not apply to any application for temporary license, except that 24 months after the effective date of this chapter, branch offices of an employment agency operated by a licensee prior to his death, shall, as required by Section 9867, be under the direct and personal supervision of a licensee in accordance with Section 9857.

A temporary license shall be effective for a period of one year and shall not thereafter be renewed or continued.

Article 4. Bonds

9880. An employment agency shall deposit with the director, prior to the issuance or renewal of a license, a surety bond in the penal sum of one thousand dollars (\$1,000).

9881. Such surety bonds shall be payable to the people of the State of California, and shall be conditioned that the person applying for the license will comply with this chapter and will pay all sums due any individual or group of individuals when such person or his representative or agent has received such sums, and will pay all damages occasioned to any person by reason of misstatement, misrepresentation, fraud, deceit, or any unlawful acts or omissions of the licensed employment agency, or its agents or employees, while acting within the scope of their employment.

9882. If any licensee fails to file a new bond with the director within 30 days after notice of cancellation by the surety of the bond required under Section 9880, the license issued to the principal under the bond is suspended until such time as a new surety bond is filed. A person whose license is suspended pursuant to this section shall not carry on the business of an employment agency during the period of such suspension.

Article 5. Rules and Regulations

9890. Every employment agency shall keep records approved by the director, in which shall be entered:

- (a) The date of each application for employment.
- (b) The name and address of the applicant to whom employment is promised or offered, or to whom information or assistance is given in respect to such employment.
- (c) The amount of the fee received.
- (d) Other information which the director requires.

Such employment agency shall also enter in the same or in separate records, approved by the director:

- (1) The name and address of each employer from whom an order is accepted for help.
- (2) The date of receipt of each order, kind of help requested, the names of the persons sent, with the designation of the one employed.
- (3) The amount of the fee received and the rate of wages agreed upon.
- (4) Other information which the director requires.

No employment agency, its agent or employees, shall make any false entry in such records.

9891. All books, records and other papers kept pursuant to this chapter in any employment agency shall be open at all reasonable hours to the inspection of the director or its agents. Every employment agency shall furnish to the director upon request a true copy of such books, records, and papers or any portion thereof, and shall make such reports as the director prescribes.

9892. No employment agency shall knowingly issue a contract for employment containing any term or condition which, if complied with, would be in violation of law, or attempt to fill an order for help to be employed in violation of law.

9893. Every person conducting an employment agency shall file with the director a schedule of fees to be charged and collected in the conduct of its business. In the schedule, the various employments or salary ranges by which the fee is to be computed or determined shall be classified, and in each class the maximum fee shall be fixed and shall include the charges of every kind rendered by the agency in each case or transaction on behalf of the prospective employer and a prospective employee. Changes in the schedule may be made, but no change shall become effective until seven days after the date of filing thereof with the director and until posted for not less than seven days in a conspicuous place in the agency.

9894. A copy of the schedule in effect with the changes noted thereon shall be kept posted in each room of the employment agency frequented by applicants for help or employment, and the posted schedule

and the changes therein shall be in lettering or printing of not less than standard pica capitals. The date of the taking effect of the schedule and of each change therein shall appear on the posted copies and a certificate thereof shall be procured from the director and kept posted in a conspicuous place in the agency. No fee charged or collected shall be in excess of the fee as scheduled and in force at the time of the issuing of the contract for employment.

9895. No employment agency shall accept a fee from any applicant for employment, or send any applicant for employment without having obtained orally or in writing, a bona fide order for employment, and in no case shall such employment agency accept, directly or indirectly, a registration fee of any kind. Should an employment agency send an applicant for employment and should the applicant secure employment other than that position specified in the bona fide order for employment to which the applicant was sent, but with the same employer, than the agency shall be entitled to a fee for the employment of the applicant, computed under the terms of the fee schedule in effect in the agency at the time of referral, providing that such employment occurs within a period of six calendar months from the date of referral.

9896. No employment agency shall divide fees with an employer, an agent or other employee of an employer or person to whom help is furnished.

9897. If the applicant paying a cash fee fails to obtain employment, the employment agency shall, upon demand therefor, repay the amount of the fee to the applicant. Unless the fee is returned within 48 hours after demand, the employment agency shall pay to the applicant an additional sum equal to the amount of the fee. A notice to this effect shall be inserted in all contracts between the agency and the applicant, and in all receipts given to the applicant for cash payment in advance of employment, and in the schedule of fees posted in the office of the agency.

9898. No employment agency shall publish or cause to be published any false, fraudulent, or misleading information, representation, notice, or advertisements. All advertisements of an employment agency by means of cards, circulars, or signs, and in newspapers and other publications, and all letterheads, receipts and blanks shall be printed and contain the licensed name and address of the employment agency. Every employment agency shall use the word "agency" or "agencies" as part of its licensed name. No employment agency shall give any false information or make any false promises or representations concerning an engagement or employment to any applicant who registers or applies for an engagement or employment or help.

9899. No employment agency shall send or cause to be sent any applicant as an employee to any house of ill fame, to any house or place of amusement for immoral purpose, to places resorted to for the purposes of prostitution, or to any place where the health, safety, welfare or morals of the applicant could be adversely affected, the character of which places the agency could have ascertained upon reasonable inquiry.

9900. No employment agency shall send any minor under the age of 18 years to any place where intoxicating liquors are sold to be consumed on the premises.

9901. No employment agency shall knowingly permit any persons of bad character, prostitutes, gamblers, intoxicated persons, or procurers to frequent such agency.

9902. No employment agency shall, when such employment would be in violation of Chapter 1 (commencing with Section 1171) of Part 4 of Division 2 of the Labor Code or Division 9 (commencing with Section 10501) of the Education Code, accept any application for employment made by, or on behalf of, any minor, or place or assist in placing any minor in any such employment.

9903. Every employment agency shall post in a conspicuous place in the applicant reception area of such agency a printed copy of this chapter and of such other statutes as may be specified by the director. The director shall furnish printed copies of any statute required to be posted by employment agencies.

9904. (a) Every employment agency shall give to every applicant for employment from whom a fee is to be received a contract or receipt, in which is stated:

(1) The name, address and telephone number of the employment agency.

(2) The name and address of the person giving the order for help, the date and consecutive number of the receipt of such order by the agency, and its manner of transmission.

(3) The date and consecutive number of issuing the contract.

(4) The name of the applicant, the name and address of the person to whom the applicant is sent for employment, and the address where the applicant is to report for employment.

(5) The amount of fee charged and collected from the applicant, the amount of fee, paid or advanced by the prospective employer and by whom paid or advanced.

(6) The kind of work or employment and the general conditions of employment with particular regard to sanitary conditions and compliance with labor laws affecting the employment as shown by the statement of the prospective employer.

(7) The daily hours of work; the wages or salary including any consideration of privilege; whether or not board or lodging or both is to be furnished.

(8) If any labor trouble exists at the placement of employment, that fact shall be stated in the contract.

(9) Any other term, condition, or understanding agreed upon between the agency and the applicant.

(b) There shall be printed on the face of the contract in prominent type the following: "This agency is licensed by the Employment Agency Licensing Bureau of the State of California." At the bottom of the contract there shall appear a notice to the effect that the contract is the property of the applicant and shall not be taken from him. A notice shall also appear in the contract directing the employer to state on the reverse side of the contract in the space provided therefor, that he discharged the applicant after employing him less than seven

days, and indicate thereon the amount of gross wages paid, when either is the fact, and the number of days of such employment.

(c) The employment agency shall in such contract undertake to repay the applicant the fee in the event of failure to procure employment.

(d) Every such contract or receipt shall be made and numbered consecutively in original and duplicate, both to be signed by the applicant and the person acting for the employment agency. The original shall be given to the applicant and the duplicate shall be kept on file at the agency.

9905. All contracts or agreements of types other than provided in Section 9904 between the employment agency and applicants for employment shall be approved by the director.

9906. Notwithstanding the provisions of Section 9904, the director may, by rule and regulation, prescribe alternative forms of contracts or receipts which may be used by employment agencies for specific occupations in which the nature and duration of the employment reasonably justifies the use of a contract or receipt different from that set forth in Section 9904.

9907. Each employer to whom an applicant is sent in response to a request for an employee shall, upon the applicant's request, state on the reverse side of the contract, in the space provided therefor, that he refused to employ the applicant or that he discharged him after employing him less than seven days, and indicating thereon the amount of gross wages paid, when either is the fact.

9908. Every employment agency shall notify each applicant before sending such applicant in response to a request for employment whether a labor contract is in existence at the establishment to which the applicant is being sent, and whether union membership is required.

9909. No employment agency shall send an applicant to any place where a strike, lockout, or other labor trouble exists without notifying the applicant of such fact and shall in addition thereto enter a statement of such conditions upon the receipt given to such applicant.

9910. All employment provided by any employment agency to any applicant from whom a fee is to be received shall be considered permanent only if lasting beyond 90 days.

Article 6. Disciplinary Proceedings and Offenses Against the Chapter

9920. The director may suspend or revoke licenses, after proper notice and hearing to the licensee, if the licensee has been found guilty by the director of any of the acts or omissions constituting grounds for disciplinary action. The proceedings under this article shall be conducted in accordance with Chapter 5 (commencing with Section 11500) of Part 1 of Division 3 of Title 2 of the Government Code, and the director shall have all the powers granted therein.

9921. All accusations against licensees shall be filed with the director within one year after the performance of the act or omission alleged as the ground for disciplinary action; provided, however, that the foregoing provision shall not constitute a defense to an accusation alleg-

ing fraud or misrepresentation as a ground for disciplinary action. The cause for disciplinary action in such cases shall not be deemed to have accrued until discovery by the director, of the facts constituting the fraud or misrepresentation, and, in such case, the accusation shall be filed within two years after such discovery. The director may, upon its own motion, and shall upon verified complaint in writing of any person, investigate the actions of any person licensed under this chapter.

9922. Upon receipt of a complaint, or upon its own motion, the director shall ascertain whether or not the accused licensee has been guilty of an act or omission constituting a ground for disciplinary action and may make or cause to be made such investigation as it deems necessary in order to ascertain this fact.

9923. Acts or omissions constituting grounds for disciplinary action by the director shall include, but shall not be limited to:

- (a) Engaging in unprofessional conduct.
- (b) Procuring a license by fraud, misrepresentation or mistake.
- (c) Violations or attempts to violate, directly or indirectly, or assisting in or abetting the violation of, or conspiracy to violate, any provision or term of this chapter.
- (d) Making or giving any false statement or information in connection with the application for issuance of a license.
- (e) Conviction of a felony or any crime involving moral turpitude.
- (f) Impersonating or acting as proxy for any applicant in any examination required under this chapter for the issuance of a license.
- (g) Making false promises, misrepresentations in advertisements, or engaging in the practice of claiming or demanding fees, other compensation or commissions for services not rendered, within the contract agreed.
- (h) Engaging in any other conduct, whether of the same or a different nature than specified in this section, which constitutes fraud or dishonest dealing.

9924. Any person, or agent or officer thereof, who violates any provisions of this chapter is guilty of a misdemeanor, punishable by a fine of not less than fifty dollars (\$50) nor more than five hundred dollars (\$500), or imprisonment for a period of not more than 60 days, or both.

Article 7. Revenue

9930. The director shall receive and account for all money derived from the operation of this chapter and, at the end of each month, shall report such money to the State Controller and shall pay it to the State Treasurer, who shall keep the money in a separate fund known as the Employment Agency Licensing Bureau Fund. This fund shall be expended in accordance with law for the payment of all actual and necessary expenses incurred in carrying out the provisions of this chapter.

9931. The unencumbered balance of all money available for expenditure by the Department of Industrial Relations in carrying out any functions transferred to the Department of Professional and Vocational Standards by this chapter shall be made available for the support and maintenance of the department, and all books, documents, records and property of the Department of Industrial Relations relating to such functions shall be transferred to the department.

9932. The director shall charge the following fees:

(a) A filing fee of twenty-five dollars (\$25) for each new application for license.

(b) A filing fee of twenty-five dollars (\$25) for each new application for branch office license or permit.

(c) A filing fee of twenty-five dollars (\$25) for application for examination or re-examination.

(d) A filing fee of twenty-five dollars (\$25) for application to transfer or assign a license.

(e) An annual license fee of fifty dollars (\$50) for an employment agency manager license.

(f) An annual license fee of one hundred dollars (\$100) for an employment agency license.

(g) An annual license fee of twenty-five dollars (\$25) for license of each branch office.

(h) A temporary license fee of thirty-five dollars (\$35).

(i) A reinstatement fee of one hundred dollars (\$100), in addition to other fees, to reinstate a license revoked or suspended.

No fees shall be prorated for the unexpired portion of the license year.

SEC. 2. Chapter 1 (commencing with Section 1550) of Part 6 of Division 2 of the Labor Code is repealed.

SEC. 3. Section 1698 of said code is repealed.

1698. No part of the provisions of Part 6, Chapter 1, of Division 2 of this code shall be applicable to a farm labor contractor, except that the following section, in the terms thereof now in effect, shall be so applicable, to wit: Sections 1591, 1595, 1630, 1633, 1637, 1638, 1639, 1640, and 1642; and for such purpose, each of said section, in the terms thereof now in effect, shall be read, applied, administered, and enforced as though expressly made applicable to a farm labor contractor.

SEC. 4. Section 1699.1 is added to said code, to read:

1699.1. All moneys collected for licenses and all fines collected for violations of the provisions of this chapter shall be paid into the State Treasury and credited to the General Fund.

SEC. 5. Section 1699.2 is added to said code, to read:

1699.2. No licensee shall sell, transfer or give away any interest in or the right to participate in the profits of the employment agency without the written consent of the Labor Commissioner. A violation of this section shall constitute a misdemeanor, and shall be punishable by a fine of not less than one hundred dollars (\$100) nor more than five hundred dollars (\$500), or imprisonment for not more than 60 days, or both.

SEC. 6. Section 1699.3 is added to said code, to read:

1699.3. No licensee shall knowingly issue a contract for employment containing any term or condition which, if complied with, would be in violation of law, or attempt to fill an order for help to be employed in violation of law.

SEC. 7. Section 1699.4 is added to said code, to read:

1699.4. No licensee shall accept a fee from any applicant for employment, or send any applicant for employment without having obtained orally or in writing, a bona fide order therefor, and in no case

shall such licensee accept, directly or indirectly, a registration fee of any kind.

SEC. 8. Section 1699.5 is added to said code, to read:

1699.5. No licensee shall send or cause to be sent, any woman or minor under the age of 21 years, as an employee to any house of ill fame, to any house or place of amusement for immoral purpose, to places resorted to for the purposes of prostitution, or to gambling houses, the character of which places the agency could have ascertained upon reasonable inquiry.

SEC. 9. Section 1699.6 is added to said code, to read:

1699.6. No licensee shall send any minor under the age of 18 years to any saloon or place where intoxicating liquors are sold to be consumed on the premises.

SEC. 10. Section 1699.7 is added to said code, to read:

1699.7. No licensee shall knowingly permit any persons of bad character, prostitutes, gamblers, intoxicated persons, or procurers to frequent his premises.

SEC. 11. Section 1699.8 is added to said code, to read:

1699.8. No licensee shall accept any application for employment made by or on behalf of any child, or shall place or assist in placing any such child in any employment whatever in violation of Part 4 (commencing with Section 1171) of this division.

SEC. 12. Section 1699.9 is added to said code, to read:

1699.9. No licensee shall divide fees with an employer, an agent or other employee of an employer or person to whom help is furnished.

SEC. 13. Section 1700.14 of said code is repealed.

1700.14. A person may apply for both an employment agency license and an artists' manager license, as provided for in this code, and in such event shall pay a single fee for filing an application for such licenses, for the transfer or assignment of such licenses, for such annual licenses or branch office licenses, or for annual renewals thereof, as prescribed in Article 2 (commencing at Section 1581) of Chapter 1, Part 6, Division 2 or as provided in this chapter, whichever is the higher.

SEC. 14. Section 1710.18 of said code is repealed.

1710.18. A person may apply for both an employment agency license and a nurses' registry license, as provided for in this code, and in such event shall pay a single fee for filing an application for such licenses, for the transfer or assignment of such licenses, for such annual licenses or branch office licenses, or for annual renewals thereof, as prescribed in Article 2 (commencing with Section 1581) of Chapter 1, Part 6, Division 2 or as provided in this chapter, whichever is the higher.

SEC. 15. Section 1710.37 of said code is amended to read:

1710.37. If any nurses' registry which assigns nurses to performing nursing services also engages in the business of conducting a general employment agency as provided in Chapter 20 (commencing with Section 9800) of Division 3 of the Business and Professions Code, then the records of the nurses' registry shall be kept separate from the records of the licensee pertaining to the general employment agency phase of the business.

**STATEMENT
of the
CALIFORNIA EMPLOYMENT AGENCIES ASSOCIATION**

In Consideration of
S.B. 1037 (SENATOR GIBSON) AND A.B. 1885 (ASSEMBLYMAN MEYERS)
both of the 1963 General Session

**SUBMITTED
to the
SENATE FACTFINDING COMMITTEE ON BUSINESS AND COMMERCE
of the
CALIFORNIA LEGISLATURE**

Sacramento, California, April 8, 1964

To the Honorable Alan Short, Chairman of the Senate Factfinding Committee on Business and Commerce, California Legislature, and to the honorable Members thereof:

The California Employment Agencies Association appreciates this opportunity to submit its views to the Senate Factfinding Committee on Business and Commerce with respect to Senate Bill 1037 and Assembly Bill 1885, introduced during the 1963 Regular Session of the California Legislature by Senator Gibson and Assemblyman Meyers, respectively.

Our association is a nonprofit California corporation, whose members are individuals licensed by the State of California to operate a private employment agency and/or nurses registry. It is governed by an elected board of directors and its corporate officers. The board of directors meets quarterly and the association's governing body, its house of delegates, has met annually for the last 10 years.

The major objectives of the association are:

1. To foster, to establish, and to maintain professional standards of education and experience among those persons engaged in the service of personnel placement in private employment agencies.
2. To promote and maintain high standards of service and of business integrity in the operation of private employment agencies through the enforcement of a code of ethics among members of the association.
3. To increase understanding and acceptance by the public of the role of the private employment agency in the economy of the State of California.
4. To undertake such other activities which may be recognized as a proper objective of a trade or professional association, in keeping with the public interest.

As the measures before the committee involve fundamental changes in the licensing and regulation of employment agencies from those in the present law, which has been little changed since 1913, we believe it would be helpful to compare briefly conditions prevailing in our industry in the early 1900's with those of today. We are also prepared, should the committee wish, to discuss the internal operations

of the modern employment agency and the variety of services which it renders to job seekers, employers and the general public.

While the state of our industry in the early 1900's is not too clear, a report prepared in 1890 by the United States Bureau of Labor Statistics indicates that employment agencies may have been operated in gambling casinos and saloons. There were charges at that time of collusion with keepers of immoral houses and the sending of women applicants to houses of prostitution. In the days of early California, lumber and railroad companies established and maintained employment agencies in populated areas. Later, a fee was deducted from wages or paid directly by the applicant. It is a fact that agency practices of 60 years ago are intertwined with California's colorful past, including the unconscionable practice of "shanghaiing" seamen. It is also true that at times applicants were sent from metropolitan centers to the mining, lumber or railroad camps or distant "sweat shops" and in some cases left stranded. Fee splitting between employers and agencies may have been practiced in those days.

The typical employment agency applicants at the turn of the century were agricultural or mining workers, industrial employees, men who worked in the woods and on the sea. They were also largely unskilled and poorly educated people.

It was against this background and climate that the public welfare demanded that employment agencies come under state regulation, which they did, in effective terms, in 1913 (a minimal law was first passed in 1903 which did not even require licensing). In commenting upon the law which was enacted in response to that situation, the Bureau of Labor Statistics in its 16th biennial report for 1913-15, said:

"Two years ago the bureau drafted and succeeded in having passed one of the most drastic laws for the regulation of private employment agencies."

At that time, both public and private agencies were regulated by the bureau, and in the same report, the bureau added:

"In order to make free employment bureaus a real success, it will be necessary to further restrict, and eventually eliminate, private employment agencies . . ."

The law of 1913, although amended in 1923, has remained practically unchanged in its operation for 51 years and today it simply is not adequate to the conditions of the modern employment industry nor is it properly responsive to the welfare of the public. It is now an archaic body of law which was designed to meet a situation that no longer exists. The effect of those sections of the Labor Code which take agencies out of the mainstream of law and business practices are so complex that they actually leave agencies in a sort of *Alice Through the Looking Glass World*!

The abuses which necessitated the "drastic laws" of 1913 are past and they have been gone for 25 years or more. To that end, the present law has served its purpose well. The modern employment agency industry is proud of its record—of 520,194 placements made in 1962, only 5,500 (1 percent) resulted in "controversy" cases, of which agencies probably brought some 4,000. This certainly is a record

of which any service industry can be eminently proud. In so stating, we do not deny the probable existence of isolated cases of poor practices by agencies and while we do all possible to eliminate them, there are, of course, those in all professions or vocations who simply are what we euphemistically term "bad apples". We hope that the day will soon arrive when such practitioners can be eliminated from the placement field. With the exception of these few, most such poor practices as do exist can be directly attributed to the complete lack of licensing standards.

Today California's employment agencies place men and women in positions ranging from babysitters to corporate executives, file clerks to space technicians. These applicant-clients mirror California's population—in the main, they are well educated, responsible citizens. In no sense can they be considered as out of the mainstream of American life as the Labor Code would imply nor are they in need of being considered as "wards of the Labor Commissioner" as he so frequently states.

As the state's economy has grown and matured, our clients, both employers and applicants, have rightfully insisted that we perform steadily improved counseling and screening service—not for work in mining camps as at the turn of the century—but for office, commercial and financial positions, engineering, technical and sales positions; journeyman industrial jobs and all levels of management.

To meet this need of applicants and employers for more exacting standards of services, the industry, through the initiative of this association, attempted to raise its standards of competence, although it has had absolutely no help or encouragement in doing so from its regulatory authority, the Labor Commissioner.

For example: Our association has adopted a strong code of ethics to which members subscribe as a condition of membership and which is hereto attached. This code is enforced among members and every attempt is made to gain compliance by nonmembers. Through this procedure, we have been successful in resolving many situations to the satisfaction of all concerned without bringing them to the attention of the Labor Commissioner. We recently, however, participated in a "controversy" hearing to seek recovery of a fee which was properly due an employer by a nonmember agency. We also brought to the commissioner's attention the case of an agency which habitually violates the Labor Code. As we requested some three years ago, the commissioner has finally brought license revocation proceedings.

In 1958, the association also founded the California Institute for Employment Counseling which administers accreditation examinations based on placement and personnel practices and on the Labor and Administrative Codes and other laws pertinent to employment agencies. The program is administered by the institute's board of trustees, composed of licensed and practicing agency owners. However, the drafting and grading of examinations is under the direction of a consultant of doctoral rank, without employment agency affiliation from the staff of an accredited college or university. The institute has produced the only comprehensive training manual for California agency counselors. The Labor Commissioner commended it as an "overall good job" and stated he felt that it would be "most helpful

as a daily guide." The institute also regularly sponsors training seminars for agency personnel.

While not all employment agencies are members of the association, our members have established a competitive level of service with which all in the industry must be concerned.

The foregoing are but a few of the many voluntary efforts which have been undertaken to raise the standards of service in our field. However, as some 300 agencies are either established or change ownership each year—about 30 percent of the entire industry—we believe that we have achieved as much as we are able through volunteer efforts and that we now need a modernization of regulation if this industry is to continue to play its vital part in integrating the great tide of newcomers into California with our rapidly expanding economy. These are the overwhelming reasons for our support of SB 1037.

SB 1037 would transfer the regulation of private employment agencies from the Department of Industrial Relations (Division of Labor Law Enforcement) to the Department of Professional and Vocational Standards, in which would be created an Employment Agency Licensing Bureau. The measure would also establish new standards for licensing of agencies. In the main, the bill carries over the operational portions of the present Labor Code, except the controversy procedure. Our support of this measure is motivated in no sense by a desire to escape regulation—in fact, we believe that public welfare can best be served by continued regulation of our industry, but it should be regulation in keeping with the needs of both the modern employment agency and the jobseeker and employer. The present code, in our view, falls far short of both goals.

We definitely do not believe that the licensing standards as proposed in SB 1037 would keep any reasonably qualified individual from going into the employment agency business. Our primary reason for speaking in qualified opposition to AB 1885 is because we believe the standards it proposed are unnecessarily restrictive. The potential of this industry is great and the problem is not one of too many employment agencies, but one of competent employment agency management.

Why Transference to the Department of Professional and Vocational Standards?

To license or not to license is not the question for employment agencies as it has been with some groups which have sought jurisdiction by the Department of Professional and Vocational Standards. Employment agencies have long been licensed. The question is: would the public be better served if agencies were licensed and regulated by that department rather than the Division of Labor Law Enforcement? We believe we can show that the transfer is not only *in* the public interest but *essential* to it.

Because the real question is: would the public be served better if licensing standards for employment agencies were raised in order to protect it from fraud and incompetence?

Today, under the Labor Code, an employment agency license is issued to almost anyone who applies, providing only that he file affidavits from two residents of the county in which he contemplates doing business, that he is of good moral character, that he furnish a \$1,000 surety bond and pay the filing and licensing fee. The Labor Commissioner "may",

but is not required to make an investigation as to character and responsibility.

So far as we know, this is the only vocational or professional license issued by the State without *any* qualifying standards of competence. We can compare it only with a license for hunting or fishing. You don't qualify for it. You just buy it. And the regulation is all done *after* issuance.

The 20 pages of the Labor Code specifically having to do with employment agencies and labor contractors is largely given over to specific "thou shalt's" and "thou shalt not's", many of them concerning problems of a distant past. And the Labor Commissioner is given the power and authority to revoke a license for failure to comply with any provision of the code, but in spite of his oft-pointed finger at our "bad apples" he has, in so far as we know, revoked less than a handful in as long as memory can serve.

The commissioner will no doubt present testimony to this committee citing the policing problems of agency operation with which he deals. He can be expected to point once again to our "bad apples". We acknowledge that we have them, but the wonder is that we don't have more, when you consider that fully 30 percent of the entire industry of some 1,000 agencies is newly licensed every year, with no qualifying standards and with absolutely no preorientation by the commissioner's office. The commissioner may well talk about "bad apples" but he won't at any time cite his actions to insure that agency licensees are qualified to do what the State has licensed them to do. We can be sure he won't do that because the code gives him no authority to do it. And in 1961 when the major licensing provisions of SB 1037 were proposed as amendments to the Labor Code (AB 509 introduced by Mr. Hegland and heard on February 21, 1961, before the Governmental Efficiency and Economy Committee of the Assembly), the commissioner vigorously and successfully opposed their adoption. He even opposed requiring that licensees have a high school education or its equivalent, saying that "Anyone with a sixth grade education can operate an employment agency". Over the years, labor commissioners have neither advanced ideas of their own nor endorsed suggestions developed within the industry for writing competency standards into the law. At no time has there been any display of interest on the commissioner's part to explore a common approach to what we consider to be essential legislation.

In fact, the commissioner's approach even to regulation comes close to being a sort of challenge or "dare" to licensees to operate within the legal provisions. For example, during the years commissioners have forwarded to agencies a considerable body of administrative interpretations and rulings, noncompliance with which leaves an agency liable for penalty or revocation. But these letters are not gathered together and made easily available for reference. Copies of previous letters *are not* furnished to new licensees who may, therefore, never even suspect their existence. And, if files are misplaced over the years, even the best intentioned licensee may put himself in jeopardy.

In enacting the Business and Professions Code, it is clear that the Legislature intended, as stated in this committee's report of 1957, to:

“ . . . provide protection to the public from the practice and activities of incompetent persons where damage to the public health, safety, welfare or morals could occur and where the public has no relatively easy way of determining competency itself,”

by requiring that such private businesses or professions be licensed for competency.

The central question is whether employment agency licensees need to be competent—it is well established that they are concerned with the public welfare. The affirmative answer to this question would seem to be self-evident except that the commissioner has in the past, before committees of the Legislature, argued in the negative. Employment agencies deal with human beings at a time when they are extremely vulnerable, and in respect to what may be one of the two or three major decisions of a lifetime: that of choice of employment. It is doubtful that a man makes a more important decision except perhaps the taking of a wife. Employment agencies not only deal with man's human dignity, but they also have an enormous social and economic responsibility to job seeker and employer alike. The general employment agency needs comprehensive knowledge not only of professional and occupational requirements, but also of company growth potentials and personnel practices. If a licensee does not possess this competence, his decisions and referrals all too often result in the wasted time of “wild goose chases.” In essence, he needs to know what he is doing!

Since nothing is more expensive than *not* having a job, any agency that is so incompetent that it prolongs the search, rather than shortening it, is committing a fraud, whether or not a fee is charged.

In equal measure, those agencies dealing with domestics and baby-sitters must know what they are doing in order to meet their highly personal responsibilities to their clients for knowledgeable, healthy and trustworthy applicants who will work with children and deal with prized personal possessions.

A general employment agency doing business in the fields of commercial, technical and industrial placements, deals with a far wider spectrum of job specifications than does the employment manager of even the largest of corporations. Attached, as illustration, is a list of the job orders for men received by one San Francisco agency in a recent single week. These job orders were, of course, only a small fraction of those still open or available from previous weeks. To deal with all the complexities of finding applicants to fill such orders from employers and of finding openings for such applicants, the commissioner has testified that, in his belief, a sixth grade education is sufficient!

For the state to license without requiring competence invites and encourages fraud. In fact, since the public assumes that the issuance of a license insures that essential standards *have* been met, it almost amounts to fraud!

The commissioner's disinterest and actual opposition to legislation intended to provide protection to the public from the practices and activities of incompetent agency licensees is the major reason why we are convinced that nothing short of transference to another authority will make it possible to carry out such a program.

The Department of Professional and Vocational Standards is the body designated by the Legislature to set and maintain standards of business and professional competence where the public safety, health, welfare or morals is concerned. The staff, knowledge, and experience for the implementation of those standards proposed in SB 1037 is in that department which now, through its 30 boards, bureaus and commissions, licenses in excess of 600,000 persons practicing more than 50 professions and vocations. That staff, knowledge and experience is not in the Division of Labor Law Enforcement.

In opposing transference, the commissioner has frequently stated that licensing and regulation of employment agencies must remain under the Division of Labor Law Enforcement because their commodity is labor.

But the courts have held:

“A contract between an artist and an employment agency is not a contract pertaining to labor within C.C.P. Sect. 1280 prohibiting arbitration agreement from applying to disputes arising out of contracts pertaining to labor.” *Robinson v. Superior Court* (1950) 35 C2d 379, 218 P2d 10.

Agencies must, of course, be cognizant of prevailing labor laws because they are correctly restrained from placing people on jobs where labor laws are violated, but they are not involved in those laws dealing with the relations between workers and employers.

Our commodity is not labor but placement service. We do indeed serve workers, but no less than we serve employers who have no special haven or protection in the Labor Code. We could not serve workers without serving employers and we can never forget our responsibilities to each.

While we have been talking about applicants for employment, it must be emphasized that we also serve employers and offer to both a service just as do insurance and real estate brokers, attorneys and engineers, accountants and doctors. If employment agencies must be regulated by the Labor Commissioner on the premise that they render a service to workers, then the same standard could be applied to similarly situated professions and business.

It is interesting to speculate that if the commissioner's premise were extended to its logical conclusion, the Department of Employment, which operates the largest placement service in the entire state, would be under his jurisdiction as would organized labor, which operates the third largest placement service, together with the myriad other groups, clubs, etc., which engage in varying amounts of placement activities.

Regulatory Board vs. Bureau

Article 2 of SB 1037 provides that the proposed Employment Agency Licensing Bureau shall be under the supervision and control of the director, who shall be assisted by a chief, appointed by the Governor, and who will exercise the responsibilities of the director, in his name. There will also be a five-member advisory board, four of which shall be practicing employment agency licensees, and the fifth to be a public member.

The mode of licensing an industry differs markedly from that more prevalent practice of vesting such responsibility in a board composed of practicing licentiates of the licensed group, plus a public member.

Of the 30 professions, businesses, or vocations presently licensed through the Department of Professional and Vocational Standards, only four are regulated by a bureau, which is controlled by a chief.

We think that there is sound reasoning behind this strong precedent of vesting such responsibility in a board, as its members would have vastly more intimate knowledge of the needs of the industry than would a chief who would probably serve for a term of only a few years. Too, the board members, from their day-to-day practice of the business are in a better position to learn the public's reaction to the industry and to determine what steps should be taken so that the public welfare can best be served.

We feel, however, that there should be an appeal from rulings of the board to the director and from his decision into the courts. We also feel that the tenure of the board members should be limited to two terms.

When SB 1037 was first drafted, we supported the concept of bureau and chief, although we actually would have preferred the board. However, after further careful consideration, we feel our original preference for the board would be in the best interests of all concerned. This conclusion was undoubtedly reached secondarily, because of some of the difficulty which we understand now exists between the advisory boards of the Collection Agency Licensing Bureau and the Bureau of Private Investigators and Adjusters and their chief, and primarily because the Labor Commissioner today serves as such a "chief" to our industry. In fact, his full title is Chief of Division (Labor Law Enforcement) and Labor Commissioner. To be sure, we have been able to get the commissioner to meet with us from time to time, meet with industry representatives as would a chief meet with his advisory board. Those conferences are always held in a very cordial atmosphere, but in fact very little has ever come out of them. For example, about three years ago we brought to the commissioner's attention that there was a steadily growing group of so-called executive search firms which were engaging in placement services, for a fee, but without benefit of being licensed as an employment agency as required by the Labor Code, Section 1551. (The Attorney General ruled in 1950 that such firms must be so licensed.) However, it was not until December 27, 1963, that the commissioner actually issued a directive requiring that these firms take out an agency license.

We would like to see a uniformity of regulation and we believe that a board, with its minute knowledge of occurrences within the industry, is not only better qualified to do this than would be a chief, but would have the substantial additional advantage of bringing a broad cross-section of views to bear upon such deliberations.

In a variety of ways, employment agencies make a substantial contribution to the economy of California and some 520,000 placements are made each year through their services. We do believe that the public welfare would be better served by regulation of this industry by

those who know it best and, in particular, by those who are in a position to assess the public's reaction to it.

Licensing and Examination

As we pointed out earlier, the only requirements for securing an employment agency license are:

1. Submission of affidavits from two character references who have known the applicant-licensee for at least two years.
2. Furnishing of a \$1,000 surety bond.
3. Payment of a filing fee of \$25 and license fee of \$100.

The commissioner "may" but is not required to make an investigation as to character and responsibility. Absolutely no demonstrable competency in the field is required.

The most significant changes made by SB 1037 over the present Labor Code are requirements for licensing. These requirements are set forth in Article III. To be licensed an applicant must:

- a Be of good moral character, in the opinion of the director
- b Be at least 21 years of age
- c Be a citizen of the United States
- d Provide affidavits from two character witnesses
- e Be a high school graduate or its equivalent
- f Not have had a license revoked within three years
- g Have had at least one year experience with an employment agency
- h And must pass a qualifying, practical-type examination to demonstrate his ability, knowledge and proficiency to conduct an employment agency.

Poor practices which now exist in the employment agency field, in an overwhelming majority of cases, can be traced directly to the absence of qualifying standards. Almost always, we find that agency owners do not intentionally violate either the law or accepted standards of practice — they simply are uninformed. It is no wonder since the law does not now require any proof that they be conversant with the law pertinent thereto, let alone standards of practice, before they are licensed to hang out a shingle as "employment specialist", presumably ready to counsel and place people at all levels. Day in and day out the association office receives inquiries from members and nonmembers on all points of law and standards of practice covering every phase of agency operation, including questions on assignment of fees, use of collection agencies, conformity with advertising rules, Fair Employment Practices Act, division of fees, etc.

Our association from time to time has sought to have the licensing standards of employment agencies raised to a level of those proposed in SB 1037. We last did so in the 1961 session of the Legislature when Assemblyman Hegland introduced Assembly Bill 509. When that measure was heard before the Governmental Efficiency and Economy Committee on February 21, 1961, the Labor Commissioner successfully opposed it and argued most forcefully that an examination would serve

no useful purpose and should not be required, that "anyone with a sixth grade education can operate an employment agency," and that the present requirements are completely adequate.

Apparently he changed his mind with respect to the educational and experience requirements, as he did support Assembly Bill 1885 when it was heard before the Senate Labor Committee on June 17, 1963, although he had opposed it 10 days earlier before the Assembly's Committee on Civil Service and State Personnel.

We did not support AB 1885 nor do we do so today because we believe that on one hand it is unnecessarily restrictive and on the other that it is not complete. Its combination of education and experience standards are unrealistic and would result in keeping well qualified people from entering the field. While many agency owners do meet its educational requirements many do not, yet are successful and competently managing agencies.

Our association has proved over the last few years that assembled reference material, management seminars, qualifying examinations, and codes of business practice, established and enforced by competent and knowledgeable members of the industry can raise standards of practice and levels of protection and service to the public in this industry just as they have in many others.

We believe that with such licensing requirements as those in SB 1037, this industry can quite rapidly be brought to the place where the public can be assured of competent service.

There are already many highly qualified people in employment agencies today. Following World War II many new people with college training and personnel experience saw opportunities of service and livelihood in job placement and counseling.

Recent surveys among association members have shown an average of $3\frac{1}{2}$ years of college education.

With the greater availability of accepted and proven aptitude tests, private employment agency management has brought a more scientific and thorough screening treatment to job placement. Modern data processing methods are being used for cross referencing of both applicants and employers' needs.

Under the grandfather clause in SB 1037, present licensees will of course be covered in. This clause, however, is considerably more restrictive than most such provisions. While those people who come in under the grandfathers clause may retain their licenses as long as there is simple renewal, in any case where there is any change in name, location, or financial participation, licensees must meet the requirements.

Combined with the industry's rapid attrition and turnover which we can probably expect will continue for at least a year, all these factors hold promise that a generally higher level of competence can be achieved very quickly.

The present operation regulations are carried over almost intact from the Labor Code, and will continue as the basis for policing agency actions.

We feel certain, however, that requiring higher standards of knowledge and experience on the part of agency management will serve to *prevent* many of the problems that today necessitate regulation. The "bad apples" can be dealt with *before*, not *after*, they happen.

The proponents of AB 1885 note correctly that the Department of Employment requires its employment security and personnel and management trainees to be graduates from college. It is important to note, however, that these trainees participate in an extensive training program for a full year.

We do recommend that part of the definition of experience in AB 1885 be added to those in SB 1037:

“The experience . . . may be obtained in any industry, state, or employment agency position wherein the primary function of the individual is the hiring or placement of personnel.”

This will substantially broaden the experience requirement.

If that definition is allowed as an alternate to the one-year experience standard proposed in SB 1037, and a qualifying examination required, the new licensee should have a good chance of becoming successful in the business and rendering useful service to the public.

SB 1037 (Section 9853) makes provision for an employment agency manager's license and specified in Section 9867 that “No such licensee” (owner or manager) “shall direct or supervise more than one office of any employment agency . . .”

While we do believe that there should be provision for an employment agency manager's license, so that new licensees can qualify as to experience, we think it is somewhat premature to require that all offices be under the supervision of a manager. It also would be unnecessary in a city such as San Francisco where an owner-licensee can well supervise two or three offices located in that city.

The need and desire of the employment agency industry is not to set qualifying standards so high as to keep competition out, while “locking-in” the incompetents, but it is to establish realistic licensing criteria to insure that newcomers are competent.

Noninclusion of Controversy Procedure

The only substantial section of the Labor Code provisions which cover employment agencies which is not included or substituted for in SB 1037 is present Section 1647. This is the so-called controversy procedure. And here we get to the source of the removal of agency regulation from the mainstream of American law. Here we really get to “. . . Looking Glass” world:

Labor Code Section 1647 provides:

“In all cases of controversy arising under this chapter the parties involved shall refer the matters in dispute to the Labor Commissioner, who shall hear and determine the same, subject to an appeal within 10 days after determination, to the superior court where the same shall be heard *de novo*.”

In 1953 the Legislature amended the section by adding:

“The Labor Commissioner may certify that there is no controversy within the meaning of this section, where the agency presents substantial evidence that the applicant acknowledges the fee to be due.”

which amendment the courts declared invalid. (*Bess v. Park* (1955) 132 CA 2d 49. 281 P2d 556). In other words, the courts declared that

simply not paying an agency fee constitutes "controversy" within the meaning of Section 1647.

This is the section that so greatly limits an agency's access to the courts as almost to deny it. Under 1647, the agency contract, which must be approved as to form by the Labor Commissioner, cannot be enforced through normal legal processes until after his "determination" that the contract is valid.

According to the commissioner's ruling, collection of an overdue fee, duly contracted for, and not disputed by the debtor, may not be assigned to a collection agency, until after the employment agency has obtained a "determination" that the applicant does owe the fee. A byproduct, but very important effect, to the job seeker as well as agency, is that the procedure denies the use of normal credit channels for financing of placement service fees, which would be highly beneficial to both parties. We may not "threaten" a debtor with legal or collection procedure. We may not even imply in a collection attempt that the Labor Commissioner will rule the fee due.

Actually, the assumption under 1647 that the agency's contract is not valid until it has been determined so by the commissioner does, in effect, declare that agencies are guilty of fraud until they have proven themselves innocent.

Let's take a very real but hypothetical case. This is what must happen before an agency can do more than ask politely for its fee:

1. Since the commissioner is adverse to awarding a determination for the full fee short of 90 days (which is defined as a permanent position), it is not practical to file a request for hearing until the applicant has been on the job for at least 60 days. (See Addendum—Note 1).
2. File the required, properly assembled documents and statement.
3. Wait an average of 30 days more for the scheduled hearing (during this period a great many debtors skip, resulting in no service, no hearing and no determination).
4. A representative of the agency must attend the hearing and prove all documents valid.
5. For those on whom service has been effected, there is another average 30-day period for the proposed determination.
6. Another 10-day period must elapse to allow for appeal to the commissioner from the proposed determination.
7. Receipt of final determination. (Often delayed far beyond the required 10 days).
8. A second 10-day period must elapse to allow for appeal to superior court.

It is now 140 days since the debt was incurred, perhaps without any payment to the agency. Only at this point does the agency pull up level with every other creditor in the business community, in his ability to collect contracted fees.

The tables of collectibility of accounts as published by collection experts show that a debt that is 90 days old has only half the chance of

being collected as one 30 days old. Collectibility diminishes in rapid ratio thereafter.

Agencies might just as well write "skips" off to begin with. They can't be served for a hearing and they can't be assigned to a collection agency without a determination. Resistant debtors who refuse to accept delivery of the commissioner's registered letter must be tracked down with personal service or written off.

In many instances, the decisions of the several deputies who handle these cases at the local level, have been capricious and contradictory. Appeals to the Labor Commissioner have given us little relief—and further postpone collection.

The only appeal from the final determination of the Labor Commissioner is to the superior court where the matter is heard anew. Not only does it take a year or more to have a case heard in that court, but the cost is such in relation to the average fee as to make it simply too expensive to appeal, except as a matter of principle. In effect, the appeal process is so expensive and difficult as to be unavailable.

California is the only state with a "controversy" procedure. In other states, a contract between an employment agency and its clients is regarded in the same manner as are other contracts and the differences between the principals are resolved by the judiciary.

Attorneys and judges to whom we have talked are not inclined to accept the commissioner's frequent statement that the Division of Labor Law Enforcement has unique expertise in adjudicating employment agency contracts and is therefore more competent to determine such matters than are the courts.

They have pointed out also, that since the essence of a contract is its enforceability in the courts, we actually *have no contract*.

Section 1647 nullifies our contracts for an extended period of time, denies us access to the courts, compounds our collection problems, increases our cost of operations (which must be paid by those who do pay their fees) while offering no protection to the honest applicant-debtor which is not already available within our court system. To the unscrupulous applicant-debtor, however, it offers an almost impenetrable haven of escape from paying a duly contracted obligation. Each year, as knowledge of this opportunity is disseminated further, agencies lose increased thousands of dollars.

How did Section 1647 come to be?

While the controversy procedure was written into the law in 1923, in its present language, its origin is in the Employment Agencies Act of 1913, when the Commissioner of Labor, his deputies and agents were vested with the power and authority of sheriffs and other peace officers to make arrests for violations of that act.

This authority was first used by the commissioner to investigate complaints against employment agencies, most of which involved refunds of placement fees which the agencies had declined to make voluntarily. As noted in the 16th biennial report of the Bureau of Labor Statistics for 1913-14:

"During the fiscal years 1914 there were filed 923 complaints against employment agencies. Each of these complaints was investigated, and in 632 cases fees and expenses to the amount of \$2,328.30 was ordered returned."

However, the commissioner in those days apparently felt that his jurisdiction in such matters extended only to positions which lasted less than seven days, but where the applicant had paid the full fee, for as noted in the 20th biennial report of the Bureau of Labor Statistics for 1921-22, it states:

"The law further provides that when the employment lasts less than seven days by reason of the discharge of the applicant, the employment agency must return to the applicant his fee or such part of the fee as in the judgment of the Commissioner of Labor may be adequate."

In the early 1900s, most employment agencies, like almost all other businesses, did not extend credit. Placement fees were paid in advance or the applicant was not sent to the job. Under the conditions that prevailed in the agencies of those days, as well as the nature and competency of their applicants and because small claims courts were not established until 1933, it is clear that the commissioner needed powers to compel the return of fees.

How the law gradually evolved to its present application by the Labor Commissioner is a question on which research yields little in the way of plausible answer. It appears to be a classic case of administrative practice which achieved the effect of law. As a result, perhaps the language of Section 1647 seemed practical and reasonable when it was proposed in 1923. It was probably enacted without realization of its far reaching effects or its potential damage to those to whom it denies the basic right of hearing by an impartial body. In addition, it seems clear that the Legislature did not intend that the procedure should extend to simple collection cases, for in 1953 it adopted the aforementioned amendment which permitted the Labor Commissioner to certify that no controversy existed. Undoubtedly, the Legislature did intend to provide, through the controversy procedure, a readily available method of arbitration for complaints of applicants against agencies. We believe that such a forum should be available and is highly desirable.

But, as the controversy procedure operates today, it deals predominantly with collection cases. Mr. Kenneth Cameron, Southern Area Deputy for the Division of Labor Law Enforcement, when he appeared before the October 5, 1960 session of the Assembly Interim Committee on Governmental Efficiency and Economy, discussed three types of controversies:

"One is a case in which there is no real dispute as to the amount of the fee that is owed, but in which there has been no payment. And since the agency is required by law to bring the case and get a determination from the Labor Commissioner before they can sue in court, or use normal legal process, some agencies bring their unpaid accounts to us as controversies for determination very early after they become due.

"That is one type of controversy which, in a literal sense, is really not a controversy. It is just an unpaid account. But by law it must be considered a controversy until the Labor Commissioner has determined it. This type of controversy in Los

Angeles accounts for perhaps as much as 75 percent of all controversies filed. This is what we call a collection case.

"Incidentally, in many cases of this type, when we have a hearing, the applicant does not even appear at the hearing although he is notified of it. He feels that he owes it and so he doesn't appear."

The other two types of cases, as discussed by Mr. Cameron, involve substantive issues and require "real consideration of the equities on both sides."

Commissioner Arywitz told our Los Angeles Chapter on March 12, 1964, that the Division of Labor Law Enforcement last year received 5,500 controversy cases. Judging from Mr. Cameron's statement, apparently the division acted on 4,125 pure collection cases. In addition to our other objections to this procedure, we question the propriety of the expenditure of public funds to this end.

Without the present procedure, most cases would be heard in small claims court where the maximum suit is now \$200. In a 1962 report of the Division of Labor Statistics and Research, prepared for the Division of Labor Law Enforcement, it is stated that the average fee paid by applicants for services leading to a commercial position was only \$99.74. Some placement fees do go considerably higher, but such fees are correlated to the applicant's level of responsibility, beginning salary, and therefore to his education and experience. We would estimate that fully 90 percent of all agency collection cases now heard under the controversy procedure would come within the jurisdiction of the small claims court. The operation of a small claims court is, of course, simplicity itself. No technical or expensive pleading is necessary as the clerk fills out the required information on prescribed forms; service is by registered letter with a required return receipt card; and the hearing for local residents must be held within 30 days, but in not less than 10 days. The conduct of the hearing is informal, as prescribed in the Code of Civil Procedure, Section 117:

"No attorney at law or other person than the plaintiff and defendant shall take any part in the filing or the prosecution or defense of such litigation in the small claims court. The plaintiff and defendant shall have the right to offer evidence in their behalf by witnesses appearing at such hearing, or at any other time. The judge or justice may also informally make any investigation of the controversy between the parties either in or out of court and give judgment and make such orders as to time of payment or otherwise as may, by him, be deemed to be right and just."

In describing the operation of the presently controversy procedure before the Assembly Interim Committee on Industrial Relations on August 31, 1962, Commissioner Arywitz said his deputies, in agency collection hearing:

"... concern themselves with whether the job on which an applicant has been placed is as represented, whether the fee sought by the agency has been properly computed, whether the contract receipt required by law is in order, whether the order for the job on file with the agency properly describes the placement, and whether all the other laws governing the relationship have been observed."

Such questions come before courts day in and day out on a wide range of subjects. We cannot believe that the courts are not competent to handle employment agency matters. We cannot believe that in our case alone, an officer of the executive branch of government is better qualified to sit as prosecutor, judge and jury than would be an impartial judiciary.

An additional safeguard for defendants in small claims court action is that the judge is specifically directed to prescribe the terms and condition of payment. If he concludes that the applicant client cannot pay the judgment in full, the judge schedules payment over a period of time, consistent with his ability to pay.

To recapitulate we object to the controversy procedure, particularly as it applies to collection cases, both in practice and principle, for the following reasons:

In Practice

1. It is not necessary. The interests of our applicant and employer clients would be as jealously and expertly protected by courts of competent jurisdiction as by the Labor Commissioner.
2. It unduly protects resistant and unscrupulous debtors.
3. The time interval between filing or a hearing and final determination is such as to make collections through the procedure, in many cases difficult or impossible.
4. Appeal to the superior court is so expensive and difficult as to be unavailable.
5. It is degrading to our applicant-clients whom the Labor Commissioner terms "wards of the commissioner." Such paternalism implies that these clients both jobseekers and employers, are incompetent and somehow not in the mainstream of American life or law; that the agency-client relationship is both unique and uniquely fraught with peril.

In Principle

1. The present procedure is uniquely discriminatory in that employment agency contracts cannot be enforced at law until first passed upon administratively. To our knowledge, employment agencies alone have no direct access to the courts for contract adjudication.
2. It denies agencies the basic right to unbiased and impartial hearing in legal determinations. By the inherent demands of his major responsibilities, the Labor Commissioner is biased toward our applicant client.
3. It places too much power in one office, the present procedure vests the function of the judiciary, insofar as the collection of agency fees is concerned, in the Labor Commissioner, who not only licenses us, polices us according to his own administrative rulings, but also sits in judgment on us.
4. It denies "due process" perhaps not constitutionally, but certainly in practice both because it assumes guilt until proof of

innocence and because the only appeal is to the superior court. Since most agencies cannot appeal because of the expense and time involved, appeal is, for practical purposes — unavailable.

The Labor Commissioner has stated on many occasions that he does not want to decide purely collection cases through the controversy procedure. However, he has vigorously and successfully opposed modification of that procedure before committees of the Legislature in 1962 and 1963, and he has never proposed an alternative. A proposed amendment which was heard before the Assembly Interim Committee on Industrial Relations on August 31, 1962 (AB 1016—Mr. Cusanovich—of the 1961 Regular Session), was drafted in accordance with the 1957 recommendation of this committee, which noted

“It is a fundamental of our constitutional system that the people shall have access to the courts and the term ‘the people’ most certainly include both parties to any disagreement.”

and recommended:

“... that an amendment be drafted to Section 1647 of the Labor Code providing for direct access to the appropriate courts by disputants but permitting courts to re-refer the cases to the Labor Commissioner for arbitration when genuine controversies regarding the obligation of one of the parties under the law or an employment referral contract exists.”

Procedures for Bona Fide Complaint Against Agencies

Not for a moment would we argue against the necessity for an avenue by which bona fide complaints may be brought against employment agencies. That was the intended purpose of the controversy procedure and if it had been limited thereto, it might have served its purpose well.

In our support of transfer of jurisdiction over agencies to the Department of Professional and Vocational Standards we clearly recognize the necessity for providing a practical, just, and easy means for the resolution of bona fide complaints, not presently provided in SB 1037. Perhaps it could be done by a section which would require that the Employment Agency Board establish an arbitration forum through a third party, such as the American Arbitration Association, for consideration of such matters. We suggest that the notice of the availability of such arbitration be included in the agencies contract-receipt, as is the controversy procedure at present, and that its cost be paid from the Employment Agency Licensing Fund. Provision might also be made for notifying the Labor Commissioner of such proceedings so that he could, if he so wished, extend the services of his office to the applicant.

Similarly, we suggest that in cases which are filed by employment agencies in courts other than small claims court, the agency or court be required to notify an appropriate officer of the state (perhaps the Labor Commissioner) of such action so that he could enter such proceedings either on behalf of the applicant or as friend of the court.

ADDENDUM

Note 1:

The commissioner normally declines to render a decision in a case for the full amount of the fee where the employee is still on the job, but 90 days have not elapsed. He feels that he could not render such a decision without prejudicing the applicant's right to a refund should his employment terminate in less than 90 days.

In the aforementioned *Bess v. Park* case of 1956 (144 CA 2d 798, 301 P2d 978), the court said:

"... The arbitrary postponement by appellant labor commissioner of his determination or award in the event of a dispute between the agency and the applicant would seem to amount to a nullification of the terms of a binding contract around which the controversy revolves. This would seem especially true when, as ... pointed out, the provisional remedies of suit, attachment and garnishment are unavailable to the agency until it is authorized to institute an action at law following the labor commissioner's award.

"In the instant case the court (trial) found that although appellant labor commissioner refused to make a determination and award with respect to the controversy between the agency and the applicant until after 90 days from the time the latter commenced his employment, that after the applicant had remained in his employment for a period of 90 days the commissioner made an award in favor of the agency for the full fee for permanent employment.

"As a conclusion of law the court (trial) decided, and we think correctly, 'That the defendant Labor Commissioner is under a duty to hear and determine all said cases of controversy with administrative diligence and dispatch and does not have the right, arbitrarily, to refuse to hear and determine the controversy on the ground that ninety days must elapse from the commencement date of the work before employment procured by the agency can be deemed permanent.'"

The commissioner still frequently declines to act with "administrative diligence and dispatch" which, as we noted, has the effect of nullifying our contract for an extended period of time, compounding our collection problems, substantially increasing our costs of operation which must be paid by those who do pay their fees.

EMPLOYER ORDERS—MEN

One recent week in one San Francisco agency

Job description	Education (NS—not specified)	Salary	Fee paid by
Purchasing Manager, small molded plastic and screw machine parts. Expediting. Production control	NS-----	\$12,000 year	E
Glass Blower, journeyman preferred, for research laboratory	NS-----	\$700 up	A
Group Supervisor, flexible packaging manufacturer	PhD, organic chemistry	\$12,000 year	A
Physical Chemist, intensive background in kinetics gas phenomena, minimum 2 years experience atomic gas reactions	PhD-----	\$12-15,000	E
Vision Research Scientist to do basic research in human vision, including flicker pattern, color vision, eye movement and other movement related to imagery processing in vision system	MA or PhD, engineering or engineering psychology	\$17,000 up	E
Engineering Trainee, sales—paper products-----	Degree-----	\$600	A
Engineering Trainee, sales—welding equipment-----	Degree-----	\$600	Discuss
Sales Engineer for signaling equipment, electrical and sales background, to call on contractors, electrical engineers, institutions. Will do estimating, takeoff, quotations	Degree not required	\$5,000 up	A
Electrical Engineer, 5 years experience power distribution and lighting with consulting engineers, to handle remodeling and new store plans, for large chain operation	BSEE-----	\$700-\$800	A
Laboratory Technician, 1-2 years experience in quality control	2 years college chemistry	\$500	E
Junior Accountant-----	Degree-----	\$400-\$500	E
Chief Accountant, S and L background-----	Degree-----	\$600	A (reimb.)
Bookkeeper, not full charge-----	NS-----	\$400-\$500	A
Sales trainee with burning desire to sell-----	Degree-----	\$500	Discuss
Accounting trainee, upper half of class, above average in personality, attitude and appearance, growth potential, experience in corporate accounting. To train in general accounting and factory costs	Degree, accounting major	\$500-\$550	A
Payroll Supervisor, supervise 17, for very large operation, salary payrolls, group insurance, retirement deductions and remittances, request for alien tax rulings, personnel files, periodic statements and reports. Good organizer	Degree in accounting	\$650-\$700	A
Office Manager, supervise warehouse office-----	Degree in accounting	\$600	Discuss
Sales Representative, new surgical product. Chemical, biological, medical experience good, but must above all be successful salesman. Top brass type. Calls on hospitals, administrators and surgical teams, with product used by anaesthetists	NS-----	\$600-\$700	Discuss
Florist Trainee, some floral design experience-----	NS-----	\$1.65 up for experience	A
Dealer Representative, paint. Develop new business	HS minimum-----	\$475-\$500	A
General Clerk, good typist, figure apt. Stock records, type orders, intelligent	HS minimum-----	\$325-\$350	A
Office Manager, administrative experience. Supervise seven girls. Handle incoming calls and complaints, billing, sporadic pressure. Doesn't have to be accountant	NS-----	\$500-\$600	Discuss
Office Boy, some work experience. Assist at freight desk, no typing	High school-----	\$275	A
Driver, part time, 14 hours week, Ford truck, 5-speed box, nights. Above-average man, able to deal with nurses, etc. Clean record. Able to pass extensive physical	NS-----	\$2.50 hour	A
General Plant Worker, baby milk preparation. Must pass stiff physical. Some weekends, but 40-hour week. Sharp, clean, promotable	NS-----	\$2.10 hour	A

PRIVATE EMPLOYMENT AGENCIES IN CALIFORNIA

ANNUAL STATISTICAL REPORT, 1963

Summary

PLACEMENTS AND FEES OF PRIVATE EMPLOYMENT AGENCIES IN CALIFORNIA, 1963

General employment agencies	
Total placements ^a	586,241
Applicant-paid fee placements.....	502,296
Employer-paid fee placements.....	83,945
 Total fees collected.....	 \$18,020,300
Applicant-paid fees.....	10,739,900
Employer-paid fees.....	7,280,400
 Theatrical and motion picture agencies and artists' managers	
Fees collected.....	\$16,741,200
 Labor contractors ^b	
Fees collected.....	\$587,600
 Nurses' registries ^a	
Total number of nurses placed.....	21,053
Male nurses.....	2,550
Female nurses.....	18,503
 Total fees collected.....	 \$821,000
Male nurses.....	113,700
Female nurses.....	707,300

^a Figures not comparable with years prior to 1962; 1961 legislation removed the nurses' registries from licensing under general employment agencies and separate nurses' registry licenses were issued.

^b Figures not comparable with years prior to 1962; pertain to 13 labor contractors as balance no longer required to be licensed.

TYPE OF AGENCY

General	—Places persons, for a fee, in all fields except those covered by artists' managers, labor contractors, nurses' registries, and farm labor contractors. A general agency also engaging in the theatrical and motion picture placements is issued one license as a general agency.
Theatrical and motion picture	—Books entertainers or groups of entertainers as artists, speakers, etc., for motion picture, radio, television, screen, stage, night club and other theatrical work.
Artists' manager	—Person who counsels artists in the development of their careers and obtains or attempts to obtain employment for them. Prior to August 1943, artists' managers were not covered. An artists' manager who acts as artists' manager and theatrical and motion picture employment agency, is also licensed as a theatrical and motion picture agency.
Labor contractor	—A person who, for a fee or other compensation, employs an individual to render personal services to, for, or under the direction of a third person.
Farm labor contractor	—A person who, for a fee, employs farm workers, for or under the direction of a third party, who supplies workers to a third party and in connection with obtaining workers may provide for a fee, services, such as board, lodging, or transportation for the workers, supervise the work and make payments to the workers.
Nurses' registry	—Places, for a fee, private duty nurses (registered nurses, licensed vocational nurses, or practical nurses) to render service to a patient under the supervision of a physician and surgeon registered to practice in this state. 1961 legislation added this category and removed them from licensing under general employment agencies.

^a Licenses are issued for the license year April 1 to March 31 of the succeeding year.

^b General agencies are all agencies other than theatrical and motion picture, artists' managers, labor contractors, and nurses' registries.

^c 1961 legislation removed certain categories of labor contractors from licensing requirements.

^d Effective January 1, 1954, license year for farm labor contractors changed to calendar year basis.

^e Effective August 4, 1943, the Labor Code was amended to establish a separate category for artists' managers. Prior to 1943 some persons who acted as artists' managers were licensed under statutes regulating theatrical and motion picture employment agencies. Others acting solely as artists' managers were not covered until August 1943. Artists' managers to whom both artists' manager and theatrical motion picture employment agency licenses have been issued are included with theatrical and motion picture employment agencies.

^f 1961 legislation removed nurses' registries from licensing under general employment agencies and provided for separate licensing as nurses' registries.

^g Beginning in 1960, figures not strictly comparable with prior years. Effective April 1, 1960, general employment agencies also operating in theatrical or labor contractor categories were issued only one license classified under general, instead of separate licenses for each category as in previous years.

All tables beginning with table 2 relate to general employment agencies only. The types of placements made by general employment agencies are grouped in the following fields of employment:

Commercial	—Includes office, sales, advertising employees, and kindred workers.
Baby sitting	—Includes and is limited to care of children in private homes, without accompanying domestic duties.
Domestic	—Includes domestic and personal servants and day workers in homes, except babysitters.
Hotel and restaurant	—Includes workers in hotels, bars, restaurants, bakeries, and lunch counters, and kindred workers, not including office employees.
Nursing and medical	—Includes practical, vocational and graduate nurses, office nurses, doctors, and other medically-trained persons including laboratory technicians.
Teaching	—Includes public and private school teachers in all grades.
Technical	—Includes laboratory technicians (other than medically-trained), lawyers, engineers, architects, and professional workers generally other than medical.
Miscellaneous	—Includes factory workers, laundry workers, garage and service station workers, beauty operators, models, and all others not included in any of the above classifications.

^a Based on annual reports received from general employment agencies; does not include transactions of theatrical and motion picture agencies, artists' managers, labor contractors, and nurses' registries. Includes both permanent and temporary placements; therefore no meaningful figure for "average fee per placement" can be derived from these data.

^b Beginning in 1957, figures include employer paid fees and placements, and are not comparable with prior years. Separate figures for employer and applicant paid fees and placements were requested beginning with the third quarter of 1957.

^a Based on annual reports received from general employment agencies; does not include transactions of theatrical and motion picture agencies, artists' managers, and labor contractors. Also excluded for 1962 and 1963 were transactions of nurses' registries; prior to 1962, nurses' registries were included with general employment agencies.

^b Permanent placements are those lasting more than 90 days; temporary placements are those lasting 90 days or less.

^c Metropolitan area definitions:

Los Angeles-Long Beach—Los Angeles and Orange Counties.
 San Francisco-Oakland—Alameda, Contra Costa, Marin, San Francisco, San Mateo, and Solano Counties.
 San Diego—San Diego County.

Per Diems Paid to Members of Licensing Boards, Commissions, and/or Committees Within the Department of Professional and Vocational Standards

Senate Bill 807, as introduced in the 1963 session of the Legislature by Senator Alan Short, originally proposed to increase per diems for the members of the various boards and commissions of the Department of Professional and Vocational Standards from \$25 per day to \$50 per day. The bill was subsequently amended in the policymaking committee, and the per diem allotment then proposed was \$35 per day—with the extra restriction that no member should receive more than 6 per diems in any one month, nor more than 60 per diems in any one year.

The payments would be made subject to the availability of moneys in that fund for which the particular member of the board or commission was serving. The proposed increase in per diem was intended to cover the increased cost of living which has occurred since the present \$25 per diem was instituted.

In the Department of Professional and Vocational Standards there are 32 boards and commissions, established by the Legislature, and the department acts as the administrative body and policymaking group for the various boards and commissions. The boards meet not less than four times per year, and most of them meet much more frequently.

A public hearing was held in Sacramento on October 29, 1963; the deputy director of the department, and representatives from the Board of Pharmacy, the Board of Dental Examiners, the Bureau of Furniture and Bedding, and the Board of Veterinary Medicine were present and testified.

At the time of the hearings, the Board of Medical Examiners had recorded the highest number of per diems, a total of 1,139, and a low figure of eight had been established by two boards (Guide Dogs for the Blind and the Licensed Physical Therapists) during the last period for which figures were available to the committee. During the year 1964, the low in per diems received by any one appointee serving on the 29 boards and commissions was \$25 for one day. The high was \$4,150 for 167 per diems.

As a result of questions raised concerning the number of meetings by some of the boards, and also because of the locale of some of these meetings, the bill amended, was referred to this committee for interim study. Investigation by the staff revealed that boards were meeting a great many times away from the large metropolitan areas where most of the licensees themselves are situated. The favorite place of these meetings appeared to be Santa Barbara, Monterey, Palm Springs, Tahoe Valley and Yosemite.

The Board of Architectural Examiners during the period from August 1, 1962, to June 8, 1963, met 11 times. Three of these were special meetings of one day's duration. These were held either in Los Angeles or San Francisco. Oral interviews were held on four separate occasions also in San Francisco and Los Angeles. These oral interviews of applicants for licensing took up a total of seven days. For its regular business meetings, the board met once in Santa Barbara for four days; once in Monterey for a period of five days and once in Palm Springs for four days. In addition the board met in Seattle for two days attending the Western Conference of Architectural Examiners.

Listed among its meetings is a committee meeting of the Board of Dental Examiners in Miami, Florida. This turned out to be the annual meeting of the American Dental Association. The Board of Accountancy held meetings in Yosemite and Coronado during the 1962-63 fiscal year. The Landscape Architect Board met a total of six times during the fiscal year. Four of these meetings were held in such places as Lake Tahoe, Yosemite, Palm Springs, and Santa Barbara. Lake Tahoe was a favorite meeting place for the Board of Veterinary Medicine and the Board of Shorthand Reporters. The concern of the committee is best set forth in questioning one of the witnesses:

Senator Stiern: "What is the point of going to Bijou with the Veterinary Board? — Why at Bijou? There is nothing central about the Lake Tahoe area."

Mr. Barbeau: There is nothing in the law—

Chairman Short: Mr. Barbeau aren't there other places that have more veterinarians than Bijou, California?

Mr. Barbeau: Yes.

Chairman Short: And it is not nearly as close to Stateline as Bijou is.

Mr. Barbeau: Actually—

Senator Stiern: The point I am getting at is this. It would seem that you would meet where it was an open meeting and people in the profession might like to attend. I don't know how many veterinarians there are in the Bijou area but I don't think there are as many as there are in the Los Angeles area or even in the Fresno area as far as that goes—

Some question was raised as to whether or not the giving of examinations and the grading of papers might not be handled by an independent agency. While it was extremely difficult to pin down the actual number of days spent, a good deal of time is occupied by most of the boards in the preparation, supervision, and correction of examinations. The chairman demonstrated great interest in this function of the boards, as indicated by the following question:

Chairman Short: "Let me ask you this, it is possible to get from the department a study of whether it would be feasible to have knowledgeable people, the same as we have in the members of the board, prepare the examinations and correct them, for example, professors in the dental school to prepare a written examination and appropriate members of academic staffs to correct them and to make a survey to determine what they would charge to prepare these examinations and to correct them so that you wouldn't take busy people away from busy jobs. So that these people that are on the boards can best spend their time in policy matters rather than grading papers. Is it possible to make such a survey? May I ask, on behalf of the committee, since the director of the department is here, we would appreciate such a survey being made of some kind or a determination given us as to whether it is feasible or what it would cost. I don't think you are going to have any trouble with the Athletic Commission. Check the dental examiners, the medical examiners and see what they come up with. I think

that we would very much like to have this information and I think that we could use it in our general reports."

The information requested in the report has not yet been received. The department has not completed its study on examinations. This is a complex matter; the per diems are misleading with respect to the examinations of the so-called healing arts: the Chiropractic Examiners, the Dental Examiners, the Funeral Directors, Medical Examiners, Board of Pharmacy, etc. These boards prepare the examinations, give them, and correct the papers. The other boards, in many cases, handle this matter by a combination of arrangements. For instance, the Board of Civil and Professional Engineers employ outside experts to prepare tests and examine applicants. If the costs were reflected in the per diems, the average per diems would be in keeping with those of such others as the Board of Pharmacy and the Board of Dental Examiners. The Contractors' License Board has a permanent staff that handles this function. The Board of Cosmetology uses civil service examiners for this purpose, and has done so for the last three years. The Board of Barber Examiners has this work done by full-time board members, employing two part-time board members as well.

With respect to the relationship of costs and per diems, the following interesting testimony was offered by Leon Happell, a member of the Board of Pharmacy:

Leon Happell: "One reason why they didn't blush when we asked for this increase was the fact that in 1950 the average wage of a pharmacist was about \$350 a month and now, a young man out of school, who has just received his graduation and is licensed by the commission of the board, will receive a wage of not less than \$850 a month, and I have one pharmacist that I pay \$1,100 a month to. I have several that I pay \$950 a month to, or about that, but the average run of the mill is about \$45 a day for a pharmacist. The law provides that you must have a registered pharmacist in charge of a pharmacy at all times and this is where we vary from all of the other boards. It is mandatory that as long as the door is open, there must be a registered man in charge. A man leaves to attend a board meeting, he has to place a man in his place, if he is operating at full capacity. It will cost him \$50 a day to put a fellow in there to take his place and these facts can be borne out by any kind of an interrogation."

In connection with this increased cost, it might be well to review the present status of per diems for appointees to the board and commissions in the Department of Professional and Vocational Standards. Prior to 1959, the members of the various boards and commissions received their per diems with figures set forth in each individual bill. There was a discrepancy from board to board and an effort was made to achieve uniformity for all appointees during this period.

Legislation was subsequently introduced and passed, setting forth the \$25 per diem presently existing. This achievement obviously required some compromise. As previously stated, the desire to increase the per diems is predicated upon the existence of increased costs. Almost without exception, the appointee suffers a financial loss in deal-

ing with board business and attending board meetings. It is doubtful that any of the board members receive less than \$25 a day in their regular occupations. Where the proprietor of a business is concerned, it is necessary in almost every case that he have someone to replace him and take care of business in his absence. The purpose of the per diems is to compensate for this personal sacrifice.

The committee staff contacted the States of Florida, Texas, Pennsylvania, New York, Massachusetts, Illinois, and Ohio, with a view to ascertaining what these particular states paid in the way of per diems to various appointees to similar boards and commissions in the respective states. In requesting information from the various states, an effort was made to pick those states that were relatively similar to California in economy, and had sufficient population to be properly indicative. The States of New York, Illinois, Florida, Ohio, and Pennsylvania responded. Attached, as an addendum or appendix to the report, is the information received from those states cooperating with the committee.

In none of these states was there a uniformity of payment. In New York, the per diems ranged from \$30 to \$60. In the State of Illinois, interestingly enough, most of the appointees to boards and commissions receive no per diems, but only their actual expenses. The few who do obtain per diems receive from \$10 per day to \$25 per day. While the information from the State of Florida was not clear and covered many of the judicial offices, etc., there appears to be a pattern of payment of \$35 per diem to members of boards. That of the Board of Pharmacy is specifically spelled out in one section of the Florida statutes. In the State of Ohio, the per diems ranged from a low of \$15 per day to a high of \$100 per day. Certain appointees in the State of Ohio receive yearly allocations. For example, the State Racing Commission receives \$2,500 a year and the Ohio Turnpike Commission receives \$5,000 per year. The Board of Building Appeals, which receives the maximum of \$100 per diem, may not exceed \$3,000 per year in per diems. In the State of Pennsylvania, the per diems ranged to a maximum of \$50 per day.

The financial provision factor was discussed at the hearings, and information received from the department indicates that with slight exception there are sufficient funds in each agency or bureau to match increased costs. The comparison of per diems for 1963 and 1964 is attached hereto, and made an appendix. The estimate of increased cost is also attached hereto and made an exhibit and part of this report.

RECOMMENDATIONS

The committee feels that the per diems of the boards should be increased to \$50 per day. From an equity standpoint, there is a sufficient justification on the basis of increased costs to the members of the boards. Moreover, a comparison of figures from other states indicates that the \$50 figure would not be remiss, and would in fact be in keeping with a logical provision; the \$50 figure would then be in order.

The committee feels that substantial savings could be made and the number of per diems decreased and/or made more meaningful if the examination preliminaries and procedures were investigated. In this connection, the committee feels that there should be a repeal of any statute that provides for the payment of per diems for correcting a given number of examination papers. It is felt that in some cases the time spent in giving and correcting examinations, and the number of people passing upon same, may be open to question. This topic should be the subject of further investigation, and the committee recommends that this matter be referred to an appropriate interim committee for further study and recommendations to the 1967 Legislature.

APPENDIX

AMENDED IN SENATE JUNE 6, 1963

AMENDED IN SENATE MAY 6, 1963

SENATE BILL

No. 807

Introduced by Senator Short

February 27, 1963

REFERRED TO COMMITTEE ON BUSINESS AND PROFESSIONS

An act to amend Section 103 of the Business and Professions Code, relating to payments to members of licensing boards, commissions, or committees.

The people of the State of California do enact as follows:

SECTION 1. Section 103 of the Business and Professions Code is amended to read:

103. Each member of a board, commission, or committee created in the various chapters of Division 2 (commencing at Section 500) and Division 3 (commencing at Section 5000), and in Chapter 2 (commencing at Section 18600) and Chapter 3 (commencing at Section 19000) of Division 8, shall receive the moneys specified in this section when authorized by the respective chapters.

Each such member shall receive a per diem of thirty-five dollars (\$35) for each day actually spent in the discharge of official duties, and he shall be reimbursed for his traveling and other expenses necessarily incurred in the performance of his duties; *provided, that no member shall receive per diem for more than 6 days in any one month, nor for more than 60 days in any one year.*

Such payments in each instance shall be made only from the fund from which the expenses of the agency are paid and shall be subject to the availability of money in that fund.

State of Florida
OFFICE OF THE ATTORNEY GENERAL
TALLAHASSEE

JAMES W. KYNES
Attorney General

FRED M. BURNS
Assistant Attorney General

September 25, 1964

HONORABLE RAY E. GREEN
State Comptroller
Tallahassee, Florida

Attention: Honorable Charles D. McClure
General Counsel

Re: Construction of Section 465.051, Florida Statutes, in the
Light of Chapter 63-400, Acts of 1963

Dear Mr. Green:

This is in reply to your recent request for an opinion of this office upon substantially the following question:

Is the Comptroller of Florida authorized to make payments of \$35 per diem compensation to each member of the Board of Pharmacy while they are on official business, as was set forth in Section 465.051, Florida Statutes, 1961, in addition to travel expenses as provided in Section 112.061?

Section 465.051, Florida Statutes, 1961, contained the following language not included in the said section in the Florida Statutes, 1963, to wit, "Each member of the board shall be paid a per diem allowance not to exceed thirty-five dollars for time actually expended incident to attendance at board meetings or to the performance of other duties as a member of the board and shall also be reimbursed for expenses incident to attendance at board meetings or to the performance of other duties as a member of the board," which language was replaced in said Section 465.051 of the Florida Statutes, 1963, by the following language, to wit: "Each member of the board shall be reimbursed for traveling expenses as provided in section 112.061." The language in both the Florida Statutes, 1961, and the Florida Statutes, 1963, down to the first above quoted language is the same and is verbatim. The history note to said Section 465.05, Florida Statutes, 1963, indicates an amendment by Section 19, Chapter 63-400, Acts of 1963.

Chapter 63-400, Acts of 1963, is primarily an act amending Section 112.061, Florida Statutes, which section is in fact amended by Section 1 of said Chapter 63-400; subsequent Sections 2 through 18 of said chapter make specific amendments to portions of Sections 11.13, 13.01, 13.24, 102.021, 103.071, 103.102, 158.03, 230.201, 272.18, 298.14, 340.05, 388.141, 489.03, 550.03, 601.06, 625.121 and 64.07, each of which clearly relates to the per diem and travel expenses incurred by state officers and employees when traveling in connection with state business and their duties, and do not seem to relate to their salaries or other official compensation. It is clear from a reading of said Section 112.061, as amended by said Section 1 of Chapter 63-400, that said Section 112.061

was designed and intended to pay the authorized traveling expenses of the traveler and to reimburse him for his authorized lodging and meal expenses while traveling on state business. It does not cover, and was not intended to cover, the compensation, whether paid by the day, week or month, of the traveling officer or employee as compensation for services performed.

We are confronted with the construction of the portion of said Section 465.051, Florida Statutes, 1961, which was deleted from said section in the Florida Statutes, 1963, that is, "each member of the board shall be paid a per diem allowance not to exceed thirty-five dollars for time actually expended incident to attendance at board meetings or to the performance of other duties as a member of the board *and also* be reimbursed for expenses incident to attendance at board meetings or to the performance of other duties as a member of the board." (Emphasis supplied.) The use of the words "and also" indicates something in addition to, something besides, or as well as, the matter or thing previously mentioned (Webster's Dictionary; 3 Words and Phrases, Permanent Edition, 632 and 633). The phrase "and also be reimbursed for expenses incident to attendance at board meetings or to the performance of other duties as a member of the board" contained in the Florida Statutes, 1961, but omitted from the Florida Statutes, 1963, appears to relate to the expenses incurred by a traveler, and not to his compensation as an officer or employee, and seems to be substantially the same as is expressed in the Florida Statutes, 1963, by the following language, "each member of the board shall be reimbursed for traveling expenses as provided in section 112.061." The language "each member of the board shall be paid a per diem allowance not to exceed thirty-five dollars for time actually expended incident to attendance at board meetings or to the performance of other duties as a member of the board," contained in Florida Statutes, 1961, but omitted from the Florida Statutes, 1963, appears to have been intended as official compensation of the board members, and not as reimbursement of their travel expenses embraced within Section 112.061, Florida Statutes, as amended by Chapter 60-400, Acts of 1963. There appears to have been no conflict between the portion of Section 465.051, Florida Statutes, 1961, above discussed, and said Section 112.061, Florida Statutes, as amended by Chapter 63-400.

The Florida Statutes, 1961, were codified by Chapter 63-2, Acts of 1963, with the amendments of Sections 16.19, 16.20, 16.22, 16.23 and 16.24, therein made, as and constituting the Florida Statutes, 1963, which act of codification became and was effective from and after April 10, 1963. Under existing statutes (Sections 16.19, 16.20, 16.21, 16.22, 16.23, 16.24 and 16.44, Florida Statutes, the Statutory Revision Department of the Attorney General's Office, prepared the "Florida Statutes, 1963," containing the provisions of the said Florida Statutes, 1961, and the compilation therein of the amendments, changes, extensions and additions made by the 1963 Florida legislature. In *Foley v. State*, Fla., 50 So. 2d. 179, it was stated that the adoption of the Cumulative Supplements of 1943 and 1945, made by Chapter 24,337,

Acts of 1947, as the Florida Statutes, 1947, did not include as statute law the amendments, extensions, additions, etc., made by the 1947 legislature, which were compiled by the Statutory Revision Department and included in the publication known as the Cumulative Supplement, 1947. In *Lipscomb v. Gialourakis*, 101 Fla. 1130, 133 So. 104, and *Lipscomb v. Kaloroukas*, 101 Fla. 1137, 133 So. 107, it was held that the additions made in the Compiled General Laws, 1927, to the statutes contained in the Revised General Statutes of Florida, 1927, were not statutory law, but as to such additions were merely a compilation and therefore not statutory law as were the Revised General Statutes, 1920. These cases and observations lead to the view that the portions of the Florida Statutes, 1963, derived from the Florida Statutes, 1961, without change by the 1963 legislature, is the evidence of the statutory law of Florida, and will control over the session laws from which derived, while the portion of the said Florida Statutes, 1963, derived from 1963 session laws, including amendments thereof made by the 1963 legislature, are merely compilations of the said 1963 laws, and merely presumptive evidence thereof, and will be controlled by the said 1963 enactments in case of conflict between the 1963 session laws and the said publication known and designated as the Florida Statutes, 1963.

In the light of the above and foregoing we hold that the omission of the following language, to wit, "each member of the board shall be paid a per diem allowance not to exceed thirty-five dollars for time actually expended incident to attendance at board meetings or to the performance of other duties as members of the board," was not repealed by reason of its omission from the publication known as the Florida Statutes, 1963, and has remained in force and effect. However, unless this error is corrected by an act of the 1965 legislature, or by the 1965 act adopting the 1963, Florida Statutes, as the Florida Statutes, 1965, the same will be repealed by reason of 16.20, Florida Statutes, if included in the 1965 act adopting the 1965 statutes.

Your above stated question is answered in the affirmative up to the time of the adoption of the Florida Statutes, 1965, after which the question must be determined from the actions of the 1965 legislature.

Sincerely,

JAMES W. KYNES
Attorney General

THE HONORABLE ALAN SHORT, *Chairman*

Senate Factfinding Committee on Business and Commerce
 California Legislature
 State Capitol
 Sacramento, California

Dear Mr. Short:

Attached is a copy of the information requested by you from the Governor and routed to us for reply. Somehow during the hectic days of a special session of the Ohio General Assembly we overlooked the request and must apologize for this delay in answering. We hope your need for it still exists.

We had no prepared information on the per diem paid to the members of the various state boards, so it was necessary to prepare it ourselves. We have not included the full-time boards and commissions such as the Public Utility Commission, Civil Rights Commission, Board of Personnel Review, Industrial Commission, Liquor Control Board and others, which are full-time positions paid on an annual salary. Also excluded are numerous unpaid bodies such as university trustees and advisory boards of all kinds which receive only expense money in connection with their attending meetings.

If the figures in the second column confuse you, the number to the left is the total membership, the second is the number appointed by the governor, the difference being ex officio members.

Sincerely,

CHARLES H. WESTON
Research Librarian

December 31, 1964

HONORABLE ALAN SHORT, *Chairman*
Senate Factfinding Committee on Business and Commerce
State Capitol
Sacramento, California 95814

Dear Senator Short:

Governor Kerner has requested this office to reply to your inquiry concerning the compensation of various boards and commissions in the State of Illinois.

The enclosed brochure, together with the addenda to page 26, shows the present compensation, if any, paid to the various state officers and boards. You will note that the particular type of board about which you inquire, that is, the various occupational, examining and licensing boards, are for the most part paid no compensation and for those that are paid the compensation is nominal. The members of these boards are entitled to reimbursement for expenses incurred in the performance of their duties.

Sincerely yours,

LOREN M. BOBBITT

GOVERNOR'S STATUTORY APPOINTMENTS 1964

Under the statutes, the Governor of Illinois makes appointments to more than 140 different agencies, boards, or classes of offices, ranging from department directors to notaries public. Appointments where the statute creates particular offices (rather than a class with an indefinite number of appointments, such as notaries public) now total more than 1,000, as shown below.

	<i>Agencies, boards, or classes of positions involved</i>	<i>Number of individual appointments</i>
Code departments:		
Officers-----	17	47
Paid boards-----	4	17
Unpaid boards-----	43(a)	311 *
Other state agencies:		
Paid positions-----	14	47
Unpaid positions, executive agencies--	28	198
Unpaid positions, mixed agencies----	19	101
Interstate compact agencies-----	5	20
Local authorities-----	15(b)	262 *
	<hr/> 145	<hr/> 1,003

In about a third of the appointments, terms are indefinite or are staggered to expire in future years rather than in 1965. Some boards or commissions include ex officio members or members appointed by another public official, e.g., by a mayor. Note also that not all the positions mentioned here are salaried positions; for some, compensation is on a per diem basis, while others are allowed only expenses, as for travel and subsistence while performing official duties away from place of residence.

SCOPE OF MEMORANDUM

This memorandum seeks to list all appointments made by the Governor of Illinois pursuant to statutes and to describe the pay and other incidents of these appointments. Citations are to *Illinois Revised Statutes* (1963).

Most of the appointments described are listed in the *Directory of State Officers*, a publication originated by the Legislative Council but now compiled and published by the Secretary of State. The outline of presentation used in that directory is also followed in the presentation herein, (e.g., Code Departments, Other Departments, Higher Education, Boards and Commission, etc.). By using this method of presentation, it is possible to use the two publications as complementary to each other.

The schema of presentation follows the same pattern throughout the memorandum: (1) the name of the major agency involved, along with the statutory citation; (2) the nature of the position or positions (and in some instances there are separate citations given for these).

* Includes a category where the number of appointments is not clearly indicated in statute as follows: (a) members of advisory boards to local free employment offices (Department of Labor); and (b) notaries public of which there are approximately 250,000 (October 1964).

Following this information are a series of entries concerning (3) salary, (4) term of office, (5) qualifications, (6) Senate confirmation required or not required, and (7) miscellaneous.

The information on salaries indicates the compensation paid on an annual basis, but in some cases per diem rates are shown. Where there is an entry of "none," no salary is paid but usually official expenses incurred are defrayed.

Under the entries for term of office, there is also an indication as to when terms expire. There are a number of boards where terms of some or all members do not expire until a later year than 1965. Most of the positions under the code departments are two-year appointments expiring ordinarily on the third Monday of January of odd-numbered years.

Under the heading of "Qualifications," entries made here refer to qualifications specified in the statutes. For some positions, the technical nature of the position has required statutory guidelines on appointments. In other instances, requirements relate to political, geographical, or economic interest representation.

Under the heading of "Senate Confirmation," it is to be noted that appointments to positions created by the Civil Administrative Code are subject to confirmation by the Senate. Where appointments are made under acts other than the Civil Administrative Code, these separate acts sometimes omit a reference to Senate confirmation, although the Constitution generally requires Senate confirmation of "officers" appointed by the Governor (Art. V, Sec. 10).

Miscellaneous information is presented under the heading of "Other." In some cases, the composition of a board was too extensive to list in full; in other instances, exceptional bonding requirements are noted.

—PAUL W. REEDER

 5. Other—\$5,000 bond

Public Administrator (ch. 3, par. 163)

- a. 102 appointed by Governor: 1 for each county
 1. Salary—in Cook County, \$20,000; in all other counties, fee basis
 2. Term—4 years: expire 1st Monday in December, 1965
 3. Qualifications—none
 4. Senate confirmation—required
 5. Other—\$5,000 bond

STATE OF NEW YORK EXECUTIVE DEPARTMENT

Division of the Budget

STATE CAPITOL

T. N. Hurd, Director of the Budget

December 18, 1964

MR. ALAN SHORT, *Chairman*Senate Factfinding Committee on Business
and CommerceState Capitol
Sacramento, California 95814

Dear Mr. Short:

Governor Rockefeller has asked me to reply to your letter of December 3 requesting information on per diem fees paid to members of boards and commissions in New York State.

Members of commissions, boards and councils who meet on a part-time basis are most often paid per diem rates. There is no standard per diem; however, the amounts shown in the attached table represent the range of per diems paid to members of New York State commissions, boards and councils as of October 1, 1964.

Many state boards and commissions have a full-time, continuing function and their members are paid an annual salary, comparable to other state employees. In such cases, the chairman is almost always the head of the state department or agency associated with the board.

I hope this information will be helpful.

Sincerely yours,

T. N. HURD

Per Diem Rates Paid to Members of Certain New York State Commissions, Boards and Councils as of October 1, 1964

<i>Commission, Board or Council</i>	<i>Compensation per Diem</i>
Labor and Management Practices Advisory Council-----	\$60
Minimum wage boards-----	60
Unemployment Insurance Advisory Council-----	55
Medical Appeals Board-----	50
Public Works Advisory Board-----	35
Veterans Affairs Commission-----	30

COMMONWEALTH OF PENNSYLVANIA—GOVERNOR'S OFFICE

GOVERNOR'S OFFICE, HARRISBURG

December 9, 1964

HON. ALAN SHORT, *Chairman*Senate Factfinding Committee on Business
and Commerce

California Legislature

State Capitol

Sacramento, California 95814

Dear Mr. Short:

In reply to your letter of December 3, 1964, Governor Scranton has directed me to compile the necessary information to answer your question.

Please find enclosed a list of the different boards and commissions in Pennsylvania which I feel parallel the boards and commissions mentioned in your letter. Some of these boards are on salary and, therefore, we have listed the chairman's salary and the member's salary. The balance of the listings cover those boards and commissions which operate on a per diem and they have been divided into classifications according to their dollar value.

I sincerely hope this information can be put to effective use in your investigation.

Sincerely yours,

WILLIAM D. JOHNSON

Assistant Secretary to the Governor

Board of Arbitration of Claims

Chairman \$13,500, members \$11,000

Armory Board of the State of Pennsylvania

Members \$1,200

State Athletic Commission

Chairman \$7,500, members \$7,000

State Civil Service Commission

Members \$50 per diem, but no more than \$5,000 per diem compensation in any one year

Pennsylvania Labor Relations Board

Chairman \$12,000, members \$11,000

Pennsylvania Liquor Control Board

Chairman \$18,000, members \$17,000

Milk Control Commission

Chairman \$13,000, members \$12,500

Pennsylvania Board of Parole

Chairman \$15,500, members \$14,500

Pennsylvania Public Utility Commission

Chairman \$20,000, members \$19,000

Pennsylvania Securities Commission

Chairman \$13,000, members \$12,000

State Tax Equalization Board

Chairman \$14,000, members \$13,000

Pennsylvania Turnpike Commission

Chairman \$17,000, members \$15,000

Unemployment Compensation Board of Review

Chairman \$14,000, members \$13,000

Workmen's Compensation Board

Chairman \$14,000, members \$13,000

State Highway Commission

\$50 per diem, and expenses

Medical Advisory Board to the State Athletic Commission

\$35 per diem, and expenses

Advisory Board on Problems of Older Workers

\$35 per diem, but such compensation shall not exceed in any calendar year the sum of \$5,000 per member.

Air Pollution Commission

\$25 per diem, and expenses

State Apprenticeship and Training Council

\$25 per diem, and expenses

FOLLOWING BOARDS RECEIVE \$30 PER DIEM, AND EXPENSES

Appeals Board (under the Pennsylvania Prevailing Wage Act)
Advisory Health Board

TRAVEL AGENCY BUSINESS

THE TRAVEL AGENCY BUSINESS

At its organizational meeting at the conclusion of the 1963 Budget Session of the State Legislature, the Senate Factfinding Committee on Business and Commerce, on its own motion, proposed an interim study on the operation of travel agencies within the State of California. The committee has received many letters from California travelers requesting legislative action with respect to travel agents and their operations. This public response stems from the stranding of many California travelers in New York and Europe during the summer of 1963, and from other complaints by the traveling public.

The interim committee held a public hearing in San Francisco on December 4, 1963. Present and testifying at that hearing was Mr. Stanley Mosk, Attorney General of the State of California, whose office had made a complete investigation of the operation of one of the travel agencies because of the appendant publicity and complaints he had received from California travelers.

Seven California travelers appeared as witnesses, some of them traveling great distances, at their own expense, to be present and testify. In addition, there were present representatives from the Better Business Bureaus of San Francisco and the San Jose area, numerous owners of travel agencies in the State of California, and the General Counsel for the American Society of Travel Agents, who presented the picture of the travel agent and his problems.

Those witnesses appearing who had been travelers with problems sought redress and relief from the Legislature for their frustrations; they endeavored to secure relief and a solution to the problems entailed as a result of their travels. Some travel agents themselves had problems and were urging state licensing and regulation. The Attorney General in his testimony urged legislation to regulate and license travel agents operating within the state. The principal opposition to licensing obviously came from certain of the travel agents who appeared before the committee and testified.

The dominant organization within this field is the American Society of Travel Agents, commonly known as ASTA. This represents approximately one-third of the travel agencies operating in the United States. In addition to the testimony of the twenty some odd witnesses, statements were received from the Attorney General's Office of New York (which itself had made an independent investigation of this problem), and from some of the common carriers, the Air Transport Association, and the Civil Aeronautics Board. Congressman Emanuel Celler, Chairman of the House Committee on the Judiciary, was invited to testify but was unable to do so. However, he did send a copy of the report that the Antitrust Subcommittee of the House Judiciary Committee, of which he is the chairman, compiled with reference to travel agents as a part of their report on the airline industry.

Travel Agencies and Their Operations

The travel agency business is the focal point for travelers seeking information, particularly those contemplating vacation trips and tours, and is certainly the chief point of inquiry for those travelers endeavoring to save monies.

In this day of greater leisure time, more and more people are traveling, and as the standard of living increases, more and more people will travel greater distances. With the coming of the jet plane, it is now possible to take a world tour in less than 21 days.

Travel agents are as old as travel itself. The first brokers, undoubtedly, were those arranging space for travelers within the Phoenician Empire. As the Empire's trade expanded, travel expanded with it. The agent who was securing cargo for the boats and ships of that early day probably booked passage for the merchant who was endeavoring to sell his wares and expand his influence.

The advent of the railroad and its expansion, particularly in the United States, made the role of the ticket broker or the travel agent more important; the advent of air transportation made his job all the more glamorous. The term "Cook's Tour", which has become a part of the English language, was an outgrowth of the tours arranged by the largest travel agency in the world: Thomas N. Cook and Sons.

There are approximately 5 thousand travel agencies operating in the United States and Canada. It is estimated that the typical travel agency books 300 thousand dollars of gross business a year, of which 20 thousand dollars gross profit.

Perhaps the operations of a typical travel agent can best be described with an excerpt from the examiner's decision in the North Atlantic Tours Commission case for the Civil Aeronautics Board:

"He spends a substantial part of his time, labor, and advertising in promoting travel. This may be done by one or more of the customary means of publicity such as newspapers, radio, or television; speaking and exhibiting travel pictures, both still and moving, to local groups; distributing hand bills or direct mailing of travel folders.

"Once a client is attracted to an agent's office, he must be given personal attention and his needs for information and advice satisfied and, if possible, a trip sold. The nature of this work, of course, varies with the individual client, but a person who does comparatively little traveling might want information about the following matters:

- "1. The cost by the various modes and classes of transportation.
2. Distances and times involved.
3. Types of accommodations available.
4. Schedules available.
5. Methods of obtaining passports.
6. Comparative methods of surface and air transportation.
7. The availability of living accommodations at the point or points of destination."

A person dealing with a travel agency expects the agent to plan his entire trip and tour. This would include the motor transportation, itineraries, hotels or other types of accommodation en route, sight-seeing, etc. He is expected to quote a firm price for this trip or tour and issue the ticket and documents for the completion of the tour. He provides a service to the public that the transportation companies are unable to do. By the very nature of their business, the carriers do not have offices in all cities, and in the smaller ones have an office only at the airport or depot.

Many travel agencies specialize in planning and operating tours; some deal with ethnic groups. Many specialize in commercial operation and the larger ones issue travelers checks, extend credits, and maintain a worldwide network of offices. The travel agent derives his income from a commission on ticket sales, hotel accommodations, sight-seeing trips, etc. In almost all cases no charge is made to the traveler.

Not only has the jet aircraft made the world shrink in size, but world travel itself is no longer a luxury confined to the very rich. The average citizen, with the average bank account, now can afford his own grand tour. Trips to Europe are now being advertised in the mail order catalogs and in the catalogs of the trading stamp companies.

The travel growth in the United States in the past 15 years has been astounding. Figures from the *Immigration and Naturalization Reporter* of October, 1962 show that passenger departure from the United States rose from 1.2 million in 1952 to 3.3 million in 1962, and it is still increasing. This remarkable rise is attributed to the population growth of our country and the high level of our national income, as well as to the shorter work week and the increased leisure time enjoyed by the working class. A report of the Celler Committee indicated that the travel market will continue to grow at an accelerated pace and that the role of the travel agent in this growth will be substantial.

Complaining Travelers

Seven individuals appeared before the committee at its hearing in San Francisco and six of them testified. In addition, a representative of the Attorney General's Office testified as to the activities of two prospective travelers in Northern California. Two of the witnesses came great distances, on their own time and at their own expense, in order to appear.

The operation of Jerry Nyles Davis, doing business as the World Travel Center, was the focal point of the hearings and investigations conducted by the committee and its staff. Mr. Davis operated his agency in Palo Alto, California, and specialized in packaged tours. He advertised extensively in trade journals, and tried to deal with either ethnic groups or educational groups. Since under Civil Aeronautics Board regulations and carrier regulations advantageous rates can be obtained for specialized groups, Mr. Davis endeavored to hit these groups. The World Travel Center operation was predicated on the regulations which gave specialized groups these advantageous charter rates. Such organizations as ATA, YMCA, the Bar Association, associations of government employees, etc., which are not organized specifically for travel purposes and whose members have held membership for a period

in excess of six months, are eligible for these specialized group charters.

The World Travel Center was operating illegally and improperly in two respects: (1) the passenger in the charter was not a bona fide member of the group and had not been for the six-month period and, (2) organizing and soliciting such charters is illegal under the same regulations. These activities had created the problem of those who had purchased trips and tours from Mr. Davis and his World Travel Center.

A group of these California travelers, upon their return to the state after their experience, formed what they called the "Stranded Californians Club." Mrs. Joyce King, an instructor in education at the University of Southern California, who paid her own expenses from southern California to San Francisco for the hearings, was a classic example. She had arranged with Mr. Davis to take a tour known as the "Stanford Tour" to Europe. A friend had shown her a copy of the Davis ad in the *Stanford Daily News*. This advertising held forth the inducement and gave details of the trip.

She purchased the tour from Mr. Davis and left Los Angeles on June 28th. When she arrived at the Los Angeles Airport no one was there to meet her and no one that she contacted had any knowledge of the tour. She then paid her own transportation to San Francisco, and upon arrival there was advised that the tour plane had been canceled. After a great deal of difficulty, she received word that she was to proceed to the Oakland airport and await instructions. She did so and met a group of people leaving on the same tour.

After a lengthy delay they embarked on the plane. When they were seated and aloft they were given a paper to sign, which stated that they were members of the United Educational and Professional Association. It had a second paragraph stating that they would not be picked up in Paris or that they might have to go to another airport. Some refused to sign this paper, and when the plane landed in Chicago all left the plane and were told that the aircraft would be locked and that they would not be able to resume their trip until all of the passengers had signed the statement. Only the pressure of the other passengers and that of the agent's representative persuaded Mrs. King to sign this document, which was patently erroneous.

When they arrived in New York they were met by a representative from the New York Attorney General's Office, and they were taken to a hotel which was paid for by one of Mr. Davis' representatives. Arrangements were made for them to fly to Europe by Air France, but the CAB had issued a ruling that they were not a legitimate group and could not travel as planned. They subsequently left on another flight and Mrs. King arrived in Paris six days late. Her testimony dramatically portrayed her feelings:

Mrs. King: "Our tour had fallen apart in New York. It reminded me of a ship going down because one by one people left and went on their own. Some stuck with us and still tried to go on as a group. Finally, when it became apparent we couldn't, reactions varied. One little girl sat and cried in a corner in one of the rooms. She had eight dollars to her name and she was supposed to pick up money that had been wired to London for her and she didn't

know what to do. Several girls rounded up the Travelers' Aid and I never did hear what happened."

In order to continue her trip Mrs. King had to pay her full fare on the airline to Europe and, of course, the full fare to return home. Instead of being cheaper, her trip wound up being a great deal more expensive and considerably more inconvenient.

Miss Rosa Hann was another of the "Stranded Californians." She paid her own expenses from Ogden, Utah, to San Francisco and return in order to appear and testify before our committee. She had purchased a prepaid tour of Europe from Mr. Davis, having contacted him through previous employment in a printing plant which had prepared some travel folders for his agency. Upon her inquiry, he informed her that he was scheduling a student tour that would include hotels and sightseeing, and cover just what she wanted.

She purchased the 15-hundred-dollar tour that was planned to start in England and go through the Scandinavian countries, Germany, and Switzerland. The 11-week itinerary was to cover all transportation, hotel accommodations, and sightseeing trips. Instructions and itinerary announcement received from Mr. Davis read as follows:

"Our hotels are especially selected for the high standards of comfort and cuisine. All our meals, sightseeing, an experienced courier, transfers from airport, rail terminals, steamer piers, tips, taxes, entrance fees, all baggage will be taken care of, and, of course, everything of a personal nature will not be included in this price."

Miss Hann left the Oakland Airport on the so-called "Stanford Charter Flight" in June of 1963, with the understanding that she would be met at the airport when she arrived in London. The "Student Tour" which was to have been a large charter had diminished to a small group of 14 or 15 people. When she arrived in New York she was informed that she would have to pay an additional 40 dollars before she could proceed any further. While she was opposed to this payment, she felt that she did not want to be delayed in New York, and as she had already invested 15 hundred dollars, she paid and went on.

When she arrived in London, no one was there to meet her, and when she called the hotel that was mentioned in the itinerary they advised her that they had never heard of Mr. Davis or World Travel Center. Her testimony portrayed the impact of this experience:

Miss Hann: "There I was in the middle of Victoria Station in London and I had never been in Europe before in my life. Fortunately, I was in England and they spoke English. So a nice man from British United Airways got my luggage for me, which was more than I could pack, and got me a hotel, and the next morning I went investigating."

Miss Hann spent five days in London trying to get her trip on its way. She had to pay her own hotel expenses and meals during this period. She finally reached the Scandinavian countries, but instead of this being an all-expense tour, she was compelled to pay for all her meals and hotel stops, with the exception of her stay in Oslo. Most of

her time was spent at the American embassy, in attempts to contact Mr. Davis or one of his European representatives.

When she left the Scandinavian countries, her next destination was Germany. Upon arrival in Hamburg, she was taken to a rather expensive hotel and then told that she was on her own. She went to the travel agency which was supposed to be making arrangements for Mr. Davis there, and was shown a telegram which stated that the tour had been canceled because of insufficient funds. When she inquired at the American embassy she was advised that they were unable to contact Mr. Davis, as he had closed his office and gone out of business. It was up to Miss Hann to plan and provide for the balance of her trip, which was to last from July 10th, the date upon which she was informed of the cancellation, until September 10th, when she was due to return. Her feelings are best conveyed by her testimony:

Miss Hann: "I went from Hamburg on into Amsterdam and then I couldn't get hold of my parents because they were out of town. I couldn't get hold of anyone in the States. I had less than 50 dollars in my pocket. I do not speak German and I sat in that hotel wondering just how much longer I could go on."

Another member of the Stranded Californians Club was Mrs. Nicholas Petris, wife of Assemblyman Petris of Oakland, California. Mrs. Petris purchased a trip to Athens and back for herself and her father-in-law. She went on the same flight as Mrs. Joyce King. It was her understanding that this charter flight was for members of the Greek-American Progressive Association and the American Hellenic Progressive Association. She learned of the tour through an ad in the Greek-American newspaper in San Francisco. When the flight was stranded in New York, according to her testimony, she and 10 others were

"... whisked, literally whisked off our feet and put on a Pan American flight to London. Before we left they told us to wait at the London Airport and they would contact us and a group would eventually join us and we would all go on to Athens together."

Her testimony indicated that they waited at the London airport for 12 hours and had no place to go. They were afraid to leave because they hoped that they would hear from the World Travel Center. They subsequently became tired of waiting and paid their own fare from London. Mrs. Petris had to pay \$1,440 for the return flight from Athens it was necessary for Mrs. Petris and her father-in-law to pay their own fare. The packaged tour that was purchased from the Davis agency came to approximately \$540. In addition to the \$158 paid in London to Athens, which came to \$158. In order to get back from Athens to California.

The final witness who had been victimized by Jerry Davis and the World Travel Center was a Mr. Jan Smekens, who had purchased a tour to Europe for himself and his family in the summer of 1963.

Mr. Smekens' testimony was of special interest in that he had previously traveled rather extensively and was aware of the various regulations. He had earlier endeavored to put together a 25-person group, but had failed in the effort. When asked by the chairman why he had done this, he replied that it was done to secure a lower rate. He was subsequently advised that there was a group affiliated with the Cali-

fornia Teachers Association which he might be able to join, but he and his family were ineligible for this, as a California teaching credential was required and his wife did not hold such a credential. Their application to join this charter was consequently rejected. They later joined a group known as the Berkeley Books Unlimited Cooperative, which was planning a charter flight to Europe that met their needs. They paid the fare for this charter, but because of the fact that the departure date was moved up 15 days lost their eligibility and had their fares refunded.

Mr. Smekens was subsequently referred to the World Travel Center and was advised that the agency had a flight from Oakland to London and Paris and back to Oakland for \$399 per person. When he asked about eligibility, he was told that he would be traveling with the Greek-American Professional Association. When he inquired further about the membership requirements, he was informed that the charter would be allowed a certain percentage of nonmembers.

Mr. Smekens' troubles began on the departure date, June 8th, when he was advised that the plane would land in Luxembourg instead of London. When he and his family boarded the plane and took off they were approached by the group leader, a Mr. Richards, who was a professor of Greek languages at one of the northern California colleges. He spoke to Mr. Smekens and the other passengers, informing them that he was losing money on the trip, and requesting \$25 from each passenger. Mr. Smekens refused to pay the sum of \$100 for the four persons of his party, and Mr. Richards finally accepted \$50.

Instead of landing in Luxembourg, as they had been advised it would, the plane landed at Shannon Airport in Ireland, and they had to proceed from there on their own. When Mr. Smekens attempted to make arrangements for his return flight home he discovered, to his dismay, that he was unable to complete the trip bargained for. He spent considerable time in Paris trying to make arrangements and ended by borrowing \$1,900 to get home.

When asked to relate any other incidents or experiences with travel agents which had been unfavorable or misleading, he testified of one other such occurrence. He had at one time requested rates for a hotel in France where he and his wife had spent some time approximately 15 years ago. They asked a travel agent in northern California to make reservations for them and advise them as to the rates. They also contacted the hotel directly and received an answer from the travel agency and from the hotel directly within a couple of days. Questioned as to the nature of the replies, Mr. Smekens stated:

"The answer from the travel agent was \$12 a day; the answer from the hotel was \$4 a day."

All of the victims of the World Travel Center endeavored to recover damages and moneys expended, but were unable to do so. Mr. Davis had gone out of business and had no conceivable or visible assets. The stranded Californians engaged the services of an attorney to no avail. The Attorney General's Office made an investigation of Mr. Davis' operations, and the testimony of Attorney General Mosk will be taken up later in the report.

While the Californians who dealt with the World Travel Center constituted the largest group of victims, Mr. Davis was apparently not the only travel agent who had done disservice to the public. Mrs. Nan Walsh of Berkeley, California, an experienced traveler, gave testimony which contained as its high point of dramatic impact the story of a trip into Africa that has been booked for her by a travel agent who is a member of ASTA.

Mrs. Walsh: "On the second trip I had we were to go to Aswan, that was made with reservations in our contract, and when we got up there into Ethiopia we were supposed to take a plane from Addis Ababa to Haifa. Instead the man said, 'there hasn't been a plane leave here for four years.'"

Mrs. Walsh testified as to her experiences after having booked a world tour in 1961 through a northern California travel agent. When she made the arrangements for this tour with the agent, she inquired as to whether or not she would be able to secure a rebate if she completed her trip by boat instead of making the complete tour by air. When she went to pick up her tickets, he advised her that she would be unable to secure a refund, so she had to purchase an around-the-world plane ticket on Pan American Airways in addition to the boat fare from France to the United States. Mrs. Walsh held the unused portion of her plane ticket from Paris to San Francisco. She was unable to secure a refund, and when she made a later trip to Europe and endeavored to use the ticket, it was not honored for passage.

Another witness who had problems with a travel agent was Mrs. Jesse Booth. Mrs. Booth was a traveler from San Jose, California who had purchased a tour of the Caribbean from Martin and Associates, in Oakland, California. Her testimony was in the nature of a complaint that refunds were promised to her which were never granted.

Mrs. Booth: "We were given an itinerary, which I did not approve, and I called Mr. Martin about it. He said, 'Mrs. Booth, anything that you do not use in this little packet of green—' you know, the things they give you— 'you bring it back to the office and you will get your money refunded.'"

"Well, when we were on the ship we did not want to take this itinerary which we didn't approve of at the time, so we did not and went on our own. We got to Kingston, and got the lady to clip all the coupons together and she said, 'Just take these to Martin when you get back and everything will be refunded.'"

Mrs. Booth concluded her testimony by saying :

"We have not got our money refunded from those trips and we feel that it is very stupid to take this kind of thing and let them get by with it."

The final testimony dealing with complaints of travelers was given by Mr. Theodore McHugh, a special representative of the Attorney General's Office. Mr. McHugh gave details of the operations of travel agents in Oakland, California, as investigated by his office. There was one particularly touching situation which involved the embezzlement of over \$1,500 from a party in Oakland, who had paid the sum to an agent for an Hawaiian tour.

The party in question was a skilled worker who wished to celebrate his 25th wedding anniversary in the Hawaiian Islands. His wife was a victim of paralysis, which was rapidly leading to her demise. This party had saved his money, saved his vacation time, and in addition had borrowed \$1,200 from a credit union. The money was deposited with this Oakland travel agent to pay for the tour of the Hawaiian Islands which the worker and his wife had selected. They were given a receipt and told to contact the agent prior to departure time. When he called at the agent's office three days before his trip was to start, he found the door locked and the travel agent out of business. Mr. McHugh concluded as follows:

"To my knowledge the man has not at this moment received his money back and the same agent, when this travel agent closed his doors and left the scene, decamped."

Position of the Travel Agents

The testimony of those speaking for the travel agencies themselves was presented by the General Counsel for the American Society of Travel Agents and the officers of the California chapter of ASTA.

Mr. Rocco Siciliano, general counsel, expressed his feeling that the activities of Jerry Davis and World Travel Center had hurt the entire travel agency business because of the unfavorable publicity generated. The travel agents feel that something should be done to prevent a recurrence of such activity, and the solution that they proposed was the passage of federal legislation, which was drafted by their organization and introduced in Congress by Senator Magnuson of Washington.

This act would make it unlawful for any party, other than an airline or its employees, to sell air transportation or represent oneself as a seller of such transportation, except when said person was authorized in writing by a carrier or operator.

Mr. Siciliano pointed out the similarity between the proposed bill authored by Senator Magnuson and the present California regulations, which require registration and bonding of ticket brokers in the State of California. ASTA expressed the feeling that the charter system which was set up under the rules of the CAB itself brought on the fraudulent practice that led to the strandings of the California travelers in New York and Europe. Mr. Siciliano asserted that these rules were discriminatory with reference to travel agents, and created a very serious enforcement problem as well. The ASTA has requested the CAB to change these rules, and the Counsel felt that if CAB does not take appropriate action, the ASTA will probably go to court to force the change. He explained that the CAB regulations prohibit the travel agent from engaging in this type of business.

Mr. Siciliano: "A travel agent cannot legally solicit the public to gather a charter group. He cannot even solicit among the members of a bona fide organization in order to try to gather a sufficient group. He cannot solicit the members of an already gathered group for a special land tour. He loses his commission if he, or any of his employees, happen to be a member of this sponsoring group. The amount of assistance he can give in the ad-

ministration of the charter or group fare is severely limited. This situation has attracted a number of travel promoters who are not afraid to operate in violation of present regulations. These promoters are actually in the business of marketing illegal charters."

Mr. Siciliano expressed the view that even if California did license travel agents, the regulations could not prevent a shady operator from opening up shop in the State of Nevada or any other neighboring state and conducting his operation by mail. He concluded his statement as follows:

"ASTA is opposed to general across the board state licensing and bonding because (1) as noted above, it would increase the already intolerable burdens of regulations and bonding which now are imposed on the travel agency industry, and (2) imposition of state licensing would not be an effective way of preventing the recurrence of the strandings which occurred last summer.

"We are convinced that existing federal policy of pro rate of charters and affinity groups and tariffs is the basic cause of the countless hardships imposed upon members of the traveling public who had been stranded or otherwise inconvenienced. Therefore the most effective solution to this problem which is of such great concern to the travel industry is the elimination of the present system of pro rate of charters and affinity group fares. Certainly the travel agency industry should not be made the whipping boy for this problem by the imposition of state licensing merely, because out of the feeling that something—anything—must be done. The American Society of Travel Agencies and Agents are strongly in favor of curing whatever ills exist in the travel agency industry. We stand ready to cooperate in any way we can in supporting any specific proposals which deal with the specific evils that do exist."

Additional testimony was given by Mr. Don Everingham, President of the Northern California Chapter of ASTA, and owner of the Don Em Travel Agency. His testimony was to the effect that travel agents sell more than \$500,000,000 worth of air travel each year and that 75 percent of all international air travel is handled through travel agents. He pointed out that in order for an agent to be eligible for membership in ASTA the applicant must have three years of experience in the business and have at least two appointments by air and steamship conferences.

Mr. Harold Martin, owner of the Berkeley Travel Service and National Chairman for Aviation of the ASTA organization, testified opposing any state controls over travel agencies. Mr. Martin further declared that a great deal of harm had been done to the industry by a report and subsequent regulation changes brought about by the house judiciary subcommittee chaired by Emanuel Celler.

Testimony was received from representatives of the Better Business Bureaus of Santa Clara Valley and San Francisco. Both spokesmen indicated that they did not feel licensing of travel agents was necessary.

The Better Business Bureau of Santa Clara Valley directed a letter to Governor Brown expressing this opinion. Their testimony stated, in part:

"It is our feeling that the vast majority of travel agents as well as the several trade association groups interested in air travel have done an admirable job in serving the public and we would hate to see them made a subject of further restrictive legislation because of the Palo Alto fiasco."

The representative of the San Francisco Better Business Bureau concluded his testimony with the following statement:

"I think as far as activity is concerned, and I was on the desk during all the Jerry Davis affair, we find that there doesn't appear to be any evidence, as far as our files are concerned, that the entire field of travel agents should be subject to a massive push on the part of government to regulate the entire industry."

Testimony by three travel agents advocated licensing and strict regulation by some governmental agency. Gunner Norberg, who operates the Norberg Travel Agency in Carmel, California, testified quite strongly urging state licensing and regulation of travel agents. He stated that he had been the owner and operator of the Norberg Travel Service for a number of years and that he had extensive experience in the transportation business. He asserted that the airlines had a stranglehold on the travel agencies and could use the "club" of withholding approval to the extent of actually putting an agent out of business. He indicated that he had been an established agent for Pan American Airways for a number of years and had just recently received a questionnaire from them relative to the other sales and operations of his agency. Mr. Norberg said that he was being importuned by Pan American Airways to spend money for advertising, and threatened with withdrawal of their recognition as a branch travel office. He stated that when something of this nature had occurred some years before, he had not thought it very critical, but after Pan Am withdrew recognition of his branch office in another area all the other airlines followed suit, and while this was a mistake on their part it had never been rectified, and he had been forced to close down his branch office.

The testimony of Thaddeus Wolkowski, President of Viking World Travel Service of San Francisco, touched another point. Mr. Wolkowski is known as a "wholesale" travel agent, because he arranges and plans tours for other agents. He concluded his testimony as follows:

"The American Society of Travel Agents has utterly failed in its mission . . . it is 32 years since ASTA was organized and it still represents a small fraction of American travel agents. It is of vital importance to the American public, as well as to the travel trade, that all travel agents be licensed and bonded."

Mrs. Ralene Olson, as associate of the Curtis Travel Agency in Sunnyside, stressed the need for licensing. She pointed out that the public has no guarantee that the money paid to a person holding himself forth as a travel agent will purchase the service for which payment has been

made. Nobody exists which can guarantee proper service or punish those who do not provide it. Mrs. Olson believed that in the absence of federal controls the only logical course for California would be the enactment of a licensing law.

The final testimony in behalf of the travel agents was offered by a representative of Thomas N. Cook and Sons, one of the world leaders in the business. He stressed the unfairness of the charter business and strongly suggested that lower air fares were the answer to this problem. He concluded his testimony by declaring that the travel agents, themselves were trying to initiate a program for the certification of travel agents, with three years experience to be necessary for the securing of such a certificate.

Report of the Attorney General's Office

Attorney General Stanley Mosk testified that his office had conducted an extensive investigation of the travel agents in California as a result of complaints that were triggered by the Jerry Davis fiasco. He stated that most travel agents are reputable businessmen who serve the public. They save the client time by providing him with the type of service that best suits his needs. But he pointed out that the only genuine requirement for the setting up of a travel agency is the printing of a business card with the words "travel agent" appearing thereon, together with either your own name or the trade name of your agency. He suggested that while it might be convenient to rent an office and secure a telephone, these actions were not absolutely necessary.

He discussed the state law which requires the travel agent to register with the Secretary of State and post a \$5,000 bond. This requirement is apparently not an absolute necessity, as less than half of the state's travel agents have seen fit to comply with the regulation.

The Attorney General referred to the need for the travel agent to secure appointments from transportation companies so that he can sell ticket stock, which is vital to the operation of a travel agency. This involves securing certification and sponsorship by one carrier of the Air Traffic Conference, as well as by the International Air Travel Association. Once this is secured, the agent is able to obtain ticket stock and is in business. The Attorney General stated that the Air Traffic Conference, before granting approval, requires a substantial bond to be posted by the agency. It is of interest to note that this bond is not for the protection of the public, but is designed to protect the airlines from any fraud or dishonesty on the part of the travel agent.

The Attorney General discussed the Magnuson bill, and pointed out that this bill provided for a thousand-dollar fine for any person representing himself as a seller of transportation unless he has been specifically authorized by the carrier. He indicated that the bill as explained by ASTA has a two-fold object: (1) to protect the public from a small group of unscrupulous travel promoters who have been selling dubious charters and, (2) to head off state licensing in California and New York. Attorney General Mosk stated:

"I question whether it will accomplish the first purpose, and I hope it won't accomplish the second."

He referred to the weaknesses in CAB regulations which grant the airlines almost sole control over travel agencies. His testimony was highlighted in discussing the World Travel Center debacle:

Attorney General Mosk: "Jerry Davis handled more than \$500,-000 in air fares in 1963 without any kind of bonding requirements, and had Senator Magnuson's bill been law, Mr. Davis would still have handled \$500,000 in fares, would still have messed up the vacations of over 700 California citizens, would still have operated precisely as he operated, and the federal government would not have had one jot more authority to deal with him than they do now—without Senator Magnuson's bill.

"These bills are based on the same fundamental misconception that ASTA has cherished and reiterated since these problems became public knowledge. Specifically, that the ills of the travel industry are due to unscrupulous promoters, not travel agents. That their wrongdoing is abetted by non-CAB certified air carriers.

"There is only one problem about the neat analysis. Jerry Davis was a bona fide travel agent. He was a conference-appointed, carrier-approved, ticket-holding travel agent. Not a member of ASTA, to be sure, but then only slightly more than half of all travel agents have obtained that distinction."

Attorney General Mosk stated further that the federal government does not now have effective control, . . . that the proposed legislation would give adequate control, and that he felt the citizens of California were entitled to some protection from their state government.

Attorney General Mosk related the fact that at a recent convention of the World Travel Congress ASTA had adopted a resolution to "take all reasonable efforts to oppose state licensing of travel agents." Thus, without having seen any proposal, they closed the door to any possible suggestions of attaining better protection for the public. Their action was taken in spite of an offer by his office to allow them to participate in the development of any legislation that might be drafted.

Mr. Mosk contended further that it was ludicrous to look to the CAB for protection. His staff had worked with 25 percent of the CAB staff on their investigation of travel agency operations, and this 25 percent consisted of two (2) investigators. So the CAB has a total of only eight (8) investigators to handle routine complaints for the entire United States, without even thinking of preventive checking or major investigation.

The Attorney General concluded his statement with excerpts from the magazine "Travel Weekly":

"Reviewing last summer's events stirs up new indignation. The abuses were so flagrant that they rendered meaningless all the CAB and conference regulations supposedly in force, not to mention the futility of repeated 'we must protect the public' pronouncements by the state and federal authorities . . . Without a doubt, the charter promoters—as soon as they have finished the monotonous job of adding up the season's profits—will be mapping new plans for another banner season in 1964. If the past is any

criterion, they will suffer little inconvenience at the hands of the law enforcement agencies . . . But the state and federal officials will continue to make speeches and issue press releases about their deep concern for the 'public welfare.' . . ."

The Role of the CAB and the Air Traffic Conferences

Under the Civil Aeronautics Act, Congress conferred on the Civil Aeronautics Board, commonly referred to as the CAB, extensive powers to regulate all persons engaged in "air transportation". The sale of tickets per se is not in itself regarded as air transportation, and in consequence the CAB does not have the authority to regulate travel agencies. However, under Section 412 of the Civil Aeronautics Act approval has been given to the agreements worked out by the air traffic conferences in their control over travel agencies. The federal courts have held these agreements to be immune from the antitrust laws.

The advent of highspeed aircraft, the rise in the national income, and the general occurrence of more leisure time have accelerated the growth of the travel agency business and contributed to its problems. Before the travel agent can sell passenger space on the major airlines and receive commission on these sales, he must be accredited by the ATA (Air Transport Association) air traffic conference. The Celler Committee report defines the conference system as:

" . . . joint action by carriers to standardize relations with agents and to establish a list of qualified agents from which the individual carriers can pick their representatives."

ATA handles this for domestic air travel. The International Air Transport Association handles it for foreign air travel.

ATA and IATA have absolute control over the destiny of any travel agent. He must make written application to the conference for accreditation, and be sponsored by a certified airline. The application must be approved by a two-thirds vote of the members. After approval, the conference retains absolute control over the agent's business. It can review his eligibility at any time and remove his accreditation without any explanation. Testimony before the CAB indicated that as soon as one airline withdrew its appointment of a travel agent, all other airlines invariably withdrew theirs. The travel agent cannot even sell his business, as his rights under the conference agreement are not transferable or assignable. The new owner must qualify all over again. Under these agreements which have the blessing of the CAB, the travel agent has all the disadvantages of proprietorship and none of the advantages.

The very rules established by both the CAB and the air traffic conferences were the prime cause of the plight of the stranded Californians. The conference sets the commission rates and dictates on which flights these will be paid. The CAB in its rate structure makes the provisions for the special group charters. The ASTA representative in his testimony specifically indicated that a travel agent could not organize a charter, or assist one, and that if one of his employees was a member of such a group, he would not be eligible for any commissions. Obviously, this situation restricts the agent's business. If he

didn't go by the rules, he would lose his conference appointments. Yet as long as these low charter fares are available, people will seek them out.

Domestic fares are under the control of the CAB, with the exception of the airlines operating solely within a state. In California, such control rests with the Public Utilities Commission. Foreign fares are set by treaty and intergovernment agreement. In practice, IATA sets all foreign fares, as a result of the fact that practically all foreign carriers are either government owned or heavily subsidized by the respective governments.

The unilateral reduction of foreign fares is impossible, by virtue of the probability that each country would withdraw its permission to land and use its facilities if a competing carrier reduced fares below that agreed upon by the conference. These procedures have resulted in a system of fares that are a hodgepodge, both domestically and internationally. While it is the duty of the CAB to foster air travel, it has systematically reduced competition, first by gradually eliminating the nonscheduled airlines, and secondly by granting route privileges to a limited number of carriers. Both practices have acted to prevent competition.

California contains a classic example of what competition has done for the air traveler. The air route between San Francisco and Los Angeles is probably the most heavily traveled in the United States. The largest carrier of passengers along this route is an intrastate airline, regulated by the California Public Utilities Commission, rather than the CAB. This line pioneered a rate structure using the latest type of aircraft that resulted in comfortable air travel, without frills, for a fare of less than \$15. The average fare on this route by the major airlines under CAB control was \$22. The consequent competition has resulted in these major carriers securing permission from the CAB to meet the competitive rate.

If a person were planning a trip between New York and Miami Beach, he would find that there are 200 different fares available. Should he wish to fly from Los Angeles to Chicago, the coach fare, including a meal (as of 1963), was \$110.72. However, had he wanted to fly on the same plane and skip the meal by going economy class, the fare was \$89.25. Had he wanted to continue to New York, the economy class, strangely enough, was not available; he would have had to fly coach or first class.

The trade journal *American Aviation* commented on the price picture in a recent issue:

"The CAB has not been pushing the carriers to reduce prices . . . stung by criticism during the hard years of jet transition, the Board (CAB) is determined to let the carriers chart their course during the profit surge. The result is that management has the ball and the CAB is blowing a slow whistle."

It would appear that the CAB has become an extension of the industry which they were set up to regulate. They have failed to foster lower air fares and have abdicated any control over travel agencies by

approving the method of operation of the Air Traffic Conference with respect to travel agencies. On this score the Celler Report was blunt and to the point:

"The overall effect of the board's course of conduct with respect to travel agents has been to confer on the certified air carriers far reaching regulatory powers over the travel agency industry which the board does not have the statutory authority to regulate in the first instance . . . a travel agent cannot engage in the effective and profitable sale of air travel accommodations unless he has first secured conference recognition . . . the committee cannot accept the board's claim that the present procedures equitably serve the public interest . . . If the CAB believes that licensing of travel agents based upon a review of their qualifications is necessary to encourage and develop our air transportation system, this travel function must be exercised by an agency of the government . . . once licensed by the government, travel agents would then be eligible for appointment by any ATA or IATA carrier desiring their service. Such clearance would give the carriers the protection and assurance they desire."

CONCLUSIONS AND RECOMMENDATIONS OF THE COMMITTEE

All travel agents or agencies operating in California should be licensed and bonded. This should be effected either through a new bureau in the Department of Professional and Vocational Standards or the Public Utilities Commission.

It is evident that the federal government is not interested in such a licensing program. We must conclude that the present ATA and IATA conference arrangements offer no protection to the public and are patently unfair to the travel agency business. The federal legislation introduced by Senator Magnuson and supported by ASTA would not prevent a recurrence of the recent California travel fiasco. It does not differ greatly from the present California regulations covering the so-called ticket brokers, which provide for registration with the Secretary of State and the posting of a bond. Investigation by the committee staff indicated that less than one-third of the travel agencies operating in California were complying even with this innocuous law.

The bonding requirement of any new legislation should be for the protection of the public and in an amount reflecting the average monthly sales of the agency. The bond should be for a minimum of not less than \$10,000 and a maximum of \$100,000.

The losses incurred by the California travelers in 1963 would have been covered by such a bonding requirement. The present bond posted with air conferences by the travel agents is solely for the protection of the carriers.

The Senate, by resolution, should call upon the CAB to use its authority to lower air fares and foster more competition within the industry. The resolution should urge a change in regulations so that travel agents could assist groups in arranging charters. It should urge a change in any regulation prohibiting groups from forming for travel purposes, so as to avail themselves of the lower charter fares.

These very rules and regulations of both the CAB and the ATA, as well as IATA, are an open invitation to promoters to prey upon the unsuspecting public. Legitimate agencies which are experienced in the business should be permitted to avail themselves of this attractive field of revenue. The public should be permitted the opportunity of grouping together to travel and receive the benefits of lower fares, which in many instances are less than one-half of the normal fare.

Meaningful standards established by legislation would protect the public and would also benefit the travel agencies. IATA and ATA would have no reason to withhold appointment from a licensed California agent, as the carriers would be adequately protected by the experience and bonding requirements. The CAB would be in a position to force changes in the conference rules and agreements because of such legislation.

APPENDIX
TO
TRAVEL AGENCY BUSINESS

STATE OF CALIFORNIA
OFFICE OF THE ATTORNEY GENERAL, DEPARTMENT OF JUSTICE
State Building, San Francisco 2
Stanley Mosk, Attorney General

August 30, 1963

HONORABLE EDMUND G. BROWN
Governor of California
State Capitol
Sacramento, California

Dear Governor Brown:

On July 23, 1963, I wrote to you concerning an investigation of the circumstances which led to the stranding of California tourists in New York several weeks earlier. It has become apparent that, as additional information was developed, further amplification of our findings should be made available to you and to the California Legislature.

My office has been making an intensive investigation into the affairs of the travel promoter who acted as agent for the stranded tourists. In the course of this investigation, we have learned a great deal about several related problems of the air travel industry.

One element of this problem is the operation of pro rata charters by air carriers. Another is the dual relationship of travel agents to carriers and to the general public.

Pro Rata Charters

Certain rules of the Civil Aeronautics Board and of the International Air Transport Association provide that an air carrier may charter an aircraft and crew to a bona fide organization which may then allocate the cost among its members. Other rules allow portions of aircraft to be allotted to groups.

A careful reading of these rules reveals that travel agents are sharply curbed in their relationship with chartered groups. For example, six paragraphs of Part 295 of the CAB regulations are devoted to this relationship, including a rather detailed description of the conditions under which a travel agent may book *land* tours with members of a group. On the other hand, only one paragraph deals with the solicitation of charter groups by air carriers. In general, air carriers are forbidden from soliciting individuals within a bona fide organization for the purpose of forming a charter group. But nothing in the regulation bars air carriers from placing advertisements before the public designed to encourage members of groups to contact them concerning information on such charters.

In short, it appears that CAB approved regulations are designed to curtail and discourage the chartering of groups by legitimate travel agents and to promote direct solicitation by air carriers. In my opinion, there is a serious question as to whether such regulations are in the

public interest. It should be recognized that the virtual elimination of the legitimate travel agent from this field will inevitably result in enterprising travel promoters creating artificial groups, specifically to take advantage of the tempting reductions in air fares which may be obtained thereby.

These regulations invite the public to participate in collusion with such tour promoters. The incentive for collusion is substantial. For example, a single traveler will pay \$778.40 or more to fly from San Francisco to London. Air charters have been successfully operated on this route for as little as \$398. Since there is no clearly defined moral obligation on the part of the air traveler to abide by CAB regulations, the public has availed itself of this legal loophole and has traveled to Europe this summer at considerable savings.

I should make it clear that I have no objection to saving money on air transportation. On the contrary, minimum cost that enables students and families of modest income to travel is a highly laudable objective. However, inadequate enforcement of illogical regulations has resulted in an influx of marginal operators into this lucrative field. Attorney General Louis Lefkowitz of New York has put several of them out of business this year, and we are experiencing similar problems here in California.

To the term "illogical," to describe these regulations, we could add that the very premise of these regulations is undemocratic and discriminatory. There is no rational basis for excluding persons from the economic benefits of charter travel simply because they do not belong to the "proper" organization.

The results of the application of these rules have been predictable. In the first six months of 1963, the American Society of Travel Agents reported 69 charter or group violations to the International Air Transport Association, the CAB, and Canada's Air Transport Board. No one doubts that other violations remain undetected. Current estimates place the number of travelers across the Atlantic during the 1963 tourist season at approximately a quarter of a million.

I believe that the public would be best served if the CAB and the IATA would discard the so-called affinity rule (requiring charter groups to be composed of members of bona fide organizations) and to permit reasonable discounts to *any* charter or group fare groups. I further believe that travel agents should be encouraged to participate in the creation of such groups, *provided, however, that travel agents are suitably licensed and bonded by the state or federal government.*

Regulation of Travel Agents

I have found that the vast majority of people involved in the travel industry are reputable businessmen working hard to serve the public. Many of these well-meaning individuals have expressed their opinion that the licensing of travel agents will have little deterrent effect on the perpetration of frauds upon the public by travel promoters. They have expressed concern that the licensing of agents might be regarded as a punitive measure—publicly making the travel agent the scapegoat for all the ills of the travel industry. They believe that the blame for the stranding of California tourists should be placed upon

the existing system of pro rata charters, rather than on travel agents.

While I agree that the problem extends beyond the power of State remedy through the simple device of licensing, I believe that the licensing and bonding of agents is an essential first step toward protecting the public. We cannot overlook the fact that the well-publicized stranding of these tourists was caused by a travel agent who was certified by the International Air Transport Association—not caused by an air carrier or by the CAB. And I must emphasize that this is not the only case involving a travel agent which has come to my attention.

It has been argued that travel agents are now effectively regulated by a system of private control, exercised by the air carrier conferences, whose regulations have been approved by the CAB. It is true that these groups of air carriers, together with their individual members, have established regulations to protect themselves from impecunious or dishonest agents. But it is also regrettably true that these measures have not been wholly successful. Even the institution of a bond, recently required by the Air Travel Conference (domestic air carriers) has not been effective. An Oakland travel agent was recently indicted on three counts of grand theft, involving members of the general public, which were perpetrated in spite of the fact that she had an ATC required bond in effect.

It should also be pointed out that these bonds—now required by the ATC and the steamship conferences, and soon to be required by IATA—are to protect only the carriers. They are not designed to protect the general public.

With respect to pro rata charters, the major problem does not appear to be the legitimate travel agent. There is no specific prohibition in law to prevent a person, not certified by any carriers or conferences, from holding himself out to be a travel agent so far as the general public is concerned. Such an individual can promote charter or group travel, and with the acquiescence of one or more disreputable, marginal or careless air carriers, collect and disburse vast sums of money without supervision. Over \$400,000 was handled by the Palo Alto promoter who booked the stranded Californians—without a bond of any kind.

Further, I am not at all sure that industry regulation of travel agents would be an appropriate delegation of the state's responsibility, if it were carried to the extent necessary to be effective. This is particularly evident since some carriers in the IATA are clearly instrumentalities of foreign governments.

In this connection, it has been contended that the action of the CAB in approving the travel agent regulations which are promulgated by the air conferences, constitutes, in effect, federal regulatory action. Then the further argument is made that the federal government has preempted this field through such action, or that the Commerce Clause of the Federal Constitution precludes state action. I doubt that this view could be seriously maintained. In *California v. Thompson*, 313 U.S. 109, Mr. Justice Stone speaking for a unanimous court made the following statement:

“Fraudulent or unconscionable conduct of those so engaged [transportation brokers] which is injurious to their patrons, is peculiarly a subject of local concern and the appropriate subject

of local regulation. In every practical sense regulation of such conduct is beyond the effective reach of congressional action. Unless some measure of local control is permissible, it must go largely unregulated. In any case, until Congress undertakes its regulation, we can find no adequate basis for saying that the Constitution, interpreted as a working instrument of government, has foreclosed regulation, such as the present, by local authority."

The only bill before the federal congress which has been brought to my attention, seeks to prohibit the sale of air transportation by a ticket agent who is not under contract to air carriers. It is by no means a bill to require federal licensing, and it does not appear that such a move is contemplated by the federal government in the foreseeable future.

I therefore believe it desirable for California to create a system of licensing and bonding travel agents, designed to develop reasonable and workable professional standards for travel agents and to provide the public with the assurance that such agents are financially responsible.

Since another summer of heavy travel will pass before the next general session of the Legislature, the prevention of further imposition on the public justifies placing this subject on special call for the 1964 session of the Legislature. I hope you will agree that this matter is of sufficient weight to warrant its being brought before the Legislature next year. If so, my office will work with appropriate governmental and interested private agencies to make certain that specific proposals are as comprehensive and carefully conceived as possible.

Copies of this report will be directed to appropriate legislators, federal authorities and other interested persons in the hope that these views may contribute to the solution of this complex problem.

Sincerely yours,

STANLEY MOSK
Attorney General

Statement of Attorney General Stanley Mosk Before the
SENATE FACTFINDING COMMITTEE ON BUSINESS AND COMMERCE

San Francisco, California
December 4, 1963

I have been asked to present to you my views concerning the desirability of licensing and bonding California travel agents, and I am honored by your invitation.

I would like to preface my observations with a disclaimer: I am not now, nor have I ever been, nor do I ever intend to become, a travel agent. I do not have any of the specialized knowledge that should be the greatest asset of a professional travel agent. For example, knowledge of the rapidly changing regulations, fare structures and schedules of various transportation media.

I have a great deal of respect for the working travel agent. He can and does save his client money and time by providing the kind of package best suited to his needs, tastes, and finances. Most travel agents are reputable businessmen, working to serve the public interest. So the fact that I do not wish to become a travel agent should not be regarded as indicating disapproval, merely a question of personal taste. I chose, a long time ago, to be a lawyer.

But if any of you would like to become a travel agent, I can give you expert legal advice on how to go about it, in satisfaction of every existing law—state and federal.

First, you have a business card printed on which the words "travel agent" appear, together with your name. You may find it convenient to rent an office and secure a telephone, so that your card can include this information as well. Then you might wish to register with the Secretary of State, which implies filling out a form and posting a \$5,000 bond. This is in compliance with a 1953 law passed by the California Legislature. But you really don't have to bother with this if you don't want to—less than half of California's 400 travel agents have, in fact, registered.

After you have done these things you go shopping for appointments. Tell a few airlines that you are starting out and you need some help. These airlines have bright and capable young men on their staffs who are paid to do just that. They want to help you if they think you can sell space on their airplanes. Naturally, they won't send you ticket stock immediately. They will put you on a cash basis at first, then see how you work out. If you produce, they will sponsor your certification by their conference—the Air Traffic Conference, if it is a domestic air carrier, or the International Air Travel Association, if it is an international carrier.

The conferences will subject you to a little more careful scrutiny. The ATC will require a substantial bond—not to protect the public, but to protect their member airlines from any impecunious dealings or fraud on your part.

There are, incidentally, three other conferences concerned with travel agents: the Trans-Atlantic Passenger Steamship Conference, the Trans-Pacific Passenger Steamship Conference, and the Rail Travel Promotion Association. While important, the extraordinary development in air travel in the past decade has elevated the air conferences to primary importance so far as the travel agent is concerned.

Having been certified by a conference, you can now receive appointments from any carrier who is a member of the conference. And, on the strength of this certification, other conferences will be strongly inclined to certify you so that their members will be able to cash in on your sales ability.

Now gentlemen, having taken these steps, you are truly a travel agent. You have earned industry approval and public trust. In short, you are in a fine position to rob your clients. Because nowhere in the procedures described has any attempt been made to screen out the obvious misfits. For example, in a recent travel agent fiasco about which you will shortly hear, three of the men involved as "travel agents" were convicted criminals. One of them was actually still on probation for fraud.

As a lawyer, much less as Attorney General, I would not dare give you advice on how to defraud the public. But I assure you that it has been done, and will be done again unless some action is taken to protect the public—and the travel industry—from a few “fast buck operators” who are moving into the field. The door is wide open.

It would be redundant for me to discuss the activities of Jerry Davis and the World Travel Center of Palo Alto. You have assembled other witnesses who have more intimate—and painful—knowledge of these people. I feel I should tell you, however, that an investigation undertaken by my office was turned over to Santa Clara County District Attorney Louis Bergna. He will take further action in due course.

The State of California has seen fit to exercise public control over any business activity involving the health, safety or financial security of its people.

We license chiropractors, termite inspectors, and we charter banks. A cosmetologist, a physician, a real estate or insurance broker—none of these can practice their trade without demonstrating to a public agent, their competence, their knowledge and the soundness of their moral character. If a person were to hold out that he is a private investigator or a mortician or an architect and he did not hold an appropriate state license, he could go to jail or be fined, or both.

You already know all these things. I mention them only to put the problem in context. Why are travel agents exempt from this kind of control?

Some argue that the nature of the travel industry precludes state licensing. Their business is essentially interstate, even international, in nature, thus subject only to the control of the federal government.

Without conceding the validity of the argument, let me go on record here and now as welcoming federal intervention. But only if such control is effective and comprehensive. To suggest that the bill presented by U.S. Senator Warren Magnuson to the United States Congress last month is either effective or comprehensive is folly. Let me give you the text of the bill and you can judge for yourselves.

“Fraudulent Sale of Transportation—Interstate, Overseas, Foreign Air Commerce.

“Sec. 1112. No person, other than a carrier or aircraft operator engaged in providing transportation by aircraft in interstate, overseas, or foreign air commerce, or a *bona fide* employee of such carrier or aircraft operator, shall sell or offer for sale any such transportation, or hold himself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, or contracts for such transportation, except to the extent that such person is specifically authorized in writing by a carrier or aircraft operator to do so.”

The bill carries as a penalty, in addition to the opprobrium of the federal government, a fine totaling \$1,000 American dollars.

The purpose of the measure, as explained by the American Society of Travel Agents (ASTA), is twofold: “To protect the public from a small group of unscrupulous travel promoters who have been selling dubious charters; and to head off state legislation in New York and California designed to license travel agents.”

I question that it will accomplish the first purpose and I am sure it will not accomplish the second purpose.

ASTA has a proprietary interest in this bill, since it was drafted by ASTA's staff. Apparently ASTA has despaired of the chances of a similar bill submitted July 15, 1963, by California Congressman Charles S. Gubser. Mr. Gubser's proposal apparently sought to accomplish the same purpose, but carried higher penalties. The relevant portion of his text reads as follows:

"(2) Any ticket agent, or any officer, agent, employee, or representative thereof, who, knowingly and willfully, sells or offers for sale any transportation subject to this Act, without first entering into a lawful contract or other enforceable agreement with such air carriers, foreign air carriers, and supplemental air carriers as may be necessary to furnish such transportation, shall, for the first offense, be fined not more than \$2,000, or imprisoned not more than one year, or both, and for any subsequent offense, shall be fined not more than \$5,000, or imprisoned not more than five years, or both."

I have now placed into the record, with this reading, the entire scope of proposed federal legislation on the subject of travel agents. Existing regulations are even more tenuous. The Civil Aeronautics Board has assumed the authority to approve or disapprove air conference rules which are designed to govern travel agents. The CAB does not create rules, it merely approves them. The development of such rules is solely the concern of these private organizations. The CAB was challenged in the federal courts, and its authority was upheld on February 6, 1961, by the United States Court of Appeals. No appeal was taken to the Supreme Court.

The adequacy of existing federal regulations may be judged by the following statement that I now make: Jerry Davis handled more than \$500,000 in air fares during 1963 without any kind of bonding requirements. Had Senator Magnuson's bill been law, Mr. Davis would still have handled \$500,000 in fares, would still have messed up the vacations of over 700 California citizens, would still have operated precisely as he operated, and the federal government would not have had one jot more authority to deal with him as they do now—without Senator Magnuson's bill, and without Congressman Gubser's bill.

These bills are based on the same fundamental misconception that ASTA has cherished and reiterated since these problems became public knowledge. Specifically, that the ills of the travel industry are due to "unscrupulous promoters"—not travel agents—and that their wrongdoing is abetted by non-CAB certified air carriers engaged in developing phony charter flights.

There is only one problem about this neat analysis. Jerry Davis was a bona fide travel agent. He was a conference-appointed, carrier-approved, ticket-holding travel agent. Not a member of ASTA, to be sure but then only slightly more than half of all travel agents have attained that distinction.

If you conclude from the foregoing that I believe that the federal government does not have effective control over travel agents, you are

correct, and I will restate an earlier remark: I welcome effective and comprehensive federal control. But since there is none, I believe we owe it to the citizens of California to act now.

Licensing and bonding will, at the very least, prevent known criminals from becoming travel agents. A sensible program will keep those previously adjudged bankrupt from handling clients' funds in what may be regarded as a trust capacity. Such a program would insure that innocent persons would be compensated for losses suffered by the fraudulent or careless acts of a travel agent.

These appear to be modest goals. Yet there is no move by the federal government, by any conference or by ASTA, to attain them.

So far as ASTA is concerned, their position was made clear at a recent convention, with the passage of the following resolution:

"WHEREAS the 33rd World Travel Congress of the American Society of Travel Agents, Inc., has convened from October 20th through October 26th, 1963, in Mexico City, and

"WHEREAS the travel agency industry is by its very nature interstate and international and

"WHEREAS the travel agency industry is responsible and ethical and can best accomplish its task on behalf of the travel industry and the general public without burdensome regulations, and

"WHEREAS state licensing of travel agents is neither necessary, desirable, nor in the best interests of the travel industry and the traveling public, and

"WHEREAS the Chairman of the United States Civil Aeronautics Board, the Honorable Alan S. Boyd, expressed the policy of the Civil Aeronautics Board as opposing state licensing of travel agents, now

"THEREFORE BE IT RESOLVED that the delegates of this World Travel Congress enthusiastically endorse the unanimous decision of the Board of Directors of the Society to take all reasonable efforts to oppose state licensing of travel agents."

By this resolution ASTA has rejected any licensing program without even having seen one. I have met with representatives of ASTA and members of my staff have worked with the board of directors trying to explore reasonable means of attaining public protection. I offered to allow them to participate in the development of draft legislation, but they have responded with a resolution that characterizes any state legislation as "burdensome."

Incidentally, mention of Alan Boyd in the context of opposing state legislation is rather amusing. At the height of our investigation last summer, we were pleased to work with 25 percent of the investigators of Mr. Boyd's enforcement division. Both of these men were helpful and intelligent. Presumably the other 75 percent — the other six investigators — were occupied elsewhere.

I hope you have found my views to be enlightening. I know you understand that they are presented from the point of view of the chief law enforcement officer of our state. But you will find others who agree with me, many of them members of the travel industry. The respected editor and publisher of *Travel Weekly*, Irwin Robinson, editorialized concerning industry woes in the November 26, 1963 issue.

While his words do not specifically relate to the question of licensing travel agents, they are worthy of repetition, so I will read part of his column to you. It is entitled, "Futility Unlimited":

"Looking back is supposed to provide a better perspective for judging events than at the moment they occur. There is likely to be less distortion.

"We've been applying this yardstick to some of the headaches which have plagued the trade this year, notably the charter and group problems that reached scandalous proportions last summer.

"This is one case where retrospect serves only to confirm the original judgment — doubled in spades. Reviewing last summer's events stirs up new indignation. The abuses were so flagrant that they rendered meaningless all the CAB and conference regulations supposedly in force, not to mention the futility of repeated 'we must protect the public' pronouncements by state and federal authorities . . .

"Without a doubt, the charter promoters — as soon as they have finished the monotonous job of adding up the season's profits — will be mapping new plans for another banner charter season in 1964. If the past is any criterion, they will suffer little inconvenience at the hands of the law enforcement agencies.

"But the state and federal officials will continue to make speeches and issue press releases about their deep concern for the 'public welfare.' . . . "

In response to the words of Irwin Robinson, I have no intention of making any pious declarations. Members of my staff are now working on a draft of a comprehensive licensing and bonding program. I have already asked the Governor to add the subject to the 1964 legislative session, and when the time comes, I sincerely hope our work will meet with your approval.

Thank you.

Stanley Mosk
Attorney General
State of California

PROPOSED NEW YORK LAW REGULATING AND LICENSING TRAVEL AGENCIES

AN ACT to repeal article ten of the general business law, relating to and providing for licenses to sell transportation tickets or orders for transportation to or from foreign countries, and to amend the general business law, in relation to providing for the licensing and regulation of persons engaged in the travel agency business, and making an appropriation therefor.

The People of the State of New York, represented in Senate and Assembly, do enact as follows:

SECTION 1. The general business law is hereby amended by inserting therein a new article, to be article twenty-nine-d, to read as follows:

Article 29-D TRAVEL AGENCIES

Sec.

- 560. *Repeal.*
- 561. *Purpose of article.*
- 562. *Definitions.*
- 563. *License required.*
- 564. *Powers of the secretary of state.*
- 565. *Advisory committee.*
- 566. *Application for licenses.*
- 567. *Licenses; display; renewal; duplicates.*
- 568. *Issuance of licenses; fees; bonds.*
- 569. *Refund of fees.*
- 570. *Suspension and revocation of licenses.*
- 571. *Hearing on charges; decision.*
- 572. *Judicial review.*
- 573. *Violations and penalties; criminal prosecution.*
- 574. *Official acts used as evidence.*
- 575. *Disposition of moneys derived from operation of article.*
- 576. *Application of article.*
- 577. *Separability clause.*

§ 560. *Repeal. Article ten of the general business law is hereby REPEALED.*

§ 561. *Purpose of article. The need for technical skill, training and experience, good moral character and other fundamental qualities and qualifications in persons engaged in the travel agency business, as herein defined, having been established and demonstrated by reason of the ever-increasing number of people availing themselves of the facilities thereof, the complexity and scope of travel today and the inadequacy of local regulation, it is the purpose of the legislature, in enacting this article, to protect the comfort, safety and well-being of those persons who patronize the travel agencies of our state by*

making adequate provision for the licensing and regulation of travel agencies.

§ 562. *Definitions.* As used in this article, unless the context requires otherwise:

1. "Department" means the department of state.
2. "Person" means an individual, firm, company, partnership, corporation, association, joint stock association, or other group, however organized.
3. "Licensee" means a person, as herein defined, engaged in the business of conducting a travel agency.
4. "To engage in the business of conducting a travel agency" means and refers to holding out, directly or indirectly, as being able, or offering or undertaking by any means or method, to acquire for a fee, commission or other valuable consideration from any source, travel reservations or accommodations; tickets for travel by air, rail, ship, bus or other medium of transportation; hotel or other lodging reservations or accommodations; airplane reservations or accommodations and any other type of reservations or accommodations for lodging or transportation.
5. "Licensee" means any person to whom a license has been issued pursuant to this chapter.

§ 563. *License required.* On and after January 1, 1965 no person shall engage in the business of conducting a travel agency, as herein defined, without having first received from the department of state a license so to do, as hereinafter provided.

§ 564. *Powers of the secretary of state.* In addition to the powers and duties elsewhere prescribed in this article, the secretary of state shall have the power:

1. To appoint an adequate number of assistants, inspectors and other employees as may be necessary to carry out the provisions of this article, to prescribe their duties, and to fix their compensation within the amount appropriated therefor;
2. To keep records of all licenses issued, suspended or revoked;
3. To adopt such rules and regulations not inconsistent with the provisions of this article, as may be necessary with respect to the form and content of applications for licenses, the reception thereof, the investigation of applicants, and the other matters incidental or appropriate to his powers and duties as prescribed by this article and for the proper administration and enforcement of the provisions of this article, and to amend or repeal any of such rules and regulations.

§ 565. *Advisory committee.* To advise the secretary of state, there shall be an advisory committee which shall consist of five members to be appointed by the secretary of state. Three members thereof shall be actively engaged in the travel agency business in this state; two members shall not, at the time of appointment, be directly or indirectly interested in or identified with the travel agency business. The secretary of state or his duly authorized representative shall be an additional member of the advisory committee and act as chairman thereof. The advisory committee shall meet at least once a year, at an appropriate time to be fixed by the secretary of state and at any other time on call of the secretary of state. It shall be the duty of

the advisory committee to advise the secretary of state on all matters relating to this article, and on such other matters as the secretary of state shall request. The secretary of state shall designate an employee of the department to act as secretary of the advisory committee, and shall detail to such advisory committee such stenographic or other assistance as may be necessary.

The members of the advisory committee, except the secretary of state, shall be entitled to compensation at the rate of not exceeding twenty dollars per day for each meeting attended by them or each day actually spent in the work of the advisory committee, not to exceed the sum of two thousand dollars per annum. They shall also be paid their reasonable and necessary traveling and other expenses while engaged in the performance of their duties.

§ 566. Application for license. 1. Any individual over the age of twenty-one years, desiring a license to engage in the business of conducting a travel agency under this article, may make application to the secretary of state therefor. The application shall be duly signed and shall be in such form and shall contain such information relative to the applicant and his qualifications as may be prescribed by the secretary of state. If the applicant is a natural person, the application shall be signed by such person. If the applicant is a partnership, the application shall be signed by each individual composing or intending to compose such partnership. The application shall state the full name, age, residence, present and previous occupations of each person or individual so signing the same, and shall specify and indicate the location of the principal place of business and each bureau, agency, sub-agency, office or branch office for which a license is desired, and such further facts as may be required by the department of state to show the good character, competency and integrity of each person or individual so signing such application.

2. If the applicant is a corporation, the application shall be signed by an officer thereof, and shall specify the name of the corporation, the date and place of its incorporation, the location of its principal place of business, and the name of the city, town or village, stating the street number, if the premises have a street and number, and indicate the location thereof, where is to be located the bureau, agency, sub-agency, office or branch office for which a license is desired. Each and every requirement of subdivision one of this section as to a person or individual member of a partnership shall apply to such officer, his successor and successors who shall, prior to entering upon the discharge of his duties, sign a like statement, approved in like manner, as is by said subdivision one prescribed in the case of a person or individual member of a partnership; and in the event of the death, resignation or removal of such officer, due notice of that fact shall forthwith be given in writing to the department of state, together with a copy of the resolution adopted at any meeting of the board of directors of said corporation, certified by the secretary, indicating the death, resignation or removal of such officer and the election or designation of the successor of such deceased, resigned or removed officer.

3. Any person engaged in the business of conducting a travel agency business for a continuous period of one year prior to January 1, 1965,

shall, upon compliance with the provisions of section five hundred sixty-six and section five hundred sixty-eight of this article, be licensed by the secretary of state to conduct such business, pursuant to the provisions of this article.

4. No license shall be issued to an individual applicant who, at the time of filing such application, is less than twenty-one years of age, nor to a partnership comprised of individuals all of whom are less than twenty-one years of age at the time of filing such application.

§ 567. Licenses; display; renewal; duplicate. 1. All licenses shall be for a period of two years or a fraction of such two-year period and shall expire on the thirty-first day of December of each even-numbered year.

2. No license shall be assignable or transferable.

3. A bona fide purchaser of a travel agency business from the holder of a license thereof may continue to use the license of the seller for a period of not more than forty-five days from the date of the sale, provided there is endorsed on the face thereof the name of the purchaser, the date of the sale, and the signature of the seller and the purchaser; and provided further that within fifteen days from the date of the sale, an application, in accordance with the provisions of this article, shall be presented by the purchaser to the secretary of state for a license to conduct a travel agency business.

4. Each license issued pursuant to this article shall be posted and kept posted in some conspicuous place in which the licensee is engaged in business. Every license shall contain the name of the licensee, a designation of the city, street, and number of the premises in which the licensee is authorized to carry on business, and the number and date of such license.

5. Any license which has not been suspended or revoked may, upon the payment of the renewal fee prescribed by this article, be renewed for additional periods of two years from its expiration, upon the filing of an application for such renewal, on a form to be prescribed by the secretary of state.

6. Any person failing to file application and fee for renewal of a license hereunder, within one year immediately following the expiration of his last license, shall pay an additional fee of twenty-five dollars, and if he fails to file application and fee for renewal within one year immediately following the expiration of his last license, he shall be ineligible to apply for the renewal of such license and shall file an application for a new license.

7. A duplicate license may be issued for one lost, destroyed or mutilated upon the application therefor on a form prescribed by the secretary of state and the payment of the fee prescribed therefor by this article. Each such duplicate license shall have the word "Duplicate" stamped across the face thereof and shall bear the same number as the one it replaces.

8. Notice in writing shall be given the secretary of state at his office in Albany by the holder of a license issued pursuant to this article of any change of address set forth therein, together with return of license, whereupon a properly signed endorsement will be made on the face thereof of such change and the license then returned to the li-

censee. A change of address by a licensee without such notice and endorsement of license shall operate to cancel the license.

§ 568. Issuance of licenses; fees; bonds. 1. When the application shall have been examined and such further inquiry and investigation made as the secretary of state shall deem proper, and when the secretary of state shall be satisfied therefrom of the good character, competency and integrity of such applicant, or, of the applicant be a firm, partnership or corporation, of the individual members or officers thereof, the department of state shall issue and deliver to such applicant a license to conduct such business and to own, conduct, or maintain a bureau, agency, sub-agency, office or branch office for the conduct of such business upon the applicant's paying to the department of state for each such license so issued, for the use of the state, the fees hereinafter described, and upon the applicant's executing, delivering and filing in the office of such department the bond hereinafter described; provided, however, that a license shall not be granted to any person who has been convicted in this state or any other state or territory of a felony, or of a misdemeanor concerning activities prohibited by this article.

2. The fee for a license to engage in the business of conducting a travel agency pursuant to this article shall be fifty dollars if the applicant be an individual, or one hundred dollars if a firm, partnership, or corporation, and for each renewal thereof the fee shall be fifty dollars if the applicant be an individual, and one hundred dollars if a firm, partnership, or corporation.

3. The fee for issuing a duplicate license in substitution for lost, destroyed or mutilated license, shall be five dollars.

4. Every applicant for a license pursuant to the provisions of this article shall execute, deliver and file with the secretary of state, before a license shall be issued, a surety company bond, written by a company recognized and approved by the superintendent of insurance and approved by the secretary of state with respect to its form, manner of execution and sufficiency, in due form to the people of the state of New York, in the principal sum of seven thousand dollars for the first such license and five thousand dollars for each additional license, provided, however, that in no event shall the aggregate sum of any such bond exceed thirty-five thousand dollars. Such bond shall be conditioned that the obligor will not be guilty of any fraud or misrepresentation to any patron, and will conduct such business faithfully and honestly. A suit to recover on the bond required to be filed under the provisions of this article may be brought by or on the relation of any party aggrieved in a court of competent jurisdiction, and in the event that the obligor on said bond has been guilty of fraud or misrepresentation, may be enforced by the department of state in the name of the people of the state of New York to recover the loss occasioned by such fraud or misrepresentation.

§ 569. Refund of fees. Moneys heretofore or hereafter received by the department of state pursuant to this article may, within one year from the receipt hereof, be refunded to the person entitled thereto, on satisfactory proof that:

1. Such moneys were in excess of the amount required by this article, to the extent of such excess;

2. The license for which application was made has been denied;
3. The applicant for the license has predeceased its issuance;
4. The licensee has enlisted in or been otherwise inducted into active federal military, naval or marine service or in any branch or division thereof, in which event the refund shall be such proportion of the license fee paid as the number of full months remaining unexpired of the license period bears to the total number of months in such period.

Such refunds shall, upon approval by the secretary of state and after audit by the comptroller, be paid from any moneys received from the operation of this article.

§ 570. *Suspension and revocation of licenses.* A license issued pursuant to this article may be suspended or revoked by the secretary of state for any one or more of the following causes:

1. Fraud or bribery in securing a license issued pursuant to this article;

2. The making of any false statement as to a material matter in any application or other statement or certificate required by or pursuant to this article;

3. Failure to display the license as provided in this article;

4. Violation of any provision of this article, or of any rule or regulation adopted hereunder;

5. Any fraud or fraudulent practice in the operation and conduct of such business, including, but not limited to dishonest or misleading advertising or demonstrated untrustworthiness or incompetency;

6. Conviction of a felony, or of a misdemeanor concerning activities prohibited by this article;

7. Whenever the license issued pursuant to this article is revoked, the applicant may not apply for a new license until after the expiration of a period of one year from the date of such revocation.

§ 571. *Hearing on charges; decision.* No license shall be suspended or revoked until after a hearing had before an officer or employee of the department designated for such purpose by the secretary of state, upon notice to the licensee of at least ten days. The notice shall be served either personally or by registered mail and shall state the date and place of hearing and set forth the ground or grounds constituting the charges against the licensee. The licensee shall be heard in his defense either in person or by counsel and may produce witnesses and testify in his behalf. A stenographic record of the hearing shall be taken and preserved. The hearing may be adjourned from time to time. The person conducting the hearing shall make a written report of his findings and a recommendation to the secretary of state for decision. The secretary of state shall review such findings and the recommendation and, after due deliberation, shall issue an order accepting, modifying or rejecting such recommendation and dismissing the charges or suspending or revoking the license. For the purpose of this article, the secretary of state or any officer or employee of the department designated by him, may administer oaths, take testimony, subpoena witnesses and compel the production of books, papers, records and documents deemed pertinent to the subject of the investigation. The department of state is hereby authorized to employ such agent or agents as the secretary of state may deem necessary to enable the department of state

to carry out the provisions of this article, to investigate violations hereof and to enforce compliance herewith.

§ 572. *Judicial review.* The action of the secretary of state in suspending, revoking or refusing to issue or renew a license may be reviewed by a proceeding brought under and pursuant to article seventy-eight of the civil practice law and rules.

§ 573. *Violations and penalties; criminal prosecution.* Any person who shall directly or indirectly engage in the business of conducting a travel agency or hold himself out to the public as being able so to do, or conduct such business without a license therefor, or who shall violate any of the provisions of this article, or who shall have made a false statement as to a material matter in any application or other statement required by or pursuant to this article, or having had his license suspended or revoked, shall continue to engage in such business, shall be guilty of a misdemeanor, and, upon conviction, shall be punishable by imprisonment for not more than six months, or by a fine of not more than five hundred dollars, or by both such fine and imprisonment.

The attorney general may prosecute every person charged with the commission of a criminal offense in violation of this article. In all such proceedings, the attorney general may appear in person or by his deputy before any court of record or any grand jury and exercise all the powers and perform all the duties in respect of such actions or proceedings which the district attorney would otherwise be authorized or required to exercise or perform; or the attorney general may in his discretion transmit evidence, proof and information as to such offense to the district attorney of the county or counties in which the alleged violation has occurred, and every district attorney to whom such evidence, proof and information is so transmitted may proceed to prosecute any person charged with such violation. In any such proceeding, wherein the attorney general has appeared either in person or by deputy, the district attorney shall only exercise such powers and perform such duties as are required of him by the attorney general or the deputy attorney general so appearing.

§ 574. *Official acts used as evidence.* The official acts of the secretary of state and department shall be prima facie evidence of the facts therein and shall be entitled to be received in evidence in all actions at law and other legal proceedings in any court or before any board, body or officer.

§ 575. *Disposition of moneys derived from operation of article.* All moneys derived from the operation of this article shall on or before the tenth day of each month be paid into the general fund of the state treasury, to the credit of state purposes fund therein.

§ 576. *Application of article.* This article shall not apply to railroad, steamship, airline or bus companies, hotels, motels or other places of public accommodation, or their employees engaged solely in the business of such employers, nor to any person employed by any firm as a transportation officer or employee whose principal duty is to obtain transportation and/or accommodations for such firm or other officers or employees thereof.

§ 577. *Separability clause.* If any part or provision of this article or the application thereof to any person or circumstances be adjudged invalid by any court of competent jurisdiction, such judgment shall be confined in its operation to the part, provision or application directly involved in the controversy in which such judgment shall have been rendered and shall not affect or impair the validity of the remainder of this article or the application thereof to other persons or circumstances and the legislature hereby declares that it would have enacted this article or the remainder thereof had the invalidity of such provision or application thereof been apparent.

§ 2. The sum of sixty thousand dollars (\$60,000), or so much thereof as may be necessary, is hereby appropriated to the department of state from any moneys in the state treasury not otherwise appropriated, to pay expenses, including personal service, maintenance and operation, in carrying out the provisions of article twenty-nine-d of the general business law, as added by this act. Such moneys shall be payable out of the state treasury from any moneys in the general fund to the credit of the state purposes fund therein, on the audit and warrant of the comptroller, on vouchers certified or approved in the manner prescribed by law.

§ 3. This act shall take effect January first, nineteen hundred sixty-five.

STATE OF CALIFORNIA, OFFICE OF LEGISLATIVE COUNSEL

ANGUS C. MORRISON, Legislative Counsel

Sacramento, California

February 11, 1964

HONORABLE STAN PITTMAN
Senate Chamber

Air Transportation Brokers—No. 2674

Dear Senator Pittman:

QUESTION

Would a verified affidavit of an air transportation broker in which he states that he has been appointed to act for certain contracting air carriers comply with the provision of Section 24023 of the Public Utilities Code which requires documentary evidence of an appointment by an air carrier to act as a broker for it?

OPINION

In our opinion such a verified affidavit would not comply with the provision of Section 24023.

ANALYSIS

Section 24023 reads as follows:

“24023. Any aircraft transportation broker shall be deemed to have complied with this part by filing with the Secretary

NOTE: The present Article 10 of the General Business Law being repealed by this bill relates to the licensing of certain persons engaged in the sale of steamship tickets or orders for transportation to or from foreign countries.

of State a written statement under oath that all air transportation as respects which the broker acts or purports to act as an aircraft transportation broker is issued over the line of a contracting air carrier or carriers which has authorized the broker to act on his behalf and has agreed to furnish transportation according to its published tariffs on any tickets sold by said broker or to refund on demand according to its published tariffs any unused tickets sold by the broker. Attached to the written statement shall be documentary evidence of the appointment of the broker to act for such contracting air carrier or carriers. The aircraft transportation broker shall notify the Secretary of State within 10 days of any change in the agreement or agreements between him and the contracting air carrier or carriers which he is authorized by agreement to represent."

There have been no decisions reported which interpret this section. However, we do not believe that the term "documentary evidence" as used in Section 24023 includes a verified statement of the broker that he is authorized to act for a certain contracting air carrier. The first sentence of the section relates to matters which must be contained in a written statement under oath. The "documentary evidence" is to be attached to such statement. This particular placing of the term "documentary evidence" suggests that the Legislature intended that something other than another written statement prepared under oath be attached to the written statement required by the first sentence of the section. Without attempting to specify the limits as to what might be considered documentary evidence for the purposes of Section 24023, we believe that some more concrete evidence than the broker's own statement is required as proof that he has been appointed to act for a particular contracting air carrier.

Very truly yours,

A. C. MORRISON
Legislative Counsel

By DON VICKERS
Deputy Legislative Counsel

STATEMENT OF AIRCRAFT TRANSPORTATION BROKER

(California Public Utilities Code, Section 24023)

-----, an aircraft transportation broker, as that term is defined in Part 3, Division 9 of the Public Utilities Code, hereby certifies:

1. That all air transportation as respects which the undersigned acts or purports to act as an aircraft transportation broker is issued over the line of a contracting air carrier or carriers which has authorized the undersigned broker to act on its behalf and has agreed to furnish transportation according to its published tariffs on any tickets sold by the undersigned or to refund on demand, according to its published tariffs, any unused tickets sold by the undersigned broker.

2. Attached hereto is documentary evidence of the appointment of the undersigned as broker to act for each of the listed contracting air

carriers; and each appointment is unrevoked and still in full force and effect.

3. The undersigned will notify the Secretary of State in writing within 10 days of any change in any agreement between the undersigned and any of the contracting air carriers listed which undersigned is authorized by agreement to represent; and will notify the Secretary of State in writing within 10 days of any change in the name under which undersigned carries on said air transportation brokerage business and of any change of address at which said business is conducted and of discontinuance of said business.

4. The complete address of each place of business at which undersigned conducts said air transportation brokerage business is as follows:

5. The true name of each contracting air carrier for which undersigned is authorized to act as aircraft transportation broker, as evidenced by attached documentary authority, is:

By _____
(Title)

STATE OF CALIFORNIA }
COUNTY OF _____ } ss.

_____, being first duly sworn, deposes and says that _____ he is the (broker) or (_____ of the above named broker); that _____ he has read the foregoing statement and knows the contents thereof to be true of _____ own knowledge.

(Title)

Subscribed and sworn to before me
this _____ day of _____, 19____.

Notary Public

NOTE: A \$5 fee is payable to the Secretary of State at time of filing of this statement.

TRAVEL CENTER INC.

A DIVISION OF TRAVEL MANAGEMENT CORPORATION

649 South Olive Street, Suite 724

Los Angeles 14, California

September 3, 1963

MR. STANLEY MOSK, *Attorney General*
State of California
Sacramento, California

Dear Mr. Mosk:

Re: *Licensing of travel agents*

I have noted with interest your recommendations that the State of California consider the subject of licensing and bonding of travel agents.

I feel that it would be to the best interests of the state and the travel industry that the travel agents be given an opportunity to regulate themselves first. In 1956 I proposed state licensing and am enclosing a

paper which I sent out to all the travel agents in the state. As President of the American Society of Travel Agents, Southern California Chapter, 1958-1959, and also during my two-year term (1961-1962) as International Director of ASTA, I worked on licensing but found the members of the society afraid of the effects of "licensing". My plan was to have them "certificated" similar to certified public accountants. I believe the Structural Pest Control Act of California did a good job for that industry.

My purpose in writing you is to suggest that a committee of travel industry people (steamship, airlines, railroads and travel agents), not necessarily ASTA members, be invited to proceed to come up with a practical solution. In other words the industry should be given notice to act NOW or else. . . .

I would very much like to be invited to suggest or participate in such a committee. I have been in the travel business since 1930 and expect to continue actively.

Yours very sincerely,

JOHN B. SOUSA
President

SOMETHING TO THINK ABOUT NOW

November 20, 1956

To All Travel Agents:

I just returned from the 26th Annual Convention and World Travel Congress in Chicago. It was an excellent convention and much was accomplished. However, the future status of the travel agent remains uncertain. There may be federal regulation—the Celler case and its possible disastrous effects—the unfair competition of nontravel agents in operating tours. The future as to these major problems of ours is cloudy and some may be loaded with dynamite.

During my 26 years in the travel business I have given a great deal of thought to our industry problems. I feel sure that what we need badly is an official status on a professional level, the same as certified public accountants and other professional people enjoy today. Such recognition by the public would give us certain rights in our field which would protect the public and us from the ills which plague us today as much as they did 20 years ago. Now is the time to act. If there is the remotest possibility of the travel agent being regulated in the future (and it never looked closer), we should take immediate steps to ask for such regulations ourselves along the lines of our own thinking. Let's have a part in designing our own standards; let's tell the public that we are going to elevate the travel agent to a professional status to protect them; let's make it impossible for anyone to enter the travel business or organize a tour without meeting certain requirements which we have a part in outlining. That is what we want, I believe. And we can do all this an easy way.

Here's how to do it: Let's start with our own state. The others will follow. There are two ways:

1. We can draw up a bill collaborating with the carriers and working closely with certain members of the State Legislature. The bill will be offered and we can muster enough help throughout the state to get it through. From our past experience we know that the public is interested in the protection that we are planning.
2. We can draw up a bill collaborating with the carriers—float petitions through all travel agencies asking our customers to sign it, thereby securing sufficient names to get the bill on the ballot. In securing signatures we will be winning new customers, and there is no doubt but that the press would support us. This would familiarize the public with the travel agency business more than ever and muster the support necessary to put the bill through.

I believe the second plan would do more for the agents in public relations and probably assure the passage of a bill more to our liking. Under the first plan there might be considerable lobbying and more possibility of changes in the proposed bill.

About the proposed bill: The bill would require all travel agents to be certificated and to display credentials in places of business; let's call it a Certified Travel Agent's certificate. There would be three classifications of CTA certificates:

CTA Class A—An agent holding air and steamship conferences.

CTA Class B—An agent holding air and other conferences but not holding both air and steamship.

CTA Class C—An agent holding RTPA or bus and RTPA (not holding air or steamship conferences).

We have to start somewhere—so all agencies in business for four years or more would be automatically licensed in their proper classifications. We may have to allow the airlines and other carriers to hold CTA certificates in order to get this bill through, but that is no more than they now have. I feel sure the carriers are interested in accomplishing much which the bill would do relative to their current problems and would go along with us.

How the CTA would be appointed: There would be a state-appointed official in Sacramento to enforce and issue all licenses as directed by a committee operating under the bill. The committee would consist of members representing each branch of transportation and one representing ASTA. Under this plan there would be only one salaried state official and the annual license fee would be modest and, in my opinion, not more than \$50 per year. The committee would hold examinations annually in both Los Angeles and San Francisco for the purpose of making appointments. One of the requirements to take the examination would be at least two years' employment in a travel agency. Written and oral examinations would be formulated jointly by carriers and an ASTA committee. In the case of accountants, the examination is submitted by the Certified Public Accountants Society, as we propose.

Anyone could take the examination if qualified, whether employed or in business. This would be advantageous to both employers and em-

ployees. The employers would be assured of qualified assistants and added prestige, and the possession of a certificate naturally would be a great aid in securing employment and better pay.

What would be accomplished: No one could organize a tour or open a travel agency unless holding a CTA certificate in the proper classification. This would:

Eliminate the organization of tours by unqualified persons.

Prevent organization of tours by professors, clubs, etc., etc.

Eliminate the opening of travel agencies by unqualified persons or those financially irresponsible.

Protect the public.

Prevent unfair competition.

Give travel agents a professional status.

How new appointments would be made: airlines and other carriers desiring new representation would necessarily appoint an existing certified travel agent in the proper classification, presently employed or already in business.

This is merely an outline of what the travel agents need more than anything else, in my opinion. This has been in my mind for years and I cannot resist writing you in the hope that the seed will germinate. I am doing it now because I believe the timing is right. If we take matters in our own hands now, we will come up with something that we need and have had a hand in creating. If we don't act now, we will be facing something designed by others outside of our line, and we will have to work harder to get our own ideas into it. We should decide our course now.

I will appreciate hearing from you.

Very cordially yours,

JOHN SOUSA

DO WE HAVE TO LIVE WITH CHARTERS?

Comments by Harold Martin, National Aviation Chairman, preliminary to the open discussion from the floor at the Western Regional ASTA Meeting in Santa Barbara, May, 1963

Ladies and Gentlemen:

This part of the "Voice of the Industry" discussion which has to do with air charters has been deliberately placed at the end of the discussion so that if it runs into overtime, it can do so without disrupting other parts of the program. As this subject has consumed so much time in many earlier meetings throughout the country, and as so many of the problems have been thoroughly discussed before, it was decided that a preliminary discussion and summary by your aviation chairman might help to bring the problems into focus and eliminate time-consuming rhetorical discussions. At each seat is a copy of this summary, and it is suggested that you make notes on the margins so that when discussion from the floor is requested we all may be brief and concise.

Nothing in the history of travel agents has been so damaging to the economic well-being of the travel agent; nothing (not even the "Chan-

dlar Affair'') has been so disrupting to the normal business routine; nothing has been so destructive to the morale of the travel agents as the charter.

In the history of the travel business there has never been a regulation which has so encouraged devious and dishonest practices by the traveling public (a failing which has spread to the carriers and to the travel agent as well) as has Part 295 of the CAB Economic Regulations, the IATA Resolution 045 on charters, and the 088 Series of IATA Resolutions on partial charters known as "group fares."

Although there is hardly a travel agent who is not against charters (a view which is shared by a few carrier executives and by most carrier personnel in the sales category), it will not be possible for us to rid ourselves of them by shouting "unfair" and "discriminatory." We must recognize the fact that a fantastic oversupply of seats has been created by the advent of the jets which have been purchased in excess of real need by many carriers who represent the civil aviation arm of prestige-conscious nations. These are carriers who cannot go out of business, regardless of how unwise their management has been. With equally poor judgment are the many competition-conscious private carriers of our own country whose routes are so important that the CAB cannot afford to let them disappear from the scene. To further aggravate the situation, there is the tremendous number of piston-equipped planes which have been dumped on the market at fantastically low prices. Many of these now are in the hands of supplemental carriers who are competing for the charter business as well.

Further, a policy statement from the White House, issued April 24, 1963 (just a month ago), specifically indicated that our government is in favor of lowering air fares and named charters as a "practical means which help to achieve reasonable rates."

Although the above seems discouraging, it by no means is the end of the matter. You and I have a task ahead of us to protect our livelihood, and it can be done, but we must be realistic about the problems before us.

It is also important to note that in this same policy statement, the White House declares: "Our acceptance of the IATA mechanism is predicated upon *strict adherence* by carriers to their IATA agreements. If the agreements are violated, we will have to reconsider our relationship to IATA and our *authority over violations*."

You are all aware of the tremendous number of violations of the charter regulations and of the complaint after complaint filed with the CAB and IATA, seemingly to no avail. Finally, through CAB order E19492 dated April 11, 1963, we have received the welcome news that "an investigation will be instituted based upon the various complaints filed with the board, and information ascertained by investigation of board staff to look into the abuses, most of which amount to illegal rate cutting." The CAB is preparing to turn such material over to the Attorney General for the institution of appropriate civil and *criminal actions* to enforce the provisions of the Federal Aviation Act. A person illegally traveling on a charter, or with a group, or a charter illegally organized are considered rate-cutting acts and are *now liable to criminal prosecution!*

ASTA has been requested by the CAB to assist them with this investigation—a task we eagerly accept.

Simultaneous with this action by CAB, and prior to any knowledge of what the CAB had planned, ASTA had investigated the practicality of bringing the matter of the discriminatory charters to a court hearing in an effort to have them declared illegal. In order to do this we must exhaust all appeals through CAB, then probably be prepared to go through lower federal courts on up to the Supreme Court. This action had to be very carefully discussed as it could take considerable time and the cost would undoubtedly run into six figures. Nevertheless, this resolution was presented to the ASTA board and was approved at the last meeting. Our action will benefit all travel agents, and for this very important reason (in addition to all the other benefits of ASTA membership) eligible agents who are not yet members should be encouraged to join and actively support us.

A second court action has been discussed in which ASTA could cooperate with an agent who can substantiate actual damages to his business by an illegal charter, and who would be willing to sue the charterer and the accepting airline jointly.

However, the wheels of justice grind very slowly indeed, and we cannot wait for these legal actions to cancel the charters immediately. Some agents might be out of business before the problems are solved, if they ever are to be. So, although taking up the battle cry that "pro rata" charters are discriminatory, unfair and dishonest, we must recognize that they are with us today and methods must be found to modify them as best we can so we can temporarily live with them.

Executive Ray Hering in his letter of May 6 to Tom McKibbons, southern California aviation chairman, succinctly pointed out that the problem is changing: While illegal charters and groups have been the major problem heretofore, now, as the traveling public is becoming wiser, legal charters are becoming the dominating problem. More and more groups are being formed, ostensibly for other purposes, but actually for the purpose of travel—and more and more organizations are making it very easy for new members to join. For example, one young lady, who is traveling on the University of California charter, told me that she had planned to go to Europe in 1962 but found she was not eligible for a charter. Therefore, she set about locating and joining various groups, including a book club whose only requirement was a fee of \$2. She became eligible for five different charters this year, one of which was through her enrollment in the graduate school of the University of California, requiring only a visit with a professor once every three weeks.

To solve our problems, many suggestions have been made—some in the form of resolutions to the board. Others, although discussed many times informally, have not been resolved and it is your chairman's recommendation that a formal resolution be drafted to present these to the next Board meeting.

Respectfully submitted,

HAROLD MARTIN, *Chairman*
National Air Committee, ASTA

**Problems of Pro Rata Charter Operations and Recommendations for Controlling
Such Problems Until Such a Time as Charters and Groups
Are Declared Illegal and Are Eliminated**

(Note: Nothing in these suggestions should imply that travel agents wish to see the discriminatory charters and group fares continue.)

Items marked * indicate that a recommendation to the CAB has been made on this particular matter by our attorney. ** Indicates the CAB has agreed to take action.

Policing and enforcing of charter regulations.

** Action now started by CAB.

Definitions:

Present IATA Resolution 045 and CAB Order 295 do not spell out clearly enough the eligibility of groups and charters. The result is that many fringe groups are being organized which violate the spirit of the regulations (as well as being an outright violation).

Membership in groups:

Six-months' membership rule is ineffective. Too easy to join existing legitimate organizations strictly for the purpose of traveling. Many require little or no dues, and no obligations.

Publication of intention:

Groups planning to charter should have their name, date of organization, membership number and other pertinent information published in an acceptable journal at time of filing.

Public inspection of list of members:

* Manifest of participants in group and charter to be made available for public inspection at least 30 days prior to flight time (our attorney's request did not specify number of days). This should deter some prospective illegal participants. (Modest number of published changes to be permitted in last 30 days.)

Sworn statements:

* Charterers and members should make sworn statements as to their eligibility.

Penalties:

(A)

* CAB is reluctant to cancel charter unless violations are flagrant. Specific penalties should be defined including forfeiture of monies paid by illegal participants.

(B)

* Charterers found attempting illegal charters should be prevented from going to another carrier for at least 120 days. (This suggestion was turned down by CAB.)

Fixed prices on charters:

* As long as there is such wide discrepancy in prices between charters, groups and regular fares, there will be a tendency for people to cheat and to join groups improperly. Charters should be based on a reasonable relationship to current tariffs.

Fixed dates of charters:

Recommend that charters' eligibility dates should be comparable to the dates for excursion fares.

Schedule cancellation for charters:

This practice causes great inconvenience to the traveling public. Schedule integrity should be demanded by CAB.

Identification of airlines flying charters:

* An effort should be made to clearly establish and publish a list of charters flying, including the total number of passengers, the airline chartering, and dates of the flights.

Publicity:

(A)

The southern California chapter recommends consideration be given to a publicity campaign regarding the discriminatory fare structure, pointing out that it is against the public good and that the great disparity in prices between normal fares and group and charter fares encourages dishonesty and damages the morale of the traveling public.

(B)

It is further recommended that travel agents solicit their clients who are paying regular fares to sign petitions protesting these discriminatory fares.

Local level action:

Many potential illegal charters have been stopped at a local level by a complaining agent's going direct to the district office of the particular airline involved. Some carriers who might close their eyes to a possible violation will, when confronted with facts, take action to eliminate questionable charters.

December 3, 1964

I am Donald L. Everingham of Don-Em Travel Center. On behalf of the American Society of Travel Agents—ASTA—I appreciate the opportunity of appearing before this committee. I have been President of the Northern California Chapter of ASTA for the past two years and am now becoming a national area director. With me are Branwell Fanning, Vice President of Cartan Travel Bureau, Inc., San Francisco and the new President of the Northern California Chapter, Mr. Harold Martin of Travel Service, Inc., National Air Chairman, Mr. Henry Chase of Chase Travel Service, Glendale, California, Area Director for Southern California, and Mr. Dale Johnson of Dale Johnson Travel Service, San Jose, California, National Area Director for northern California.

ASTA has approximately 1,700 members throughout the country operating at more than 2,400 locations.

For your general information, the travel agents of United States sell more than \$500,000,000 worth of air travel every year. In fact, it is estimated that more than 75 percent of all international air travel is handled by agents; more than 25 percent of all domestic air travel is sold by agents. ASTA represents the great majority of this volume of

sales. The ASTA travel agent considers himself a responsible professional and member of the business community. He is concerned that there be a complete understanding by the public of his responsibilities toward them. For your information, an applicant for membership in ASTA must have at least three years in business and must have at least two appointments by the air and steamship conferences. This is ASTA's assurance of the financial and business stability of the applicants.

This hearing comes about, as we understand it, because of the recent unfortunate strandings of Californians in New York while on their way to and from Europe by charter flights. The State of New York is also now interested in the same matter. Needless to say, every ASTA member is equally anxious that such a situation not recur.

With us today is ASTA's general counsel. We have asked him to come from Washington to attend this hearing because of his general knowledge of the problems and regulations affecting the operation of the travel agent, as well as his specific legal knowledge on the subject of licensing. He is prepared in this technical field and, for this reason, I ask that he be permitted to present a statement which has been prepared for your careful analysis.

We will, of course, be happy to answer any questions.

**Statement of Rocco C. Siciliano on Behalf of
AMERICAN SOCIETY OF TRAVEL AGENTS, INC.**

My name is Rocco C. Siciliano and I am a partner in the law firm of Wilkinson, Cragun & Barker, located in Washington, D.C. We are general counsel to the American Society of Travel Agents, Inc. (ASTA)—an organization which has approximately 1,700 travel agency members throughout the country operating at more than 2,400 agency locations. ASTA is the only industry-wide spokesman for the travel agency industry. Seated with me are Mr. Dale Johnson of the Johnson Travel Service, San Jose; Mr. Donald Everingham of the Don-Em Travel Center, San Francisco; and Mr. Henry Chase of Chase Travel Service, Glendale; who are members of ASTA's board of directors. I propose to briefly outline ASTA's position on the question of state licensing of travel agents and then answer any questions you may have with respect to ASTA's position on the licensing question, as well as on the travel agency business in general.

I must state, at the outset, that ASTA is flatly opposed to the imposition of across-the-board state licensing on travel agents. We are opposed because (1) we do not believe that there is any need for such drastic action, and (2) we are firmly convinced that licensing of legitimate travel agents would not prevent a recurrence of the unfortunate charter strandings that took place last summer—the strandings which are the genesis of this morning's inquiry. This opposition to licensing, of course, does not mean that ASTA does not share this committee's deep concern about the strandings. Indeed, the entire travel agency industry has received much unfavorable publicity because of them, even though they resulted from the operations of a single travel promoter. There is no need to repeat the details of the scandal. It is

enough to state that the promoter victimized hundreds of California citizens by purporting to have authority to sell charters on a carrier, which later repudiated him and refused to provide the transportation.

ASTA recognizes that situations such as occurred here last summer should not be permitted to recur. For this reason, ASTA has assisted in drafting federal legislation which would make it unlawful for any person other than an airline or its employees to sell air transportation or to hold himself out as one who sells, provides, furnishes or contracts for such transportation, "except to the extent that such person is specifically authorized *in writing* by a carrier or aircraft operator to do so." (Emphasis supplied.) This bill, S. 2321, was introduced by Senator Warren G. Magnuson of the State of Washington, Chairman of the Senate Committee on Commerce, on November 20, 1963. We understand that the bill has an excellent chance of passage. Senator Magnuson made a strong statement in support of it and it is supported by the Air Traffic Conference of America, as well as appropriate federal authorities. We have attached copies of S. 2321 and Senator Magnuson's statement as an appendix to this statement.

When he introduced the bill, Senator Magnuson made it absolutely clear that its purpose was to prevent a recurrence of the unfortunate incidents that transpired last summer. Referring to the California strandings, he specifically states:

"Such incidents can be attributed almost invariably to unscrupulous promoters who claim that they have authority to sell air transportation when in fact they do not. They claim that they can secure transportation on airline X for a certain price on a certain day. Yet the airline has no knowledge of the commitment and gave the promoter no authority to contractually obligate it. Consequently the transportation is not provided. A tourist looking forward eagerly to his journey finds himself victimized and stranded."

Senator Magnuson concludes that:

"The bill through the imposition of civil penalties will, in my view, do much to minimize, if not eliminate, the fraudulent sale of air transportation and will afford the public the necessary protection against strandings and similar incidents alluded to previously."

Coincidentally, it should be noted that there is now a California State law in existence that is somewhat similar to the Magnuson bill.¹

¹ It is provided in the California Aircraft Transportation Brokers Act (Added Stats. 1953, c. 1448, p. 3046 et seq.) that any travel agent handling air transportation, or holding himself out to be an agent or broker for any air passenger transportation, is required to make a filing with the Secretary of State of California. He must either (a) deposit a surety bond in the amount of \$5,000 with the Secretary of State, or—and here is where the similarity with S. 2321 exists—(b) file with the Secretary of State a sworn statement that each of the airlines which he represents, over which he sells transportation, has authorized him to act in its behalf and has agreed to furnish transportation according to its published tariffs or, on demand of the passenger, refund, according to its tariffs, any unused tickets sold by the broker. The travel agent making this filing must attach documentary evidence of his appointment to act for each carrier. The act became effective September 9, 1953, and filings were due at that time. Failure to file is a misdemeanor to be punished by a fine on not more than \$500 or jail for six months.

It should be noted that proposal of legislation is not the only action that ASTA has taken to prevent the happening of incidents like the California charter strandings. On July 12, 1963, ASTA filed a complaint with the Civil Aeronautics Board asking it to rule that its present rules with respect to pro rata charters and group fares are in violation of the Federal Aviation Act of 1958. As specified in the complaint, pro rata charters and group fares are offered at such a huge discount from regular fares, a discount unwarranted by service distinctions, cost, or other factors, that passengers who travel singly and not in groups, are unjustly discriminated against. Also, restricting such huge discounts to an arbitrarily defined class of the public known as "affinity" groups, discriminates against nonaffinity groups as well as single passengers.

Not only are the affinity rules discriminatory, but they present a serious enforcement problem. The rules are disregarded because the economic inducement is so great, because the particular rules are inherently difficult to enforce, and because the traveling public sees no particular reason (certainly no ethical reason) why it should adhere to the rules. We have received so many documented or otherwise credible reports of irregularities that we believe it probable that violations are the rule, not the exception. It should be noted that ASTA, in its effort to focus attention upon illegal charters, informed the Civil Aeronautics Board about the particular flight which led to the stranding of 100 persons at Idlewild in July, several weeks before it actually left California. However, due apparently to the limitations of the enforcement machinery and jurisdiction of the CAB, action was not taken to prevent what clearly appeared to be an illegal charter.

What is more significant, for the purposes of this inquiry, is that the present rules encourage the operations of unscrupulous travel promoters. This is so because they make it almost impossible for legitimate travel agents to participate in the sale of charters. Thus, a travel agent cannot legally solicit the public to gather a charter or group fare group. He cannot even solicit among the members of a bona fide affinity organization in order to try to gather a sufficient group. He cannot solicit the members of an already-gathered group for special land tours. He loses his commission if he or any of his employees happens to be a member of the sponsoring organization. The amount of assistance he can give in the administration of the charter or group fare trip is severely limited. This situation has attracted a number of travel promoters who are not afraid to operate in violation of present regulations. These promoters are actually in the business of marketing illegal charters.

ASTA, in its filing with the CAB, has requested the CAB to abolish the present affinity test system which has proved so unworkable and institute a new four-point program to make available safe, efficient, and economical air transportation to all members of the traveling public.

Although on September 25, 1963, the Civil Aeronautics Board dismissed ASTA's complaint, ASTA filed a petition for reconsideration which is now pending before the board. If this petition is denied, ASTA plans to appeal the board's decision to the courts. We are

willing to pursue this matter so far because, out of enlightened self-interest, we realize that protection of the public from such incidents as occurred last summer is the only way to continue public confidence in the travel agent—confidence which is essential to the success of the travel agency industry. We firmly believe that elimination of the present rules, which provide inducement for marginal operators, would be an effective way to prevent future strandings.

The American Society of Travel Agents, then, has proposed specific remedies for the specific problem that exists, i.e., the charter mess which has led to the strandings of California citizens. Attorney General Mosk, in his letter to Governor Brown of Tuesday, September 3, 1963, has proposed far broader measures to deal with this specific problem. It appears from the Attorney General's letter to Governor Brown that he wants a bill which would require all travel agents operating in the State of California to be bonded and which, in order to "develop reasonable and workable professional standards for travel agents,"² would require agents to take some sort of examination and be approved by some sort of Board before they could secure a license.

The American Society of Travel Agents is firmly opposed to this type of legislation. We are opposed, first of all, because we sincerely doubt that the imposition of state licensing—with all the concomitant burdens that would be placed upon the legitimate travel agent—would be at all effective in curtailing the operations of the unscrupulous few travel promoters who are operating unethically. I should like to add that Alan S. Boyd, Chairman of the Civil Aeronautics Board, in addressing the ASTA 33rd World Travel Congress, in Mexico City on October 21, 1963, voiced similar sentiments in making a statement opposing state licensing of travel agents.

ASTA would strongly emphasize that the charter problem is one which transcends state boundaries and that the travel agency industry is merely one element involved in this transportation industry. Therefore, any effort to use licensing as a means of resolving this problem must take into account that the basic responsibility for the conduct of charter transportation lies with interstate air carriers subject to federal regulation. Even if we assume that state licensing would prevent unscrupulous travel promoters from actually conducting a business within the borders of the state—and this assumption presupposes an enforcement program of gigantic proportions—California state licensing could not effectively prevent promoters from operating outside of the state, in Nevada or Washington, for example—and conducting their shady operations by mail.

But the fact that state licensing would be ineffective to meet the problem that exists is not the only reason we oppose it. For not only would state licensing fail to cure existing problems, it would actually create new problems.

It can hardly be disputed that the licensing of an occupation is not something that should be lightly done. Whatever the motive for the imposition of licensing—and here we recognize that Attorney General Mosk's motives are clearly to protect the traveling public—the imposition of licensing has the inevitable effect of restricting free-

² Letter to Governor Brown, dated Sept. 3, 1963. p. 6.

dom of economic mobility and limiting competition. As stated by Professor Walter Gellhorn of Columbia University Law School, who has long opposed the expansion of occupational licensing:

"In this land of the free, over 200 occupations are subject to federal, state or municipal licensing registration or certification requirements. The American used to be regarded as captain of his fate, master of his destiny. Perhaps he has now been demoted to the position of first mate or even boatswain. He can no longer confidently set his own course to attain the ambitions of his heart. Instead, he must listen to the commands of others who tell him the direction in which he may sail. . .

"In the past this nation has derived great strength from fostering an economy capable of expansion; in truth, our economy has been forced to expand in order to remain healthy. Semimonopolistic licensing practices march in the opposite direction."³

It cannot be too strongly stated that Professor Gellhorn's arguments apply with added force in the case of the travel agency industry. This is so because the travel agency industry is already highly regulated through both direct and indirect means.

1. Regulation of Travel Agents by Air Carriers

A considerable amount of indirect regulation by the CAB and direct regulation by the various domestic air carriers is accomplished because of the provisions of Section 412 of the Federal Aviation Act of 1958. Under these provisions, carriers are allowed to enter into agreements which become exempt from the antitrust laws provided they file the agreements with the CAB and the agreements meet CAB approval. Accordingly, the carriers have promulgated detailed sets of rules which regulate travel agents. Thus, for example, in order to become an agent for a regular domestic carrier, which is a member of the Air Traffic Conference of America (ATC), an agent must satisfy, among others, each of the following requirements imposed under the Conference's Resolution No. 80.10:

1. Experience Requirements—The owner or one or more of the officers or managerial employees must have had a specified amount of experience in the sale of air transportation or be able to demonstrate promotional willingness, ability and activity in lieu of the experience requirements.

2. Ethical Business Practices—An applicant for approval must demonstrate that it is ethical in its business operations and, specifically, must furnish references from three former employers, business associates, customers, or business or professional men in the community attesting to the applicant's reputation for ethical business practices.

3. Financial Stability.—An applicant must furnish a financial statement and list all persons having a financial interest in it.

4. Bond.—An applicant for approval must furnish a bond in a minimum amount of \$10,000.

³ Occupational Licensing—A Nationwide Dilemma, 109 Ja 39, 40-41.

5. Restrictions as to Location—No agency can be located where its place of business is an airline terminal or hotel, or in a private residence (with certain exceptions), and an agent cannot operate at another location without obtaining approval of the traffic conference.

6. Change of Ownership—The ownership of a travel agency business cannot be transferred without the transferee obtaining approval of the traffic conference in his own right.

Similar requirements are made by the International Air Transport Association (IATA) under its Sales Agency Resolution No. 810(a), which has been approved by the Civil Aeronautics Board. These are as follows:

1. Financial Stability—No applicant will be approved unless his financial and credit standing is satisfactory. The applicant must submit a financial statement which is checked against a credit report obtained by the traffic conference.

2. Ethical Standards—The applicant's reputation for adherence to ethical practices must be satisfactory.

3. Change of Ownership—Approval by the traffic conference is required when there is a change in the legal or beneficial ownership of the applicant or in its corporate status.

4. Interest of Customer—An applicant will not be approved if any customer of the applicant has any substantial interest in the ownership, management or profits of the applicant.

5. Restriction as to Name—No applicant will be approved if the applicant uses a name identical or similar to that of an IATA member.

6. Location—Each location in which the applicant proposes to do business must be approved by the traffic conference. The location for which approval is sought must be an office, or department of an office, engaged solely in the promotion and sale of passenger transportation and services.

7. Professional Ability—An applicant will not be approved unless the Subcommittee determines that for any reason the applicant lacks willingness, ability or capacity to generate, promote and sell air transportation, or the applicant's plans for future generation, promotion or sale of such air transportation are inadequate.

8. Bond—There is now a proposal before the CAB to institute a bond similar to the ATC bond mentioned above.

9. Experience Requirement—There is now a proposal before the CAB to institute experience requirements similar to those imposed by the ATC which have been mentioned above.

It should be noted that under both the ATC and IATA resolutions, violation of any of the resolutions by agents can lead to removal of the agent from the approved agency list and the termination of the agent's eligibility to sell transportation for the member carriers. Both carrier conferences have highly active investigative branches to ensure compliance with their regulations by the agents.

II. Regulation of Travel Agents by the Shipping Conferences

Under Section 15 of the Shipping Act, 46 USC 814, shipping conferences are similarly allowed to institute regulations, by agreement among themselves, which govern the eligibility of travel agents to sell transportation of the member lines. Under Transatlantic Passenger Steamship Conference (TAPC) Agreement No. 120, approved by the Federal Maritime Commission, agents are subject to the following requirements:

1. Bond—The agent must maintain a surety bond for the protection of the member lines. The amount of the bond is based on the amount of expected sales of the agent.

2. Change of Ownership—No transfer sale or change of address or name of an agency can be accomplished without prior consent of the steamship companies which are the agent's principals.

3. Ethical Standards—Maintenance of unethical or unsatisfactory business standards in the conduct of the agency business is grounds for cancellation of eligibility for appointment as agent.

4. Advertising—All advertising by agents must avoid even the appearance of being misleading and must be limited to statements of fact.

5. Inspections—The agent's books must always be open for inspection by the conference.

III. Regulation of Travel Agents Who Sell Motor Transportation

No travel agent can sell motor transportation to the public without securing a license from the Interstate Commerce Commission as a Motor Transportation Broker, 49 USC 311, et seq. As motor transportation brokers, travel agents must satisfy the following requirements:

1. Bond—In order to secure a license, an applicant must furnish a bond to the commission in a minimum amount of \$5,000.

2. License Standards—In order to secure a license, an applicant must be able to show that its issuance "will be consistent with the public interest and the national transportation policy declared in this act."

3. Transfer—No license issued to a motor transportation broker can be transferred unless the commission is convinced that the "transferee is fit, willing and able to perform the duties, and that the transfer will not be contrary to the public interest." A similar requirement is made with respect to the change in the control of a corporation which is operating an agency.

4. Inspection—All motor transportation brokers must be ready to submit all of their records to inspection by the Interstate Commerce Commission.

5. Use of Noncertified Carriers—Motor transportation brokers are forbidden to use motor vehicle carriers who do not hold effective certificates or permits to perform the transportation.

6. Penalties—Violations of any of the provisions of the Interstate Commerce Act can, of course, lead to criminal and civil penalties, and motor transportation brokers are required to appoint an agent for the service of process.

It is obvious from the foregoing that the travel agency industry—while not subject to state or federal licensing per se—is one of our country's most highly regulated industries. Despite this, and despite his recognition that the "vast majority of people involved in the travel industry are reputable businessmen working hard to serve the public,"⁴ Attorney General Mosk has recommended across-the-board licensing for all travel agents. Instead of proposing a specific solution for the specific problem, that is, the elimination of the relatively few unscrupulous travel promoters who have used the charter mess to bilk the public, the Attorney General has come out in favor of imposing increased restrictions on an industry that is beset at every side with restrictions.

In order to prove the need for across-the-board regulation, Attorney General Mosk has pointed to the strandings that have occurred and has mentioned other complaints about travel agents that he has received. But the mere fact that unscrupulous travel promoters exist does not justify the imposition of licensing. It is only if licensing is, in fact, generally needed that it should even be considered. In our opinion, no such general need has been demonstrated.

In sum, ASTA cannot support general across-the-board state licensing and bonding because (1), as noted above, it would increase the already almost intolerable burdens of regulation and bonding which now are imposed on the travel agency industry, and (2) imposition of state licensing would not be an effective way of preventing the recurrence of the strandings which occurred last summer.

We are convinced that the existing federal policy on pro rata charters and affinity group tariffs is the basic cause of the countless hardships imposed upon members of the traveling public who have been stranded or otherwise inconvenienced. Therefore, the most effective solution to this problem, which is of such great concern to the travel agency industry, is the elimination of the present system of pro rata charters and affinity group fares.

Certainly the travel agency industry should not be made the whipping boy for this problem by the imposition of state licensing merely out of a feeling that something—anything—must be done.

The American Society of Travel Agents, Inc., is strongly in favor of curing whatever ills exist in the travel agency industry. We stand ready to cooperate in any way we can in supporting any specific proposals which would deal with the specific evils that do exist.

⁴ Letter to Governor Brown, dated Sept. 3, 1963, p. 3.

88TH CONGRESS—1ST SESSION

S. 2321

IN THE SENATE OF THE UNITED STATES

NOVEMBER 20 (legislative day, OCTOBER 22), 1963

MR. MAGNUSON (by request) introduced the following bill; which was read twice and referred to the Committee on Commerce

A BILL

To amend the Federal Aviation Act of 1958, as amended, to prohibit the fraudulent sale of transportation in interstate, overseas, or foreign air commerce, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That title XI of the Federal Aviation Act of 1958 (49 U.S.C. 1501) is amended by adding at the end thereof the following new section:

“FRAUDULENT SALE OF TRANSPORTATION IN INTERSTATE,
OVERSEAS, OR FOREIGN AIR COMMERCE

“SEC. 1112. No person, other than a carrier or aircraft operator engaged in providing transportation by aircraft in interstate, overseas, or foreign air commerce, or a bona fide employee of such carrier or aircraft operator, shall sell or offer for sale any such transportation, or hold himself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, or contracts for such transportation, except to the extent that such person is specifically authorized in writing by a carrier or aircraft operator to do so.”

SEC. 2. Section 901(a) of the Federal Aviation Act of 1958 is amended—

(1) by striking out the words “any provision of title III, IV, V, VI, VII, or XII” where they appear in paragraph (1), and inserting in lieu thereof the words “any provision of title III, IV, V, VI, VII, XII, or section 1112 of title XI.”

(2) by striking out the words “or by the Board in the case of violations of title IV or VII” where they appear in paragraph (2), and inserting in lieu thereof the words “or by the Board in the case of violations of title IV or VII or section 1112 of title XI.”

SEC. 3. That portion of the table of contents contained in the first section of the Federal Aviation Act of 1958 which appears under the heading “TITLE XI—MISCELLANEOUS” is amended by adding at the end thereof the following:

“Sec. 1112. Fraudulent sale of transportation in interstate, overseas, or foreign air commerce.”

PROHIBITION OF FRAUDULENT SALE OF
AIR TRANSPORTATION

Mr. MAGNUSON. Mr. President, by request, I introduce for appropriate reference, a bill to amend the Federal Aviation Act of 1958, the essential objective of which is to prohibit the fraudulent sale of air transportation. Specifically, the proposed law would prohibit any person other than an airline or its employees to sell or offer for sale air transportation or to hold himself out by solicitation, advertisement, or otherwise as one who sells, provides, furnishes, or contracts for such transportation, except to the extent that such person is specifically authorized in writing by an airline.

During the past year, as in previous years, national attention has been focused on incidents in which unsuspecting air travelers have been stranded. They had contracted for specific air transportation, often on charter flights, or believed they had done so, only to find on arrival at the airport that either no plane was available or that the trip had been overwise cancelled. It is not difficult to imagine the disappointment and frustration of one who finds that the trip, to Europe perhaps, or elsewhere, which he had planned and saved for so long, had been cancelled only hours before departure. Such incidents can be attributed almost invariably to unscrupulous promoters who claim that they have authority to sell air transportation when in fact they do not. They claim that they can secure transportation on airline X for a certain price on a certain day. Yet the airline has no knowledge of the commitment and gave the promoter no authority to contractually obligate it. Consequently the transportation is not provided. A tourist looking forward eagerly to his journey finds himself victimized and stranded.

This, or course, is not a practice of recognized travel agents. In fact they have been the greatest champions for legislation to eliminate it. The recognized travel agents are reputable and conscientious businessmen and women who are dedicated to serving the needs of the public. They are responsible citizens and a credit to their community. It is indeed unfortunate that a relatively few so-called promoters, engaged in the fraudulent sale of air transportation, have blemished their fine reputation.

This bill, through the imposition of civil penalties will, in my view, do much to minimize, if not eliminate, the fraudulent sale of air transportation and will afford the public the necessary protection against strandings and similar incidents alluded to previously.

The PRESIDING OFFICER (Mr. BAYH in the chair). The bill will be received and appropriately referred.

The bill (S. 2321) to amend the Federal Aviation Act of 1958, as amended, to prohibit the fraudulent sale of transportation in interstate, oversea, or foreign air commerce, and for other purposes, introduced by Mr. MAGNUSON, by request, was received, read twice by its title, and referred to the Committee on Commerce.

Statement of Representative Emanuel Celler Before the
New York-New Jersey Chapter, American Society of Travel Agents,
Hotel Astor, New York City, January 17, 1963, 7:30 p.m.

Travel Agents and the Public Interest

I look back over many years of travel here and abroad, and I have always found it to be indeed a broadening experience. I am therefore delighted tonight to be with you, since my avocation is your vocation.

I heartily concur with the English essayist, William Hazlitt, who observed that "one of the pleasantest things in the world is going a journey."¹

Hazlitt contented himself with a simple and prosaic formula for travel. "Give me," he wrote, "the clear blue sky over my head, the green turf beneath my feet, a winding road before me, and three hours to march to dinner . . ."²

The modern tourist is faced by a great many more complications, whether to travel first class, second class, tourist class, or on the champagne flight, and how to achieve the humanly impossible task of seeing every artifact and monument in Europe on a 10-day vacation. Your society represents a profession devoted to insuring that despite all the complications, travel shall continue to be "one of the pleasantest things in the world."

One of the complications of modern travel is the art of making and meeting trains. In this regard I am reminded of an anecdote about Mrs. Theodore Roosevelt, the younger, who after having been absent from home for several days, wired her husband to meet her at a certain station. Hurrying to be on time, Colonel Ted arrived at the station just in time to see the train whiz through at a great speed. Somewhat bewildered, he stared at the speeding cars and was more astonished to see his wife standing on the very back platform frantically waving an important looking envelope in her hand. Spying him, she threw it at him, and, the train rounding a corner, she disappeared from sight.

Scrambling about in the bushes into which the envelope had fallen, the colonel finally found it and quickly opened it. He was amused and somewhat relieved to read:

"Dear Ted: This train doesn't stop here."

In a similar vein is the story told about Sir Winston Churchill. One time Sir Winston almost missed a train and Lady Churchill was alarmed. Sir Edward Marsh, Churchill's private secretary, tried to calm her by saying, "Winston is such a sportsman, he always gives the train a chance to get away." I am sure that many of you have had clients who likewise spiced their taste for travel with a zest for sport.

Man has always felt the urge to travel. Homer's *Odyssey* recounts the travels and adventures of Ulysses on his return from the Trojan War. If I remember my Homer, it took Ulysses 10 years to make

¹ Hazlitt, "On Going a Journey," *Table-Talk* 249 (1871 ed.).

² *Id.* at 250.

that trip. I understand that today the Mediterranean and the Aegean World can be done in somewhat less time—in perhaps a few days—even with a trip to Israel thrown in. Perhaps all has not changed for the better, however. I wonder whether you travel agents with all your ingenuity are able to offer in the package tour an interview with a one-eyed Cyclops or a rendezvous with Circe.

Not only has the world shrunk but world travel has ceased to be a luxury confined to the very rich. Today the average citizen with the average bank account can afford a “grand tour.” Indeed, I understand that trips to Europe are now being sold out of mail order catalogs along with other less exotic commodities, a practice which I am told is causing concern to some of you.

Along with this broadening of the base of the traveling public, we have witnessed in the past 10 years a veritable “travel boom.” Passenger departure by sea and air from the United States rose from about 1.2 million in 1952 to 3.3 million in 1962.³ All this, of course, has given a tremendous boost to your business. In 1958, the House Antitrust Subcommittee, of which I am chairman, took note of this expansion of the travel agency business. The subcommittee attributed this remarkable development to such factors as a favorable rate of population growth, a high level of national income, the long-term trend toward a shorter work week, mass travel opportunities for the middle income class group and technological improvement in the development of high-speed aircraft.⁴ At that time the subcommittee predicted:

“There is every reason to believe that the travel market will continue its recent substantial rate of growth and that the role of the travel agency in this process will be substantial.”⁵

Time has shown both predictions to have been amply justified.

As with so many other activities in our lives, travel has come to be clothed with a national interest. There is an oft-repeated cliché to the effect that every American citizen who travels abroad is his country’s ambassador. Indeed, our image abroad is often formed more by the impression which an individual American makes on his trip to a South American village than by the official action which our government takes in carrying out international policy. Witness the success of the Peace Corps in Africa, Asia and South America. More recently, a new facet to this picture has developed. Travel by foreign nationals to our shores has become highly important to this nation in view of our balance of payments problem. As you know, Congress passed the International Travel Act of 1961 and the United States Travel Service was established under the Department of Commerce. I understand that this office is doing a grand job in encouraging tours here and in closing “travel gap.”⁶

All these developments in the field of travel I have followed with great interest for I believe that travel is not only one of the pleasantest things in the world but also one of the most valuable. As you know, I have served for some time as a member of a body down in Washington

³ Lindsey, *The Service & The Travel Boom*, Immigration and Naturalization Reporter, October 1962.

⁴ Antitrust Subcommittee, Committee on the Judiciary, *The Airlines Industry*, H. Rept. No. 1328, 85th Congress, 2d Session, 1958, at page 191.

⁵ *Ibid.*

⁶ Congressional Record, July 16, 1962, page 686.

which is generally very enthusiastic about travel (particularly around adjournment time).

I can assure you that there is no substitute for the first-hand knowledge that can be secured from these trips abroad. So firmly do I believe this that I have supported the right of Americans to travel abroad when that right has been threatened by executive action, and have introduced in the past legislation to guarantee that fundamental right.

In all these developments in the field of travel, you, the professional travel agent, have played a major role. It has been your function to help mightily in the business of promoting travel in this country and abroad, in selling people on the idea that travel is within their means, and that their lives can be enriched by that travel and, finally, in advising people as to the millions of details which they need to know in making an intelligent travel choice.

With the increasing need for your service has come greater responsibilities and new and difficult problems. I have noted with keen interest that there is presently raging within your ranks something of a great debate. That debate is focused on the question: Should the travel agent be required to obtain a government license before being permitted to sell tickets or travel services to the public? A related or subsidiary question is whether your profession should be subject to some kind of organized regulation.

I am not prepared to give a definitive answer to these questions here. A definitive answer would require more information and more expertise concerning your business than I presently possess. At best as to licensing, I have a sort of benevolent neutrality. As a member of the traveling public, I have the feeling that federal licensing, coupled with some form of self regulation, might well serve to increase public confidence in the services which you provide. But I think, at this point, the decision as to whether and how you shall be regulated is up to you. My sole contribution to your debate is to suggest some precedents in the field of government regulation of business and industry self-regulation that may be helpful to you.

But, first, let me remind you that I have always had a personal interest in the competitive and regulatory problems of your profession.

As you know, during the 87th Congress, our antitrust subcommittee made a comprehensive study of the airline industry and gave considerable attention to the relationship between the airlines and their travel agents. The subcommittee found that the airline industry, through its Air Transport Association, prescribes conditions which travel agents must meet in order to qualify for commissions on sales of airline passage. To be eligible to act as a travel agent for a certificated carrier, one must be accredited by the ATA's Air Traffic Conference. Thereafter, the agent is subject to a regulatory code prescribed and enforced by the conference. At the time of the antitrust subcommittee hearings, the conference's procedure permitted it to cancel an agent's accreditation by decisions made in closed secret session. These procedures provided a travel agent no right of appeal from such a sanction; nor did the agent have any right to be advised of the reasons for his cancellation.⁷

⁷ Antitrust Subcommittee Report on the Airlines Industry, *supra*, note 4, pp. 189-216.

The subcommittee also found that travel agents selling tickets for flights on international routes were subject to a similar set of controls and procedures administered by the IATA, the International Air Transport Association.

Your society (ASTA) had complained of this unilateral exercise by the Air Traffic Conference of arbitrary power in agency matters, free of any effective check or supervision by the Civil Aeronautics Board and without proper consideration of the travel agency viewpoint.⁸

The subcommittee concluded that in permitting these procedures and this degree of control, the Civil Aeronautics Board had conferred on the certificated carriers far-reaching regulatory powers over the travel agency industry, which the board itself did not have statutory authority to regulate in the first instance. The subcommittee rejected the claim that the then existing agency procedures of the ATC and IATA equitably served the public interest, the interest of the ticket agents and the interest of the certificated carriers.

Sometime after the issuance of the subcommittee's report, the CAB took action to erect safeguards around the ATC's exercise of its authority over travel agents. At the time the board took this action, I noted the significance of the board's requirement that a record be kept of the ATC's travel agent proceedings and that the travel agent be notified and afforded *de novo* arbitration proceedings as well as an opportunity to rebut charges against him.⁹ Thus, I believe the work of the antitrust subcommittee in this field has led to an improvement of certain conditions which were operating to the detriment of your profession.

I should also note in passing that the antitrust subcommittee's recent report on the shipping industry also dealt with the relationship between travel agents and the passenger steamship conferences engaged in the foreign trade of the United States.¹⁰ I understand that there is presently pending before the Federal Maritime Commission a proceeding initiated by your society involving the propriety of certain activities of such conferences insofar as they relate to travel agents.¹¹

Let me return to the central question which is now apparently before your society, namely, whether travel agents should be licensed. At the time of its 1958 report, the antitrust subcommittee suggested that if the CAB believed that licensing of travel agents based upon a review of their qualifications was necessary to encourage and develop our air transportation system, this function should be exercised by an agency of the government. Once licensed by the government, travel agents would then be eligible for appointment by any ATC or IATA carrier desiring their services. It was the subcommittee's understanding that such licensing would satisfy the ATC.¹² This principle remains sound. Let me restate it here. If your profession is to be subject to some form of regulation, the regulating should be done by the government or by yourselves, not by some other industry. I should think your society might profitably consider the possibility of such

⁸ *Id.* at 199.

¹¹ FMC Docket No. 873.

¹² Report *supra* note 4 at p. 215.

licensing in working out your relationship with both the airline and the steamship industries.

However, as I have said, the decision as to regulation and licensing should be worked out first by your society and the members of your profession. I think it is an indication of the healthy and constructive outlook of your industry that you are now going through this period of self-examination. In the case of many other industries in this country, it has taken catastrophe or scandal to spur the establishment of a system of complex government regulations in order to restore public confidence. I do not suggest that there are any such derelictions in your profession today; however, you know as well as I do that a few bad apples can spoil the barrel.

Much can be learned from existing systems of self-regulation in other businesses.

The first of the systems of self-regulation which I should like to talk about tonight is represented by the National Association of Securities Dealers or NASD as it is called. As you may know, the Maloney Act amended the Securities Exchange Act of 1934 to provide for a system of self-regulation for the over-the-counter securities industry. Although the Securities Exchange Act then provided a modicum of government regulation over such brokers and dealers, Congress thought this regulatory scheme needed to be strengthened and supplemented in order "to protect the investor and the honest dealer alike from dishonest and unfair practices by the submarginal element in the industry" and "to cope with methods of doing business which, while technically outside the area of definite illegality, are nevertheless unfair both to customer and to decent competitor . . ."¹³

To accomplish this end, Congress considered two alternatives. It might have greatly increased the scope of government regulation over the industry by multiplying the functions of the Securities and Exchange Commission. The second alternative was the adoption of a program of "cooperative regulation" in which the primary task of regulation was to be performed largely by the industry itself through its organization of investment bankers, dealers and brokers, with the government exercising appropriate supervision in the public interest. It was this latter alternative which Congress thought preferable and which it ultimately adopted in the Maloney Act. The NASD thus became the industry's self-regulatory body.

I stress this history because I suspect that you are considering a similar set of alternatives—whether to support direct licensing and regulation by some agency of government or whether to establish a system of self-regulation presumably under the aegis of a government agency. I suggest that the possibility of organized industry self-regulation may be preferable to direct government control, although I recognize that your problems are very different from those of the securities industry.

Basically, the securities industry is open to all comers and the bad apples are weeded out through this complex process of cooperative regulation which I have been discussing. I understand in your own case you are seeking some form of control which would bar unsuitable persons from engaging in your business. Nevertheless, whatever program

¹³ S. Rept. No. 1455, 75th Congress, 3d Session, 1938.

of entrance requirements you settle on, I should think that some system of regulation to insure adherence to ethical standards would be valuable.

Government would, of course, have an essential role to play in a program of self-regulation. In the case of the securities industry, the Securities and Exchange Commission may review disciplinary action taken by the NASD against its members. The SEC may set aside the board's action if unwarranted or it may cancel or reduce the penalty if excessive or oppressive. Thus, the SEC plays somewhat the role of an appellate court, protecting the broker dealer against too harsh treatment at the hands of his own competitors. This points up one of the greatest difficulties with a system of self-regulation. A profession or industry can be very hard on its own. Earlier in the history of the NASD, the SEC had to warn the association to pay greater attention to due process and to bear in mind that a system in which competitors regulate each other can be easily cast into disrepute.¹⁴

In balance, however, the program of self-regulation has been effective. Professor Louis Loss in his authoritative treatise on our securities laws concludes that the NASD has helped to improve the ethical standards of the over-the-counter securities industry; that "that association is a force for the public good in the over-the-counter industry (and that there is room in such a field for a degree of self-regulation properly supervised by a disinterested government agency." ¹⁵

I should like now to turn briefly to a more recent example of industry self-policing, one that is now in an experimental stage. This is the so-called neutral body system which is being tried out by a number of conferences of ocean freight carriers engaged in the foreign commerce of the United States.

As I have mentioned, the antitrust subcommittee conducted a three-year investigation into monopoly problems in the ocean freight industry. Among numerous other distressing discoveries, we found that a great many steamship lines engaged in "malpractices" — the name which the trade attaches to violations of conference agreements and shipping laws through rebating, false billing and the like. In addition to tightening up the federal regulatory program, which we recommended, it was clear that something else was needed to eliminate this spate of "malpractices." Spurred in part by our discoveries and in part by a recognition that "malpractice" was bad medicine for the industry, the shipping conferences themselves decided to establish better machinery for self-regulation. They hit upon a device somewhat hopefully named, the "neutral body."

A "neutral body" is simply a firm — generally but not necessarily a firm of accountants — which is employed by a steamship conference to investigate and adjudicate complaints of "malpractice" against members of the conference. If the neutral body finds, for example, that a member line has given a shipper an illegal rebate, the neutral body may impose a substantial fine upon the offending company. If the company fails to pay up, the conference may expel it.

The antitrust subcommittee expressed considerable interest in these neutral body systems and recommended that some such vehicles of self-

¹⁴ *Sherman Gleason*, 15 SEC 639.

¹⁵ Loss, *Securities Regulations* 733-4 (1951).

policing be generally established in all conferences. Presently, only two steamship conferences have really operating neutral bodies, and it is therefore too early to tell how effective the program will be.

One other "precedent" may be instructive. As you may know, the last Congress, in Public Law 87-254 attempted to deal with the ticklish problem of the ocean freight forwarder. The new law provides for the licensing of qualified independent freight forwarders by the Federal Maritime Commission. Again it is too early to tell what the effect of this remedial legislation is going to be. However, the Chairman of the Federal Maritime Commission, in a recent progress report to the antitrust subcommittee, gave some hint as to what has been happening under this federal licensing provision. Chairman Stakem reported that at the time the law was passed there were about 1,700 freight forwarders.¹⁶ Although the deadline for applications has expired under the new law, only about 900 freight forwarders have filed for registration. Thus, according to Mr. Stakem, the law has had the effect of eliminating some 800 forwarders who could not comply with new financial and other requirements of the new law. This can be a mixed blessing. It may eliminate a lot of unqualified individuals from a business; at the same time, it may eliminate both competition and jobs. It seems to me that a licensing provision would have to be carefully drawn so that it does not throw the baby out with the bath water.

In summary, I should think it would be helpful for members of your society to watch carefully the developments in this very interesting area of industry self-regulation under government supervision upon which I have touched tonight. There are, of course, other helpful examples of self-policing which I have not discussed — such as the fund which the bar associations provide to indemnify clients of defaulting attorneys — but the systems I have mentioned should give you some indication of the possibilities in this field. I believe that self-regulation or "cooperative regulation" is going to become an increasingly important device for the preservation of the public interest. It may be that your society will find it profitable to itself to experiment with some such system of cooperative regulation and to do so in conjunction with some system of federal licensing through the CAB or Commerce Department. I think that such a program will surely help to maintain public confidence in your profession.

However, if you do adopt such a program, I hope that you will avoid some of the pitfalls it presents — notably the tendency of self-regulating bodies to be particularly harsh on the smaller competitors and the danger that a rigid licensing system will eliminate persons or firms able to offer a useful service to the public.

Let me close by again referring to that English essayist whom I mentioned at the outset. In that same essay from which I quoted earlier he expressed a sentiment which I think we all share:

"I should . . . like well enough to spend the whole of my life in travelling abroad, if I could anywhere borrow another life to spend afterwards at home!"¹⁷

¹⁶ Hearing before the House Antitrust Subcommittee, *Progress Report from the Federal Maritime Commission*, 87th Congress, 2d Session (1962) at p. 24.

CIVIL AERONAUTICS BOARD
Washington, D.C. 20428

MR. ALAN SHORT, *Chairman*

Senate Factfinding Committee on Business and Commerce
California Legislature, State Capitol
Sacramento, California

Dear Mr. Short:

By letter of November 19, 1963, the board advised that, although unable to send a representative to testify at the hearings before your committee relating to complaints involving the activities of local travel agents, it would transmit a written statement for the committee's consideration. This letter constitutes the board's statement.

While the facts known to the board surrounding the unfortunate incidents of last summer which gave rise to your investigation are hereinafter set forth, a brief statement concerning the status of ticket agents and the board's regulations relating to charter flights will be helpful.

Provisions of Law Applicable to Ticket Agents

Ticket agents as such are not generally subject to the regulatory provisions of the Federal Aviation Act. Rather, the board's power to control their activities is primarily an indirect one resulting from its authority to control the activities of air carriers. Nonetheless, the board's powers over the carriers, and particularly those conferred by Section 412, are such that a considerable degree of regulatory supervision is provided by the board over the activities of those ticket agents actually utilized by the majority of air carriers, and the regular route operators have established, with the board's approval and under its supervision, what amounts to a system for licensing and regulating the ticket agents utilized by them.

Section 412 of the act empowers the board to approve or disapprove in the public interest certain types of agreements entered into between air carriers and between air carriers and other carriers. As a practical matter, the regular route carriers find it necessary to deal on a uniform basis with ticket agents, and to establish a central clearinghouse for the scrutiny and approval of agents. Accordingly, the domestic certificated route airlines many years ago through their trade organization, the Air Traffic Conference of America (ATC), adopted a resolution establishing uniform procedures governing the initial selection of independent agents to engage in the sale of passenger transportation, and the subsequent working arrangements between these agents and the carriers. This resolution constituted an agreement subject to Section 412, and was approved by the board. A similar resolution relating to the utilization of agents in foreign air transportation promulgated through the machinery of International Air Transport Association (IATA) also was approved.

In October, 1956, the board instituted an investigation into the standards and operating procedures relating to the utilization of agents in domestic transportation (*ATC Agency Resolution Investigation*, Docket 8300). The board's decision was issued therein in 1959 29

C.A.B. 258), and subsequently was affirmed by the courts (*McManus v. Civil Aeronautics Board*, 286 F. 2d 414 (C.A. 2, 1961), *cert. denied*, 366 U.S. 928 (1961)). The board in its investigation conducted extensive public hearings at which persons including ticket agents were given an opportunity to express their views concerning the desirability of the conference method of dealing with matters relating to ticket agents. The board concluded that continuation of the system was in the public interest, subject to the introduction of certain reforms designed to eliminate restraints upon the right to engage in the agency business which had no relationship to the qualifications of an agent. The board did approve those standards designed to assure that the carriers and the public are served by qualified agents. While it may be stated in this connection that the supplemental air carrier industry does not have an overall industry agency program and each carrier appoints its own agents, the board is not aware of any instance in recent years in which a supplemental carrier has not accepted responsibility for the actions of its agents.

As a result of the board's actions, there exists today a comprehensive set of airline rules which constitutes an effective screening process for any person seeking to be approved as a sales agent for ATC members, and a comprehensive set of rules governing the day-to-day conduct of those agents. Failure to observe these rules may result in a loss of agency status under procedures approved by the board. Comparable procedures also have been required by the board with respect to the agents utilized by the United States and foreign flag carrier members of IATA. Order E-16459, *Affirmed, McManus v. Civil Aeronautics Board*, 310, F. 2d 762 (C.A. 2, 1962). The board's orders relating to these actions have heretofore been transmitted to Mr. Neil A. Holding by letter of September 19, 1963, from the Chief of the Board's Routes and Agreements Division.

We also understand that procedures and rules similar in nature to those described above are presently applicable to ocean carriers regulated by the Federal Maritime Commission. Also, of course, many other surface carrier agents fall within the coverage of those provisions of the Interstate Commerce Act relating to brokers. Accordingly, there are only a few agents who serve the public directly who are not subject to a screening process.

In those instances in which the agent involved is not one approved and governed by either the ATC or IATA procedures and resolutions, the only provision of the Federal Aviation Act directly applicable to the activities of the agent is Section 411,¹ which proscribes those unfair or deceptive practices or unfair methods of competition which the board finds to have been committed. While the scope of this provision

¹ Section 411 provides:

"The board may, upon its own initiative or upon complaint by any air carrier, foreign air carrier, or ticket agent, if it considers that such action by it would be in the interest of the public, investigate and determine whether any air carrier, foreign air carrier, or ticket agent has been or is engaged in unfair or deceptive practices or unfair methods of competition in air transportation or the sale thereof. If the board shall find, after notice and hearing, that such air carrier, foreign air carrier, or ticket agent is engaged in such unfair or deceptive practices or unfair methods of competition, it shall order such air carrier, foreign air carrier, or ticket agent to cease and desist from such practices or methods of competition."

has never been fully delineated, we doubt its applicability to a broker's failure to carry out an undertaking to obtain transportation where he assembles a group for travel in advance of a commitment from a carrier to provide transportation and this fact is known to the group. While a false representation that there was a commitment for transportation well might constitute a false or deceptive practice, Section 411 does not lend itself to prompt action against this or any other improper activities of travel agents within its scope in the event of contest, since it merely enables the board to direct a cessation of activities found to be improper after full evidentiary proceedings. Similarly, any activity by, or legally attributable to, a carrier which might fall only within the scope of Section 411 likewise could be proscribed only after such procedures. In neither case could criminal sanctions be imposed for the conduct involved unless it should be continued after issuance of the board's cease and desist order. In that event, the offense or charge would be a violation of the board's order, and not of Section 411.

Regulations Applicable to Air Carriers

As previously stated, the board is empowered to issue regulations governing air carriers in providing or selling transportation. Violations of specific board regulations or orders stand on a different footing from Section 411 ones, and will subject the carrier to possible civil and criminal penalties (Sections 901 and 902 (49 U.S.C. 1471, 1472)), to the entry of a cease and desist order (Section 1002 (49 U.S.C. 1482)), or to a civil suit for injunction (Section 1007 (49 U.S.C. 1487)). The board has promulgated a number of regulations relating to the conduct of charter flights by air carriers, and copies of these regulations have heretofore been sent to the committee. The one principally involved in the incidents of last summer is Part 295 relating to transatlantic charter trips, and a copy is attached (Exhibit A) for the committee's additional convenience. That regulation contains various restrictions upon the groups of persons who may be afforded charter transportation, including restrictions relating to the use of agents.

These restrictions relating to the solicitation of groups and their eligibility for transportation must be imposed to avoid circumvention of the tariff rates applicable to individual transportation, since otherwise persons could be assembled by an agent from the general public merely for the purpose of obtaining individual transportation at a reduced rate. However, a failure to observe these limitations does not constitute a violation by the agent, but rather the transportation of groups assembled other than in conformity with the board's regulations constitutes a violation by the carrier. Also, again as Part 295 discloses, special authority is required from the board to conduct transatlantic charter flights. A representation by a carrier that it will provide transportation if authorized to do so by the board, or an agreement to transport contingent upon board approval, is neither a violation of any board regulation nor deemed to be an unfair practice. On the other hand, as in the case of an agent, a representation of present authority to transport where none exists probably would be within the reach of Section 411.

The Board's Information and Actions Relating to the Activities of World Travel Center

We now turn to the incidents which gave rise to the instant inquiry. In the early spring of 1963, information was brought to the attention of the board's Bureau of Enforcement indicating that World Travel Center (Jerry Davis) of Palo Alto was engaged in solicitation and promotional activities in relation to a group of charters being organized for the ostensible purpose of carrying college students to Europe which might in many ways render the transportation improper under the board's regulations. The board's staff also had information that Aerovias Sud Americana (ASA) was reportedly committed to carry these charters, and that representations were being made that ASA was the carrier notwithstanding that it had no authority to perform them. Davis was not an ATC or IATA approved agent, and hence not subject to the disciplines exercised by the traffic conferences. His activities were brought to ASA's attention in April by the board's enforcement bureau; ASA was cautioned concerning the possibility of violations resulting from these activities; was asked to investigate them; and to advise the board of its findings.

Moreover, there were received during this period several inquiries concerning the proposed flights, and the enforcement bureau advised in response thereto that ASA had no authority to provide the transportation, that it would need a special order from the board, and, up to May 22, 1963, that ASA had not applied for such an order. Further, during the entire period while these charters were being organized, the board's bureau of enforcement, in response to various inquiries, emphasized that any charter which failed to conform to Part 295 of the economic regulations would be considered illegal, and that any carrier subject to board regulation which attempted to perform would do so at its peril. Additionally, the bureau of enforcement on May 27, 1963, addressed a telegram to the president of one of the California colleges involved, cautioning that improper activities by World Travel Center already known to the board might preclude the flights from falling within the scope of the board's charter regulations and thus cause hardship to many students at the last moment who had relied upon the possibility of charter transportation. Also, on May 28, 1963, a three-page multilithed announcement was issued by the Better Business Bureau of Santa Clara Valley (Exhibit B) pointing out the possible illegality of the Davis activities. Expressions of concern relating to the activities of World Travel Center also were received from various private individuals, a member of Congress, and a college newspaper editor. In sum, the facts that these flights well might not be permitted and that the activities of the agent were improper appear to have been well publicized and generally known.

On May 29, 1963, the board by its Order E-19624 (Exhibit C) denied the application by Aerovias Sud Americana for authority to conduct the flights in question. What subsequently transpired with respect to these charter groups has been pieced together from indirect sources, and we may not have the whole story. It is understood that when ASA failed to obtain authority from the board, Davis apparently sought substitute service. How all of the passengers were moved

from California to New York is not known to the board. However, arrangements were made by someone (whether by Davis or the groups, we do not know) for Intercontinental, U.S., purportedly operating as a private carrier and not subject to the board's jurisdiction, to move most of these groups to Europe and to return them to the United States. We understand that one group was disbanded in New York after Intercontinental refused to carry them to Europe, and that substitute service could not be found. We further understand that transportation between New York and California was not available to some of the groups upon their return to New York from Europe, and that the travelers were put to the additional expense of paying their way back to the point of origin of their flight. On September 5, 1963, the board granted a special authorization to United States Overseas Airlines to move these people to California at \$72 per person (a rate well below its tariff for similar service), and many of the returnees utilized this service. Whether Intercontinental failed to carry out its contractual commitments for transportation, or whether it fully performed its commitments and the difficulty lay in the fact that sufficient funds were not advanced by Davis to arrange for the substitute transportation, is not known, but it is our understanding that the latter very well may be the case.

The additional expense and inconvenience occasioned to the passengers involved in these charter flights is attributable primarily to the activities of the World Travel Center. On the basis of the facts known to the board, the travel agent's activities well may have been such as to constitute an unfair or deceptive practice within the meaning of Section 411 of the Federal Aviation Act. However, they do not appear to have involved violations of any other provision of the Federal Aviation Act, and, as previously stated, Section 411 is neither self-enforcing nor does it lend itself to prompt remedial action. Thus far, our bureau of enforcement has not instituted any complaint before the board concerning Mr. Davis' activities, nor does it appear that proceedings against him and the issuance of a cease and desist order would provide any benefit since it is our understanding that his activities have resulted in penalty actions pursuant to state law.

Insofar as Aerovias Sud Americana is concerned, our information discloses that certain of the carrier's employees stationed on the west coast very well may have actively aided Mr. Davis and made representations that ASA would provide the transportation. Again, on the basis of the facts known to our staff, however, it does not appear that there was a violation of any express prohibitions of the act or the board's regulations, but rather that the conduct may have constituted an unfair or deceptive practice. The board has not proceeded against ASA with respect to the transactions here involved since the carrier terminated the employment of its California representatives, closed its California office, voluntarily accepted a cease and desist order as to certain other practices in which it was engaged, and reorganized its operations under new management. We also are informed that the carrier's charter venture in California caused it severe financial losses, and that the carrier returned to Davis all of the sums deposited by him with it in relation to the charters in question. Also, insofar as we know, none of the financial losses suffered by the travelers was

due to any defalcation by ASA. Again, in these circumstances, it has not been considered that any useful purpose would be served by bringing formal proceedings against the carrier under Section 411 of the act.

As to Intercontinental, U.S., enforcement proceedings have been instituted on allegations that the carrier's various activities, including the transportation here involved, constituted common carriage subject to the economic regulatory provisions of the act, and hence that the carrier has been and is unlawfully engaged in air transportation.

CONCLUSIONS

It is by no means clear that additional legislation at either the federal or state level would serve to preclude future incidents such as the one involving the activities of World Travel Center. Rather, as in any other area of activity, there always will be found some persons who will engage in activities which constitute violations of law, just as Davis' activities appear to have been in violation of various provisions of California law. To the extent, however, that legislation purporting to regulate ticket agents is indicated, it is the board's view that any legislation should be by the federal government rather than by individual states.

As previously detailed, travel agents, for the most part, already are subjected to extensive regulation, with federal government approval, by the carriers which they represent. It is not believed, therefore, that any additional system of licensing of agents is necessary, or that the air carriers should be burdened by local licensing requirements in the sale of air transportation subject to federal control.

As to other possible legislation, a bill recently has been introduced into the Congress of the United States proposing to make it a criminal offense for an agent to sell, or offer for sale, transportation by aircraft in circumstances in which there is no written authorization from the carrier to do so (S. 2321). Yet another bill has been introduced which in effect would make it a crime for an agent to sell transportation without an enforceable commitment from a carrier to provide it (H.R. 7542). These prohibitions, if enacted, presumably would apply to activities such as the ones conducted by Mr. Davis. Additionally, the board has under consideration proposals designed to enable it to deal more effectively with carriers such as Intercontinental, U.S., which purport to conduct operations which are outside the scope of the board's jurisdiction.

It is hoped that the foregoing information will prove of assistance to the inquiry by your committee.

Sincerely yours,

ALAN J. BOYD
Chairman

[Reprinted from FEDERAL REGISTER of April 28, 1961]

Exhibit A

Civil Aeronautics Board, Economic Regulations, Effective April 28, 1961

[Reg. ER-326]

PART 295—TRANSATLANTIC CHARTER TRIPS

Revision of Part

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 20th day of April 1961.

This part contains the amended general requirements governing applications for, and operations under, individual exemption orders authorizing the performance of transatlantic passenger charter flights by United States air carriers other than carriers certificated to provide unlimited passenger service over designated routes. The regulation does not itself grant any authority for the operation of transatlantic passenger charters and any carrier seeking such authority must file application in accordance with the provisions of this part for an exemption pursuant to section 416(b).

Historically, a major objective of the Board has been the development of the potentially large mass international travel market in the United States without undue diversion from the regularly-scheduled, individually-ticketed services of United States and foreign flag route operators. In furtherance of this objective, the Board has granted individual authorizations for transatlantic charter flights to carriers not otherwise thereunto authorized, but has also imposed and from time to time has redefined standards for charter eligibility of groups. Thus, in 1957, we amplified the general criteria for charter eligibility which we had followed in 1955 and 1956. These criteria were largely those that had been previously developed by the carriers and the Board, and had been embodied in IATA Resolution 045, which contains the requirements established by scheduled international route operators for their own operations. In 1958, we made these criteria more specific and susceptible of precise application. And in 1959, we embodied them with minor modifications in an Economic Regulation (Part 295), giving them greater stability and legal effect than theretofore. In 1959, we also concluded the Foreign Off-Route Charter Investigation, Docket 7173, in which foreign air carriers were for the first time authorized to perform off-route charters in air transportation. In addition to amending their permits to provide this authority, we promulgated a new Economic Regulation (Part 212) and established as guides for issuance of a charter authorization standards similar to those in Part 295. In 1960, after the IATA carriers had finally undertaken, upon the Board's suggestion, to provide more definitive and enforceable standards for their own operations, we undertook to modify Parts 295 and 212 in order to conform our requirements in substantial respects to those now provided in amended IATA Resolution 045.¹ Consequently,

¹ It was also necessary to impose as conditions to approval of Resolution 045 certain standards, especially with respect to travel agency participation in charters, which IATA had not provided for in the Resolution. See Order E-16295, dated January 23, 1961.

at such time charter requirements for all classes of transatlantic carriers had become substantially similar.

During the developmental period of this program, the Board considered it necessary and desirable to pass on each individual passenger charter flight in foreign air transportation by supplemental and certificated cargo carriers, and Part 295, as hitherto in effect, thus required special authorization by exemption for each charter.

However, on November 14, 1960, the Board issued a notice of proposed rule making (EDR-21, Docket 11907, 25 F.R. 10944) in which it proposed to amend Part 295 to provide, instead, the framework within which it might grant temporary (seasonal) blanket exemption authority. Upon consideration of all relevant matter in the comments received in response to the notice, the Board has decided to adopt revised Part 295 substantially as proposed.

The regulation contemplates the granting of temporary exemption authority, during the tourist charter season, individually to those supplemental and all-cargo carriers which are also applicants in a now current proceeding to determine whether such carriers, or any of them, should be certificated to conduct transatlantic passenger charters² and which are otherwise qualified. This regulation further sets forth the criteria and conditions which shall be observed in conducting passenger charter operations pursuant to such temporary authority as may be granted hereafter.

It should be noted that such exemptions as may be subsequently granted will be within the seasonal period of transatlantic charter activity from April through September. Further, pending completion of the aforesaid charter investigation, seasonal exemptions will be annually renewable upon regular application as set forth in §295.5 of the part. Of course, applications for exemption authorization for individual charter trips may still be made in conformity with Part 302 of the Board's Procedural Regulations, and insofar as charterworthiness is concerned, the standards of this regulation will be largely determinative of the disposition of such applications. However, the Board does not contemplate that it will grant individual flight approvals to supplemental or cargo carriers where the carrier either has not applied, or has applied and been found unqualified, for the seasonal exemption herein contemplated, except in unusual or compelling circumstances.

The Board believes that several basic considerations support the conclusion that seasonal passenger charter authority in the transatlantic market for supplemental and all-cargo carriers will be in the public interest. It is recognized that there has been a substantial and sustained growth of transatlantic passenger charters and that supplemental air carriers have provided a significant part of this service. During the 1960 season, for instance, supplemental carriers conducted a total of 226 flights or approximately 17 percent of the combined number of flights conducted by Part 295 and IATA carriers. There is reason to believe that such services by these carriers will continue to be needed. The charter season is, for the most part, also the extremely busy regular service season over the North Atlantic for the IATA carriers. Further, these latter carriers have generally been engaged in a jet reequipment program and may increasingly find it uneconomic to maintain appropriate facilities to operate piston aircraft

² Transatlantic Charter Investigation, Docket 11908.

merely to serve a seasonal charter market. Yet, jet capacity and costs may be such as to reduce substantially the potential of jet aircraft for charter services, particularly with respect to small groups. From its contacts with chartering groups in past years, the Board is informed that such groups have sometimes been unable to obtain charter flights at the times they desired them.

A second major consideration is that it no longer is administratively necessary to retain the requirement that nonroute operators obtain special authority for each charter. The standards of charter eligibility are now sufficiently precise and understandable to preclude substantial inadvertent violations of charter principles which would lead to a breakdown in the proper distinction between charter and individually-ticketed services and thus have a serious adverse effect on regularly scheduled services.

A third consideration for the present action is the economic and administrative burden which supplemental and cargo carriers have had to sustain in being required to obtain special approval for each passenger charter trip. These carriers are relatively small particularly as compared with passenger route operators, and the necessity of obtaining prior authorization for each charter makes advance planning of their operations considerably more difficult. As comment from carriers reveal, equipment must often be committed a substantial time in advance and projection must be made with respect to the economical use of aircraft (e.g., resolving the problems of filling empty ferry legs). It was further stated in comments that amelioration of these factors would afford greater opportunity for the subject carriers to maintain and develop all their services. Comments also indicated that the expense, time and paperwork required for preparing and pursuing so many applications is not insignificant in total effect, and the adverse sales impact of a charterer's knowing that specific authorization must be sought from the Board appears to be undue competitive disadvantage. Comments showed that such factors may well have been instrumental in causing withdrawal from the market of seemingly successful passenger charter operators and apparently have contributed to the changing identities of carrier participants in transatlantic charter operations. Since the market for these carriers is seasonal, its attractiveness from an economic standpoint is limited.³ Under these circumstances, relatively small impediments can loom as large factors in a decision to devote resources to it.

These three basic considerations noted above have prompted the Board to institute the proceeding to investigate whether certificates should be granted to those carriers which would undertake on a sustained basis to meet such need as may exist for passenger charter services additional to those provided by the passenger route operators. The same considerations also indicate that any exemptions which may be issued to such carriers pending final determination in the aforesaid proceeding should be on a seasonal rather than an individual charter basis.

Various objections to the proposed regulation were received from transatlantic passenger route carriers. Thus, they assert that the con-

³ We, of course, recognize that the fluctuations in MATS' policy and its effect on the availability of backhauls affect the economy of charter service and the desirability of participation in this market.

templated blanket exemptions would be issued on the theory that supplemental and all-cargo carriers have a right to be in the transatlantic passenger market free of the disadvantage of adherence to a prior approval procedure which does not apply to route carriers. However, the Board's conclusion that a change from individual to seasonal exemption would be in the public interest is not based on the concept of affording relief because of any rights in the market. The rule contemplates appropriate temporary relief for qualified carriers coming within its purview in the conduct of operations which supply a needed supplementation of other services. It is consonant with the declared policy of the Board to develop charter services as the public interest requires. It does not place the supplemental and all-cargo carriers on an equal competitive basis with transatlantic route operators which retain the advantages of more stable authorizations, market identification, larger sales organizations, and in case of on-route charters, established stations. Further, seasonal exemptions, like individual charter exemptions, can be granted only if they satisfy the requirements of section 416(b).

Comments also asserted vagueness of the Board's tentative conclusions concerning the burden involved in existing procedures, and question whether any appreciable burden would be removed from the supplemental and all-cargo carriers by eliminating the requirement of prior approval. These comments also question the Board's conclusion that the identification of carriers participating in this traffic has changed because of the burden of making prior application, and call it unsupported and a mere guess, advocating the hypotheses that the transatlantic passenger charter service is inherently unprofitable for supplemental air carriers. Conversely, other comments from a route air carrier object that the regulation would attract additional supplemental and all-cargo carriers to this market. Comments of supplemental and all-cargo operators generally tend to confirm the Board's tentative conclusion, derived from processing of Part 295 charter applications during the past years, that the prior approval requirement was a serious administrative and economic burden. Since exemptions will be granted only upon application and in accordance with the provisions of section 416(b), the regulation as such is not determinative of the number of authorizations which the Board will issue thereunder. Of course, no exemption will be issued to other than qualified carriers.

It is also asserted that a change to seasonal authorizations is untimely in that it would result in substantial awards not required by any emergency and in the face of doubt as to whether decision in the certificate proceeding, Docket 11908, will result in awards of any charter authority. Various arguments relating to the issues in that proceeding are made to show the existence of such doubt. Another carrier comments that the awards would prejudice the certificate proceeding. However, as stated above, the Board presently deems continuation of the transatlantic charter services of supplemental and all-cargo carriers necessary in the public interest, and this revision of the regulation merely reflects the Board's conclusion that this should be accomplished by seasonal grants. Any exemption that may be issued will be for the peak charter season of the year and renewal of such exemption will require a de novo determination under section 416(b). The issue of

seasonal exemptions will not prejudice the certificate proceeding, Docket 11908, or any issue therein.

Objection to the regulation is also made on the ground that transatlantic charter operations by supplemental and all-cargo carriers adversely affect the economy of the scheduled airlines, at the very time when unnecessary duplication of service should be eliminated and such operations are not needed. We do not conceive of the transatlantic passenger charter service as unnecessary duplication. Thus the Board believes that the standards of Part 295 adequately protect the scheduled route carriers from undue diversion.

Further comment was submitted advocating that this regulation should be effectuated only after formal hearing. The hearing to be held in the certificate proceeding which we have instituted will be directed to the long range needs and authorizations in the transatlantic passenger charter field. The comments contained nothing that would establish that hearings prior to the issuance of this regulation are required as a matter of law or by public interest considerations. Although this regulation, by itself, grants no rights, the Board is adopting the regulation in the belief that the requisite findings under section 416(b) can be made in the event that an application is filed by a properly qualified applicant. There will be adequate opportunity for objection respecting any particular application for temporary authority filed pursuant hereto.

In further comments received, objection has been made to the exclusion of any supplemental carrier from eligibility for exemptions under this rule and especially to exclusion on the ground that the supplemental carrier is not an applicant for a charter certificate in the above-mentioned proceeding. Conversely, other comments deplored an alleged lack of adequate standards or limitations to insure the fitness of carriers granted blanket authority. The Board is satisfied that the public interest justifies keying its transatlantic charter policy to the operations of those carriers which have exhibited a sustained interest in the operation of transatlantic charters. Further, this part contemplates that successful applicants will have met completely adequate standards of fitness. Section 295.5 now specifically requires that applications be accompanied by such additional supporting information as data showing whether the applicant possesses aircraft capable of providing the service; whether capital required to operate is available to it; whether it has made arrangements for protecting charterers' deposits so as to be in a position to make prompt refunds when flights are not operated; whether it has definite plans to operate, such as signed conditional contracts for options; whether it has a reasonable program for assuring on-time departures and for suitable substitute arrangements where emergency situations necessitate substitute service; whether it will provide a point of contact overseas for charter groups for securing information regarding return trips; and that it has the ability to conform to all the provisions of the Act and the requirements thereunder. Previous experience in the transatlantic pro rata charter market will also be a factor to be considered.

It was also suggested that all-cargo carriers be excluded from this Part in conformity with a concept of encouraging specialists to denote their endeavors to developing their own limited markets. The proposi-

tion would have greater force if the all-cargo carriers were firmly established in their regular cargo work on a stable and sound economic basis. The role of the all-cargo carrier in the subject charter services may be better determined after decision in the Domestic Cargo-Mail Service Case (Docket 10067, et al.). There is insufficient reason to exclude all-cargo carriers at this time from this regulation.

Several comments were submitted suggesting greater safeguards against violations of bona fide charter operations hereunder. It was proposed that basic charter data be filed prior to each flight with the Board, be open to public scrutiny and objection, and be subject to disapproval by the Board. Concern was also voiced as to the availability of effective sanctions.

Charter standards are not sufficiently clear and precise and so well known to carriers that there can be no confusion on the part of an operator or his competitor as to what constitutes a violation of the Board's charter concept. Any substantial violations can be expected to become readily known to competing carriers and could be reported to the Board by appropriate complaint. Further, information on every charter flight must be filed monthly pursuant to this part and can serve as an additional source of information available to the public for checking on the validity of operations performed. In addition, much more detailed data, under certification of charterer, travel agent, and carrier, as to each charter operation must be retained by the carrier available for Board inspection. With such opportunity to discover violations being available there is little likelihood that carriers would knowingly engage in unauthorized operations and risk the quite sufficient sanction of later not being eligible for renewed exemption authority or not being found fit for a charter certificate. Such authority as may be issued under this part will be subject to amendment or revocation in the discretion of the Board.

While it is true that the self-interest of supplemental and all-cargo air carriers would not directly cause them to protect the individually-ticketed passenger market, their self-interest in remaining eligible for renewal of authorizations and eventual certification will constitute a strong incentive for them to abide by the regulation.

From the fact that in the past some carriers submitted charter applications which the Board had to reject, it does not follow that they would have performed such charters on their own responsibility. It is expected that the carriers will, for their own protection, ask for an advisory opinion in doubtful cases, and for a waiver in cases more clearly outside the standards of these rules.

In addition to the above, other comments were received urging the Board to make several changes not specifically dealt with in the notice of proposed rule making. The American Society of Travel Agents proposed a 23-day year-round excursion fare on individually-ticketed services in lieu of the provisions of Part 295. It may be noted that the recent meeting of IATA at Cannes did not result in a proposal to the Board of such a fare, and thus we have no basis for considering this proposal in connection with the subject amendment of this part. One cargo carrier suggested a limitation on carriage of cargo on passenger charter ferry legs to avoid undue diversion from cargo carriers. There

has been no showing of any undue diversion through prior operations conducted under the provisions of Part 295 and the change from individual flight exemptions to blanket authorities should not unduly increase the chances of such an occurrence. Another carrier suggested inclusion of a rate floor to prevent uneconomic operations. This is not now found necessary inasmuch as the transatlantic passenger charter market has not exhibited any tendency toward extreme rate cutting.

Several other proposals not dealt with in the notice were submitted in response thereto. Thus, comments were received urging the Board to allow for split charters whereby the aircraft is shared by separate charter groups; to permit any relative residing with a member of the charter group to participate in the trip as a member of his "immediate family", and to permit travel agents to participate in charter administration and allow them to receive commissions for charter services performed for the carrier even though they are members of the charter organization. The Board does not consider such amendments advisable. Split charters would tend to erode the concept of charters as planeload operations. Inclusion of all household relatives beyond spouse, children and parents (the usual resident categories) lends itself to abuse since determination of the true residential status of other relatives is not easily accomplished. The matter of relaxing restrictions on travel agents has been periodically considered and no new showing has been made which would warrant changing the Board's established position on the provisions mentioned.

Four supplemental carriers proposed liberalization of the prohibition against paying commissions to travel agents in excess of five percent of the total charter price or of the commission rate paid by a passenger carrier certificated to conduct regular service between the same points. They argued that supplemental carriers cannot engage in charter price competition with route operators, since the agent's commission, based on a lower charter price, would actually result in less remuneration for him and jeopardize his impartial representation of supplemental operations as opposed to certificated operations. The ceiling on commissions should not be lifted. It has served to reduce the incentive for promoters to act as indirect air carriers and to "create" charters through individual solicitation of the general public. In light of the limited nature of Part 295 operations, and the advisability of having distinctive safeguards for such operations, the proposed modification of the subject provision does not appear advisable.

Some carriers also suggested amendment of Part 295 to clarify permissible carrier solicitation of charter groups, advertising of individual rates for participants in pro rata charters, and carrier advertising of ground-tour arrangements. Section 295.11(a) states that a carrier shall not engage directly or indirectly in any solicitation of individuals as distinguished from the solicitation of an organization for a charter trip. Consistent with this provision carriers may engage in advertising not directed to the individual. To permit advertising of a pro rata charge by itself would encourage the carriers to direct advertising at individuals rather than officers of bona fide organizations and would in effect encourage individuals to form "clubs" for purposes of chartering. It should be noted that a carrier is not in a position to

state what a pro rata charge will be since such charge depends on the number of seats on the aircraft that are actually filled and such other matters as the administrative expenses assessed against pro rata shares in each particular charter. On the matter of advertising land tours, we do not interpret Part 295 as prohibiting such advertising so long as it is directed at groups rather than at individuals. Advertising of land tours directed at individuals would be an indirect method of soliciting individuals for charter flights. However, we interpret Part 295 as permitting a carrier to speak of the availability and general price range of land tours when it addresses its advertising to groups, and to refer such groups to tour operators.

Several carriers proposed elimination of § 295.2(j) which sets forth a presumptive standard for judging bona fide members of charter organizations and a safeguard against the carriage of spurious charter groups. The Board finds this provision should be retained expressly to avoid the admission of members through public solicitation for purposes of charter flight participation. The definition of bona fide members is modified in accordance with the notice of rule making. Previously it included a presumption that members were not bona fide unless they had belonged to the charter organization at the time of the filing of the application for special authority to conduct the particular charter. With the removal of this requirement for individual trip authorization the presumption was tentatively changed to refer to persons as not being bona fide unless belonging to the organization at the time it gives "notice to its members of firm charter plans."⁴ Objection was made to this definition as being too vague. To be more restrictive might unduly hinder charter participation. There will be many instances where a charterer's "Notice to its members of firm charter plans" will indicate a flight date which may serve to show a specific charter arrangement. Since such solicitation notices must be filed with the carrier under this Part and be retained by it for possible board inspection there is insignificant likelihood that the proposed standard of bona fide members as here amended will lead to spurious charter participation.

Comment was also received from the System Route Committee, Pilots-Pan American World Airways. This group felt that liberalization of charter rules would curtail charters by Pan American and adversely affect their job advancement. In the light of our discussion herein there is no showing of any possible injury sufficient to warrant further limitations concerning operations covered by this regulation.

In view of the foregoing, the Board finds that the subject amendment of Part 295 is in the public interest.

New § 295.5 contains the requirements for application for the new exemption authority. All former provisions which related to Board ap-

⁴The full definition § 295.2(j) reads as follows: "Bona fide members" means those members of a charter organization who have not joined the organization merely to participate in the charters as the result of a solicitation directed to the general public. Presumptively persons are not bona fide members of a charter organization unless they are members at the time the organization first gives notice to its members of firm charter plans and unless they have actually been members for a minimum period of six months prior to the starting flight date. This presumption will not be applicable in the case of charters composed of (1) students and educational staff of a single school, and immediate families thereof, (2) employees of a single government agency, industrial plant, or mercantile establishment, and immediate families thereof, or (3) participants in a formal academic study course abroad. In the case of all other charters, rebuttal to this presumption may be offered for the Board's consideration by request for waiver."

proval of specific aspects of charters not generally permitted under this part (such as provisions in § 295.33(a) (2) and § 295.35(b) (3)) have been omitted. The effect of this is that air carriers which receive authority under this part may not perform charters which do not comply with this part in every respect unless a waiver has been granted by the Board pursuant to § 295.3.

Similarly, former § 295.17 which required individual postflight reports to the Board is being eliminated. However, such information will have to be filed with the carrier by the travel agent and the chartering group as before. The revised provisions of Part 295 require the filing of a report by the carrier within 15 days after the close of each month concerning each charter trip operated during such month; setting forth (a) date of trip; (b) points served; (c) number of round-trip and one-way passengers; (d) name of chartering organization; (e) description of chartering organization disclosing basis for conclusion that group is bona fide; (f) name of travel agent; and (g) basis for construction of tariff charge. These provisions will be found in new § 296.6 which also refers to the necessary record-retention requirements incorporated in Part 249.

Amendment to § 295.30 has been incorporated raising to 20,000 the former numerical maximum of 15,000 for chartering groups drawn from an area other than a local area. This has been accomplished in conformity with Board Orders E-16147 and E-16295. Docket 11879 approving an amendment to the IATA Charter Resolution carrying out a parallel change.

Apart from the aforementioned changes, the provisions of Part 295 remain substantially the same. As previously noted, the rule contains restrictions on the transatlantic passenger charter business which guard against the entry into the field of indirect air carriers and which also prevent charterers from soliciting the public or segments of the public for charter flights. In addition, there are protective provisions guarding participants in charter trips from inequitable burdens and charges.

With regard to the prohibition against charterers obtaining participants for charter group by soliciting the general public, the rule prevents the forming of a group by (1) general advertising or (2) unlimited soliciting of charter participants from an organization easy to join, and of uncertain or large and scattered membership. The rule thus provides the general framework within which to judge the charter-worthiness of the cases on their own facts. For example in accordance with the provisions of § 295.30 as amended, prospective charter participants solicited without limit from organizations or other entities with a total membership of more than 20,000 (except colleges or universities located in one local area) would be considered as solicited from the general public which would preclude their charter trip. However, if the solicitation of charter participants should be limited to a group of selected delegates who are members of a large association with scattered membership, the size of the association would not appear to bar the charter.⁵

⁵ Thus, if the organization is participating in a scientific convention abroad, the individuals selected to read papers at the convention may be organized into a charter group. Or if an international organization is to hold a meeting, delegates elected by various chapters might properly be organized into a charter group.

Further, in the case of employees of a business whose total employment would apparently render a charter ineligible for approval, a valid charter might be solicited from the employees of two or more plants of such enterprise, provided the total number of employees in such plants would be sufficiently limited as to meet the tests applied by the Board in the case of a single organization. Also, the decision to limit the charter solicitation to the plants involved would necessarily have to be made prior to solicitation for the charter, and each such charter (if there were more than one) would have to be locally administered, independently of the others. It would be inappropriate to make a general solicitation of the employees of the entire enterprise and subsequently limit the charter group in an attempt to conform with the criteria of the regulation.

In those cases, furthermore, where federations of groups are the organizations from which charter groups are sought to be derived, several issues under the solicitation criteria set forth herein would necessarily arise: for instance, whether the federation provides services directly to members of several separate organization in a given locality, or is merely a superstructure tying several individual associations together. Factors to be weighed would include the relationship of members represented by such federation to the total population of the area covered by the federation, past history of joint activities sponsored by the federation, and whether the federation exists only nominally as a means of exchanging information, with participation limited to meetings of representatives of each member group and individual membership therein being merely a matter of record or form at the most.

To facilitate advising a prospective charterer of (1) charter prerequisites and (2) the opportunity to obtain advisory opinions on charterworthiness, it is provided that a copy of this regulation shall always be sent to each prospect directly by the carrier concerned. The carrier, where known, will receive a copy of any advisory opinion requested by a charterer.

In order to facilitate the use of this regulation by charterers, the Board has decided to reissue the regulation with all amendments incorporated therein rather than to promulgate an amendment to the regulation as a separate document. In consideration of the facts that the subject amendment is principally a relaxation of heretofore existing restrictions; that the amendment relates only to operations to be authorized in the future; that waivers of the provisions of the regulation may be granted where justified in the public interest and warranted by special or unusual circumstances; and that time is of the essence since the transatlantic charter season is approaching, the Board finds that the public interest requires and good cause exists for making this regulation effective upon less than 30 days following publication.

In consideration of the foregoing, the Civil Aeronautics Board hereby reissues Part 295 of the Economic Regulations (14 CFR Part 295), effective April 28, 1961, as follows:

Sec.

- 295.1 Applicability.
- 295.2 Definitions.
- 295.3 Waiver.
- 295.4 Separability.
- 295.5 Application for exemption authority.
- 295.6 Reporting and record retention.

Subpart A—Provisions Relating to Pro Rata Charters
Requirements Relating to Air Carriers

- 295.11 Solicitation and formation of a chartering group.
- 295.12 Pre-trip notification.
- 295.13 Tariffs to be on file.
- 295.14 Terms of service.
- 295.15 Agent's commission.
- 295.16 Prohibition against payments or gratuities.

Requirements Relating to Travel Agents

- 295.20 Limited activities.
- 295.21 Permissible solicitation, sale or ticketing or individual participants for land tours.
- 295.22 Agents who are members of the chartering organization.
- 295.23 Prohibition against double compensation.
- 295.24 Prohibition against incurring obligations.
- 295.25 Prohibition against payments or gratuities.
- 295.26 Statement of supporting information.

Requirements Relating to the Chartering Organization

- 295.30 Solicitation of charter participants.
- 295.31 Passengers on charter flights.
- 295.32 Participation of immediate families in charter flights.
- 295.33 Charter costs.
- 295.34 Statements of charges.
- 295.35 Passenger manifests.
- 295.36 Statement of supporting information.

Subpart B—Provisions Relating to Single Entity Charters

- 295.40 Tariff to be on file.
- 295.41 Terms of service.
- 295.42 Commissions paid to travel agents.

Subpart C—Provisions Relating to Mixed Charters

- 295.50 Applicable rules.

Subpart D—Procedure for Advisory Opinion on the Eligibility of a Charterer

- 295.60 Advisory opinion.

Authority: §§ 295.1 to 295.60 issued under sec. 204(a), 72 Stat. 743; 49 U.S.C. 1324. Interpret or apply secs. 407(a) and 416(b), 72 Stat. 766, 771; 49 U.S.C. 1377, 1386.

§ 295.1 Applicability.

This part establishes the requirements governing applications for, and operations under, individual exemption orders authorizing for periods up to 180 days but terminating not later than September 30 of any year, the performance of pro rata; mixed and/or single entity charter flights for transatlantic passengers by United States flag air carriers other than carriers certificated to provide unlimited individually ticketed passenger service over designated routes. Each application will be considered and passed upon by the Board in accordance with the statutory standards of section 416(b) of the Act. Such application shall be filed and submitted in compliance with the

applicable provisions of this part. Operations under any such individual exemption authorizing the performance of transatlantic passenger charter flights shall be conducted in conformity with the pertinent requirements of this part unless otherwise specifically authorized by the Board. The provisions of this regulation shall not be construed as limiting any other authority to engage in air transportation issued by the Board.

§ 295.2 Definitions.

As used in this part, unless the context otherwise requires—

(a) "Charter flight" means transatlantic air transportation performed by a direct air carrier where the entire capacity of one or more aircraft has been engaged for the movement of persons and their baggage, on a time, mileage or trip basis:

(1) By a person for his own use (including a direct air carrier or surface carrier when such aircraft is engaged solely for the transportation of company personnel or commercial passenger traffic in cases of emergency); or

(2) By a representative (or representatives acting jointly) of a group for the use of such group (provided no such representative is professionally engaged in the formation of groups for transportation or in the solicitation or sale of transportation services).

With the consent of the charter, the direct air carrier may utilize any unused space for the transportation of the carrier's own personnel and property.

(b) "Pro rata charter" means a charter the cost of which is divided among the passengers transported.

(c) "Single entity charter" means a charter the cost of which is borne by the charterer and not by individual passengers, directly or indirectly.

(d) "Mixed charter" means a charter the cost of which is borne, or pursuant to contract may be borne, partly by the charter participants and partly by the charterer.

(e) "Person" means any individual, firm, association, partnership, or corporation.

(f) "Travel agent" means any person engaged in the formation of groups for transportation or in the solicitation or sale of transportation services.

(g) "Charter group" means that body of individuals who shall actually participate in the charter flight.

(h) "Charter organization" means that organization, group or other entity from whose members (and their immediate families) a charter group is derived.

(i) "Immediate family" means only the following persons who are living in the household of a member of a charter organization, namely, the spouse, dependent children, and parents, of such member.

(j) "Bona fide members" means those members of a charter organization who have not joined the organization merely to participate in the charter as the result of a solicitation directed to the general public. Presumptively persons are not bona fide members of a charter organization unless they are members at the time the organization first gives notice to its members of firm charter plans and unless they have

actually been members for a minimum period of six months prior to the starting flight date. This presumption will not be applicable in the case of charters composed of (1) students and educational staff of a single school, and immediate families thereof, (2) employees of a single Government agency, industrial plant, or mercantile establishment, and immediate families thereof, or (3) participants in a formal academic study course abroad. In the case of all other charters, rebuttal to this presumption may be offered for the Board's consideration by request for waiver.

(k) "Solicitation of the general public" means (1) a solicitation going beyond the bona fide members of an organization (and their immediate families), such as advertising directed to the general public by radio, television, newspaper, or magazine, or (2) the solicitation, without limitation, of the members of an organization so constituted as to ease of admission to membership, nature of membership, area of residence of members, and size of membership, as to be in substance more in the nature of a segment of the public than a private entity.

§ 295.3 Waiver.

A waiver of any of the provisions of this regulation may be granted by the Board upon the submission by an air carrier of a written request therefor not less than 30 days prior to the flight to which it relates provided such a waiver is in the public interest and it appears to the Board that special or unusual circumstances warrant a departure from the provisions set forth herein.

§ 295.4 Separability.

If any provision of this part or the application thereof to any air transportation, person, class of person, or circumstance is held invalid, neither the remainder of the part nor the application of such provision to other air transportation, persons, classes of persons, or circumstances shall be affected thereby.

§ 295.5 Application for exemption authority.

Proceedings on applications for exemption authority pursuant to section 416(b) of the Federal Aviation Act of 1958 to conduct transatlantic passenger charter flights (pro-rata, mixed and/or single entity charters) shall be governed by §§ 302.400 to 302.409 of this chapter (Rules 400 to 409 of Part 302 of the Board's Procedural Regulations), subject, however, to the following additional or different provisions:

(a) Applications may be filed only by air carriers which are applicants in good standing for transatlantic charter authority in Transatlantic Charter Investigation, Docket 11908, instituted by Board Order E-16023 of November 14, 1960.

(b) Applications for exemption authority shall be filed with the Board at least 60 days prior to the proposed first flight under such authority.

(c) The application shall state whether authority to fly pro-rata charters, mixed charters, and/or single entity charters is requested; the scope of the charter service to be provided; and the program to be employed for screening charters for full compliance with this part (including provisions for canceling charters contracted for but found not to be bona fide). It shall also be accompanied by all other pertinent

data including but not limited to a showing whether the applicant possesses aircraft capable of providing the service; whether the capital required to operate is available to it; whether it has made arrangements for protecting charterers' deposits so as to be in a position to make prompt refunds when flights are not operated; that it has appropriate pro rata charter tariffs on file with the Board pursuant to § 295.13; whether it has definite plans to operate, such as signed conditional contracts or options; whether it has a reasonable program for assuring on-time departures and for suitable substitute arrangements where emergency situations necessitate substitute service; whether it will provide a point of contact overseas for charter groups for securing information regarding return trips; and that it has the ability to conform to all the provisions of the Act and the requirements thereunder.

(d) Copies of the application shall be served on each direct air carrier certificated to provide unlimited transatlantic passenger service.

§ 295.6 Reporting and record retention.

(a) Fifteen days after the end of each calendar month, each carrier holding operating authority pursuant to this part shall file with the Board's Bureau of Economic Regulation a report setting forth the following information pertaining to each charter flight performed during said month pursuant to such authority:

- (1) Date of trip;
- (2) Points served;
- (3) Numbers of round-trip and one-way passengers;
- (4) Name of chartering organization;
- (5) Description of chartering organization disclosing basis for conclusion that the group is bona fide (identify criteria relied upon);
- (6) Name of travel agent; and
- (7) Construction of tariff charge.

(b) Prior to performing any charter flight pursuant to this part the carrier shall execute, and require the travel agent (if any) and charterer to execute, the form "Statement of Supporting Information" attached hereto and made a part hereof.

(c) Each air carrier holding operating authority pursuant to this part shall comply with the applicable record-retention provisions of Part 249 of this subchapter, as amended.

Subpart A—Provisions Relating to Pro Rata Charters

REQUIREMENTS RELATING TO AIR CARRIERS

§ 295.11 Solicitation and formation of a chartering group.

(a) A carrier shall not engage, directly or indirectly, in any solicitation of individuals (through personal contact, advertising, or otherwise) as distinguished from the solicitation of an organization for a charter trip.

(b) A carrier shall not employ, directly or indirectly, any person for the purpose of organizing and assembling members of any organization, club, or other entity into a group to make the charter flight.

§ 295.12 Pre-trip notification.

Upon a charter flight date being reserved by the carrier or its agent, the carrier shall provide the prospective charter with a copy of this

regulation, Part 295.¹ The charter contract shall include a provision that the charterer, and any agent thereof, shall only act with regard to the charter in a manner consistent with this regulation and that the charter shall within due time submit to the carrier such information as specified in §§ 295.34 and 295.35 and submit to each charter participant the information identified in § 295.34. The carrier shall also be required that the charterer and any travel agent involved shall furnish it in due time for review before flight the information required in §§ 295.36 and 295.26, respectively.

§ 295.13 Tariffs to be on file.

At the time an exemption application is submitted, the carrier shall have on file with the Board a tariff showing all its rates, fares, and charges for the use of the entire capacity of one or more aircraft in air transportation and all its rules, regulations, practices and services in connection with the transatlantic pro rata charter transportation which it offers to perform. Tariffs filed pursuant hereto shall expressly recite that the transportation may not be furnished unless the Civil Aeronautics Board specifically exempts the air carrier from the requirements of section 401 of the Federal Aviation Act of 1958.

§ 295.14 Terms of service.

(a) The total charter price and other terms of service rendered pursuant to authority granted under this part shall conform to those set forth in the applicable tariff on file with the Board and in force at the time of the respective charter flight and the contract must be for the entire capacity of one or more aircraft. Where a carrier's charter charge computed according to a mileage tariff includes a charge for ferry mileage, the carrier shall refund to the charterer any sum charged for ferry mileage, which is not in fact flown in the performance of the charter: *Provided*, That the carrier shall not charge the charterer for ferry mileage flown in addition to that stated in the contract unless such mileage is flown for the convenience of and at the express direction of the charterer.

(b) The carrier shall require full payment of the total charter price or the posting of a satisfactory bond for full payment prior to the commencement of the air transportation.

(c) In the case of a round-trip charter, one-way passengers shall not be carried except that up to five percent of the charter group may be transported one way in each direction. This provision shall not be construed as permitting knowing participation in any plan whereby each leg of a round-trip is chartered separately in order to avoid the five percent limitation aforesaid. In the case of a charter contract calling for two or more round-trips, there shall be no intermingling of passengers and each payload group shall move as a unit in both directions.

§ 295.15 Agent's commission.

The carrier shall not pay its agent a commission or any other benefits, directly or indirectly, in excess of five percent of the total charter

¹ Copies of this regulation are available by purchase from the Superintendent of Documents, Washington 25, D.C. Single copies will be furnished without charge on written request to the Publications Section, Civil Aeronautics Board, Washington 25, D.C.

price as set forth in the carrier's charter tariff on file with the Board, or more than the commission related to charter flights paid to an agent by a carrier certificated to render regular service on the same route, whichever is greater. The carrier shall not pay any commission whatsoever to an agent if the agent receives a commission from the charterer for the same service.

§ 295.16 Prohibition against payments or gratuities.

A carrier shall make no payments nor extend gratuities of any kind, directly or indirectly, to any member of a chartering organization in relation either to air transportation or land tours or otherwise. Nothing in this section shall restrict a carrier from offering to each member of the charter group such advertising and good will items as are customarily extended to individually-ticketed passengers (e.g., canvas traveling bag or a money exchange computer).

REQUIREMENTS RELATING TO TRAVEL AGENTS

§ 295.20 Limited activities.

A travel agent may not assist in the organization or assembly of a charter group, handle the sale of the air transportation to any individual members of a group, or otherwise engage in the administration of the charter flight (including signing the charter agreement for the charterer or collecting or disbursing pro rata shares of participants). The agent may arrange land tours for a charter group provided he deals with the group as a whole. He may deal with individual members of a group regarding land tours only under the circumstances indicated in § 295.21. While his services may be utilized to prepare brochures or other literature describing all aspects of the charter trip, the distribution of such material to individual participants must be confined to the hands of the charterer. Nothing in this section, however, shall prohibit the carrier from having a travel agent make distribution to the charter flight participants of boarding passes pursuant to Warsaw Convention practices.

§ 295.21 Permissible solicitation, sale or ticketing of individual participants for land tours.

A travel agent may deal with individuals for land tours (including ticketing and receipt of individual deposits for such tours) if such persons, on an individual bases after arranging for charter participation, initiate a contact with him to request of him land tour arrangements different from those which have been made available to the charter group as a whole through the organizer of the group. A travel agent (or person controlled by, controlling, or under common control with such travel agent) who does not assist in the engaging of aircraft for the charter² and does not receive remuneration from the carrier in connection with the charter may, in addition, solicit (i.e., initiate the approach to) individual members of the charter group (i.e., persons who have already arranged for charter participation) for land tours, and with respect to such tours receive deposits and conduct ticketing of such individual members.

² This would include assistance in any form which would place the carrier under even an implicit obligation to the agent for having procured the charter. However, it would not include mere discussion between agent and charterer about the several airlines which the charterer might wish to contact.

§ 295.22 Agents who are members of the chartering organization.

If a travel agent, or officer, director, or employee of such an agent, is a member of the chartering organization, such agent, or officer, director, or employee, may not receive, directly or indirectly, any commission or other compensation with respect either to the charter flight or the land tour. Subject to this prohibition, he may participate in those activities, and only those, permitted to other travel agents.

§ 295.23 Prohibition against double compensation.

A travel agent may not receive a commission from both the direct air carrier and the charterer for the same service, nor may he receive directly or indirectly any part of the administrative labor cost referred to in § 295.33(c).

§ 295.24 Prohibition against incurring obligations.

A travel agent shall not incur any obligation on behalf of a chartering organization relating to the expenses of solicitation or organization of the individual participants in the chartering organization, whether or not it is intended for the organization to assume ultimately the obligation incurred.

§ 295.25 Prohibition against payments or gratuities.

A travel agent shall make no payments nor extend gratuities of any kind, directly or indirectly, to any member of a chartering organization whether in relation to air transportation or otherwise. Nothing in this section shall restrict a travel agent from offering to each member of the charter group such advertising and good will items as are customarily extended to individually-ticketed passengers (e.g., a canvas traveling bag or a money exchange computer).

§ 295.26 Statement of supporting information.

Travel agents shall execute, and furnish to air carriers, section A of Part II of the Statement of Supporting Information, at such time prior to flight as required by the carrier to afford it due time for review thereof.

REQUIREMENTS RELATING TO THE CHARTERING ORGANIZATION**§ 295.30 Solicitation of charter participants.**

As the following terms are defined in § 295.2, members of the charter group may be solicited only from among the bona fide members of an organization, club or other entity, and their immediate families, and may not be brought together by means of a solicitation of the general public. Charter participants solicited without limit from organizations or other entities with a total membership of more than 20,000 (except colleges or universities located in one local area) shall be considered as solicited from the general public.

§ 295.31 Passengers on charter flights.

Only bona fide members of the charterer, and their immediate families, may participate as passengers on a charter flight. Where the charterer is engaging round-trip transportation, one-way passengers shall not participate in the charter flight except as provided in § 295.14(c). When more than one round-trip is contracted for, inter-

mingling between flights or reforming of plane-load groups shall not be permitted and each plane-load group must move as a unit in both directions.

§ 295.32 Participation of immediate families in charter flights.

The immediate family of any bona fide member of a charter organization may participate in a charter flight. The immediate family of such member shall be construed to include only the following persons who are living in his household, namely, the spouse, dependent children, and parents of such member.

§ 295.33 Charter costs.

(a) The costs of charter flights shall be prorated equally among all charter passengers and no charter passenger shall be allowed free transportation; except that (1) children under twelve years of age may be transported at a charge less than the equally prorated charge; (2) children under two years of age may be transported free of charge.

(b) The charterer shall not make charges to the charter participants which exceed the actual costs incurred in consummating the charter arrangements, nor include as a part of the assessment for the charter flight any charge for purposes of charitable donations. All charges related to the charter flight arrangements collected from the charter participants which exceed the actual costs thereof shall be refunded to the participants in the same ratio as the charges were collected.

(c) Reasonable administrative costs of organizing the charter may be divided among the charter participants. Such costs may include a reasonable charge for compensation to members of the charter organization for actual labor and personal expenses incurred by them. Such charge shall not exceed \$300 (or \$500 where the charter participants number more than 80) per round-trip flight. Neither the organizers of the charter, nor any member of the chartering organization, may receive any gratuities or compensation, direct or indirect, from the carrier, the travel agent, or any organization which provides any service to the chartering organization whether of an air transportation nature or otherwise. Nothing in this section shall prevent any member of the charter group from accepting such advertising and good will items as are customarily extended to individually-ticketed passengers (e.g., a canvas traveling bag or a money exchange computer).

(d) If the total expenditures, including among other items compensation to members of the chartering organization, referred to in § 295.33(c) above, but exclusive of expenses for air transportation or land tours, exceed \$750 per round-trip flight, such expenditures shall be supported by properly authenticated vouchers to be given to the carrier with the "Post Flight Report"³ required pursuant to § 295.34.

§ 295.34 Statements of charges.

(a) Any announcements or statements by the charterer to prospective charter participants of the anticipated individual charge for the charter shall clearly identify the portion of the charges to be separately paid for the air transportation, for the land tour, and for the administrative expenses of the charterer.

(b) Within 15 days after completion of each one-way or round-trip flight the charterer shall complete and supply to each charter par-

ticipant and the air carrier involved a detailed report showing the charge per passenger transported and the charterer's total receipts and expenditures. This report shall be submitted in the form of, and contain such information including the above as more fully specified by, the "Transatlantic Charter—Post Flight Report" annexed hereto and made a part of this part.

§ 295.35 Passenger manifests.

(a) Prior to each one-way or round-trip flight a manifest shall be filed by the charterer with the air carrier showing the names and addresses of the persons to be transported and specifying the relationship of each such person to the charterer (by designating opposite his name one of the three relationship categories hereinafter described). The manifest may include "stand-by" participants (by name, address and relationship to charterer).

(b) The relationship of a prospective passenger shall be classified under one of the following categories and specified on the passenger manifest as follows:

(1) A bona fide member of the chartering organization at the time the organization first gave notice to its members of firm charter plans and will have been a bona fide member of the chartering organization for at least six months prior to the starting flight date. Specify on the passenger manifest as "(1) member."

(2) The spouse, dependent child or parent of a bona fide member who lives in such member's household. Specify on the passenger manifest as "(2) spouse" or "(2) dependent child" or "(2) parent." Also give name and address of member relative where such member is not a prospective passenger.

(3) Bona fide members of entities consisting only of persons from a study group, or a college campus, or employed by a single Government agency, industrial plant, or mercantile company, or persons whose proposed participating in the charter flight was permitted by Board pursuant to request for waiver. Specify on the passenger manifest as "(3) special" or "(3) member" (where participants are from a study or campus group or from a Government agency, industrial plant or mercantile company).

(c) In the case of a round-trip flight, the above information must be shown for each leg of the flight and any variations between the eastbound and westbound trips must be explained on the manifest.

(d) Attached to such manifest must be a certification, signed by a duly authorized representative of the charterer, reading:

The attached list of persons includes every individual who may participate in the charter flight. Every person as identified on the attached list (1) was a bona fide member of the chartering organization at the time the chartering organization first gave notice to its members of firm charter plans, and will have been a member for at least six months prior to the starting flight date, or (2) is a bona fide member of an entity consisting of (i) students and educational staff of a single school, or (ii) employees of a single Government agency, industrial plant, or mercantile establishment, or (3) is a person whose participation has been specifically permitted by the Civil Aeronautics Board, or (4) is the spouse, dependent child, or parent of a person described hereinbefore and lives in such person's household, or (5) is a bona fide participant in a charter composed of participants in a formal academic study course abroad.

(Signature)

§ 295.36 Statement of supporting information.

Charterers shall execute and furnish to air carriers section B of Part II of the Statement of Supporting Information, at such time prior to flight as required by the carrier to afford it due time for review thereof.

Subpart B—Provisions Relating to Single Entity Charters**§ 295.40 Tariff to be on file.**

The direct air carrier shall have a currently effective tariff on file with the Board prior to flight which discloses all the rates, fares and charges for the use of the entire capacity of one or more aircraft in air transportation and all its rules, regulations, practices and services in connection with the transatlantic single entity charter transportation which it offers to perform.

§ 295.41 Terms of service.

The total charter price and other terms of service shall conform to those set forth in the applicable tariff filed in accordance herewith and the contract shall be for the entire capacity of one or more aircraft.

§ 295.42 Commissions paid to travel agents.

No direct air carrier shall pay a travel agent any commission in excess of five percent of the total charter price or more than the commission related to charter flights paid to an agent by a carrier certificated to fly the same route whichever is greater.

Subpart C—Provisions Relating to Mixed Charters**§ 295.50 Applicable rules.**

The rules set forth in Subpart A of this part shall apply in the case of mixed charters.

Subpart D—Procedure for Advisory Opinion on the Eligibility of a Charterer**§ 295.60 Advisory opinion.**

An air carrier or prospective charterer may request an advisory opinion from the Bureau of Economic Regulation, Civil Aeronautics Board, Washington 25, D.C., regarding the eligibility of the prospective charterer to obtain charter service in accordance with this regulation. The Bureau's opinion will be based on the representations submitted and shall not be binding upon the Board in any proceeding in which the lawfulness of the respective charter may be in issue. Such representations should include as much of the information specified by section B, Part II, of the Statement of Supporting Information annexed to this part as is available to the person requesting the advisory opinion.

NOTE: The reporting requirements contained herein have been approved by the Bureau of the Budget in accordance with the Federal Reports Act of 1942.

By the Civil Aeronautics Board.

JAMES L. DEEGAN,
Acting Secretary

Gurney, Member, dissenting:

I cannot agree that the present charter regulations requiring the supplemental and cargo carriers to secure individual exemptions from the Board for operating charters in foreign air transportation are in need of amendment. For the most part, this charter policy has met the requirements of group travel and has tended to insure compliance with the Board's requirements. The blanket exemption authority given by this revision of Part 295 of the Economic Regulations will complicate, instead of ease, the Board's problems in this field by requiring more surveillance of the operations of the carriers and the charterers without providing a prompt and adequate remedy for any irregularities which may be found. Tighter controls over this market are required rather than a relaxation of requirements as here provided. Nor am I convinced that this amendment is necessary for administrative convenience. In the long run, little, if any, manpower in the Board will be saved.

Since the Board is determined to adopt this amendment, a vital safeguard should have been provided to insure that minimum rate practices are followed. The experiences in the bidding practices relative to the "Classification and Exemption of Air Carriers While Conducting Certain Operations for the Military Establishment" (Part 294 of the Economic Regulations) should be sufficient warning to the Board to establish minimum rates here. In adopting a new policy toward the international charter market, the Board should assist those carriers in establishing a profitable business and thereby assure an efficient operation to that segment of the public which will be served. Instead of waiting for a rate war to develop, the Board could effectively lessen the danger of competitive practices which could reduce the rate to an uneconomical level for all participating carriers. Action by the Board on each tariff filing under this regulation will impose unwarranted workload problems on the Board.

Futhermore, the exemptions contemplated by this revision fail to meet the legal requirements of Sections 416(b) and 801 of the Act and tend to prejudice the Board's determination of need for such service in the *Transatlantic Charter Investigation*, Docket 11908.

It is difficult to understand how the Board will be able to make the necessary findings required by Section 416(b) of the Act that a 180-day exemption, renewable annually, would relieve an undue burden by reason of the limited extent of or unusual circumstances affecting the operations of such air carriers. It is more reasonable to conclude that exemption authority for each individual flight as is the current practice more clearly meets the standards of Section 416(b) than a blanket authority for an unlimited number of flights over a prolonged period.

Since this exemption policy applies to foreign air transportation over which the President has exclusive authority, it is incumbent upon the Board to submit this policy pronouncement to the Executive in accordance with the provisions of Section 801 of the Act. The issuance of blanket exemption authority to the many supplemental and cargo carriers who may make application therefor is an action in which the President may have an interest and upon which he should have an opportunity to comment.

The Board's action here also tends to prejudice the determination of the need for transatlantic charter carriers in Docket 11908 by granting substantially similar authority by Exemption to those carriers filing applications for certificates in the *Transatlantic Charter Investigation*. Without a showing of an emergency requiring expeditious action, the present practice of granting individual exemptions should not be amended. The Board's freedom of action in the certificate proceeding is being seriously impaired.

/s/ CHAN GURNEY

STATEMENT OF SUPPORTING INFORMATION *

PART I—To be completed by air carrier for each single entity, mixed, or pro rata charter. (Where more than one round-trip flight is to be performed under the charter contract, clearly indicate applicability of answers.)

1. Name of transporting carrier:-----
2. Commencement date(s) of proposed flight(s): (a) Going-----
(b) Returning-----
3. Points to be included in proposed flight(s): (a) From-----to-----
(b) Returning from-----to----- (c) Other stops required by charterer:-----
(d) Technical stops required by carrier:-----
(e) Planned routing:-----
4. (a) Type of aircraft to be used:----- (b) Seating capacity:-----
(c) Number of persons to be transported:-----
5. (a) Total charter price:----- (b) If pro rata or mixed charter, does charter price conform to tariff on file with the Board?----- (c) If pro rata or mixed charter, explain construction of charter price in relation to tariff on file with the Board (in case of mileage tariff, show mileage for each segment involved and indicate whether segment is live or ferry.)-----
6. (a) Has the carrier paid, or does it contemplate the payment of any commissions direct or indirect, in connection with the proposed flight? Yes ☐ No ☐ (b) If "yes," give names and addresses of such recipients and indicate the amount paid or payable to each recipient. If any commission to a travel agent exceeds 5 percent of the total charter price, attach a statement justifying the higher amount under this regulation.-----
7. (a) Will the carrier or any affiliate provide any services or perform any functions in addition to the actual air transportation? Yes ☐ No ☐ (b) If "yes," describe services or functions:-----
8. Name and address of charterer:-----
9. If charter is single entity, indicate purpose of flight:-----
10. On what date was the charter contract executed?-----
11. If the charter is pro rata, has a copy of Part 295 of the Civil Aeronautics Board's Economic Regulations been mailed to or delivered to the prospective charterer? Yes ☐ No ☐

PART II—To be completed for pro rata or mixed charters only:

Section A—To be supplied by travel agent, or, where none, by the air carrier or an affiliate under its control where either of the latter performs or provides any travel agency function or service (excluding air transportation sales but including land tour arrangements):

1. (a) Is the travel agent a member of the chartering organization? Yes ☐ No ☐
(b) Is any officer, director, employee or family member of the travel agent a member of the chartering organization? Yes ☐ No ☐ If answer is "yes," give name(s) of such person(s) and designate whether such person(s) be an officer, director, employee, and/or family member:-----
2. Has agent furnished solicitation materials to charterer? Yes ☐ No ☐ If answer is "yes," supply copy of each type of material herewith.
3. What specific services have been or will be provided by agent to charterer on a group basis?-----
4. What specific services have been or will be provided by agent to individual participants in the proposer charter?-----

* This must be retained by the air carrier for two years pursuant to the requirements of Part 249, but open to board inspection, and to be filed with the board on demand.

5. (a) Did or will the agent collect deposits from individual participants in the charter? Yes ☐ No ☐ If answer is "yes," explain:-----
 (b) Did or will the agent collect deposits from the person(s) organizing the charter? Yes ☐ No ☐ If the answer is "yes," are the deposits in the form of a check, draft or money order *drawn on the account of the chartering organization*? Yes ☐ No ☐ If not so drawn, explain:-----
6. Has the agent incurred any obligations on behalf of the chartering organization relating to the expenses of solicitation or organization of the individual participants in the chartering group whether or not it is the intention of the chartering organization to assume ultimately the obligations incurred? Yes ☐ No ☐
7. Has the agent or, to his knowledge, have any of his principals, officers, directors, associates or employees compensated any member of the chartering organization in relation either to the proposed charter flight or any land tour? Yes ☐ No ☐
8. Does the agent have any financial interest in any organization rendering services to the chartering organization? Yes ☐ No ☐ If answer is "yes," explain:-----

 of such person.)

(SEAL)

Warranty

I, -----, represent and warrant that I have acted with regard to
 (Name)
 this charter operation (except to the extent fully and specifically explained in Part II,
 Section A) and will act with regard to such operation in a manner consistent with
 Part 295 of the Board's Economic Regulations.

 Signature and address of travel agent or, if none, of
 authorized official of air carrier (as to questions
 2-8) where such carrier or an affiliate under its
 control performs any travel agency function or
 service (excluding air transportation sales but in-
 cluding land tour arrangements).

Section B—To be supplied by charterer:

1. Description of chartering organization, including its objectives and purposes:-----
2. What activities are sponsored by the chartering organization?-----
3. When was the organization founded?-----
4. Size of membership: ² Present----- Last year----- Year before last-----
5. Qualification or requirements for membership in organization and membership fee, if any:-----
6. Has there been any reference to prospective charter flights in soliciting new members for the chartering organization? Yes ☐ No ☐

¹ Whoever, having taken an oath before a competent . . . person . . . that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed, is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall, except as otherwise expressly provided by law, be fined not more than \$2,000 or imprisoned not more than five years, or both. Title 18, U.S.C. §1621.

² This figure should represent the number of persons eligible to participate in the charter by reason of their employment, membership, enrollment, etc. For example, if the charter is being sponsored by an employee recreation association but is open to all employees (whether or not affiliated with the association) the membership figures should represent the total of all the employees, not merely the membership of the association.

7. Give geographic distribution of membership. (If confined to one city, it will be sufficient to so indicate, otherwise describe local or larger area.)³-----
8. If total membership in the chartering organization is less than 1,000, submit list showing names and addresses of members in good standing.⁴ If total membership in the chartering organization is 1,000 or more, state where a list of members is available for inspection. (Groups of 1,000 or more may be required to submit membership lists upon specific requests.)-----
9. Attach list of prospective passengers, showing for each: Name, address, and whether a member of chartering organization or relationship to a member of chartering group. (Note: This is a list of *prospective* passengers and does not necessarily have to represent the passengers actually carried.)-----
10. Purpose of trip:-----
11. What are requirements for participation in charter?-----
12. How were prospective participants for charter solicited (attach any solicitation material)?-----
13. Will there be any participants in the charter flight *other than* (1) members of the chartering organization or (2) spouse, dependent children, and parents of a member of the chartering group, *residing in the same household with the member*? Yes ☐ No ☐
14. Will there be any members of the chartering organization participating in the charter who will have been members of the organization for a period of less than six months prior to flight date?⁴ Yes ☐ No ☐ If answer is "yes," give names of participants who will not have been members for six months and justify (see §295.2(j)) :-----
15. If there is any intermediary involved in the charter, other than the travel agent whose participation is described in Section II (A), submit name, address, remuneration and scope of activity:-----
16. Estimated receipts:-----
- | | | | | |
|-------------------|---|---------------------|------|-----------------------------------|
| (pro rata charge) | x | (No. of passengers) | = \$ | (Estimated receipts from charter) |
|-------------------|---|---------------------|------|-----------------------------------|
- Estimated receipts from other sources, if any: Explain:-----
- (a) Total receipts \$-----
- Estimated expenditures, including aircraft charter (separately itemize air transportation, land tour, and administrative expenses):
- | Item | Amount | Payable to |
|---|--------|------------|
| (b) Total expenditures \$----- Explain any difference between (a) and (b):----- | | |
17. Are any of the expenses included in item 16, above, to be paid to any members of the chartering organization? Yes ☐ No ☐ If "yes," state how much, to whom and for what services:-----
18. Is any member of the chartering organization to receive any compensation or benefit directly or indirectly from the air carrier, the travel agent, or any organization providing services in relation to the air or land portion of the trip?-----
If "yes," explain fully:-----
19. Will any person in the group (except children under two years) be transported without charge? Yes ☐ No ☐
20. Will charter costs be divided equally among charter participants, except to the extent that a lesser charge is made for children under twelve years old?
Yes ☐ No ☐
21. Separately state for the outbound and inbound flights the number of one-way passengers anticipated to be transported in each direction:-----
22. If more than one round trip is contracted for, will each planeload group move as a unit in both directions? Yes ☐ No ☐-----
- ³ If eligibility to participate in the charter is dependent upon employment by a particular entity, the answer to this question should reflect the geographic location of the plants or offices in which those persons are employed.
- ⁴ Not applicable to college campus or study-group charters, nor to charters limited to employees of a single Government agency, industrial plant or mercantile company.

23. If transatlantic charters have been performed for organization during past 5 years, give dates and name of carrier performing charters:-----
24. Has a copy of Part 295, "Transatlantic Charter Trips," of the Economic Regulations of the Civil Aeronautics Board been received by the charterer? Yes ☐ No ☐

WARRANTY OF AIR CARRIER

To the best of my knowledge and belief all the information presented in this statement, including but not limited to, those parts verified by the charterer and the travel agent, is true and correct. I represent and warrant that the carrier has acted with regard to this charter operation (except to the extent fully and specifically explained in this statement or any attachment thereto) and will act with regard to such operation in a manner consistent with Part 295 of the Board's Economic Regulations.⁵

(Signature and title of authorized official of air carrier.)

⁵ Any air carrier, or any officer, agent, employee, or representative thereof, who shall, knowingly and wilfully, fail or refuse to keep or preserve accounts, records and memoranda in the form and manner prescribed by the Board, or shall, knowingly and wilfully, falsify, mutilate, or alter any such report, account, record or memorandum, shall be guilty of a misdemeanor and, upon conviction thereof, be subject for each offense to a fine of not less than \$100 and not more than \$5,000. Title 49 U.S.C. §1472.

TRANSATLANTIC CHARTER POST FLIGHT REPORT**Instructions:**

The charterer shall complete and file a report in this form with the air carrier within 15 days of each one-way or round-trip charter flight. A report in this form shall also be furnished each charter participant by the charterer within 15 days after completion of each one-way or round-trip charter flight.

1. Name of carrier:-----
2. Name of chartering organization:-----
3. Analysis of charterer's receipts.

¹ If charter cost was not divided equally among all participants actually transported, indicate clearly the individual amounts collected and the number of passengers paying each such amount.

² As a separate item there should be listed here a total of all the amounts refunded to the charter participants; also list separately air transportation, land tour, and administrative expenses (showing compensation for labor and personal expenses paid to any member of chartering organization).

³ Disclose any relationship to chartering organization.

⁴ If this item does not agree with item 3(d), submit an explanatory statement as to the reasons therefor. If the total expenditures (including among other items compensation to members of the chartering organization but exclusive of expenses for air transportation or land tours) exceed \$750 per round trip, such expenditures shall be fully supported by vouchers submitted to and retained by the direct air carrier operating the charter. Such vouchers must cover all expenditures made on behalf of the chartering group including any expenditures for banquets, gifts, local transit, etc.

⁵ Whoever, having taken an oath before a competent . . . person . . . that he will testify, declare, depose, or certify truly, or that any written testimony, declaration, deposition, or certificate by him subscribed, is true, willfully and contrary to such oath states or subscribes any material matter which he does not believe to be true, is guilty of perjury, and shall, except as otherwise expressly provided by law, be fined not more than \$2,000 or imprisoned not more than five years, or both. Title 18, U.S.C. §1621.

ECONOMIC REGULATIONS AMENDMENT NO. 1 TO PART 295

PART 295—TRANSATLANTIC CHARTER TRIPS

Present Part 295, promulgated on April 28, 1961, sets out the general requirements governing applications for and operations under individual exemption orders authorizing the performance of transatlantic passenger charter flights by United States air carriers other than carriers certificated to provide unlimited passenger service over designated routes pursuant to Section 416(b) of the Act.

Since that time, the authority of the carriers formerly operating transatlantic passenger charters under exemption authority granted pursuant to Section 416(b) has been altered by the enactment of P.L. 87-528. In that legislation, the all-cargo carriers were given authority to perform passenger charters by an amendment which is now Section 401(e)(6) of the Act.¹ The general authority of the supplemental carriers to operate charters is derived from interim operating authority issued by the Board Under Section 7 of P.L. 87-528.

The Board has before it, in the *Transatlantic Charter Investigation*, Docket 11908, the issue of the certification of carriers to conduct transatlantic passenger charters and the conditions thereof. Pending decision in that case, however, it is necessary to amend Part 295 to reflect the present bases of charter authority of the carriers heretofore operating in the transatlantic passenger charter market in order that such operations may be conducted in the forthcoming season in the same manner as in the past. Thus, as to all-cargo carriers, authority formerly sought through the exemption process must now be obtained by application for a special order (Part 207, Amendment 2, issued simultaneously herewith).

With respect to the supplemental carriers, in granting interim operating certificates under Section 7 of P.L. 87-528, pending determination of applications for permanent supplemental authority under Section 401(d)(3) of the Act, the Board did not grant such carriers any interim operating authority to carry passengers in foreign air transportation (except as to planeload transportation for the Defense Department), no such authority having been held by the supplementals prior to the enactment of P.L. 87-528. Thus, participation by such supplemental air carriers in the transatlantic passenger charter market for the forthcoming season will require an amendment to the interim operating certificates of such carriers.

Accordingly, in order to set forth the existing regulatory bases for the grant of transatlantic charter authority for the forthcoming season, the Board will amend Part 295 by substituting the terms "special order" and/or "amendment to interim operating certificates" for the term "exemption" and by deleting references to the statutory standards of Section 416(b) in §295.1 which, in view of the carriers' new statutory authority, is no longer appropriate. Similar amendments necessitated by the substitution of special orders and amendments to interim operating certificates for the exemption procedure will be made in §§295.5 and 295.13. §295.5 has also been further amended by reducing the time for filing applications under subparagraph (b) thereof from

¹ The Board, in EDR-48, noted that with the enactment of P.L. 87-528, Part 207 of the Economic Regulations, applicable to Charter Trips and Special Services, automatically became applicable to passenger charters performed by all-cargo carriers.

60 to 45 days prior to the proposed first flight under such authority.

Since these amendments impose no additional burden upon any person and merely preserve the status quo pending final decision in the *Transatlantic Charter Investigation*, and in view of the imminence of the transatlantic charter season, the Board finds that notice and public procedure thereon are not required, and the amendments may be made effective on less than 30 days' notice. However, comments (10 copies) of interested persons on these amendments, submitted to the Docket Section, Civil Aeronautics Board, Washington 25, D.C., on or before April 15, 1963 will be considered by the Board and the regulation may be further amended in light of such comments.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends Part 295 of the Economic Regulations, as amended (14 CFR Part 295), effective March 26, 1963, by

1. Amending §295.1 to read:

“§295.1 *Applicability*. This part establishes the requirements governing applications for, and operations under, special orders to carriers holding certificates of public convenience and necessity for the carriage of property only and property and mail only pursuant to Part 207 of the Economic Regulations and amendments to interim operating certificates of supplemental carriers operating under Section 7 of Public Law 87-528, authorizing for periods up to 180 days but terminating not later than September 30 of any year, the performance of pro rata, mixed and/or single entity charter flights for transatlantic passengers. Such application shall be filed and submitted in compliance with the applicable provisions of this part. Operations under any such special order or amendment to interim operating certificate authorizing the performance of transatlantic passenger charter flights shall be conducted in conformity with the pertinent requirements of this part unless otherwise specifically authorized by the Board. The provisions of this regulation shall not be construed as limiting any other authority to engage in air transportation issued by the Board.”

2. Amending the introductory paragraph of §295.5 as follows:

“§295.5 *Application for exemption authority*. Proceedings on applications for special orders pursuant to Part 207 of the Economic Regulations and amendments to interim operating certificates under Section 7 of Public Law 87-528 to conduct transatlantic passenger charter flights (pro rata, mixed and/or single entity charters) shall be governed, to the extent applicable, by §§302.400 to 302.409 of Subpart D of Part 302 of the Board's Procedural Regulations, entitled 'Rules Applicable to Exemption Proceedings', subject, however, to the following additional or different provisions:”

3. Amending paragraph (b) of §295.5 as follows:

“(b) Applications for special orders or amendments to interim operating certificates shall be filed with the Board at least 45 days prior to the proposed first flight under such authority.”

4. Amending §295.13 as follows:

"§295.13. *Tariffs to be on file.* At the time an application for a special order or amendment to an interim operating certificate is submitted, the carrier shall have on file with the Board a tariff showing all its rates, fares, and charges for the use of the entire capacity of one or more aircraft in air transportation and all its rules, regulations, practices and services in connection with the transatlantic pro rata charter transportation which it offers to perform. Tariffs filed pursuant hereto shall expressly recite that the transportation may not be furnished unless the Civil Aeronautics Board pursuant to §207.13 of Part 207 of the Economic Regulations issues such special order or amendment to an interim operating certificate issued pursuant to Section 7 of Public Law 87-528."

(Sec. 204(a), 72 Stat. 743; 49 U.S.C. 1324. Interpret or apply secs. 407(a), 401(e)(6), and sec. 7, P.L. 87-528, 72 Stat. 766, 76 Stat. 144, 147; 49 U.S.C. 1377, 1371.)

By the Civil Aeronautics Board:

HAROLD R. SANDERSON
Secretary

ECONOMIC REGULATIONS AMENDMENT NO. 2 TO PART 295

PART 295—TRANSATLANTIC CHARTER TRIPS

Elimination of Certain Limitations on Eligibility for Charters of Colleges, Universities, Businesses and Government Agencies

Part 295 of the Economic Regulations relates to transatlantic charter operations of United States supplemental and certificated cargo carriers. §295.30 provides that charter groups may not be formed or members solicited from the general public and that in this regard an organization or other entity with more than 20,000 members is considered the general public. An exception to this consideration is made in cases of colleges or universities *located in one local area*. This section is made applicable to off-route charter operations of foreign air carriers by a specific provision in § 399.35 (14 CFR Part 399).¹

In Order E-19309, February 18, 1963, the Board tentatively approved an IATA charter agreement which exempts business firms, government organizations and colleges and universities without area restriction from the 20,000-member limitation. In the same order, as further evidence that it no longer considered universal application of such a limitation to be in the public interest, the Board states its intention to revise Part 295 so as to exempt business firms and government organizations from the limitation and to eliminate the "local area" limitation applied to colleges and universities. It noted specifically that the revision would affect the off-route charter operations of foreign air carriers as well as United States supplemental and certificated cargo carriers.

¹ Section 399.95 was adopted in Regulation Policy Statement No. 11. It prescribes standards used in processing applications for Statements of Authority by foreign air carriers to conduct off-route charter trips pursuant to Part 212 of the Economic Regulations. Section 399.35 incorporates by reference many provisions of Part 295.

This order was published in the Federal Register (28 F.R. 1746, February 22, 1963) and provided 15 days for any interested person to submit written comments on the Board's proposal. Comments received were discussed by the Board in Order E-19426, March 28, 1963, which finally approved the IATA Agreement and stated the intention to amend Part 295 in the manner previously stated. Therefore, further general notice of proposed rule making is not necessary in this case. Additionally, the period in which summer charter season plans must be concluded is at hand and the delay inherent in the publication of further notice might operate to the detriment of public and carriers alike, and hence would be contrary to the public interest.

In consideration of the foregoing, the Civil Aeronautics Board hereby amends §295.30 of Part 295 of its Economic Regulations (14 CFR Part 295), effective immediately, to read as follows:

§295.30 *Solicitation of charter participants.* As the following terms are defined in §295.2, members of the charter group may be solicited only from among the bona fide members of an organization, club or other entity, and their immediate families, and may not be brought together by means of a solicitation of the general public. Charter participants solicited without limit from organizations, clubs or other entities with a total membership of more than 20,000 (except business entities, government departments or agencies, colleges and universities) shall be considered as solicited from the general public.

(Section 204(a), 72 Stat. 743; 49 U.S.C. 1324. Interpret or apply Section 401(e) (6), 76 Stat. 144; 49 U.S.C. 1371, and sec. 7, P.L. 87-528, 76 Stat. 147.)

By the Civil Aeronautics Board:

HAROLD R. SANDERSON
Secretary

Exhibit B

WORLD TRAVEL CENTER
555 Ramona Street, Palo Alto California

and

JERRY DAVIS, PRINCIPAL

World Travel Center first came to the attention of our office in January of 1960. We wrote to the firm requesting information but received no response. A followup request was sent on February 10, but still no information.

On August 5, 1960, we wrote a personal letter to Mr. Glassman, owner of World Travel Center, calling the above facts to his attention and requesting his cooperation in furnishing us with information from which we could prepare a report for our use in answering inquiries.

Under the date of August 8, 1960, we received information prepared by and submitted over the signature of Jerry Davis indicating that World Travel Center was the sole proprietorship of Ben Glassman.

Davis indicated that the business was formed October 6, 1959, that it had five employees with an anticipated gross of \$500,000. Davis referred to the firm's affiliation with Air Traffic Conference of America, and as trade references listed the names of Hawaiian Airlines, c/o Ed. Sullivan, 291 Geary Street, San Francisco, and Trans-Continental Airlines Agency, c/o Ed. Kristeef, Oakland International Airport.

During the time this agency has been in operation, we have had a number of complaints from clients indicating dissatisfaction in their dealings with the firm. Most of the complaints involve the inability to get refunds for services paid for but which were not available on trips booked through World Travel Center.

The major activity of this firm at the present time appear to be that of student "charter" trips to Europe. Through advertisements placed in various campus newspapers these trips, referred to as "Europe '63," are advertised at \$399, which covers the air transportation only.

From information furnished this office by interested parties, it appears that several "charter" flights are planned for Stanford University, San Jose State College, University of San Francisco, Cal Poly, Oregon State, and possibly other colleges or universities.

Many of the persons making inquiry to our office on the reputability of World Travel Center and their "Europe '63" program indicated that they had been told that they need not have an affiliation with the specific group in order to participate in that group's charter.

Our investigation indicated that this affiliation is a basic requirement under Civil Aeronautics Board Regulations. After having been given this information several persons again contacted World Travel Center and questioned the legality of their participation in these flights and were assured by Davis or others in his office that they (World Travel Center) were "mixing" flights and that even though an investigation might be undertaken by the authorities, such investigation would probably not be undertaken until November and by that time the return flights would have been made so that the clients had nothing to worry about.

The airline through which World Travel Center is chartering the planes is Aerovias Sud Americana (ASA), a certificated cargo carrier, with home offices in Miami, Florida. This line's passenger service, which we are told is confined strictly to charter trips, is conducted out of their office at 5912 Avion Drive, Los Angeles, telephone 776-0734. The manager at this office is Mr. George Patterson.

On May 9, 1963, we contacted Mr. Bob Bauer, of the Los Angeles BBB and asked him to check with Patterson to determine how much money had been forwarded to ASA by Davis for flights being sold. Bauer determined that these funds were being deposited in the Bank of America Branch at the LA International Airport and on May 9, there was an amount in the account of something over \$70,000. Patterson told Bauer that ASA charged \$38,000 per flight for the use of their equipment.

We were able to determine that on or about this same date, Davis had on deposit in the "Europe '63" account in the Sumitomo Bank of San Jose, approximately \$4,000. In the same bank there were two other accounts, one under the name of N. C. Davis in which there was some \$32,000 and the other under the name of G. J. Davis, which contained some \$57,000. While the "Europe '63" account required two signatures, only one signature was required on the other two accounts.

Under date of May 13, 1963, we wrote to Mr. John G. Adams, Director, Bureau of Enforcement, Civil Aeronautics Board, Washington, D.C., calling the attention of that office to what appeared to be irregularities in the operation of these so-called "charter" flights being promoted by World Travel Center.

On May 20, we received a response to this letter from Mr. Robert Burstein, Acting Director, Bureau of Enforcement, in which it was indicated that that office had had "other complaints" on this matter and that an investigation was being conducted.

Because of the steadily increasing volume of inquiries being made to our office by persons who were interested in these flights, and because of what appeared to be violations of CAB regulations governing charter flights we were interested in determining whether the CAB investigation might result in the cancellation of the flights in question. This office called Mr. Burstein on Friday, May 24, 1963, and spoke with both Mr. Burstein and Mr. Joseph Stout, Chief Investigator, for the Bureau of Enforcement. These men were reached through AC 202, 382-7695, Washington, D.C.

Both of these gentlemen showed a great interest in this matter and indicated that another of their investigators had been contacted and moved from an assignment in Los Angeles to this area to proceed with an investigation of World Travel Center activities. We were informed that this man would be here no later than Wednesday, May 29.

Under date of Monday, May 27, The Stanford *Daily* featured a story on the front page entitled "AUTHORITIES MAY CANCEL STANFORD CHARTER FLIGHT." Representatives of the Stanford *Daily* told this office that the story had been written because of the many students and/or faculty members who were scheduled for departure on one or the other of the charter flights in question.

Since the appearance of this story, our office has had many calls from the public, from other travel agencies, and from representatives of air lines complimenting our office on our activities in bringing this matter before the appropriate authorities, and pledging their help.

We will keep all interested parties advised of future developments.

Better Business Bureau
of Santa Clara Valley

Report prepared by:
WES STROUSE, *Manager*

Exhibit C

UNITED STATES OF AMERICA CIVIL AERONAUTICS BOARD
Washington, D. C.

*Adopted by the Civil Aeronautics Board
at its office in Washington, D.C.
on the 29th day of May, 1963*

Application of

AEROVIAS SUD AMERICANA, INC.

for a special order pursuant to
section 207.13 of the Economic
Regulations.

Docket 14514

ORDER DISMISSING APPLICATION

On March 26, 1963, the Board issued Amendment 2 (Regulation ER-375) to Part 207 of its Economic Regulations, which provides, *inter alia*, that a certificated cargo carrier may engage in transatlantic civil passenger charters for the period April 1–September 30, 1963 without regard to the restrictions of sections 207.5, 207.7, 207.8, and 207.10 if it obtains from the Board a special order authorizing the performance of such charters. The amendment also provides that applications for such orders, and charters performed pursuant thereto, shall be in conformance with Part 295 of the Economic Regulations. A certificated cargo carrier may perform a transatlantic passenger charter pursuant to section 401(e) of the Federal Aviation Act, as amended by section 3 of Public Law 87-528, without obtaining the above-mentioned special order, but such charters would be subject to the above-cited sections of Part 207 which impose restrictions on regularity and volume and a first refusal procedure in favor of the certificated route carriers.

On May 22, 1963 Aerovias Sud Americana, Inc. (ASA) filed with the Board an application for such a special order authorizing it to perform unlimited pro rata, mixed, and single entity transatlantic passenger charters between June 8 and September 30, 1963. ASA simultaneously filed a motion requesting leave to file this application less than 45 days prior to the first proposed flight, alleging that its failure to file in the time provided by section 295.5(b) of the Economic Regulations “was inadvertent and attributable to a misunderstanding between the carrier and its counsel”; and that no interested party would be prejudiced by the granting of the motion.

In support of its application for a special order, ASA alleges among other things, that it has entered into contracts for not less than 20 round-trip transatlantic passenger charters, the first of which is scheduled to depart on June 8, 1963; that it has the necessary aircraft, capital, trust account arrangements, screening provisions for eligibility, and arrangements for representation abroad; that it has an appropriate tariff on file with the board; that it has had prior experience in the performance of charters; and that its future depends in part upon successful commercial operations.

The Board, upon consideration of this application and motion,¹ and all pertinent circumstances, has decided to dismiss the application. Section 295.5(a) provides that: "Applications may be filed only by air carriers which are applicants in good standing for transatlantic charter authority in *Transatlantic Charter Investigation*, Docket 11908, instituted by Board Order E-16023 of November 14, 1960." Although ASA was an applicant in this investigation, its application therein was dismissed by Order E-18319, adopted May 9, 1962. Thus, it is not eligible to apply for the authority in question nor does its application in any way offer an explanation as to why it might be construed as eligible despite its failure to satisfy the requirement contained in section 295.5(a). The application will, therefore, be dismissed.²

ACCORDINGLY, IT IS ORDERED: That the application of ASA in Docket 14514 be and it hereby is dismissed.

By the Civil Aeronautics Board:

HAROLD R. SANDERSON
Secretary

Excerpt from: Report of the Antitrust Subcommittee (Subcommittee No. 5) of the Committee on the Judiciary, House of Representatives, Eighty-fifth Congress, First Session. Pursuant to H. Res. 107 on Airlines April 5, 1957

Chapter V

TRAVEL AGENTS

Congress, in the Civil Aeronautics Act, conferred extensive powers on the Board to regulate all persons engaged in "air transportation." Since the term "air transportation" does not include the sale of air travel tickets, the Board has no authority to regulate directly entry into the travel agency business. Lack of such authority was recognized by the Board in its statement, "Travel Agency Agreements" submitted to the committee at the hearings. There the Board said:

The term "air transportation" does not include the sale of air transportation or ticket agency services, and, accordingly, there is nothing in the Civil Aeronautics Act which prohibits a ticket agent from engaging in such business without first securing prior Board authorization therefor. Any person is free to act as a ticket agent for any airline which cares to use his services without securing Board approval. In this sense, the Board does not have jurisdiction to "license" travel agents.*

¹ While the explanation given for filing the application less than 45 days prior to the first proposed flight might well be construed as an inadequate one, the Board has decided to grant the motion for leave to file. By letter of February 19, 1963, the Board's staff reminded Aerovias of the status of its authority with respect to transatlantic passenger charters in the forthcoming season. By letter of April 4, 1963, the President of Aerovias acknowledged this letter and noted also the recent issuance of the amendment to Part 207 which indicated how such authority could be sought. Thus it is clear that Aerovias was fully aware of the necessity for filing for such authority and had such knowledge well in advance of the required 45-day period.

² Although the matter of ASA's compliance with other requirements of Part 295 is not reached, certain problems in this regard should be noted. ASA has no past experience in the transatlantic civil passenger charter market. Moreover, its financial reports filed with the Board indicate that its ability to meet the test of financial fitness for this particular type of program might be questioned.

* Hearings, vol. 1, p. 318.

Board approval under section 412 of the act of a series of agreements submitted by the certificated industry, however, has resulted in the exercise of controls, with immunity from the antitrust laws, by the air traffic conference, over entry into the business of selling travel agency services for air transportation on the scheduled industry's routes. Thus, by indirection, the Board has authorized a type of regulation it could not undertake to exercise directly itself.

For the past 15 years the majority of the certificated carriers through joint action in the Air Transport Association, have prescribed the conditions which travel agents must meet and under which they must operate in order to qualify for commissions on sales of passenger space on any of the member airlines. These conditions apply whether the travel agents' sales are made in conjunction with a tour, excursion, or any other form of air travel.

Before he is eligible to act as a travel agent for a certificated carrier, a travel agent must be accredited by ATA's air traffic conference.² Once qualified, the agent must thereafter observe an elaborate regulatory code prescribed by the conference, on penalty of his accreditation being canceled. In addition, the air traffic conference has preemptory power to cancel an agent's accreditation by decision made in closed secret session. ATC's procedures provide a travel agent no right of appeal, and there is no requirement that he be advised of the reasons for his cancellation.

The scheduled industry's agency system is founded upon an agreement among the ATC carriers. This agreement defines the conditions for dealing with travel agents and establishes a standard commission rate for their remuneration. Deviations from the ATC agency resolution subject a carrier to a system of enforcement sanctions administered by the Air Transport Association. Penalties for violations of the agency agreement include a possible fine of \$25,000 for each offense, in addition to costs and other measurable damages that might be involved.³

ATA's agency system was approved by the Civil Aeronautics Board under section 412 of the Civil Aeronautics Act in April 1941. It has persisted without substantial alteration to the present time, despite the far-reaching changes that have taken place in both the travel-agency business and in commercial air transportation itself.

Travel agents who sell tickets for flights on international routes are subject to a substantially similar system of controls. All United States-certificated airlines that are engaged in foreign air transportation are parties to the travel-agency agreement promulgated and administered by the International Air Transport Association (IATA). IATA is the trade association of the certificated airlines flying international routes. Insofar as the participation of American carriers is concerned, the Civil Aeronautics Board has extended its approval to IATA's program.

In its statement to the committee, the Board contended " * * * the agency arrangement secures important public benefits and, on an over-

² According to the Air Transport Association, "the affairs of the air traffic conference * * * include, by definition, all matters involving, directly or indirectly, traffic; sales; and advertising problems upon which the members of the conference desire joint and coordinated action" (hearings, vol. 3, p. 1456).

³ Hearings, vol. 3, p. 1766.

all basis, serves the best interests of the ticket agents, the air-carrier, parties to the resolution, and the public.”⁴

THE NATURE OF THE TRAVEL AGENCY INDUSTRY

During the hearings, travel-agent representatives testified there are currently approximately 5,000 travel agencies doing business in the United States and Canada, of which approximately 2,000 are accredited to sell tickets for the certificated carriers.⁵ This comparatively young industry is made up in the main of small firms with a high degree of participation in the detailed operations of the business required of the owner-manager. Although there are some large firms in the industry, the “typical” travel agency has gross bookings of about \$300,000, which yield a gross business income averaging \$20,000 yearly and a net annual income averaging from \$5,000 to \$7,000.⁶

There are two travel-agency trade associations: The American Society of Travel Agents (ASTA) with a membership of about 1,100, and the Travel Agents Guild of America (TAGA), organized in September 1955, with a membership of less than 100.⁷ in terms of bookings, ASTA travel agents account for almost \$500 million in gross volume annually. One-fifth of the gross bookings of “the typical ASTA agent” comes from the sale of domestic air transportation. Conference appointments with the ATC are held by 89 percent of all ASTA agents.⁸

Definitive statistics on the total market for travel are not available. Estimates covering the classes of travel with which travel agents are concerned, however, range from an annual expenditure of \$6 billion to \$8 billion.

Until recent years, the services of travel agencies were confined largely to providing accommodations in the narrow and specialized steamship market. Over the last decade, the travel-agency business has experienced tremendous expansion due to such factors as a favorable rate of population growth, a high level of national income, the long-term trend toward a shorter workweek, mass travel opportunities for the middle-income class group, and technological improvement encompassing the development of highspeed aircraft, as well as the modernization of facilities for other classes of transportation and hotel accommodations.⁹

There is every reason to believe that the travel market will continue its recent substantial rate of growth, and that the role of the travel agency in this process will be substantial.¹⁰ In view of the continuing expansion trends in air transportation, the air-travel market will be increasingly important to the travel-agency industry.

⁹ Cresap, McCormick & Paget, *Survey of the Travel Agency Business*, April 1955. This comprehensive study was conducted by the management-consultant firm of Cresap, McCormick & Paget for the American Society of Travel Agents and was submitted as an exhibit at the hearings (vol. 4, p. 2399) but has not been incorporated in the printed record because of its bulk.

¹⁰ *Ibid.*, p. IV-16.

While there are significant variations in methods of operation, the functions of the "typical" travel agent has been described as follows:¹¹

He spends a substantial part of his time and labor in advertising and promoting travel. This may be done by one or more of the customary means of publicity, such as newspaper, radio, or television; speaking and exhibiting travel pictures, both still and moving, to local groups; distributing handbills; or direct mailing of travel folders.

Once a client is attracted to the agent's office he must be given personal attention and his needs for information and advice satisfied, and, if possible, a trip sold. The nature of this work, of course, varies with the individual client, but a person who does comparatively little traveling might want information upon the following matters:

- 1 The cost by the various modes and classes of transportation.
- 2 Distances and times involved.
- 3 Type of accommodations obtainable.
- 4 Schedules available.
- 5 Method of obtaining passports.
- 6 Comparative merits of surface and air transportation.
- 7 The availability of living accommodations at the point or points of destination.

The travel agent is called upon to plan various aspects of his client's journey (including motor transportation, itineraries, hotel, and other accommodations en route, sightseeing, etc.) and to quote a firm price for the composite trip, including compilation of various fares, rates, tariffs, and applicable taxes. On receipt of an order for specified travel, the travel agent must accomplish the necessary reservations for the accommodations requested. Finally, the ticket must be issued and the fare collected.¹²

Some travel agencies specialize in planning and operating tours, both domestic and foreign, which are marketed through other agents. Such an agent may specialize in a particular geographical area and is regarded as a "wholesaler" of the tours he plans and operates. Other agents, who are referred to as "retailers," provide a considerable amount of booking for the tour. Another speciality is devoted to "those segments of the population having the same national origin and * * * arranging trips for this clientele to the country of origin either on business or to visit friends and relatives."¹³

In addition to the convenience afforded by numerous widely dispersed ticket-booking facilities, travel agents provide the public an opportunity for an objective appraisal of competing airline services. Counsel for ASTA, in a brief filed with the CAB, pointed to a num-

¹¹ CAB *North Atlantic Tourist Commission* case, docket No. 5422, appendix, initial decision of examiner, served May 26, 1952.

¹² Since travel may now extend to virtually any part of the globe, there are a number of miscellaneous functions which the travel agent may perform for his client, as, for example, help in handling applications for passports or furnishing information on such matters as health, customs regulations, and currency-exchange problems in foreign lands.

¹³ *North American Tourist Commission* cases (CAB Docket No. 5422), decided August 14, 1952.

ber of services provided by travel agents that could not be provided by the airlines' ticket offices. He said:

* * * The individual airline offices are not in a position to render such service, since they do not offer bookings on airlines generally and on competing lines in particular—though in many instances such competing lines offer a service more convenient to a particular passenger. * * * the great majority of the ticket offices of the carriers are situated in the center of the larger cities and at the airports and do not offer the convenience and service to the public that is offered by the numerous independent agents, who have their offices scattered not only in various parts of the larger cities, but also in the environs and suburbs, where, by reason of distance from the carrier's office and the expense of telephone-toll charges for calls to carriers' offices, the traveling public would be inconvenienced if forced to do business exclusively at the ticket offices of the carriers. Moreover, the carriers cannot through their ticket offices offer a general travel service to the public * * * ¹⁴

The travel-agency industry makes an important contribution to air transportation and provides important benefits to air carriers. In this regard, the Civil Aeronautics Board said:

The desirability of air carriers maintaining agents as a sales medium cannot be questioned. Through the maintenance of agency relationships, carriers are provided extensive sales outlets to aid in the development of business without maintaining ticket and information offices at numerous points. Increased sales representation is provided, which in many instances otherwise would be costwise prohibitive.¹⁵

The Board's view is fully endorsed by the ATC, in its statement that—

* * * in the case of all of the scheduled airlines, both large and small, considerable reliance must be placed upon the travel agents to promote traffic at off-line points. As a result, the scheduled airlines regard the travel agents as an integral and essential part of their sales promotion and service programs.¹⁶

THE CONFERENCE SYSTEM

There are significant variations in the degree of joint industry action involved in the appointment of agents for the sale of travel and related services.

The great majority of hotels and resorts, foreign railroads, and sightseeing companies have not established any joint industry arrangement for the appointment of agents, but rather will accept business from virtually any firm or individual representing himself as a travel agent.¹⁷

Airlines, steamships, and domestic railroads, by contrast, appoint travel agents pursuant to agreements promulgated by industry com-

¹⁴ Hearings, vol. 2, p. 1334.

¹⁵ *IATA Agency Resolutions Proceedings*, Docket No. 3350. January 26, 1951.

¹⁶ Hearings, vol. 3, p. 1760.

¹⁷ Cresap, McCormick, and Paget, op. cit., p. III-6.

mittees or "conferences." The "conference" system, in its most favorable light, has been defined as "joint action by the carriers to standardize relations with agents and to establish a list of qualified agents from which the individual carriers can pick their representatives."¹⁸ The conference designates specific firms as authorized agencies, and establish the standard conditions applicable to all agency agreements. There are six conferences dealing with travel agency matters in the United States and Canada: The Air Travel Conference of America (domestic air transportation), International Air Transport Association (foreign air transportation), Transatlantic Passenger Conference (steamship), Western Hemisphere Passenger Conference (steamship), Transpacific Passenger Conference (steamship), and the Rail Travel Promotion Agency.

Among the United States carriers notable differences exist in concept as to the utilization of travel agents. The following differences were noted in ASTA's study:

The steamship lines and international airlines consider that agents can serve most markets more effectively and economically than these can be served directly.

Most of the larger domestic airlines feel that competitive and traffic factors require that they establish extensive networks of direct sales offices, and so they place lesser dependence upon the facilities of travel agents.

The railroads have accepted the principle of selling through travel agents only with respect to carefully defined "tours."¹⁹

AIR TRAFFIC CONFERENCE AGENCY PROCEDURES

It was on April 18, 1941, that the CAB first approved an agency resolution submitted by the ATC which, according to the Board, incorporates the "procedure in use today."²⁰

The Air Traffic Conference's master agency resolution establishes the operating conditions for travel agencies permitted to sell transportation for the certificated airlines on a commission basis in the United States and Canada.²¹

ATC's procedures require a travel agency that desires to qualify for commissions on the sale of certificated airline transportation first to be "accredited" by a committee of air carriers.

In its agency resolution, ATC stipulates that "Any person who desires to be named * * * shall make written application to the executive secretary *through a member*."²² This requires an agent to become accredited to first prevail on a certificated airline to act as his sponsor.

¹⁸ Hearings, vol. 3, p. 2286.

¹⁹ Cresap, McCormick, and Paget, op. cit., p. III-6.

²⁰ Hearings, vol. 1, p. 319. With the advent of World War II the payment of commissions to agents was suspended. Thereafter, on September 27, 1945, the Board approved a revised version of the agency resolution (CAB No. 402), which among other provisions reinstated the 5 percent commission rate on the sale of domestic air transportation. With the subsequent incorporation of other amendatory resolutions approved by the Board from time to time, there evolved the ATC agency resolution which is currently in effect.

²¹ Reproduced at hearings, vol. 3, pp. 1774-1786. The agency resolution and its amendments are compiled in a trade practices manual distributed by the ATC to the member carriers and binding upon them.

²² Sec. IV-B, hearings, p. 1776. [Emphasis supplied.]

His application is then presented for review to the "agency committee" which is "empowered to approve or disapprove any * * * application." This committee is composed of representatives of seven ATC members and meets "no more frequently than once each year." The agency committee, in passing upon applications, acts by a two-thirds vote of the members present. If they so desire, other ATC carriers are eligible to participate in meetings of the agency committee.²³

The criteria which guides the agency committee in its consideration of an application are "the willingness, ability, and activity of the agent in promoting and selling air passenger transportation, particularly vacation, pleasure, and tour travel; the number of authorized agency locations in the area involved; and the need of members for agency representation in the area involved."²⁴ The applicant must also have "a satisfactory credit standing and a reputation for ethical practice in the sale of passenger transportation and services related thereto."

There is no right of appeal or review afforded an agent from an adverse decision of the agency committee. Nor can the agent determine the basis upon which his application was rejected.

Accreditation, when given, extends only to specified business locations, designated as the "authorized agency location", which must, in order to meet ATC qualifications, be operated on an independent basis, exclusively or primarily "for the promotion and sale of passenger transportation and general travel services."²⁵

After a travel agent has been accredited, the ATC retains complete control over continuation of his status. The ATC agency committee may "review the eligibility of an agent" on its own initiative at any time and is required to conduct such a review on request of any member carrier. If a review is conducted, two-thirds of the committee must again approve the agent's eligibility at that time or he loses his accredited status.²⁶ At present, there is no right of appeal from an adverse decision of the committee in its review of the agent's status.

After approval of his application and entry of his name on the "agency list," the agent must enter into a standard sales agency agreement with the certificated carriers who compose the Air Traffic Conference. Although there is a procedure by which a carrier can enter into a sales agency agreement without prior approval of the agency committee, the normal procedure requires approval of the agency committee prior to the agent's functioning on behalf of any conference

²³ Agency resolution, secs. IV-C and IV-D, hearings, vol. 3, p. 1776. The applicant also is required to complete a comprehensive questionnaire for the use of the agency committee, hearings, vol. 2, p. 1315.

²⁴ Agency resolution, sec. IV-C, hearings, vol. 3, p. 1776.

²⁵ Hearings, vol. 3, pp. 1775-1776. Only in exceptional cases may the agency committee deviate from the requirement that the "authorized agency location" be a "bank travel department, a transportation bureau, or a travel bureau" as defined in the agency resolution.

²⁶ Agency resolution, sec. IV-G. The pertinent provision of the agency resolution reads: "The committee may, from time to time, on its own initiative, and shall upon the application of any member, review the eligibility of any agent or any authorized agency location. In any such review, the committee shall consider the same factors as would be considered in acting upon an original application, and in addition shall consider the experience of the members with such agent and the agent's record in performing its sales agency agreement with the members. Approval of the eligibility of any agent or any authorized agency location shall require the affirmative vote of two-thirds of the persons present and entitled to vote at a duly constituted meeting of the committee." Id. p. 1777.

carrier.²⁷ The sales agency agreement²⁸ prescribes and delimits the scope of the agent's authority and activities, sales office location, the deadlines by which he must make collections and remittances, sales requirements, maximum remunerations and commissions, and many other basic conditions governing the agent's method of operation and relationships with the ATA carriers.

Upon the execution of this agreement any member carrier is authorized to appoint the approved agency as its agent by the delivery of a standard "Certificate of appointment." Only after he has received his certificate of appointment may the agent proceed to sell transportation for the conference carriers at a commission.²⁹ The travel agency is also required to pay to the ATC an entrance fee of \$50 in addition to an annual fee as fixed by the conference.³⁰

The sales agency agreement implements section VIII of the agency resolution by which the carriers are mutually bound not to pay travel agents in excess of the maximum commissions fixed by the ATC. The standard commission rates established by the contract are a ceiling of 5 percent on the price of domestic air transportation, 7 percent on international travel, and 10 percent on "advertised" or "independent" air tours that include such items as hotel accommodations, sightseeing, and plane transportation in a single all-inclusive price "package."³¹

A significant feature of the sales agency agreement is that it "may be terminated at any time by the carrier." The agreement may be terminated for "any reason * * * deemed sufficient by the carrier," and the carrier is under no "obligation to justify such determination."³²

According to testimony at the hearings, in the event that any one carrier terminates the agency and repossesses its ticket stock and certificate of appointment, it is the general custom that all other ATC airlines also shortly withdraw their appointments.³³

The terms of the agency agreement severely restrict the agent's ability to dispose of his business. An agent's ATC appointment and his rights under the agency agreement are not "assignable, or otherwise transferable,"³⁴ and any changes in ownership or location require

²⁷ Agency resolution, secs. IV-H and VIII-B, hearings, vol. 3, pp. 1777, 1781. There are three possible contingencies in which the executive secretary of the ATC "if requested in writing" by a member carrier may place a person's name on the agency list and enter into a sales agreement with that person without prior approval of the agency committee: (1) where any person "acquires the ownership of the business of any other person whose name appears on the agency list then in effect"; (2) where a member "desires representation in a community in which no other authorized agency location exists" and there is no authorized agency location within 20 miles of that community; and (3) where a member wishes to designate "as an authorized agency location" a place of business which has been included on the appropriate IATA list of agents "continuously during the most recent 12-month period." In each instance this status is contingent upon final action by the agency committee.

²⁸ Reproduced at hearings, vol. 3, pp. 1786-1794.

²⁹ Hearings, vol. 3, p. 1787. Par. 4 of the standard sales agreement provides that the "Carrier may, at its option, provide the agent with supplies of its ticket forms or exchange orders for issuance to the agent's clients to cover transportation purchased."

³⁰ Sales agency agreement, par. 20, hearings, vol. 3, p. 1791 and pp. 1797, 1801.

³¹ Agency resolution, sec. VIII-C; par. 8 and schedule A, sales agency agreements, hearings, vol. 3, pp. 1781-1782, 1788-1789, 1793.

³² The contract also contains a provision for termination at will by the agent (sales agency agreement, par. 24, hearings, vol. 3, p. 1792). This ostensibly reciprocal right is of dubious value, since the agent would rarely voluntarily surrender his valuable accreditation privileges.

³³ Hearings, vol. 4, p. 2364.

³⁴ Par. 22, agency agreement, hearings, vol. 3, p. 1791.

prior approval of the conference authorities. As in the case of any new applicant, a new owner must find a sponsoring carrier. Since a travel agent cannot assure a prospective purchaser that the ATC will maintain the agency's accredited status, "it is difficult to dispose of a travel agency at a fair price."³⁵

THE AGENCY PROCEDURES OF THE INTERNATIONAL AIR TRANSPORT ASSOCIATION

As pointed out by the CAB, the agency procedures of the International Air Transport Association is "now substantially similar in administration and procedure to that of the ATC."³⁶

IATA's standard passenger sales agency agreement,³⁷ which must be signed by all travel agencies approved by IATA's agency committee is analogous in all material respects to the standard sales agency agreement used by the Air Traffic Conference. It is administered by IATA, and governs its relationships with over 8,000 travel agents accredited by that organization.³⁸

POSITION OF THE CAB

At the hearings, the Board took the position that it is "not adverse to the public interest" to approve industry agreements under which the ATC "carriers have the power by collective action" to: (1) Establish "standard commission rates"; (2) "limit the number of travel agents" with the concurrent "elimination of * * * nonproductive agents"; and (3) "limit the number of travel agents in each area to economic levels."³⁹

It is clear that ATC decisions in these matters not only regulate the travel agency industry to a significant degree but may spell the difference between success or failure in the business life of the individual agent. Nevertheless, the Board in its testimony at the hearings found nothing to criticize in the domestic agency procedures. On the contrary, the Board's presentation was such as to lead to the belief that the present agency system involved no serious problems. The CAB advised the committee "that the agency arrangement secures important public benefits and, on an overall basis, serves the best interests of the ticket agents, the air carrier, parties to the resolution, and the public."

The Board further contended:⁴⁰

The services of ticket agents comprise an important part of the efforts of airlines which are striving to provide the traveling public with the best service possible * * * A uniform procedure for the selection and retention of agents makes for stability in the rendition of agency services to the public, and eliminates a potentially destructive competitive practice among the air carriers. The mechanics of the procedure are set up on a basis most practical and feasible to effectuate this objective * * *

³⁵ Cresap, McCormick & Paget, op. cit., p. III-8.

³⁶ Hearings, vol. 1, p. 321.

³⁷ Reproduced at hearings, vol. 4, pp. 2382-2389.

³⁸ Hearings, vol. 2, pp. 1055, 1056, 1079. IATA also utilizes a standard type of agreement for cargo sales agents.

³⁹ Hearings, vol. 1, p. 509.

⁴⁰ Hearings, vol. 1, pp. 321, 509.

* * * Such agreements among these carriers are necessary to deflect their competitive efforts into channels serving the public interest, namely, striving to provide the traveling public with the best quality and dependability of service and equipment possible in relation to the fare charged.

* * * * *

Prior to the approval of these agreements, a large portion of these [travel] agencies were mere order takers, such as hotel porters.

POSITION OF THE CERTIFICATED INDUSTRY

Similarly at the hearings the ATC indicated that the present agency system which it administers was entirely satisfactory. The point of view of the ATC carriers was fully articulated at the hearings by Mr. D. W. Markham, assistant general counsel of ATA, who made the following contentions:⁴¹

(1) "Every airline feels that it has a very legitimate interest in the agents appointed by other carriers" because an agent once appointed "becomes a subagent for all of the other carriers" in that "he can issue interline tickets involving both his immediate principal and the other carriers with whom his principal has interline ticketing agreements." This means that "in the eyes of the general public * * * that agent represents the airlines generally," so that if a particular airline "were to appoint every shoeshine parlor and every drug store and every pool hall in the communities they serve as their agents," and "if the public is victimized by a dishonest or incompetent agent," this would unfairly reflect on all the certificated airlines. Another reason why the "carriers feel that they have an interest in the agents appointed by the other carriers" is that "simply as a matter of philosophy" they "feel that if one of their principal competitors appoints an agent, they must appoint him also * * * for the protection of their own competitive interests."

(2) Each airline is concerned with the agents it appoints because the "airlines are civilly and criminally liable for the actions of their agents." Moreover, the airline "has a very large financial stake in the operations of that agent" in terms of the valuable block of blank tickets placed in his hands and the money collected by the agent which belongs to the airline.

(3) The airlines not only "regard the agent as a supplement to their own sales organizations" but "as specialists in developing pleasure, vacation, and casual-type traffic. Frequently the agents can reach the potential passenger in that field better than an airline sales organization can. And consequently they want agents who have the competence * * * the knowledge, and * * * the financial resources that are required to do the sales and promotional job" the airlines desire. Therefore, the ATC asserts that as a matter of "sound sales policy" its agency procedure is designed to "assure the selection of competent, reputable, and aggressive agents."

⁴¹ Hearings, vol. 3, pp. 1755-1757.

TRAVEL AGENTS' COMPLAINTS AGAINST THE AGENCY PROCEDURES

According to the Board, notwithstanding the fact that the agency resolution initially submitted by the ATC has "been amended a number of times, the basic procedure established by it and now in effect" has been *unchallenged by any formal protest* by the ticket agents or any other interested parties."⁴² This implication, that travel agents have regarded the basic workings of the ATC agency resolution with approval, is misleading and, on the Board's own records, grossly inaccurate. There can be no question but that there has been major dissatisfaction on the part of the travel agencies, including those accredited by the ATC, with nearly all aspects of the certificated industry's agency procedures that have been sanctioned by the Board. The agents have forcefully presented their grievances to the ATC and to the Board by both formal and informal protests.

ASTA'S COMPLAINTS

To begin with, in July 1953, ASTA filed a formal protest against the existing agency system under section 412 of the Civil Aeronautics Act,⁴³ which was served upon the Board and the ATC.⁴⁴ In its protest, counsel for ASTA made the following charges about the inequities of the "basic procedure" incorporated in the ATC system:⁴⁵

It is respectfully submitted that this procedure for the imposition of the will of a monopoly of carriers upon individual agents violates the constitutional rights of the agents and involves an illegal delegation of power to the carriers. It is submitted that it is beyond the power of the Board to approve, and to exempt from the antitrust laws, actions taken by a combination pursuant to such procedures.

No authority is vested in the Board to broadly delegate the resolution of relations between the carriers and their agents to a combination of carriers without supervision or safeguards required by law. The automatic approval of such resolutions subject only to a substantial showing of injury by third parties constitutes an illegal delegation. The Board should be governed in regulating ATC by the provisions applicable to industrial committees under the Defense Production Act, which specify that such meetings must be supervised by Government representatives, must have complete minutes, must only advise and recommend and not attempt to de-

⁴² Hearings, vol. 1, pp. 320-321. [Emphasis supplied.]

⁴³ Hearings, vol. 2, pp. 1329-1338. Secs. 412 and 1002 of the act authorize the filing of such a complaint setting forth the respects in which agreements approved by the Board under sec. 412 are adverse to the public interest or in violation of the act; the Board may modify or rescind approvals previously granted or impose such conditions as are required by the public interest.

The agreement in question, which was proposed by the ATC, would have reduced the agency commission rate on domestic point-to-point travel from a flat 5-percent maximum to a maximum of \$1.50 on one-way tickets and \$3 on round-trip tickets. ASTA contended that under the proposed arrangements, commissions would have approximated no more than 1 percent on long-distance domestic travel, thus imposing a "death sentence" on such agency sales.

⁴⁴ Hearings, vol. 3, p. 2285. Since the bylaws of ASTA require, as a condition of membership, that an agency have a reasonable number of conference appointments, the complainants were not new to the ways of the conference system. In fact, 89 percent of the ASTA membership is accredited by the ATC. Also ASTA is the major, and at that time was the only, trade association in the field, with almost a quarter century of experience. Hearings, vol. 4, p. 2359.

⁴⁵ Hearings, vol. 2, p. 1336.

termine policies of the industry or to coerce or compel compliance with the committee's actions * * *.

In the instant case none of these elementary safeguards of the public interest and the interests of affected parties has been afforded. No overriding public interest is shown to be served by the proposed violation of the antitrust laws.

At the hearings, ASTA's president, Thomas J. Donovan, testified:⁴⁶

We are convinced, however, that the Board has never informed itself about the business problems and conditions of the travel agents, which it views almost entirely from the standpoint of the problems of the carriers which it regulates.

The attitude of the travel agents which I am expressing here is not unknown to the CAB. In 1953, [this was conveyed by] ASTA in connection with its very strong protest to the CAB against a proposed unilateral reduction of our rate of commission from 5 percent to as low as 1 percent * * *.

The gravamen of ASTA's complaint was the unilateral exercise by the ATC of arbitrary power in agency matters, free of any effective check or supervision by the Board and without proper consideration of the travel agency viewpoint. Mr. Donovan, at the hearings, said:

I am saying quite candidly that CAB has a responsibility, which it has so far failed to recognize fully, to take account of the effect on travel agents of the conference resolutions, both ATC and IATA, which it is periodically asked to approve * * *. We wish to call the attention of this committee, as forcefully as possible, to our view that the exercise by the Board of its statutory exemption power on ATC and IATA conference resolutions carries with it a clear obligation to provide procedural safeguards to the travel agents in their dealings with the combination of airlines made possible by Board action. We do not feel the CAB has so far discharged this obligation.⁴⁷

TAGA'S COMPLAINTS

Criticisms directed at the workings of the certificated industry's agency program by the Travel Agents Guild of America were more sweeping than those presented by ASTA. Mr. Richard W. Joyce, TAGA's president, asserted that the Board had in effect granted "licensing" powers to ATC, which cannot be considered an impartial and disinterested party. As a result the travel agent industry has been curtailed and trade restraints have occurred.⁴⁸

There are, according to the estimates of TAGA, at least 2,000 full-fledged travel agents doing business in the United States who are without ATC accreditation, although only a handful of this group has failed to seek appointment by this conference. In this view, "there is no reason" why there should not be "four to five thousand travel

⁴⁶ Hearings, vol. 3, p. 2288.

⁴⁷ Hearings, vol. 3, p. 2297.

⁴⁸ Hearings, vol. 4, p. 2366.

agents appointed doing business and developing and promoting air travel,"⁴⁹ instead of the existing 2,337 "authorized agency locations."⁵⁰

TAGA took issue with virtually every phase of the agency procedures. With respect to the agent's problem in securing sponsorship in the first instance, Mr. Joyce testified:

The refusal to "sponsor" has been uniform throughout all the carriers, and bears no relationship to the qualifications of the agent.

At a time when travel and the need for travel counsel has been increasing tremendously, as acknowledged by carriers, agents, and governmental bodies alike, this one factor "refusal to sponsor" has been most effectively used to curtail the growth of the travel agency industry, and at the same time to plant the seed for its destruction.⁵¹

TAGA further contended that "the carriers do not desire any more travel agents, and are using the conferences as joint action to appoint only those few where pressure is brought to bear in their favor, and disqualify the rest with no reason."⁵² TAGA alleged that the qualifications of the agency applicant often "played no part" in the refusal of the ATC to grant an appointment. Instead, Mr. Joyce contended the following factors account for ATC's refusal in many instances:

(1) In the case of an agent being sponsored for appointment in a city served by competing carriers, it is common practice for the nonsponsoring carrier to vote against the agent, as a matter of "eliminating their competitors' agents."

(2) The voting at the conference consists of "horse trading" or "you vote for my agent and I'll vote for yours."

(3) In the case of an agent being sponsored for appointment in a city where there are agents already appointed, the carriers are happy to use as a "refusal to appoint", the basis that they are protecting the interests of the agents already appointed.⁵³

In this connection, TAGA called attention to the following complaint lodged by the owner of a travel agency located at Fresno, Calif.:

* * * Due to what has in effect become a licensing procedure, I have for the past year been unable to obtain appointments to sell air transportation from member airlines of ATA and IATA, the conferences.

Rather than consider an applying agency on the basis of the demonstrated need in a given area, and the ability of the agent to develop new business, it is common knowledge in the trade that voting on acceptance of a new agent frequently becomes a matter of vote trading among the member airlines—the merits of the agent taking no place in the discussion.⁵⁴

⁴⁹ Hearings, vol. 4, pp. 2356, 2362.

⁵⁰ Hearings, vol. 1, p. 321. According to CAB statistics, this was the number approved as of February 1956.

⁵¹ Hearings, vol. 4, p. 2354.

⁵² Hearings, vol. 4, p. 2356.

⁵³ Hearings, vol. 4, p. 2357.

⁵⁴ Hearings, vol. 4, p. 2372.

TAGA president Joyce testified that in his own case 1 year had been required to negotiate the first hurdle—that of obtaining sponsorship by an ATC carrier; that he was rejected for appointment when the agency committee considered his application for the first time at its yearly meeting; and that it had taken a total of about $2\frac{1}{2}$ years to secure an ATC appointment. Mr. Joyce alleged that the delay “was due to intercarrier pressure, a case of one carrier feeling that if I were appointed I would be too good an agent for another carrier.”⁵⁵

Another complaint of TAGA is that the carriers themselves have come into direct competition with the travel agencies by virtue of the fact that the carriers have been expanding their own sales offices and organizations. “These offices,” it was stated, “sell not only transportation, but also packaged tours operated by wholesale travel agents, tours constructed and retailed by the carriers themselves, automobile rentals, hotel reservations, and some of the related services one would expect to find in a travel agency.”⁵⁶ TAGA claims the agency procedures in these circumstances subject the travel agent to unfair competitive pressures. The conflict of interest involved was outlined by Mr. Joyce as follows:

At the same time the carriers reserve the right to govern the travel agent's conduct in business, and to dictate the business which he is permitted to handle. They reserve the right to invade his field and compete with him on their terms.

It cannot be called fair or legal competition to allow them at the same time to have jurisdiction over the travel agency industry with whom they are competing.⁵⁷

In addition to complaints from the travel agents associations, there have been numerous complaints about the operation of the certificated carriers procedures from individual agents. Many of the individual complaints concerned the difficulties in obtaining sponsorship.

Mr. James F. McManus, Levittown, N.Y., testified that the reluctance of ATC carriers to sponsor travel agency applications, in part was based upon the concern of some airlines that travel agents were “‘intercepting’ commercial accounts.”⁵⁸ Regarding the carriers' attitude toward travel agents promoting “commercial” as distinguished from “pleasure” sales, the authors of ASTA's study conclude that the “practice of what certain principals, primarily domestic airlines, term ‘interception’ of traffic which they believe they should handle directly, is a major course of friction between principals and agents at this time, and undoubtedly contributed to the recent attempt

⁵⁵ Hearings, vol. 4, p. 2358. Mr. Joyce had been associated with the travel agency industry for more than 8 years, and had operated his own agency business in New York City for about 2 years prior to the time his application was first considered for ATC action.

⁵⁶ See, e.g., carriers' illustrated advertisement, TAGA exhibit G, hearings, vol. 4, facing p. 2388. This trend is primarily in the domestic field. Cf., Cresap, McCormick, and Paget, op. cit., p. IV-20.

⁵⁷ Hearings, vol. 4, p. 2361.

⁵⁸ Hearings, vol. 2, p. 1310.

of the ATC to reduce agents' commissions on sales of domestic air travel."⁵⁹

The hurdles that are imposed by the sponsorship requirement were graphically illustrated by the experience of Mr. McManus, who operates a travel agency in "a large community of approximately 17,000 houses."⁶⁰ In 1954, the representatives of several certificated carriers inspected his business but none would recommend him for sponsorship. While the airline representatives were, according to McManus, "vague as to what the requirements were" it "developed that a travel agency in Hempstead, a town approximately 8 miles to the west of Levittown, was, by common report objecting to my organization of a travel agency in the vicinity of Levittown" and had indicated that it would "be ill disposed if any of the young men representing the airlines would recommend us for sponsorship."⁶¹ The reputed opposition of the Hempstead agency, which geographically was the nearest rival concern,⁶² was, apparently "only one of the factors."

Nevertheless, no question was ever raised as to the financial status or credit rating of Mr. McManus, nor was he ever given a definitive reason why sponsorship was being withheld.

In his efforts to find a sponsor Mr. McManus "wrote every member of ATC, and * * * the main representatives of IATA." He related that the representative of one of the leading certificated carriers told him there were "no openings at the time" but that he might be considered more favorably for sponsorship if he generated "at least \$150,000 worth of business" within a year.⁶³

This requirement makes it virtually impossible to qualify for a sponsorship "opening." Mr. McManus stated:⁶⁴

Now, in creating \$150,000 worth of business, with the commissions * * * between 5 and 7 percent [for domestic and international sales], you might generate commissions of maybe someplace between \$7,500 and \$9,000, the personnel that you have to employ and the advertising and everything else like that, would be substantial to write that kind of business. You would have to do it without ticket stock. You would not be like their "con-

⁵⁹ Cresap, McCormick & Paget, op. cit., p. IV-7 through IV-10. This study observes:

"The business of travel agencies is frequently considered in two categories—pleasure and commercial. This distinction is fairly clear cut with respect to domestic travel even though some business undoubtedly is placed through traffic agents or other representatives of business firms for personal use and, conversely, some individual purchases do have commercial uses in mind. Purchases of foreign travel are somewhat harder to classify because of the frequency with which trips abroad are arranged to cover both business and personal plans * * *.

"There is no marked tendency toward concentration of a high proportion of commercial business in any particular region or size of city. However, it does appear that a few large [travel agency] firms with over \$1 million annual volume do tend to specialize in bookings from commercial accounts.

"* * * commercial business appears to amount to only 15 percent of the total gross bookings of domestic travel of the typical agent, and only 9 percent of all agents obtain more than one-half of their domestic travel business from commercial sources. Were this volume related to total bookings, including foreign travel, the proportion would be even smaller."

⁶⁰ Hearings, vol. 2, p. 1308.

⁶¹ Hearings, vol. 2, p. 1309.

⁶² Hearings, vol. 2, p. 1312. In the same vein a west coast travel agency stated: "It is frequently difficult for any applying agent to obtain sponsorship for conference appointment due to pressures brought to bear on the airline by existing agencies."

Hearings, vol. 4, p. 2372.

⁶³ Hearings, vol. 2, p. 1313.

⁶⁴ Hearings, vol. 2, p. 1314.

ference" agents. You would have to do that without ticket stock, and there would be no commission on it, because there would be no assurance of the commission.

So you would be just doing them a favor. Before they "sponsor" you, they want you to write an awful lot of business for them. They do not provide you with the ticket stock to write the business, and it is just an impossible barrier that they have set up right there.

There are indications that ATC's agency procedures are utilized to prevent accredited travel agents from selling tickets for non-ATC carriers. On January 13, 1954, ATC's executive secretary was asked by Kaymax Travel Agency, an approved agency in Richland, Wash., whether it could properly represent a small intrastate scheduled airline (Johnson Airlines) which was not an ATC member. Johnson proposed to pay higher commissions than those paid by members of the conference. ATC's reply on January 21, 1954, was that Kaymax could represent Johnson because the CAB had disapproved a proposed ATC resolution which would have restricted approved agencies from accepting higher commissions from outside carriers. The ATC executive secretary recommended that Kaymax, if it had further questions, should " * * * approach those ATC Airlines by whom you are appointed."⁶⁵ The ATC, however, on February 8, 1954, explained to the West Coast Airlines—its member in the area, for whom Kaymax Agency made substantial sales—the past attempts ATC had made to keep accredited agents from representing nonskeds carriers and carriers paying higher commissions than ATC members. In this letter ATC advised:

I can appreciate the competitive position of WCA in this matter. However, the agent is not in violation of his agreement if he undertakes to represent Johnson Airlines. It is important, however, that all concerned realize that an agent will hardly provide the services and promotional activities expected by ATC members under the terms of the agreement if he is, in fact, selling transportation on behalf of other airlines which pay higher commission rates. *Under this premise, it is, of course, always possible for the members to vote deletion of the agent from the approved ATC list*, and other agents who have indulged in similar activities have been brought up for consideration at the annual review of the agency list by the agency committee. If Kaymax Travel Agency does actually promote sales over nonconference members which pay higher commissions, and to the detriment of conference members, such action on his part would, in my opinion, subject him to the consequences which can result by his failure " * * * to create and stimulate the sale of air passenger transportation offered by the carrier * * *."⁶⁶

Thus ATC suggested a technique by which its members could bring pressure—the loss of accreditation—to bear upon Kaymax in the event it made sales on behalf of a nonmember. By the same token, ATC suggested circumvention of a restriction which the Board previously had

⁶⁵ Hearings, vol. 3, p. 1767.

⁶⁶ Hearings, vol. 3, p. 1768. [Emphasis supplied.]

flatly disapproved, "because of the lack of strong and impelling reasons as to why the domestic carriers should be granted antitrust immunity," in this regard.⁶⁷

IATA PROCEDURES

The foregoing complaints apply equally, and in some respects to a greater degree, to IATA agency procedures. Notwithstanding the fact that, according to the CAB, "travel agencies generate a substantial portion of total international ticket sales,"⁶⁸ the Board has seen fit to relegate to IATA even greater agency prerogatives than those exercised by the ATC.

IATA was unsuccessful in its first effort in March 1946 to obtain CAB approval⁶⁹ of its agency procedures. The Board objected particularly to provisions which would have vested in the IATA agency committee unlimited discretion with respect to the appointment of authorized agents. The Board subsequently approved⁷⁰ an amended resolution submitted by IATA which established standards to be used by the member carriers in making agency appointments. The amended resolution also provided for maximum commissions of $7\frac{1}{2}$ percent on sales of passenger transportation and 5 percent on cargo, rather than the fixed commissions of $7\frac{1}{2}$ percent and 5 percent that were stipulated in the initial resolution.⁷¹

In January 1951 the CAB took a major step in the agency field, insofar as international air travel was concerned, by approving two IATA resolutions over the opposition of the Department of Justice. These resolutions provided (1) that no IATA sales agent shall be retained unless he agrees not to accept from non-IATA carriers a rate of commission higher than he would receive from IATA carriers; and (2) that general sales agents for non-IATA carriers shall not serve as IATA sales agents without special conference approval.⁷²

It should be noted that the Board refused to approve resolutions incorporating similar provisions when presented by the ATC.⁷³

In its approval of these sweeping resolutions, the Board admittedly "recognized the possible undesirable effects inherent in these resolutions" and stated that they "will be kept under our surveillance and subject to further review if evidence appears to indicate inequitable application of the provisions thereof." As of the time of the hearing, it was the official view of the Board that "nothing has been presented to the Board which would warrant a change in the Board's action."⁷⁴

In August 1952 the Board approved an IATA resolution that reduced the commission on transatlantic sales from a $7\frac{1}{2}$ -percent to

⁶⁷ Hearings, vol. 1, p. 510.

⁶⁸ Hearings, vol. 1, p. 510.

⁶⁹ CAB No. 558.

⁷⁰ Hearings, vol. 1, p. 321. The authority of the Board in this area, is restricted in scope to its statutory powers over United States carriers engaged in foreign air transportation; hence the Board's approval of IATA agency resolutions bears the same limitation.

⁷¹ Hearings, vol. 1, p. 321.

⁷² Hearings, vol. 1, pp. 321-322; IATA Agency Resolution Proceeding, Docket No. 3350.

At the time this case was decided, sales generated by travel agencies represented about one-half of the total passenger and cargo sales of the three leading American carriers engaged in scheduled foreign air transportation; and agency sales constituted about three-fourths of the total business of Colonial Airlines, the only nonmember of the IATA involved in the proceeding.

⁷³ Hearings, vol. 1, p. 510.

⁷⁴ Hearings, vol. 1, p. 322.

a 6-percent maximum. This decision overruled the recommendations of the hearing examiner, who had found that in terms of average operating costs, travel agents would suffer an actual out-of-pocket loss on tourist sales at the reduced commission rate. ASTA also sought unsuccessfully to defeat the resolution. The agreement, which as approved was effective until March 31, 1953, operated to reduce the ceiling on the commission paid travel agents for the sale of tourist-class transportation between the North Atlantic gateways; the permissible maximum was fixed at 6 percent of the New York-Shannon tourist fare.⁷⁵

REMEDIES PROPOSED BY TRAVEL AGENTS

ASTA's 1953 protest⁷⁶ against the basic agency procedures was combined with its protest against a resolution proposed by the ATC that would have reduced the travel agents' 5 percent commission rate to a flat dollar amount per ticket. It was never acted upon by the Board. In 1955 the proceeding was terminated by the ATC's withdrawal of its proposed resolution because of ASTA's vigorous opposition. At the same time the ATC created a committee to meet semiannually with a travel agents' committee to "explore problems arising out of the airlines' agency relationship."⁷⁷

As for the value of this committee to the travel agents, ASTA's representative complained that ATC never intended the committee would give the travel agents an effective voice in the agency relationship. He gave the following evaluation of its accomplishments:

Both CAB and ATC have called this committee's attention to this travel agents' policy advisory committee with the implication that adequate consultative machinery now exists to give travel agents a voice in ATC decisions. Four members of this committee represent travel agents, two of whom are from ASTA * * * *While there is some value in this formalized contact between the agents and the carriers in keeping each aware of the views and attitudes of the other on less controversial matters, there have been no significant results from any of these meetings to my knowledge.* The travel agents' policy advisory committee is not a substitute for any degree of travel agent participation in ATC determinations. At most the carrier members can only report what we say. They can make no agreements which bind ATC. These still require unanimous consent of all carriers.⁷⁸

To correct the agency procedures ATA recommended that the Board develop "adequate standards" to govern the carriers both in their

⁷⁵ *North Atlantic Tourist Commissions Case*, Docket No. 5422, hearings, vol. 1, p. 322. The Board held that there was no basis for concluding that agents would suffer "any substantial financial injury during the period" and that any "short-run injury could hardly be serious in view of the other sources of agent revenues, the overall high current levels of travel, and the figures * * * [from the examiner's initial decision] showing greater commission revenues forecast for agents from North Atlantic air transportation in June 1952 under the agreement than in June 1951." The Board stated that it "was further influenced by the belief that to disapprove the resolution might jeopardize the success of the North Atlantic air tourist experiment, then being initiated." After the resolution expired, the commission for both first-class and tourist services was standardized at 7 percent.

⁷⁶ CAB No. 5044, hearings, vol. 2, pp. 1329-1337.

⁷⁷ Hearings, vol. 1, p. 321.

⁷⁸ Hearings, vol. 3, p. 2297. [Emphasis supplied.]

selection of travel agents to be accorded conference approval and in framing the agreements between the carriers which require joint or uniform action in their relations with the travel agencies. In its recommendations to the committee, ASTA took a noticeably weaker position than it took in its 1953 protest to the Board. ASTA now sees no problem of illegal delegation of the Board's power provided it has a greater participation in ATC's procedures. Most specifically, ASTA advocated that:⁷⁹

(1) submissions [by the ATC carriers] in support of applications for section 412 approvals should be required to include, as part of the public-interest showing, a statement of what the applicant understands the travel agents' views to be on those changes in resolutions affecting agents; and

(2) [the] CAB should make available a simplified and inexpensive procedure whereby, on the basis of a prima facie showing of failure of a conference to abide by its CAB-approved standards, any travel agent can apply to CAB for CAB supervision of a consultative meeting with conference representatives. CAB examiners should be made available for this purpose and records should be kept of such meetings. If requested by either the carriers or the agents, the examiner should file a report to the Board stating the position and reasoning of both sides.

With regard to the maximum commission rates approved by the CAB pursuant to section 412 of the act, ASTA contended that the Board " * * * should undertake an investigation to inform itself about the adequacy of travel agents' commissions * * *. The CAB inquiry should be directed at factors which should be taken into account in determining appropriate levels of commissions * * *." ASTA also urged that the Board, in considering resolutions establishing maximum commission rates that may be paid by the carriers, require the submission of justifying data.⁸⁰

TAGA, on the other hand, recommended changes in travel-agency procedures that go far beyond those advocated by ASTA. TAGA contends that the present airline conference systems are basically unsound. It is of the view that travel-agency standards should not be determined by the carriers, the travel agents, the trade associations of either group, or even the CAB. This function, TAGA believes, should be performed by the Department of Commerce which might well be given licensing powers over travel agencies after it had made a "suitable investigation of the industry's needs."⁸¹

REACTION OF THE CAB TO TRAVEL AGENTS' PROBLEMS

Despite this mounting tide of criticism the travel-agent procedures have evoked, the Board has persistently refused to cope with the problem or, indeed, even frankly to acknowledge its existence. It is difficult to understand the Board's statement, when the hearings started, that the "basic procedure" on agency matters established by the ATC has gone "unchallenged by any formal protest by the ticket agents," in

⁷⁹ Hearings, vol. 3, p. 2298.

⁸⁰ Hearings, vol. 3, pp. 1334, 2298.

⁸¹ Hearings, vol. 4, pp. 2362-2363.

view of the precise challenge on this score which ASTA formally laid before the Board in 1953.⁸²

Moreover, the Board referred the committee to this particular proceeding in which the ATC by resolution sought to drastically reduce agency commissions, as an example of the way in which "many issues are settled by negotiation between the carriers and the agents or between the carriers and the Board without the necessity of a hearing."⁸³ The Board's account, taken at face value, would lead to a conclusion that the fundamental objections of the travel agencies to ATC agency procedures has been dissipated by corrective action and that all was now harmony in the relationship between the travel agencies and the ATC. This was far from the case. Even ASTA's representative at the hearing complained that the Board had failed entirely to recognize or discharge its basic responsibility in providing any "procedural safeguards to the travel agents in their dealings with the combination of airlines made possible by the Board action."⁸⁴

Similarly misleading was the Board's tactic of seeking to focus the committee's attention on the lack of a "formal" protest to the agency procedures. In any realistic view, the Board is not so circumscribed by the Civil Aeronautics Act in its consideration or reconsideration of complaints. It is clear that the statute vests in the Board the authority, and indeed the duty, to initiate investigations into matters of the kind as the need arises.⁸⁵

The record is replete with testimony, such as this statement by the president of TAGA: "They [the Board] stated that they had never received a formal complaint about the system. I think they failed to state how many informal complaints they had received. Their requirements so far as a formal complaint is concerned are fantastic."⁸⁶ Similarly, Mr. McManus told the committee: "Of course I have [complained to the Board] but CAB writes back that I must complain under their rules. They write in a letter to you that they have never had any 'formal' complaints. They have had many complaints about this matter."⁸⁷ He pointed out also that it was "impractical" for an individual travel agent to interpose a "formal" challenge under the appropriate section of the Civil Aeronautics Act, unless he were financially and otherwise prepared to run the gamut of administrative proceedings before the Board as well as possible appellate litigation before a Federal circuit court of appeals. This burden increased by the fact that the aggrieved travel agent is not permitted to ascertain the reason why the carriers refused accreditation or sponsorship.

⁸² Cf. hearings, vol. 1, p. 321, with hearings, vol. 2, pp. 1329-1338.

⁸³ Hearings, vol. 1, p. 321. This is how the episode was summarized by the CAB: "The absence of a hearing is not indicative of a lack of consideration by the Board of these arrangements, or of a lack of concern with any antitrust aspects since, where approval is not indicated, the parties normally are offered the options of presenting supporting data, withdrawing the agreement in whole or in part, or requesting a hearing. Thus many issues are settled by negotiation between the carriers and the agents or between the carriers and the Board without the necessity of a hearing. For example, a resolution of ATC filed in 1953 (CAB No. 5044), which proposed an important change in the commission rate, i.e., from 5 percent to a flat dollar amount per ticket, was set for hearing. After prehearing conference had been held a series of meetings took place between the American Society of Travel Agents, a protestant, and the members of the airlines under the supervision of the examiner assigned to the case. Ultimately, the resolution was withdrawn and thus a formal hearing was not held."

⁸⁴ Hearings, vol. 3, p. 2297.

⁸⁵ Sec. 1022(b) of the Civil Aeronautics Act.

⁸⁶ Hearings, vol. 4, p. 2365.

⁸⁷ Testimony of James F. McManus, hearings, vol. 2, p. 1320.

It is evident that the CAB should have long since been aware that a full scale inquiry and corrective measures were overdue. Instead the Board refused to recognize any problem existed and sought to forestall any criticism that might arise with repeated avowals that all was well.

The inertia evidenced by the Board in coming to grips with the issue persisted, until insistent demands for action were made by the committee during the hearings. When pressed at the hearings, Chairman Rizley finally conceded: "I think it [the agency issue] needs to be looked into. We will put it that way."⁸⁸

Following the hearings which were concluded on June 15, 1956, the committee "requested information as to the nature and extent of the Board's review of this matter." It was advised by the Board on September 7, 1956, that the staff of the CAB was completing an informal investigation and would then "make appropriate recommendations to the Board for action."

On September 29, 1956, TAGA filed a formal complaint with the CAB pursuant to section 411 of the Civil Aeronautics Act on behalf of one of its members whose accreditation had been revoked by the ATC.⁸⁹ In addition to seeking specific relief for the particular travel agency allegedly aggrieved, the complaint sought a comprehensive review of "each and every" travel agency resolution approved by the Board since its inception.⁹⁰

On October 24, 1956, Chairman Celler advised the new chairman of the CAB that with respect to the basic agency issues crystallized at the hearings: "I believe that it is imperative that the Civil Aeronautics Board resolve this matter without delay."⁹¹

Finally, on October 31, 1956, the CAB issued two orders⁹² that instituted investigations into the procedures used in the selection and retention of agents by the ATC and IATA to determine the resolutions "are adverse to the public interest or are in violation of the [Civil Aeronautics] Act."⁹³ The Board recognized that the basic ATC agency resolution as amended principally covers two matters: (1) appointment by ATC members of authorized agents and (2) remuneration paid agents for the sale of transportation. Nevertheless, the Board declared in its order that "we do not feel that matter of remuneration to agents warrants further discussion or inquiry at this time." For this limitation, the Board cited only the "termination by consent of all parties" of the 1953 ATC resolution seeking to reduce commission rates, and ignored the unequivocal request of ASTA for

⁸⁸ Hearings, vol. 1, p. 317.

⁸⁹ Docket No. 8238, *Travel Agents Guild of America, Inc., and David E. Dodgson, d/b/a Fruitvale Travel Center*. Sec. 411 of the act authorizes the Board to investigate and determine whether an air carrier is engaged in unfair or deceptive practices and unfair methods of competition in air transportation or the sale thereof.

⁹⁰ *Id.*

⁹¹ Letter dated October 24, 1956, from Chairman Celler to Chairman James R. Durfee, who had in the interim assumed this post at the Civil Aeronautics Board.

⁹² Docket Nos. 8300 and 8302, known respectively as the ATC agency resolution investigation and the IATA agency resolution investigation.

⁹³ The Board consolidated with the ATC agency resolution investigation (Docket No. 8300), that portion of the complaint filed by the Travel Agents Guild of America which, in the Board's words, sought "an investigation of ATC procedures for selection and retention of agents." The Travel Agents Guild of America, as well as the air carrier parties to the agency agreements in question were made parties to the proceedings.

an investigation into the adequacy of commission rates, that was made at the committee's hearings.⁹⁴

ATC'S CONCESSIONS

Some 2 weeks after the Board issued its order for a travel-agency investigation, the ATC transmitted to the Board, with a request for approval under section 412 of the Civil Aeronautics Act, a resolution incorporating certain procedural changes in its master agency resolution. These proposed amendments were adopted by the ATC on November 8, 1956. The most significant change provided by the amendments is that a travel agent who has been rejected by the ATC Agency Committee or whose appointment has been withdrawn shall have the right of appeal to an impartial arbitral tribunal. Significantly, however, ATC amendments still do not permit the agent to learn why he was rejected.⁹⁵

CONCLUSIONS

The net effect of the Board's approval of the agency system fabricated by the ATC and IATA has been to make it possible for the private trade associations of the certificated carriers to determine which agents, and how many of them, are to be singled out and accorded the privilege to sell transportation on the scheduled commercial airways. This entire process of decision making is carried out by the airlines on a unilateral basis and is not subject to review from any quarter.

The present sponsorship system, which requires an agent to first make the rounds of all airline carriers to present his case, may operate perpetually to foreclose an otherwise qualified agent from even initial consideration by the accreditation committee and thus bar his entry into the field of scheduled air transportation. Once past this hurdle, factors such as conflict or collusion between carriers may serve

⁹⁴ Hearings, vol. 3, p. 2298. The sole explanation given by the Board of its order for excluding the remuneration factor from the investigation is contained in a footnote which reads as follows: "Termination by consent of all parties of the *Air Traffic Conference Agency Resolution Case*, Docket No. 6265, by orders Nos. E-7640, dated August 17, 1953 and E-9020 dated March 17, 1955, disposed of, without investigation, a complaint by agents against ATC proposed reduction in compensation to agents and agency procedures."

By the same token the Board rejected, but without discussion, a similar request for a commission rate investigation put forward by TAGA in its formal complaint filed September 29, 1956. Clearly, this complaint—seeking a review under sec. 411 of the act of "each and every" ATC or IATA agency resolution or agreement approved by the Board—embraced in its scope the important resolutions which were instrumental in establishing the mandatory ceiling on agency commissions. Nevertheless, the Board in advertent to this complaint in its order of October 31, 1956, refers only to "the portion of the complaint * * * seeking an investigation of ATC procedures for selection and retention of agents."

⁹⁵ The other principal changes that would be made in the existing procedure are: An application for accreditation could be filed by a travel agency directly with the ATC, instead of through a sponsoring carrier, but would still not be considered for action by the conference unless a member airline indicates its willingness to sponsor the applicant; the ATC Agency Committee, which passes on such applications, would meet quarterly instead of "no more frequently than once a year"; a two-thirds vote of the agency committee would be required to remove a travel agency from the approved ATC agency list after "review" of his "qualifications" instead of the present automatic removal if less than two-thirds vote to retain the agency; in the event a travel agency is sold, the new owner will be placed on the agency list at his own request, and can be removed only by a two-thirds vote of the agency committee (while at present, the new owner can be placed on the agency list only at the request of a sponsoring carrier, "pending committee action as in the case of a new applicant"), and travel agents would be prohibited from doing 20 percent or more business with the agency owner thus preventing a user of transportation from, in effect, receiving a rebate through the use of "house" or "captive" agents. (Letter dated November 15, 1956, from Frank J. Macklin, executive secretary, ATC, to Hon. James R. Durfee, Chairman, Civil Aeronautics Board.)

to defeat the applicant who has already risked considerable capital in his operations. Moreover, the substantial investment and livelihood of the accredited agent remains in constant jeopardy, since he can continue to deal in scheduled air transportation only on sufferance of the carriers' trade associations.

These are life-and-death powers over the economic survival of the travel agents affected. Yet the ATC and IATA may exercise them arbitrarily and without restraint. An agent, unable to obtain a carrier sponsor, is forever barred from presenting his case for consideration. Neither the Board nor anyone else can determine why. If a sponsored agent is ultimately rejected by the accreditation committees which act in closed session, the reason is not subject to disclosure nor is it even a matter of record.⁹⁶ Furthermore, if the accreditation of an approved agent is summarily revoked, the same veil of secrecy is drawn.

Thus, joint industry action, which may do serious harm to present and prospective agents, remain immune from the antitrust laws and is subject neither to governmental review nor review from any quarter. At worst, as the travel agents testified, they may be at the mercy of the carriers' whim or a variety of considerations unrelated to the merits of their case. Since it is not privy to the secret sessions of ATC or IATA the Board is in no position to assess or endorse the objectivity of their procedures.

The CAB has placed major emphasis, both in its answers to the committee's questionnaire and in its appearance before the committee, upon the spectacle of the airlines dealing with "mere order takers such as hotel porters" and the need for the "elimination of such non-productive agents" in order to prevent serious "competitive abuses."⁹⁷ Indeed, the Board advised that without the agency agreements "the temptation to obtain more passengers by competitive bidding for agency-generated traffic might lead to the diminution of the carriers' revenues or to higher fares, and to the substitution of inferior transportation for the public where an agent can thereby obtain a higher commission."⁹⁸

The competitive situation that obtained in the decade of the 1930's was graphically described by counsel for the ATC in the following terms:⁹⁹

The airlines discovered that before World War II * * * that they were bidding against one another for every ticket. And my references to Joe, the shoeshine boy, the pool hall, and the drug store, I am informed, are not hypothetical. They were prepared to pay a commission in those days for any ticket that could be produced. And one carrier would tell Joe, the shoeshine boy, "Any time you can sell a ticket for us we will give you 5 percent."

⁹⁶ Hearings, vol. 3, p. 1763.

⁹⁷ Hearings, p. 509.

⁹⁸ Hearings, p. 321. It should be noted that the Board apparently does an injustice to the mode of operation of the modern travel agent as distinguished from the mere "order taker" or the past. The typical travel agent operates a comparatively small business in a community or area where he has a reputation to maintain. His self-interest would not necessarily dictate the sale of transportation on the particular airline from which he receives the most lucrative commissions. Ethical reasons aside, it simply would not constitute rational business practice to so subordinate the clients' needs and convenience, because the travel agency must depend for profitable operation upon the repeated patronage of an established clientele. Cresap, McCormick & Paget, op. cit., p. V-11.

⁹⁹ Hearings, vol. 3, p. 1765.

And the next carrier would find that Joe, the shoeshine boy, was pretty good at producing a passenger or two passengers a day. So they would give him 8 percent. And the third carrier would give him 10 percent, and so on.

In its statement, the Board similarly sought to justify the agency procedure and furnished a more complete account of this period:

The use of domestic air carriers of travel agents as additional sales outlets has a lengthy history dating back many years. About 1930, when a coordinated system of air transportation first began to emerge in the United States, the organizations operating the businesses were not staffed with adequate sales personnel to present air travel to the public. At that time the recognized travel agents could not or would not assume the task and thus the airlines were forced to create their own sales organizations. This could not be accomplished immediately and while sales organizations were being formed within the company structures, every effort was made to sell the idea of air transportation to anyone and everyone in a position to direct or influence the mode of travel of others. The most effective way to do this was to give such persons a tangible interest in promoting travel by air. Thus, commissions were offered and paid to, for example, hotel porters and traffic managers of large concerns and recognized travel agents when sales were made. Within a short period of time several thousand persons were receiving commissions and the amount paid was substantial. It became apparent to the airlines that a more definite agency program was needed and the problem became the subject of review by the Air Traffic Conference which was formed in 1939 to consider traffic and sales problems on which members desired coordinated action.¹⁰⁰

The difficulty with these attempted rationalizations is that they are completely anachronistic. The Board seeks to justify the existence of the current agency procedures by adverting to the exigencies of a by-gone era. In view of the sweeping transformation that has overtaken both the travel agency industry and the civil aviation industry, the committee does not believe these explanations have merit.

The record is devoid of any evidence to suggest that the certificated air carriers have had occasion, at any time in the postwar period, to resort to the techniques of generating passenger business that are depicted above.¹⁰¹ The techniques of a quarter of a century ago were associated with a novel industry in its early infancy. They would be

¹⁰⁰ Hearings, vol. 1, p. 319.

¹⁰¹ Nor are we impressed by the ATC claim (hearings, vol. 3, p. 1765) that the travel agents may be unduly influenced by the blandishments of the noncertificated carriers, holding out the lure of higher commission rates. The short answer to this supposed threat is supplied by the spokesman for the American Society of Travel Agents (hearings, vol. 3, p. 2285): "ASTA members do some business with nonskeds but it is held down by the difficulty of accomodating planned travel to unscheduled airline operations and by tendency of nonskeds to use exclusive representation. In the recent CAB decision authorizing supplemental scheduled services by the nonskeds the Board virtually eliminated the possibility of this new class of carrier using travel agents by prohibiting a travel agent from representing more than one supplemental carrier—a position contrary to the basic function of the travel agent and against which ASTA has several times protested to the CAB." The CAB likewise sees no threat to the commission structure from this quarter. As we have seen the Board refused to approve an ATC resolution that would have precluded agents accredited by the ATC from accepting higher commission rates, if offered by non-ATC carriers.

unthinkable and self-defeating for the certificated air carriers of today, who have achieved a high degree of maturity and public acceptance.

It is common knowledge that the carriers certificated by the Board now have elaborately developed sales organizations of their own, which normally occupy the status of separate departments in the company organizational structure.¹⁰² These departments are staffed by high officials charged with promoting airline transportation sales and are manned, in the case of most airlines, by specialized personnel throughout the geographical area of the carrier's routes. Moreover, their efforts are abetted in many ways by the organized activities of the Air Transport Association, which retains in a vice presidential capacity an experienced public relations director to stimulate travel by air and otherwise promote the sales interests of the member carriers.

Indeed, some of the domestic carriers now actively resent what they regard as the "commercial" encroachments of those travel agents, who service members of the public purchasing air transportation for business travel. This is in sharp contrast to the early state of affairs described by the Board, when the airlines were eager for the sales assistance of "anyone and everyone."

The chaos envisaged by the CAB if the present agency restrictions were relaxed is all the more unlikely insofar as the ATC carriers are concerned, since travel agents, according to the Board, now "generate * * * only a minor portion of domestic ticket sales."¹⁰³

There are other persuasive reasons for rejecting the Board's contention that if the present agency procedures are disturbed, the resulting "competitive excesses" would lead in turn to "higher passenger rates" and "increased subsidy payments" by the Government to the carriers who have engaged in such practices.¹⁰⁴ The argument, of course, implies that the traveling public and the taxpayer will be required to subsidize the competitive abuses on the part of the carriers.

In the first place, if the Board were to permit the continuance of standard commission maximums based in part on ATC and IATA recommendations, this would in and of itself preclude competitive bidding for agency generated business regardless of what charges were made in the agency selection and retention procedures and the authority which the ATC and IATA now exercise in this regard.¹⁰⁵

Even if commission ceilings were not provided and there was a recurrence of competitive excesses by air carriers in their bids for agency generated business, the CAB underestimates its own regulatory competency to cope with this contingency. The Board would by no means be dutybound to underwrite such carrier expenditures by the grant of a domestic fare increase or by its assent to an IATA fare increase so inspired. The Board itself, in another connection, assured the committee of its statutory "power to regulate domestic passenger fares and * * * control any ultimate uneconomic effort * * * on

¹⁰² Hearings, vol. 1, p. 319.

¹⁰³ Hearings, vol. 1, p. 510.

¹⁰⁴ Hearings, vol. 1, pp. 509-510.

¹⁰⁵ The Board itself regards the matter of the carriers' "remuneration to agents" as entirely separable from the procedures relating to the designation of authorized agents. In its recent order instituting an investigation into the ATC agency resolution, the Board acknowledged that the compensation that may be paid agents is 1 of the 2 principal matters covered by the resolution. Nevertheless, this issue was excluded from any "further discussion or inquiry at this time," and the investigation is concerned solely with the "ATC procedures for selection and retention of agents."

domestic fares," in the event that higher commission rates were offered to travel agents by some carriers.¹⁰⁶

These reasons apply with even more force to rule out the hypothesis of increased subsidy payments occasioned by uneconomic commission practices. This is all the more true on the domestic front where the earnings of the trunkline carriers have reached alltime highs, with subsidy support almost a thing of the past.

For the foregoing reasons, the committee is not persuaded that dire consequences would follow any changes in the agency procedures that shifted the balance of power from the ATC and IATA. On the contrary, such a step would be beneficial to both the public and the air transportation industry.

The Board does not stop with a system under which the ATC and IATA are left to administer "standard commission rates" and a "uniform procedure for the selection and retention of agents" in the interests of "stability in the rendition of agency services to the public." The Board also permits the carrier's trade associations to "limit" the overall "number of travel agents" authorized to deal with its member airlines. The Board claims that "in addition * * * limitation on the number of travel agents by areas protects the approved agents from unbridled competition from other travel agents."¹⁰⁷ According to the Board this "promotes the financial stability" of the agents who have already won accreditation, and, presumably, helps to "foster sound economic conditions in air transportation."¹⁰⁸

If these considerations were valid, it would be both legitimate and desirable to place a limit on the number of aircraft manufacturers and oil-producing companies that operate in the United States, because they fulfill the vital function of supplying the airlines with their modern aircraft and aviation fuel. The Board's contention in this regard would extend to industry regulation of these concerns to protect them from the "unbridled competition" of other would-be rivals.

The committee rejects this argument of the Board. It is repugnant to basic concepts of competitive enterprise and has no warrant within the framework of the Civil Aeronautics Act itself. Carried to its logical extreme, the Board's thesis would sanction an artificially imposed check upon competition in the many industries which, like the travel agency industry, are on the periphery of commercial air transportation, but which admittedly lie outside the scope of the Board's regulatory authority insofar as "freedom of entry" is concerned.¹⁰⁹ Neither the act nor its legislative history contain any indication that Congress intended that the CAB transcend the bounds of its special jurisdiction and seek to shield nonregulated industry, whether large or small, from the normal incidents of competition.

The committee can envisage no more certain method to bring about a progressive emasculation of accepted antitrust safeguards, designed

¹⁰⁶ Hearings, vol. 1, p. 510. This was the reason advanced by the Board for disapproval of a restrictive ATC agency resolution in 1952 which would have prevented ATC agents from accepting higher commission rates from non-ATC carriers. The ATC argued that this was necessary to offset possible competitive advantages by the non-ATC carriers.

¹⁰⁷ Hearings, vol. 1, pp. 509-510. This power of restricting area representation "to economic levels" has in fact been exercised by the ATC. Hearings, vol. 3, pp. 1762-1763, 2357. A like policy has been pursued by IATA.

¹⁰⁸ Hearings, vol. 1, p. 509.

¹⁰⁹ Hearings, vol. 1, p. 318.

to protect a free economy from the inroads of monopoly and restraints of trade. Under the Board's theory, the concept of "regulated competition" might well spread unchecked to every vital artery of the economy. In the committee's view, it is intolerable for a governmental regulatory body to countenance a situation in which a private trade association determines the appropriate levels of competition for different areas of the country. It is all the more intolerable when this determination is made for the members of still another industry.

The Board has gone to unusual lengths in furtherance of its unique regulatory philosophy for travel agents. This is illustrated by the authorization which was given the ATC only a few years ago to bring the entire accreditation program to a halt and "maintain the status quo" for a period of fully 2 years ending August 31, 1955. Thus, in a boom period marked by rapidly expanding travel demands on the airlines and the travel agencies, the ATC was permitted to curb travel agency activity by virtually closing the door on new agency applicants seeking accreditation.¹¹⁰

At the hearings, the Board alluded to this moratorium on agency appointments as a "temporary" measure to facilitate "an orderly review" by the ATC of its agency program in view "of the rapid growth in the number of agents since World War II."¹¹¹ To employ the appellation "temporary" to the "freeze" authorized in these circumstances is to underestimate the significance of two such important and dynamic years in the recent history of air travel. While the Board's attitude is consistent with its predilection to relegate the management of agency affairs to the carriers' trade associations, the Board's statement to the committee contains no satisfactory explanation for such an extended period devoted to an ex parte review of the agency program.¹¹²

The Board's grant to the ATC of such exclusionary powers and its sanction of this prolonged stalemate, sacrificed the interests of the travel agents and of the public. This was particularly true with respect to travel agencies and their clients in the smaller communities far removed from an airline ticket office or the office of an accredited agent.¹¹³

With respect to its obligations under section 412 of the act, the Board has vacillated between two substantially different tests for measuring agency resolution submitted for approval. Initially the Board reasoned that it was required to approve "any agreement that it does not find to be adverse to the public interest or in violation of the act."¹¹⁴ Later the Board indicated that a more exacting test was required under the law.

When an agreement submitted by the carriers for approval "has among its significant aspects elements which are plainly repugnant to established antitrust principles," the controlling test now is that set

¹¹⁰ The exception was that any attrition in the existing ranks of approved agents could be made up by new appointments (hearings, vol. 3, p. 1762).

¹¹¹ Hearings, vol. 1, p. 320.

¹¹² The ATC apparently found that the program was operating to its satisfaction, because it advanced no proposals for significant change until November 1956, after the Board instituted its general investigation of agency procedures.

¹¹³ E. g., hearings, vol. 4, p. 2366.

¹¹⁴ IATA agency resolution preceeding, decided January 26, 1951.

forth in the *Local Cartage Agreement* case. There, the Board held that "approval should not be granted unless there is a clear showing that the agreement is *required by a serious transportation need, or in order to secure important public benefits.*"¹¹⁵

There is no question that any agreement among the carriers providing for "the fixing of uniform rates of commissions to travel agents for selling air transportation * * * would be contrary to the anti-trust laws" without CAB approval.¹¹⁶ This is a feature common to both the basic ATC and IATA agency agreements which have received Board approval. Since these agreements, on the basis of the commission fixing provision alone, are "plainly repugnant to established antitrust principles," it follows that, in the Board's terms, a clear and positive demonstration of a serious transportation need or the derivation of important public benefits is required to justify CAB approval and overcome their otherwise adverse effect on our anti-trust fabric.

It is the committee's view that the basic ATA and IATA agency resolutions do not satisfy either of these two criteria nor do they meet the earlier test applied by the Board.

The overall effect of the Board's course of conduct with respect to travel agents has been to confer on the certificated carriers far-reaching regulatory powers over the travel agency industry¹¹⁷ which the Board itself does not have statutory authority to regulate in the first instance.

ATC and IATA may, if they so desire, bar a travel agent from business access to what is now one of the world's main avenues of transportation, the airways flown on regular schedule by the ATC and IATA carriers. In view of the virtual preemption of the field of air transportation by the ATC and IATA carriers, and the narrow range of operations left to the noncertificated carriers, it is undeniable that a travel agent cannot engage in the effective and profitable sale of air-travel accommodations unless he has first secured conference recognition by the ATC and IATA.¹¹⁸

Even if the travel agents were not outside the orbit of the Board's jurisdiction,¹¹⁹ the committee could not accept the Board's claim that the present agency procedures equitably serve the public interest, the interests of the ticket agents, and the interests of the certificated car-

¹¹⁵ Order serial No. E6485, adopted June 4, 1952 (docket No. 4850), reaffirmed as to the above quote in the *North American Tourist Commissions* case (docket No. 5422), decided August 14, 1952. [Emphasis supplied.]

¹¹⁶ *The North Atlantic Tourist Commission Case*; see also: *Lowe v. Laylor*, 208 U. S. 274; *United States v. Socony-Vacuum Oil Company*, 310 U. S. 150; *United States v. Trans-Missouri Freight Association*, 166 U. S. 296.

¹¹⁷ This was conceded by the ATC at the hearings (p. 1757):

"Mr. ROPLO. And then would you not say it is a fair statement that you, as a regulated industry, have been delegated authority by the CAB to regulate the conduct of members of an unregulated industry?"

"Mr. MARKHAM. To the extent that our interests are immediately and directly involved, I supposed that statement is correct. We have not undertaken to regulate the travel agency industry as an industry. We have undertaken to protect our own interests insofar as agents can affect them adversely. And we have undertaken to regulate our own relationship with our own agents."

¹¹⁸ There was testimony that ATC accreditation did not, strictly speaking, amount to a "license" to sell transportation on the certificated airlines since the travel agent could still arrange such accommodations for his customers, although without benefit of a ticket stock and with no expectation of reimbursement in terms of a commission. This would amount to furnishing a gratuitous service at considerable cost to the travel agent in view of the basic expenses involved in operating his business.

¹¹⁹ As we have noted, the Board does have disciplinary authority under sec. 411 of the act to curb unfair or deceptive practices by travel agents in the sale of air transportation.

riers. The Board apparently expects that these private commercial trade associations in whom it has reposed such extraordinary powers will somehow assume the attributes of quasi-judicial tribunals and conduct themselves accordingly. This view is unrealistic and does not accord with the principles of either good business administration or sound governmental regulation.

If the CAB believes that licensing of travel agents based upon a review of their qualifications, is necessary to encourage and develop our air transportation system, this function must be exercised by an agency of the Government. It would be appropriate for the CAB to recommend to the Congress, enactment of suitable legislation to accomplish this purpose. Once licensed by the Government, travel agents would then be eligible for appointment by any ATC or IATA carrier desiring their services. Such clearance would give the carriers the protection and assurance they desire.¹²⁰

Joint action by the certificated industry under section 412 of the act, of course, would be entirely separate from any licensing function authorized by legislation. Pending enactment of such legislation, the committee is of the view that the Board should approve under section 412 only such joint activities required for the ATC and IATA to propose maximum travel agent commission rates for their members and the minimum qualifications any travel agent must possess to be eligible for appointment by member carriers. Application of these qualification standards to the appointment of a particular agent should be exercised by the individual carriers and should not be undertaken by joint action of the carriers through the ATC.

The Board should withdraw its approval of all parts of the agency resolutions submitted by the ATC and IATA which are inconsistent with the foregoing recommendations. The certificated carriers no longer should be permitted to consult and take joint action, with a view to restricting on competitive grounds, the agents who may handle scheduled air transportation.

¹²⁰ Counsel for the ATC advised the committee that "adequate licensing * * * at the governmental level, would provide the airlines the kind of protection that they want," but that the ATC considers the protection afforded by the present arrangements necessary "in the absence of either Federal or State laws which would provide at least minimum qualifications, minimum financial responsibility, [and] minimum competency, as far as travel agents are concerned" (hearings, vol. 3, p. 1757).

REGISTRATION OF SMALL CRAFT

REGISTRATION OF SMALL CRAFT—ASSEMBLY BILL NO. 2497

Assembly Bill 2497 was introduced in the 1963 session of the Legislature, as an amendment to the Harbors and Navigation Code, to simplify and clarify the registration procedure on small boats for the Division of Small Craft Harbors. It would eliminate the possibility of double transfer fees being charged, which presently occurs when a used boat is purchased by a dealer for resale.

Introduction

Small pleasure boats have become big business since the end of World War II. During 1961 more than 35 million people spent in excess of two billion dollars for boats, their operation, and upkeep. Three hundred thousand boats are registered in California today and registration increases at the rate of 2,000 per month. San Francisco and Los Angeles are in the top seven boating markets in the United States. It is predicted that by the end of 1965 California will gain national leadership in boating registration.

The California laws pertaining to the registration and operation of boats within the state were passed in 1959. These laws apply to the vast majority of boats operating on our inland and coastal waters. The law provides for the registration and numbering of boats. It sets up safety requirements and operating practices, and provides for accident reporting and enforcement procedures.

Prior to the enactment of the California laws, registration, etc., was a federal activity handled by the Coast Guard. This original authority dates back to the Federal Numbering Act of 1918, which was superseded by the Federal Boating Act of 1958. At the inception of the federal regulations, an estimated 100,000 boats were affected. The development of reliable and lightweight motors, as well as the mass production of small boat hulls, increased this figure to an estimated 6 million in 1957.

This surge of boating popularity resulted in crowded waterways and an increase in accidents. It also brought about the enactment of numerous regulations by states, cities, and counties in an effort to increase boating safety, and secondarily to develop a new source of revenue. Many of these statutes conflicted with each other and, particularly, with established Federal Maritime Law. This created a chaotic situation. For example, the California Revenue and Taxation Code required each county assessor to register and number vessels. The 1918 federal statutes provide that only the federal number be displayed on the bow of the boat. If an owner displayed the California number, he violated the federal law; if he didn't, he was in violation of the California law.

As a result of the confusion and conflict, the pleasure boating industry and other allied groups requested Congress to study recreational boating problems. This study showed that additional federal legislation was required to restore uniformity throughout the country

and to enlarge the scope of such laws to cover small, high-speed, out-board motorboats. This brought about the Federal Act of 1958, commonly known as the Bonner Act. It permitted the individual states to adopt their own numbering systems and to administer them in accordance with the uniformity requirements of the federal regulations.

The California law is embodied in the Harbors and Navigation Code, and meets with the approval of the Secretary of the Treasury, in accordance with the 1958 federal statutes. Registration was originally handled by the Department of Motor Vehicles. On July 1, 1962, the Division of Small Craft Harbors assumed this responsibility.

Testimony in Support of Proposed Legislation

The purpose of the proposed legislation is to legalize a practice in the Bureau of Registration that arises out of conditions allegedly peculiar to this activity. Mr. Lachlan M. Richards, Chief of the Division of Small Craft Harbors, detailed these conditions and their proposed correction in his testimony to the committee:

Mr. Richards: "AB 2497 would make three changes in the boat registration law with respect to transactions involving dealers:

1. It would confirm the administrative procedure whereby the dealer holds the transfer documents on a vessel purchased for resale until he has resold the vessel.
2. It would add a requirement that the dealer is to notify the division within 24 hours after the purchase of a vessel for resale.
3. It would eliminate the fee for such transfers.

"The present law (Section 681 C) requires completion of the entire transfer of registration process, including issuing of new documents, each time the ownership of a vessel changes hands, and the payment of a transfer fee.

"Under this law a dealer purchasing a boat for resale would have to submit his documents to the division with a \$3 fee and obtain new documents showing him as owner. This process takes a minimum of 15 days. The dealer cannot complete the sale of the boat until he has received his new documents.

"To overcome this obstacle to legitimate commerce, an administrative procedure has been adopted by which the dealer may accept the certificate of ownership signed by the seller, sign it himself, and hold it until he has resold the boat. The new owner then receives the document, signs it, and sends it to the division. The division processes the transaction as a multiple transfer, charging a fee of \$3 for each change of ownership, and issues a new document to the current owner only."

The present law provides for transfer of ownership within 10 days. The problem that the division is trying to resolve occurs when a dealer purchases a boat from an individual for resale. As outlined in Mr. Richards' testimony, a dealer holds the papers, and when he makes the sale, then gives the new owner the documents. This in effect is a dual transfer, and under the law there is a \$3 fee for each transfer. In order for the new owner to secure the documents necessary to prove

ownership, etc., and comply with the state law, he must pay this dual fee. Mr. Richards' testimony continued and indicated that the following benefits would be derived from this change:

Mr. Richards: "Where the former owner has notified the division of the sale, the transfer may be recorded correctly but not without additional correspondence, investigation, and costs.

"In summary, the changes proposed in AB 2497 would:

- a. Confirm the procedure whereby the dealer may hold the ownership document until resale.
- b. Eliminate a transfer fee where no documents have been issued.
- c. Require the dealer to notify the division within 24 hours of any such purchase.
- d. Free the new owner of the annoyance of having to pay a fee incurred by the dealer."

When the question of the loss of revenue was discussed, the chief of the bureau testified that elimination of the \$3 fee should not result in any loss of income, as the cost of processing and collecting this is in excess of the amount collected.

It is apparent that the registration procedure was patterned after the tested methods used by the Department of Motor Vehicles. The present proposal is in line with that contained in the Vehicle Code. The basic difference in the registration program is that the Division of Small Craft Harbors has no branch offices similar to those set up by the Department of Motor Vehicles. It works through boating dealers who act as registration agents for the convenience of the boating public. This program is similar to that employed by the Department of Fish and Game with respect to the issuance of hunting and fishing licenses. The documentation issued by the Division of Small Craft Harbors provides for two types of certificates, such as those used by the Department of Motor Vehicles, wherein a white slip is issued to the registered owner and a pink slip to the legal owner and/or lien holder, as the case may be.

The question of the governing philosophy of boating registration and its general need was discussed.

Senator Pittman: "What is the purpose of the certificate? Do we really need it? Personally, I own a little fishing boat for my own pleasure, and it is a nuisance to me to put a number on that boat."

Mr. Richards: "I would like to comment on that. Originally . . . prior to my coming with the division, there was proposed legislation which set up a system of issuing a certificate of ownership, but up until the recent 1963 session, there was no requirement for showing proof of ownership at the time you registered a boat. There was always no such thing as a builder's hull number, so consequently this piece of paper didn't mean much and, in fact, many people, when they got in the midst of a transfer which was complicated took all of these papers and documents, I am told, and pushed them in a waste basket and went in and registered a

boat as a new boat, or on at least one occasion, someone has stolen a boat and gone in and registered it to themselves as a new boat."

There was a question as to possible duplication by the federal documents and state certification.

Senator Backstrand: "You are talking about federal registration. This a field where you have documented vessels, and where does this break off?"

Mr. Richards: "I jotted down what I think is about the simplest explanation I know as to what a documented and undocumented vessel is. A boat of five net tons or more on United States navigable waters is documented. A pleasure boat of five net tons or more may be documented. A ton is 100 cubic feet of space and net tonnage refers to the amount of space available for cargo. The boat must be owned by a United States citizen. In simply stating it, any boat 32 feet in length and 8 feet wide, if it is used commercially would probably have to be documented. If it is used as a pleasure boat, it is either documented by the owner at his discretion or registered with the Division of Small Crafts."

Testimony in Opposition

Opposition to the proposed changes came from the California Boating Council, represented by Mrs. Jan Mower, and the Southern California Marine Association, represented by Mr. R. D. Sweeney. Their principal objection to the legislation was based on the possibility of conflict with federal regulations.

Maritime laws as such are as old as history. The original ones date back to 900 B.C., and originated on the Isle of Rhodes, which regulated the carriage of goods and passengers for hire on the waterways. Over the years, such laws have expanded and have differed excessively from the common law. The U.S. laws are patterned after those of the High Courts of Admiralty in England.

The Federal Maritime Laws are applicable to all navigable waters of the United States. This has meant all waters, salt or fresh, with or without tides, natural or artificial, which are in fact navigable in interstate or foreign water commerce, whether or not the particular body of water is wholly within a state. To make it even more confusing, the terms "navigability" or "navigable" do not necessarily mean navigable in fact; court decisions in reference to these matters are not clear.

The jurisdiction of the state extends to all waters within its boundaries. It includes all islands, harbors, and bays along and adjacent to the coast line. The California Harbors and Navigation Code contains numerous provisions dealing with boats and their operation. In addition, many cities and counties have local ordinances regulating the use of water within their boundaries. Many of these provisions deal with subjects beyond the legislative authority of the state, city, or county; they are in fields preempted by the federal government. While it is true that the state laws apply to undocumented vessels (seemingly in accordance with the 1958 federal statutes), admiralty law, which is based on the characterization of the waters, could provide for some

dual jurisdiction. The navigable waters within the State of California which, as far as we can estimate, exceed 1,500 miles, include the waters of Lake Tahoe, the Colorado River to and including Lake Mead, the Sacramento River to Red Bluff, and the San Joaquin River to Hills Ferry. Of course, all the coastal harbors and marinas are also navigable waters and similarly subject to federal regulations.

In her testimony before the committee, Mrs. Mower pointed out that the numbering and licensing of undocumented vessels was required for safety reasons and as a protection for the public and financing institutions.

Mrs. Mower: "One inherent danger to the boatowner under the plan as set forth in AB 2497 is that a former boatowner would still be theoretically and probably actually liable, according to the permissive use Section 661 of the Harbors and Navigation Code, for damages arising from an accident with his boat that occurred while it was still in the dealer's possession and untransferred on paper to a new owner."

The whole question of liability was explored by the committee, and further testimony was in direct contradiction with Mrs. Mower's statement. Chairman Short asked Mr. Asklund if he would care to comment on Mrs. Mower's statement.

Mr. Asklund: "Yes, this question is asked by Mr. Lunardi of the Legislative Counsel and we have an opinion of his on that, saying that the liability remains with the dealer."

A copy of the Legislative Counsel's opinion was subsequently forwarded to the committee, and an extract, together with the question prompting the opinion follows:

Statement by Assemblyman Paul J. Lunardi: "This bill fights with Section 701 of the Harbors and Navigation Code and if this bill passes, will leave the poor seller of the boat the owner of record and therefore liable."

Opinion and Analysis from Stanley M. Lourimore, Deputy Legislative Counsel: "In our opinion the statement is not accurate. Assembly Bill No. 2497, as introduced, would amend Section 711 of the Harbors and Navigation Code to provide that when a dealer purchases a numbered undocumented vessel for resale and uses this vessel on California waters under his dealer registration number, he is not required to make application to the Division of Small Craft Harbors for a new certificate of number and a new certificate of ownership for the vessel and to pay the \$3 fee required by subdivision (c) of Section 681 and Section 701 of the Harbors and Navigation Code but may hold in his possession the certificate of number for the vessel until such time as he resells it.

"As we construe the proposed provision, it would make an exception for the acquisition of a numbered undocumented vessel by a dealer for resale from the requirements prescribed by subdivision (c) of Section 681 and Section 701 of the Harbors and Navigation Code that upon any transfer of ownership of a ves-

sel, an application for a new certificate of number and an application for a new certificate of ownership be made to the Division of Small Craft Harbors and a \$3 fee paid.

"This would not, however, leave the former owner of the vessel liable for the operation of the vessel while it is in the hands of the dealer. Under Section 704 of the Harbors and Navigation Code, even if an application is not made for a new certificate of number and certificate of ownership, the owner of an undocumented vessel who has made a bona fide sale or transfer of the vessel and delivered possession thereof to a purchaser is exempted from civil liability for the operation of the vessel by another if the owner has (1) made proper endorsement and delivery of the certificate of ownership and delivered the certificate of number as required by the law; or (2) delivered to the Division of Small Craft Harbors, or has placed in the mail, addressed to the division, the notice of the sale or transfer of the vessel which he is required to give the division by Section 710 of the Harbors and Navigation Code."

According to Mrs. Mower, the Boating Council had been concerned with unscrupulous dealers:

Mrs. Mower: "The proposal as set forth in this legislation will also open the door to 'double floor planning of boats' by unscrupulous dealers. This would be of major concern to banks and financial institutions. However, it is also conceivable that the small boat owner could become involved in red tape complications as a result of a dealer's manipulation of either loaning institutions or boatyards; or in having a boat in his lot on consignment if a lending institution should foreclose on him. It is also quite conceivable that this proposed legislation would open the door to improper attachment of a boat that had been sold, in the event a creditor of a former owner discovered the boat and found an untransferable registration. The dealer, of course, should cause such a wrongful attachment to be lifted by proving his purchase of the boat involved and his independence of the former owner's debt; however, there would be burdensome red tape involved."

Under the Harbors and Navigation Act, it is the duty of the Chief of the Division of Small Craft Harbors to apprise the county assessor of the ownership of any undocumented vessel registered to a resident of his county. This, of course, is for the purpose of levying personal property taxes. There is apparently some concern that if a dealer has purchased a boat for resale and ownership has not been transferred, then the owner of record would be subject to personal property taxes by reason of the ownership records in Sacramento.

The Yacht and Ship Brokers Commission raised the question as to whether or not the proposed change would be in conflict with Section 8937.1 of the Yacht and Ship Brokers Code, which reads as follows:

"Any person purchasing used yachts or ships for resale must transfer actual title to any such yacht or ship into his name and have in his possession subject to inspection by the commission a

good and sufficient bill of sale or other fit evidence of title if such person wishes to claim exemption under this chapter."

A Legislative Counsel's opinion was secured which indicated that there would be no conflict:

"It would follow that the amendments made by A.B. 2497 in the transfer of title requirements of Section 700 and the related provisions in Section 711 would not have any effect upon Section 8937.1 relating to regulation of yacht and ship brokers. In other words, we believe it would be held that a transfer of title to a dealer may occur for the purpose of Section 8937.1 regardless of a dealer's failure to comply with Section 700 or 711. Thus we do not think that the passage of A.B. 2497 would have any effect upon Section 8937.1."

In the course of the presentation by the Boating Council, the operation of the Bureau of Registration became a subject for inquiry and discussion.

Mrs. Mower: "The council surveyed a number of the boat dealers and brokers in California to determine just what the problem might be that caused rise to the introduction of this legislation. Not one of these people complained about paying the required \$3 fee to transfer ownership. Their sole complaint was that it took from 45 to 90 days to get a boat registration processed in the Division of Small Craft Harbors offices and they thought the service was deplorable. Many of these men told us this delay actually cost them sales. Others told us that the public was blaming them for the delay. Not one of them approved the legislation as outlined in Assembly Bill 2497, but all of them asked what could be done to speed up the paperwork processing in Sacramento."

The committee questioned representatives of the Small Craft Harbors Division relative to this.

Senator Backstrand asked *Mr. Askelund*: "Do you use IBM equipment?"

Mr. Askelund answered: "Yes. We process it through IBM."

Senator Backstrand: "Do you have it in your own office?"

Mr. Askelund: "It is in the Department of Parks and Recreation."

Senator Backstrand: "Now, *Mr. Richards* said it took about 15 days and, of course, the dealers were upset about that and, apparently, *Jan (Mrs. Mower)*, here, says it is taking longer than that. Have you made any survey as to the length of time to know just how long it actually does take?"

Mr. Askelund: "Yes. If all the paperwork is in order, it is processed through in less than 15 days. If there is a technicality or something is not in order and clearance is required, it will take longer. Sometimes we engage in correspondence two or three times with people to get these correct or submit what we need."

The matter of liability was further discussed and explored:

Chairman Short: "I notice in your statement (Mrs. Mower) . . . that you say a former boatowner could still be theoretically and probably actually liable after turning the boat over to the seller. Do you have a legal opinion on that from your legal staff?"

Mrs. Mower: "That was the one I got from my legal staff. I didn't bring his thing with me."

Chairman Short: "Who is your attorney?"

Mrs. Mower: "Carl G. Petterly, from Petterly, Jones and Smith in Los Angeles."

Chairman Short: "Now, you heard the Legislative Counsel's opinion that the liability would not be present."

There was further examination of the question of revenue. While it is true that the testimony of the Bureau Chief indicated that the cost of the paperwork far exceeded the revenue, the committee questioned the division spokesman, Mr. Askelund, relative to this. He indicated that the high cost resulted from the paperwork and the correspondence involved. Under the present regulations, a dealer purchasing a boat must forward the documents to Sacramento showing the transfer of ownership from the previous owner to himself. It seemed rather unfair to compel an innocent purchaser of a boat from a dealer to pay a double fee to secure documents showing him as the owner.

Mr. Montgomery: "What do you do, if a person has come in and the dealer hasn't transferred title? Do you go to the dealer or do you pay as the party registering this?"

Mr. Askelund: "Well, the dealer is the party who is registering the boat."

Mr. Montgomery: "It is a misdemeanor for failure to transfer."

Mr. Askelund: "I don't think so."

Mr. Montgomery: "Have you ever been prosecuted?"

Mr. Askelund: "Since this is a misdemeanor, it is difficult to do and we proposed in the last session to put a penalty on failure to transfer."

Mr. Richards: "This is true. We recognize . . . that there is no penalty for failure to fulfill this section of the law and we had hoped to get legislation which would tighten that up. I believe your organization was opposed to that legislation, Mrs. Mower. We didn't pursue it strongly. There was no big fight over it, but we did propose putting teeth into it. We are not an enforcing agency, as the Department of Motor Vehicles. They enforce their section of their own law, and what we have been trying to do is to get legislation which would solve the problem without our getting into enforcement."

The statement "we are not an enforcing agency . . ." seems rather significant. It would appear that the Division of Small Craft Harbors is charged with the registration of undocumented vessels for which a fee is charged. Violation of the regulations is a misdemeanor. It would also appear that enforcement of these regulations where violations were discovered would eliminate some of the problems and some of the paperwork.

The testimony of the Southern California Marine Association was legalistic in nature. Mr. R. D. Sweeney stated, in part:

Mr. Sweeney: "As far as we can determine, it (AB 2497) serves no useful purpose, is harmful to both the dealer and the seller, it helps no one and opens a large field of fraud in the sale of undocumented vessels. It is our opinion that AB 2497 is contrary to the Federal Boating Act of 1958 and if this is correct and if it is enacted into a law, it could lead to withdrawal of the approval of the Secretary of the Treasury heretofore given to sections appearing in Article 2 of Chapter 5 of Division 3 of the Harbors and Navigation Code with reference to the registration and numbering of undocumented vessels by the State of California."

Mr. Sweeney's statement dealt at great length with the possible conflict and joint jurisdiction between the federal government and the State of California. In his testimony he pointed out some of the inconsistencies as follows:

Mr. Sweeney: "There is no provision in the federal law nor in our state law that a vessel can be operated by anyone except under the certificate of number issued for that particular vessel by the Division of Small Craft Harbors. The law provides that the certificate of number must be issued to the owner of record."

"In the event AB 2497 becomes a law, we would then have a boat being operated by a dealer who was not the owner of record under what the bill calls a 'Dealer Registration Number.' There is no such thing in our law as 'Dealer Registration Numbers.' I mean, the law is very evasive—I can't find it in the law; it may be there."

Chairman Short: "I would like to get an answer to that. . . . Will you comment on that please, Mr. DeBenedetti?"

Mr. DeBenedetti: "I refer to Section 5501.1 of the Administrative Code which says, 'Numbering requirements of these regulations shall apply to boats operated by manufacturers and dealers."

"The description of the boat will be omitted from the certificate of number since the numbers and the certificate of number awarded may be transferred from one boat to another. In lieu of the description of word 'manufacturer' or 'dealer' as appropriate will be plainly marked on each certificate."

"The manufacturer or dealer may have the number awarded printed upon or attached to a movable sign or signs to be temporarily but firmly mounted upon or attached to the boat being demonstrated or tested so long as the display meets the requirements of Section 5501."

"A manufacturer or dealer may have more than one certificate of number awarded if he is the owner of more than one undocumented vessel, provided, however, that upon the sale of any such vessel by said manufacturer or dealer, then a number shall be applied for by the new owner in the manner provided for in these regulations."

Part of the problem inherent in the change seems to hinge upon the status of an ownership being in "limbo," so to speak. The financing agencies could be placed at a disadvantage if title did not change as it should. Hidden ownership and dual flooring and financing could occur.

The question of liabilities and court actions was raised as a reason for objecting to the proposed legislation. Mr. Sweeney's statement gave extensive coverage to the matter of federal and state jurisdictions.

Mr. Sweeney: "If a collision occurs on the navigable waters of the United States, which are all the waters of California, except the Salton Sea and bodies that do not open into the sea—Lake Tahoe has been determined to be a navigable water of the United States because it is between two states. The Judiciary Act of 1789 stated, following our Constitution, which placed the admiralty and maritime jurisdiction in the federal courts, that the federal courts shall have all the admiralty and maritime jurisdiction save to the suitors their rights to common law, if any rights existed. Now, a port, for a collision of a vessel was a right at common law which existed when our Federal Constitution was enacted, . . . Therefore, a litigant has the right to select his form, you can go to the federal court if the collision is on a navigable water or you can go into the state court.

"Now, there is a very important decision of the State Supreme Court in California. I will give you the citation. It is real good. I will send it to you. You come in here to court but we are going to apply all the admiralty rules, and we are going to apply the rule of comparative negligence and not the common law rule of contributory negligence. They also said this, they stated the rule of the road. That is what is contrary to the federal law. They said the federal law is supreme on the navigable waters of the United States, so as far as the court action you can go either place but when you get in the federal court, they are not going to pay any attention to this law. They are going to say the owner of the record, and whoever the owner of the record is has the liability and is going to get it. It could be either one but every attorney will sue everyone he thinks he can sue."

Exception to Mr. Sweeney's testimony was taken by the Division of Small Craft Harbors. Legislative Counsel's opinions were solicited and are attached hereto.

RECOMMENDATION OF THE COMMITTEE

1. Serious questions were raised as to the efficient operation of the registration section of this division. It is the opinion of this committee that further study should be made of the entire registration procedure of the Division of Small Craft Harbors. If the transfer procedure takes an undue length of time, the reasons for same should be ascertained and the matter corrected.

2. Enforcement of the present laws is apparently lax or nonexistent. A legislative committee should investigate this situation and discover the causes thereof.

3. It would appear that the rate of the fee should be studied. The fee should be sufficient to finance the operation of the bureau and provide for an effective enforcement wherein to insure compliance with the law. The possibility of collecting the personal property tax and remitting same to the appropriate counties in a manner similar to that procedure used by the Department of Motor Vehicles should also be explored. This would eliminate the possibility of dual taxation, as suggested in testimony presented to the committee.

4. If, as the chairman indicated, the responsibility for any tort action would be on the dealer's shoulders when he purchased a vessel, then we see no harm in the proposed change.

APPENDIX

AMENDED IN SENATE JUNE 11, 1963

CALIFORNIA LEGISLATURE, 1963 REGULAR (GENERAL) SESSION

ASSEMBLY BILL

No. 2497

Introduced by Mr. Lunardi

April 18, 1963

REFERRED TO COMMITTEE ON NATURAL RESOURCES, PLANNING,
AND PUBLIC WORKS

*An act to amend ~~Section~~ SECTIONS 700 AND 711 of the Harbors and
Navigation Code, relating to undocumented vessels.*

The people of the State of California do enact as follows:

SECTION 1. Section ~~711~~ 700 of the Harbors and Navigation Code is amended to read:

700. No transfer of the title or any interest in or to an undocumented vessel numbered under this code shall pass, and any attempted transfer shall not be effective, until the parties thereto have fulfilled either of the following requirements:

(a) The transferor has made proper endorsement and delivery of the certificate of ownership and delivery of the certificate of number to the transferee as provided in this code and the transferee has delivered to the Division of Small Craft Harbors or has placed the certificates in the United States mail addressed to the Division of Small Craft Harbors when and as required under this code with the proper transfer fee and thereby makes application for a new certificate of ownership and a new certificate of number *except as otherwise provided in Sections 711, 712 and 713.*

(b) The transferor has delivered to the Division of Small Craft Harbors or has placed in the United States mail addressed to the Division of Small Craft Harbors the appropriate documents for the transfer of ownership of the vessel pursuant to the sale or transfer except as otherwise provided.

SEC. 2. Section 711 of said code is amended to read:

711. (a) Every dealer upon transferring by sale, lease or otherwise any undocumented vessel, whether new or used, required to be numbered under this code, shall, not later than the end of the next business day of the dealer, give written notice of the transfer to the Division of Small Craft Harbors upon an appropriate form provided by it, but a dealer need not give the notice when selling or transferring a new unnumbered vessel to another dealer.

(b) When a dealer purchases an undocumented vessel numbered under this act for resale and uses this vessel on California waters under his dealer registration numbers, he is not required to make application for transfer or to pay the three dollars (\$3) transfer fee required by Sections 681(c) and 701; *provided, however, that the dealer shall notify the division in writing of such purchase within 24 hours thereafter on an appropriate form available from the division.* The dealer may hold in his possession the Certificate of Number and Certificate of Ownership for vessel purchased for resale purposes until such time that he resells the vessel.

SYNOPSIS OF OTHER SUBJECTS
STUDIED BY THE COMMITTEE

OTHER SUBJECTS STUDIED BY THE COMMITTEE

In addition to the subjects covered in detail in the foregoing pages of this partial report, the committee held hearings and the staff of the committee did further study on the following subjects:

1. Furniture and bedding
2. Psychiatric technicians
3. Medical fees
4. Collection agencies
5. Private investigators and insurance adjusters
6. Exempt narcotics

The following is a brief synopsis of the ground covered by the committee and its recommendations.

FURNITURE AND BEDDING

The report of the committee on this subject is in preparation, and the following synopsis contains briefly the work of the committee. A full report on this subject will follow.

Senate Bill No. 797—Senators Teale, Miller, Arnold and O'Sullivan

FURNITURE AND BEDDING

This bill abolished the Bureau of Furniture and Bedding Inspection. It was the outgrowth of the licensing provision which set forth any manufacturer or dealer of upholstered furniture must be licensed to engage in that undertaking.

A small lumber dealer in a small foothill town, who had as an accommodation to one of his customers purchased an unpainted set of stools with a thin upholstered padding on them, was required to have a license which cost more than the merchandise he had purchased as a convenience for his customer.

The hearing held by the committee was lengthy and the subsequent investigation by the staff was penetrating and informative. It was indicated that many of the state laws and regulations were not being adequately enforced. That some control of out-of-state shipments should be adopted in order to protect the people of the State of California and also to protect California industry from unfair competition is indicated.

It was indicated that a great deal of merchandise in the trade channels of our country was in violation of Federal Trade Commission rules, which were not being enforced. In California there are only two F.T.C. enforcement officers. It was discovered that the administrative regulations setting forth quality and labeling requirements had been in effect for, in some instances, 15 years without change.

During the course of the hearing the license fees were spotlighted, and it was discovered that the largest license fee in the state was a drugstore chain and that three charitable organizations paid higher license fees than the largest furniture manufacturers in the state. The investigation indicated that the inspectors of the bureau did not feel free to take costly items of upholstered furniture in for inspection as no provision was provided to pay the dealer of same when these were taken at the retail level. Obviously, a small furniture dealer is placed at a serious economic disadvantage if a large sample is taken from his store.

RECOMMENDATIONS

1. That the present advisory board should be a full policy making and regulatory board with the authority to adopt rules, discipline licensees and set fees within the minimums set by the Legislature.
2. That there be a review of the license fees charged by the Bureau of Furniture and Bedding Inspection so that the fee be more equitable and reflect a volume of business transacted by said licensee.
3. Some consideration be given to the system of fines for violators. The money derived to be set up in a special fund to pay for samples taken for inspection.
4. There be a periodic review of the administrative rules and regulations adopted by the board. This should be done not less than biennially.
5. Some consideration be given to rules covering quality standards for all materials used, including the designation of the types of wood used in furniture construction.
6. Some control of out-of-state shipments be devised as better inspection could be enhanced.
7. A system of lot numbers be worked out so that merchandise found to be unfit for sale could be traced and placed off-sale.
8. The Legislature, by resolution, request through the Congress and executive branch of the government that the Federal Trade Commission rules and regulations with respect to furniture and bedding be rigidly enforced.
9. A statement of policy, that the California standards be not less than those adopted by the federal government for the furniture and bedding industry.

MEDICAL FEES

Senate Bill No. 374—Senator Christensen

This deals with medical fees paid by the state or any of the political subdivisions within the state to doctors, dentists, pharmacists, etc., for services. The bill provides that the amount paid by these bodies shall be equal to the usual and customary fees paid by the general public for these services.

At the public hearings held on this matter, the representatives of the healing arts testified that there was a great disparity between the fees paid by the state and various political subdivisions in the state to them for services to indigents and recipients of public programs. They pointed out that they had been unable to secure an adjustment of their fees and that it was unfair to expect them to continue in this fashion. The Department of Finance representatives indicated that they were paying more than the other states, that the fee schedule adopted was not unrealistic and that they had endeavored to be fair in their dealings.

RECOMMENDATIONS

No bill be enacted. That a Senate Resolution be introduced directing the Department of Finance to meet with the representatives of the healing arts and adopt a realistic fee schedule, taking into account, in setting same, the amounts the general public paid and pays for such services.

PRIVATE INVESTIGATORS AND ADJUSTERS

Senate Resolution No. 78—Senator Rodda

The above resolution introduced at the 1964 Special Session of the Legislature as the result of complaints from within the industry as to the operation of the Bureau of Private Investigators and Adjusters.

At the hearing, those parties who were instrumental in the introduction of the resolution pointed out that while there was an advisory board, the administration of the bureau did not reflect the wishes or suggestions of the board. The bureau licenses private investigators, insurance adjusters, reposseors and also provides for the registration of those working under licensees. These are known as registrants and are subject to the same screening procedure as the regular licensees.

Subsequent to the hearing, the Chief of the Bureau resigned and the administration remained in the hands of the Chief Deputy Director of the Department of Professional and Vocational Standards.

During the course of the hearing on this resolution, it developed that the fiscal problems of this agency had partially been created by, perhaps, overzealous use of the Attorney General's office instead of using commonsense to solve some of the problems that crop up daily in any licensing agency. It also is apparent from the testimony and subsequent investigation that the cost of screening and investigating the so-called registrants far exceeded the revenue received from the registrants themselves. The fiscal problems had partially been solved by the elimination of the chief of the bureau's salary, but this obviously will be a temporary measure and will not continue.

The automobile reposseors who are licensed by this agency pointed out in the hearing that they were compelled to be licensed as automobile reposseors under the Private Investigators and Adjusters Act and also must have a collection agency license, as they collected money due. This resulted in a dual license fee for the reposseors.

RECOMMENDATIONS

1. It is recommended that the present advisory board be eliminated and that a full policymaking and regulatory board for this bureau be created, the board to have the usual powers granted to such a body.
2. That the licensing of registrants be discontinued. As pointed out previously, this serves no useful purpose and costs more than the revenue produced for servicing this function.
3. That the automobile reposseors be eliminated from this bureau. They are already licensed by the Bureau of Collection Agencies and, inasmuch as they are handling other funds, this license must be maintained. This is a small group and the loss of revenue will not be serious.
4. That the present maximum license fee be increased to \$150 so that the board will have latitude to increase the present fees if necessary to maintain the operation of the bureau.

PSYCHIATRIC TECHNICIANS**Senate Resolution No. 98—Senator Short**

This resolution was the result of the desire of the psychiatric technicians themselves and other interested groups to get the registration program for the psychiatric technicians moving again.

The licensing and registration program was enacted in 1961. Because of internal problems such as incomplete registration and misunderstandings at certain levels, the registration program floundered.

After the introduction of the resolution, every interested group in the healing arts, as well as representatives of the various state employees' groups, met in San Francisco to discuss this program. They came up with a reasonable solution and presented it to the committee at its public hearing in Stockton last November. It was anticipated that with these changes and with full support of the program, it should function smoothly. The growth of private mental health facilities as well as expansion under the Short-Doyle program in local communities will greatly enlarge the need for psychiatric technicians.

RECOMMENDATIONS

That the program presented by the healing arts group be endorsed and submitted to the Legislature for passage.

COLLECTION AGENCIES

Senate Bill No. 1016 and Senate Bill 1017—Senator Gibson

These bills were the result of problems that have occurred in the collection field through the years and the combination of hearings by previous committees concerning the operation of this bureau. Two main problems occur that are still matters of controversy; one involves the administration of the bureau and the other concerns the audit program.

It is apparent from testimony at the public hearing held in Stockton and also from further investigation by the staff of this committee that there is a personality clash between the bureau chief and the licensees. The present advisory board is, on the main, ignored with respect to its recommendations and the bureau chief is prone to use the newspapers for disciplinary reasons and tends to use the licensees as whipping boys.

The audit provisions of the present licensing act were gone into in great detail. Previous to 1964, the licensees were audited by the state, some on an average of once every three years and many at much greater intervals. The present program of self-audit by licensed accountants was instituted. The very large agencies were most vehement in opposing this, alleging that the cost was prohibitive. The smaller licensees felt that this was most favorable and much better than the previous program. The estimates of the self-audit ranged from a low of \$100 to a high of \$12,000 for the largest licensee. Inasmuch as the result of the first self-audit has not been completed, the committee had no factual knowledge of the actual cost of the license.

RECOMMENDATIONS

1. That the present advisory board be eliminated. That a policy-making and regulatory board be formed and appointed to act as the administrative body to run this bureau.
2. That with respect to the audit program, this matter be deferred until such time as actual information is received from the bureau and the licensees regarding the cost of this audit. Should it develop that inequities are apparent, remedial legislation should be considered.

EXEMPT NARCOTICS

Public hearings were held in Stockton in December of 1964 arising from a request for the Board of Pharmacy to take action against certain licensees who are allegedly selling cough syrups containing exempt narcotics to teenagers and known narcotic addicts in the Stockton area. The Board of Pharmacy indicated that it did not feel that it had the authority to take appropriate action.

Hearings were scheduled by the committee to explore the powers of the Board of Pharmacy with respect to this alleged problem. Testimony was given by law enforcement agencies in the area as to the sale of cough syrup containing codeine to teenagers. It was pointed out that five pharmacies had been importuned to cease and desist. One pharmacy was reported to have sold over 3,000 bottles of these preparations in one month's time.

A subsequent audit revealed that five pharmacies in the area had sold over 50,000 bottles of these exempt narcotic preparations. The records in the area indicate that there are over 200 addicts under age 21, due to the easy access to these preparations. Testimony by the California Medical Association indicated that use of these preparations was addictive. A known death was attributed to narcotic cough syrup addiction. Subsequent investigation by the division and by the Board of Pharmacy indicated that this was not a problem peculiar to Stockton or local in any respect.

Surveys were made in the Los Angeles area and the San Francisco Bay area, showing flagrant violation of the spirit of the law and a need for changes. Comments by pharmacists in southern California were to the effect that only 1 purchase in 25 were for legitimate reasons. In the San Francisco Bay area one woman purchased six gallons of this preparation in a four-month period. Pharmacists have indicated that there are better cough syrup preparations on the market that contain no narcotics, which they recommend to customers, if so asked.

RECOMMENDATIONS

1. The exemption set forth in the Health and Safety Code which permits the sale of codeine in solution to the extent of one grain per ounce should be repealed.
2. Cough syrups containing narcotics should be dispensed only with a doctor's prescription.
3. The Board of Pharmacy be granted powers to administratively take appropriate action to restrict the sale of dangerous drugs so as to protect the public.
4. Manufacturers of any preparation containing narcotics should be designated on the label on any such preparation so that they might be easily traced to their source.
5. Wholesalers of preparations containing narcotics should be compelled to keep a separate record of these preparations and to whom they are sold. Retail outlets should be compelled to have corresponding records. Wholesalers should be prohibited from making special inducements to the retailers to buy large quantities of these preparations outside of normal demands. (At the present time dealers are importuned to purchase extra large quantities with the inducement that they will be given either a 50-percent or, in some cases, 100-percent bonus equal to the amount that they have purchased. In this manner it is almost impossible to keep accurate inventory control or check the sales and purchase records of the retailer.)

LETTER OF TRANSMITTAL

May 3, 1965

HON. GLENN M. ANDERSON, *President*
and Members of the Senate
Senate Chamber
State Capitol
Sacramento, California

Gentlemen :

Attached hereto is the report of the Factfinding Committee on Business and Commerce. The report contains a summary of the hearings held by the committee during the interim period from August 1, 1963, to December 31, 1964.

This report incorporates the views of the state agencies involved as well as private organizations and individuals as to those matters of particular concern to them.

Respectfully submitted,

ALAN SHORT, *Chairman*
LUTHER E. GIBSON
JOHN F. MCCARTHY

STAN PITTMAN, *Vice Chairman*
"J" EUGENE McATEER
WALTER W. STIERN

ACKNOWLEDGMENTS

The committee has tried to make this report as comprehensive as possible. This could not have been accomplished without the cooperation of the Governors of the various states and their appointed officials dealing with furniture and bedding problems. The committee wishes to express its appreciation for this cooperation, which enabled it to compare the regulations in effect throughout the United States, and, probably for the first time, to compile in one volume all of the known existing rules and regulations affecting the furniture and bedding industry.

Through the cooperation of the Association of Bedding and Furniture Law Enforcement Officials, the committee was able to ascertain the level of enforcement throughout the country, and to obtain expert opinion as to suggested law changes for the benefit of the public as well as the industry.

The committee also wishes to express its appreciation to the Director of the Department of Professional and Vocational Standards and his staff for their assistance and cooperation in connection with the California study. The department, along with the California Manufacturers Association and the California Retail Furniture Dealers' Association, rendered invaluable service to the Committee. The high degree of public protection is a tribute to their coordinated desire to maintain high standards in this important industry.

THE FURNITURE AND BEDDING INDUSTRY

This study of the furniture and bedding industry is an outgrowth of action by the Senate resulting from the introduction of Senate Bill 797 by Senators Teale, Miller, Arnold, and O'Sullivan, which bill would have eliminated the licensing of all retail outlets engaged in the selling of furniture and bedding; it also would have eliminated the omnibus clause that requires licensing for all other sales of furniture and bedding by any other means.

Introduction of the bill itself came about because of complaints by retailers who are required to secure license from the Bureau of Furniture and Bedding Inspection as a result of their sale of items technically covered by the Furniture and Bedding Act. These complaints were from such outlets as lumber dealers who, as a convenience to their customers, purchased unpainted stools with a thin cotton padding on them, or dealers in beauty supplies, office furniture, et cetera.

The Standing Committee of the Senate on Business and Professions, after a lengthy discussion on the bill, referred it to the Factfinding Committee on Business and Commerce for further study and report to the 1965 Session of the Legislature.

HISTORY OF FURNITURE AND BEDDING LICENSING AND INSPECTION IN THE STATE OF CALIFORNIA

Background

The original act covering furniture and bedding dates back to 1909, at which time the Legislature enacted regulations which provided that all items of furniture and bedding containing used material must carry a designating label. Failure to comply with this regulation was a misdemeanor and punishable as such.

It was not until 1911 that it became apparent the law was not being enforced, inasmuch as the Legislature had not placed its enforcement with any specific bureau or governmental agency, and in that year the Legislature placed the enforcement of this section of the general statutes with the Bureau of Labor Statistics and under the State Labor Commissioner.

The Mattress Act, enacted by the Legislature in 1915, prohibited the sale of any mattress which did not have a cloth tag attached to it setting forth the type of material used in the filling of the mattress, whether it was new or used, and also containing the name of its manufacturer. This was the only protection offered to the public until 1927, at which time the State Department of Agriculture was designated to administer the program, a licensing procedure was established, and the coverage of all upholstered furniture was provided for the first time.

In 1929 the law was again rewritten, and the licensing of manufacturers and retail outlets of furniture and bedding was turned over to

the Division of Weights and Measures. No further changes were made until 1935, at which time the present agency, the Bureau of Furniture and Bedding Inspection within the Department of Professional and Vocational Standards, was created to enforce the furniture and bedding laws in the State of California. This bureau issues licenses and acts as an enforcement body in accordance with statutes creating the Bureau of Furniture and Bedding Inspection, which provided for greater enforcement powers under the chief of the bureau and gave the director of the department the power to issue regulations and take items off sale that were not in conformity with the law. The enforcement remains standard to this date.

The only other significant change has been that the inspectors who formerly worked directly under the chief of the Bureau of Furniture and Bedding now work within the Division of Investigation; they make routine inspections and report violations to the chief and director. When necessary, the bureau calls upon the Division of Investigation for special assignments.

In addition to the laws enacted by the Legislature, the bureau has adopted administrative regulations spelling out in concise terms how the licensees should operate in conformity with the law. A modern, efficient laboratory is maintained by the bureau for the purpose of checking samples to ascertain that same are in compliance with the state law and regulations.

In 1955 there was established within the bureau a seven-man advisory board consisting of representatives from the manufacturing, the retailing, dealer, and sterilizing phases of the industry as well as a public member. It is the duty of the board to inquire into the needs of the industry and to make recommendations to the chief of the bureau and to its director as to how the bureau might better serve the best interests of the public.

PROJECTED EFFECT OF PROPOSED SB 797 ON THE FURNITURE AND BEDDING INSPECTION PROGRAM IN THE STATE OF CALIFORNIA

Fees

As a result of legislation enacted in 1963, fees for all agencies within the department were placed on a biennial basis. The projected budget for 7-1-63 to 6-30-65 was \$1,240,000. There were at that time 14,226 licenses in effect that would have been eliminated with the passage of SB 797. The total revenue from these licensees was \$428,280. This would have left a deficit in the amount of \$368,280 from the biennial budget of the bureau had these licensees been eliminated. Approximately 72 percent of the inspections made by any enforcement of the licensing act were made of these retail outlets. The projection is attached as an appendix to the report of the committee and made a part of this report.

TRANSCRIPT OF COMMITTEE HEARING ON FURNITURE AND BEDDING LICENSES

SENATE BILL 797

Sacramento, October 30, 1963

Senator Alan Short, *Chairman*, presiding

Index of Witnesses (In Order of Appearance)

Mr. Frank C. Freer, Chief, Bureau of Furniture and Bedding Inspection

Mr. Howard C. Winslow, Laboratory Supervisor, Bureau of Furniture and Bedding Inspection

Mr. Earl G. Waters, Chief, Division of Investigation

Mr. Edward D. Veady, Supervising Inspector, Bureau of Furniture and Bedding Inspection

Mr. Eddy S. Feldman, Managing Director, Los Angeles Home Furnishings Mart

Mr. C. L. Matthews, Member, California Advisory Board of Furniture and Bedding

Mr. Lesley D. Fay, Managing Director, Furniture Retailers Association

The Senate Factfinding Committee on Business and Commerce commenced a hearing on Senate Bill 797 on Wednesday, October 30, 1963, at the State Capitol, Sacramento.

Present at the committee table were: Senator Alan Short, *Chairman*; Senator Stan Pittman, *Vice Chairman*; Senators Walter W. Stiern and Lee M. Backstrand, *committee members*; and William W. Montgomery, *consultant* to the committee.

PROCEEDINGS

The Chairman: We have a quorum present and the secretary will note the present members.

At this time we will go into the subject that has been designated for this morning's hearing, Senate Bill 797, which was introduced by Senator Teale. The Legislative Counsel's digest tells what this does. It says if you are a retailer, you don't have to have a retail furniture dealer's license. And it includes other provisions that take away the requirement of having a license. Some of you other members may recall the presentation that was made. Senator Teale stated that there was a very small retailer up in the Mother Lode area that was selling a few stools. In fact, they weren't even painted, I believe he said. He sold maybe \$20 or \$30 a year worth of these stools and he had to get a license. In order to sell these stools, it cost him more than the entire sale of stools. He wondered if this was fair. He asked that that being the case, where he wasn't making any money—in fact, he lost money—that he not be forced to pay this fee. This was kind of a new subject for the committee. At that time I think Mr. Freer from the department came in with various exhibits showing how toys were stuffed and mat-

tresses and pillows and cushions, and the work they did in making sure that shoddy materials were not put into these various pieces of furniture. I think we were all a little bit confused. There was certainly a lot of opposition from the manufacturing end of the business. So we assigned this matter for interim committee study. That is what we are doing here this morning.

Now, I have some material that I will use from time to time. I want to encourage members of the committee to ask questions and to dig into this thing and see if in fact this revenue that is obtained and the various ways of licensing is fair and equitable.

I think the license charges are set out in Exhibits B1 and B2 of the material that is prepared by the Department of Professional and Vocational Standards. I note here in looking at it quickly that Englander Company, bed manufacturer, pays a license fee of \$240; Selby Mattress, \$120; Simmons, \$240. The complaint is made that Penney's, which distributes, had a fee charge of \$6,780. They don't make it. They just have it. But they sure are soaked with the fees on these retail outlets. I have some other information that such places, for example, as Goodwill Industries are charged fees of \$3,980; the Salvation Army, \$1,920; St. Vincent de Paul, \$1,660. They license various places and recondition furniture and sell it. You have big manufacturing places that currently are getting off almost scot-free. I think we ought to go into that this morning.

Is Mr. Freer here?

Mr. Freer: Yes.

The Chairman: Will you come forward, please. This is Mr. Frank Freer?

Mr. Freer: Yes.

The Chairman: All right. You are head of the Bureau of Furniture and Bedding, is that correct?

Mr. Freer: Yes, sir.

The Chairman: Will you describe for the members of the committee some of the things that you do in your bureau. What is the purpose of your bureau?

Mr. Freer: The purpose of the bureau is to see to it that all articles of furniture and bedding—that is, posted furniture and article of bedding—are properly licensed as to the content of the filling material.

The Chairman: Excuse me. Properly licensed as to the contents?

Mr. Freer: That are properly labeled; to see that all of the establishments, the manufacturers, upholsterers, bedding renovators, sterilizers, wholesalers, supply dealers and retailers, are licensed as is required under the California Furniture and Bedding Inspection Act. Also to see to it that the articles that are secondhand and are offered and exposed for sale in retail establishments are reasonably clean and sterilized. Also to see to it that the retailers properly advertise their merchandise in the selling program.

The Chairman: All right. As I understand it, the classifications you have in your bureau—and this is in the memorandum. Do you have a memorandum? You have a furniture manufacturer's biennial fee of \$120, is that correct?

Mr. Freer: That's right, sir.

The Chairman: And you have a wholesale furniture dealer's biennial fee of \$120?

Mr. Freer: That's right.

The Chairman: And that applies equally to bedding manufacturers?

Mr. Freer: Yes.

The Chairman: Wholesale bedding dealers?

Mr. Freer: Yes.

The Chairman: Supply dealers?

Mr. Freer: Yes.

The Chairman: Toy manufacturers?

Mr. Freer: Yes.

The Chairman: Wholesale toy manufacturers?

Mr. Freer: Yes.

The Chairman: In other words, if you have a plant in Sacramento where we are making stuffed furniture, toys, or we are a wholesale bedding dealer, then we would pay for that particular establishment's license with a fee of \$120, is that correct?

Mr. Freer: That is correct.

The Chairman: And that is for two years, is that correct?

Mr. Freer: That is correct.

The Chairman: Thank you. Then we go from there to furniture repair, bedding renovators, sterilizers. Each of these establishments pays an \$80 fee, is that correct?

Mr. Freer: This is correct.

The Chairman: And then we get down to the small fry, the retail furniture dealer, the retail bedding dealer. I take that back. Some of them aren't too small. The retail toy dealer. And for each of those establishments they have a biennial fee of \$20, is that correct?

Mr. Freer: That is correct, for the one class. Sometimes they have both classifications, which would make it \$40.

The Chairman: So if they are a retail furniture dealer and also a wholesale bedding dealer they might be paying \$140, is that correct?

Mr. Freer: If they have a wholesale and bedding dealer's license they would not need the retail bedding dealer's license. If they have the larger license it wouldn't require the smaller one.

The Chairman: All right. Now let's take the case of that posed by Senator Teale, this retail outlet for unfinished stools that happened to need padding in the more rustic area of the Mother Lode region. I will ask you if you know about the particular case Senator Teale brought to the attention of the committee.

Mr. Freer: I know of the case.

The Chairman: Thank you. Was that uncovered by one of your investigators?

Mr. Freer: That was uncovered by one of the inspectors working in the Division of Investigation during one of his routine inspection calls.

The Chairman: Under the jurisdiction of Mr. Earl Waters, is that correct?

Mr. Feer: That is correct.

The Chairman: Thank you. I see Mr. Waters in the rear of the room. Now, how much fee did that individual pay?

Mr. Freer: That fee would be \$20 for the biennial period.

The Chairman: Do you know how much business he was doing?

Mr. Freer: I have no knowledge of how much business he was doing. I have an idea as to the type of operation that he has. I used to be in the field. I can assume he carries a few items, say, like the stool. He might have even carried a sleeping bag in those areas. I don't know.

The Chairman: Have you had complaints from small retailers that their fees are too high?

Mr. Freer: At the outset of the biennial licensing period we had complaints not only from the retailers, but from all classifications.

The Chairman: Englander, for example?

Mr. Freer: Their name wasn't—We have a file of letters that we received from the different firms who are subject to the licensing program. I don't recall that they were a part of the complainants.

The Chairman: Thank you. How many employees do you have in your bureau?

Mr. Freer: In our bureau now we have 15.

The Chairman: And what is your budget for the 15?

Mr. Freer: The budget for the 15?

The Chairman: Roughly speaking. I don't expect you to have the exact figures.

Mr. Freer: Well, for the entire operation it is in the neighborhood of \$507,000 this year. This would include the people working in other areas.

Mr. Chairman: Five hundred and what?

Mr. Freer: Five hundred and seven thousand.

The Chairman: For 15 people?

Mr. Freer: No. This is for the people that were turned over to the division. The way the budget is made it includes the pro rata charges for other units that service our agency.

The Chairman: Well, what do you mean by that? For example what? Can you explain that to us, please?

Mr. Freer: Yes, sir. I don't have the budget here, but there are pro rata charges that are in our budget, in our overall budget, that go beyond the actual employees who work under my direct supervision. There is a departmental pro rata charge and there is a pro rata charge for services rendered by the Division of Investigation. There is a pro rata charge that goes to the Department of Finance.

The Chairman: The Department of Finance charges you too?

Mr. Freer: Well, they charge the department. Then I think there is some sort of program where the department prorates the charges to the agencies under the department.

The Chairman: And your own investigative division charges you for services rendered?

Mr. Freer: Yes. We pay that also.

The Chairman: But in your own bureau that is directly accountable to you, do you have 15 employees? Is that correct?

Mr. Freer: That is correct.

The Chairman: And what do these 15 employees do?

Mr. Freer: There is my position, the assistant chief of the bureau; there are five clerks in the headquarters office.

The Chairman: In Sacramento?

Mr. Freer: In Sacramento. And we have a laboratory that has a staff of eight people, which includes one sterilization plant inspector. They are also located here in Sacramento.

The Chairman: Now, these eight laboratory technicians, what do they do?

Mr. Freer: They are charged with the job of analyzing the filling materials samples as they are submitted by the field force under Mr. Waters' supervision.

The Chairman: Then Mr. Waters goes out to these various manufacturing places and renovators and retail outlets, gets samples and submits them to your laboratory force?

Mr. Freer: That is correct.

The Chairman: Now, do you have anybody here from your laboratory?

Mr. Freer: Yes. I have the supervising chemist here, Howard Winslow.

The Chairman: Howard Winslow?

Mr. Freer: Yes. He is the supervising chemist.

The Chairman: Thank you. Mr. Winslow, will you please come up. Will you sit down there, please. I am asking these questions rather slowly because I want to give members of the committee an opportunity to read the agenda that has been prepared by the department and to go over this particular problem so that they will have a little more knowledge of this. Now, the amount of money that you collect from your licenses on the two-year period is what, Mr. Freer?

Mr. Freer: It was projected for this first biennial period at \$1,073,000.

The Chairman: Or approximately what you need to pay your expenses?

Mr. Freer: That is correct.

The Chairman: Now, the expenses of the 15 alone account for how much each year?

Mr. Freer: I didn't bring the budget along.

The Chairman: Well, I think—

Mr. Freer: I would say it would be—

Unidentified Speaker: Two hundred and thirty-five thousand.

The Chairman: \$235,000 for the 15. Thank you. And the rest of the money goes for investigative services?

Mr. Freer: And the other pro rata charges.

The Chairman: Pro rata charges including the Department of Finance that charges you for their work?

Mr. Freer: That's right.

The Chairman: What work do they do for you?

Mr. Freer: I have to ask the department to answer that. I think it includes part of the services of the Legislature now.

The Chairman: All right. Can you explain that latter category to me.

Mr. Freer: I think the department can answer that better than I can. This is a rather new—

The Chairman: Your remark is it includes part of the services to the Legislature?

Mr. Freer: Yes.

The Chairman: The Department of Finance service to the Legislature, is that correct?

Mr. Freer: I would imagine overall.

The Chairman: All right. Thank you. Do you pay anything to the Attorney General's office?

Mr. Freer: Yes, sir.

The Chairman: How much do you pay them? Do you know?

Mr. Freer: I think it was in the area of \$3,000 last year. The amount we pay them is for services rendered in administrative hearings or maybe in Attorney General's opinions.

The Chairman: Thank you. Do you want to be seated for a few moments. I would like to talk to Mr. Winslow a little bit before we go back to you.

Mr. Winslow, you can sit there if you want to. Use the microphone so everyone can hear you, if you please. Your name is Howard Winslow and you are the supervising chemist of the Bureau of Furniture and Bedding Inspection, is that correct?

Mr. Winslow: Yes.

The Chairman: Talk into the microphone, please. You have seven people working for you, is that correct?

Mr. Winslow: Eight.

The Chairman: You have eight people?

Mr. Winslow: That's right.

The Chairman: Well, with yourself that makes nine.

Mr. Winslow: That is true.

The Chairman: What do you do?

Mr. Winslow: We analyze materials that are submitted to the laboratory that are used in articles of furniture and bedding.

The Chairman: How are they submitted to you? Will you explain this process?

Mr. Winslow: The majority comes in by first-class mail from the Division of Investigation and Inspection. Others are submitted direct from our main office.

The Chairman: Where do they come from?

Mr. Winslow: You mean the source?

The Chairman: Yes. Do they mail them to you? Where do they generally mail these things from? Los Angeles, San Francisco?

Mr. Winslow: San Diego.

The Chairman: And when they come in what do you do then, Mr. Winslow? What are you looking for when they send these samples in? Whether it is sanitary, whether they are using the type of material in the stuffing that they say they are on the label, and things like that?

Mr. Winslow: Yes, sir.

The Chairman: Whether it is filthy or dirty?

Mr. Winslow: Yes, sir. We look first for the cleanliness factor and secondly—

The Chairman: Now let's go step by step on this because I think a lot of people would be interested, housewives would be interested in knowing what they are getting and about things that they purchase that have stuffing in it, what is underneath the pretty exterior. Now, I have a list, Mr. Winslow, of your inspection reports. And I will tell you the truth. I was shocked. Will you explain this process, if you please? Let's start by determining whether it is clean. What kind of material is sent to you and how do you determine whether it is clean or not?

Mr. Winslow: Well, in the animal products, which would include feathers and down, wool, and your hairs, cattle, goat and horse hair, the first thing we would check for is any of the pathogens which would be present in the colon bacillus.

The Chairman: Any of the what?

Mr. Winslow: Pathogenic bacteria that are present, that may be present because the material had not been washed.

The Chairman: Pathogenic bacteria? Is that a polite term that you are using? I have a feeling it is.

Senator Stiern: Very polite.

The Chairman: Dr. Stiern says it is very polite. Thank you. Excreta?

Mr. Winslow: That's right. In the animal products these are the factors that would be tested for. Now, in the vegetable fiber products, such as cotton and your jutes and so forth, we would go for what we call the sludge content, which is a measure of the actual dirt, or any of the material that would sift through the tick and would cause maybe some agitation to the nasal passages or any other skin allergies that might arise. And then secondly in the animal products we would also test for the actual trash content, which would be added material over and above that which is normally encountered in those products.

The Chairman: What kind of trash do you encounter?

Mr. Winslow: In the cotton we would encounter a sand, excessive stem, dirt, hull, fiber, and so forth.

Mr. Montgomery: Bacteria?

Mr. Winslow: In the vegetable products you don't find bacteria in the newly manufactured articles. In the secondhand, yes. The only thing I would encounter in, let's say, new cotton, would possibly be some of the fungi bacteria. But this is very rare.

The Chairman: That's on the dirt part of it?

Mr. Winslow: Yes.

The Chairman: Does that cover the sanitation part too?

Mr. Winslow: Well, then the sterilization program is another factor.

The Chairman: Well, now, in the newly manufactured items that are inspected you take a sample from them and you expect the contents to be sanitary, is that correct?

Mr. Winslow: Yes.

The Chairman: There must be some process that they go through to make it sanitary, isn't there?

Mr. Winslow: Yes, sir.

The Chairman: What process is that?

Mr. Winslow: In the animal products the hairs have to be steamed, sterilized, autoclaved. And in the feathers and down they would have to be washed, sanitized—not sterilized, but washed.

The Chairman: Washed in what?

Mr. Winslow: It would be similar to your washing process at home only with a higher degree of temperature.

The Chairman: You mean soap and water?

Mr. Winslow: That's right. And in the wools, of course, they would have to go through the normal scouring process to remove the possibility of anthrax and so forth.

The Chairman: And they do this at the manufacturing plant?

Mr. Winslow: Yes, sir.

The Chairman: They are supposed to under the code, is that correct?

Mr. Winslow: Yes, sir.

The Chairman: Now, what standard do you use? Is there a state standard or a federal standard? Does the Department of Public Health give you a standard or does the Surgeon General of the United States give you a standard? How do you go about determining when there is too much dirt or too much anthrax or too much of the other things you mentioned, sand, stems, and so forth?

Mr. Winslow: The only thing that we have established newly since I have been here has been the sludge content. The other cleanliness factors were already established before I was employed by the bureau.

The Chairman: Sludge content is what again?

Mr. Winslow: It is a measure of the dirt, the actual dirt in any material.

The Chairman: What about the Surgeon General? Does he advise you in regard to this?

Mr. Winslow: Yes, sir.

The Chairman: Because you have things moving in interstate commerce, don't you?

Mr. Winslow: Yes.

The Chairman: Manufactured in other areas and brought in for sale to California?

Mr. Winslow: Yes, sir.

The Chairman: New things?

Mr. Winslow: Yes, sir.

Senator Stiern: Internally too.

Mr. Winslow: Yes, sir.

The Chairman: And does the Surgeon General set any standard for you?

Mr. Winslow: He can't set the standards for us. However, he does advise on what should take place as far as cleanliness is concerned.

The Chairman: Has he advised you?

Mr. Winslow: Yes, sir.

The Chairman: Do you have any correspondence from him?

Mr. Winslow: Yes, sir, indirectly through the Academy of Sciences.

The Chairman: And they forward it on to you?

Mr. Winslow: That's right.

The Chairman: And who is the Academy of Sciences?

Mr. Winslow: Well, the National Academy of Sciences is a group supported by the government which selects certain people to advise the federal government on standards for various things, the clothing, cement, bedding.

The Chairman: Thank you. Now do you have any directives or information from Dr. Malcolm Merrill from the Department of Public Health, or anybody under his jurisdiction, in regard to the standard that you should use and what you should look for when you are conducting these laboratory tests?

Mr. Winslow: We have correspondence from Dr. Merrill. I don't know exactly what it is. I have read it but I just don't know exactly what it is. It is in reference to sterilization, I am sure of that.

The Chairman: Do you ever refer anything to him for further analysis?

Mr. Winslow: Yes, sir.

The Chairman: Do you have any results from him as to what he has found in further analysis?

Mr. Winslow: Yes, sir.

The Chairman: Well, we will go into that in just a bit. Now, I have something here from the department that indicates that in 1957-1958, 1,418 samples were submitted to you.

Mr. Winslow: That sounds reasonable.

The Chairman: And that is what you analyzed. Correctly labeled was 859. Mislabeled and unfit for use was 559, or 39.4 percent. And in 1958-59 samples analyzed, 1,389. Correctly labeled was 605, or 43.6 percent; mislabeled and unfit for use, 784, or 56.4 percent. In the fiscal year of 1959-1960 there were 1,446 samples analyzed. Correctly labeled, 625, or 43.2 percent; mislabeled and unfit for use, 821, or 56.8 percent. And for the fiscal year 1960-1961—I think maybe this is when Mr. Waters was starting—I am not sure—maybe it was later—you had 2,599 samples. Correctly labeled was 1,620 or 62.3 percent. Mislabeled and unfit for use, 979, or 37.7 percent. In 1961-1962 you had 1,698 samples. Correctly labeled was 1,107, or 65.2 percent; mislabeled and unfit for use, 591, or 34.8 percent. In 1962-1963, samples analyzed was 2,125. Correctly labeled was 1,426, or 67.1 percent; mislabeled and unfit for use, 699, or 32.9 percent. This year to date you have 495 samples through September. Correctly labeled was 244, or 49.3 percent; mislabeled and unfit for use, 251, or 50.7 percent.

Does this square with your knowledge of the investigations that you made in your laboratory and the results that you found of the random samples that were made?

Mr. Winslow: Yes, sir.

The Chairman: This may be a good question for Mr. Waters later. Are these samples taken from suspected shipments, or are they, as I term them, random samples, to your knowledge?

Mr. Winslow: I have no knowledge whether they are or not.

The Chairman: Do you have a breakdown of what percentage of this is new samples, used samples, or furniture that is being sold second or third hand?

Mr. Winslow: No, sir. I would have no knowledge of that.

The Chairman: Or what comes from out-of-state?

Mr. Winslow: No, sir.

The Chairman: Doesn't anyone keep those figures?

Mr. Winslow: Must be kept in the main office.

Mr. Freer: I haven't tallied that type of workload. All we have is by the total number of samples. Years ago we kept this kind of a record and we were going to get back to this type of—

The Chairman: I would think so. Isn't it important to know?

Mr. Freer: By volume of merchandise as well as by article and type. That is what we have in mind.

The Chairman: Well, you are interested in knowing whether new furniture coming from other states is accurately labeled, aren't you?

Mr. Freer: That's right.

The Chairman: And when you are making furniture and mattresses that they reach in the right bin and get the right piece of material to put in the piece of furniture, aren't you?

Mr. Freer: This is right.

The Chairman: How are you going to know if you don't keep records of that sort?

Mr. Freer: Well, these are things we have in mind. We have started other projects which will give us more information too.

The Chairman: But you don't have the information now?

Mr. Freer: We don't have it by category at the moment, by type of merchandise or by the number of pieces. We could probably if we reviewed the records from the sample book, go back and find out.

The Chairman: Can you do that? Is there any way of correlating this with the samples that have been brought in through the auspices of Mr. Waters' office to determine where they came from? I will ask you, Mr. Winslow. Do you know where these samples come from, what particular store or manufacturing plant?

Mr. Freer: He doesn't know this at all.

Mr. Winslow: No, sir.

Mr. Freer: We have the master book in our office.

The Chairman: Will you make that available to Mr. Montgomery, the consultant?

Mr. Freer: It will take us a little time, but we can put it together. We have the big master book as of July 1st and any other book—

The Chairman: We would like to get this as soon as possible so that when we write the committee report we can put that information in. I think it would be very helpful.

Mr. Freer: I have the statistics partially way back in the early 30's which we can give you too, if you want to make a comparison.

The Chairman: I think if we take half a dozen years recently it would give us a picture of what is going on now.

Mr. Freer: All right.

The Chairman: Now, how many samples this year, for example, Mr. Winslow, have you passed on to the Department of Public Health for further study and analysis?

Mr. Winslow: None.

The Chairman: Last year?

Mr. Winslow: I think we have only had one sample within the past three to four years that we have referred to the Department of Public Health.

The Chairman: And why did you do that?

Mr. Winslow: Well, in our routine tests for presence of TB we picked up something we weren't sure of so we submitted it to the Department of Public Health.

The Chairman: And they made a further analysis of this?

Mr. Winslow: Yes.

The Chairman: And hopefully it wasn't?

Mr. Winslow: It was negative.

The Chairman: Thank you. When you say mislabeled or unfit for use would you define what you mean? For instance, what do you mean by mislabeled?

Mr. Winslow: Well, mislabeled would be any material that did not analyze out as specified on the analysis sheet which we received from the main office. Unfit for use would be those materials which were rejected because of cleanliness factors.

The Chairman: And do you know what the breakdown is?

Mr. Winslow: It is about 22 percent unfit for use of the 50 percent mislabeled.

The Chairman: I wonder if we could digress just a moment and ask Mr. Waters if he would come up, please?

Senator Pittman: Mr. Winslow, what seems to be the predominate cause for the unfit for use? Is it cleanliness or—

Mr. Winslow: Cleanliness factors.

The Chairman: Mr. Earl Waters, will you come over to the microphone and tell us who you are and what you do and how the samples are gathered and as to whether you are picking on somebody, whether you go down to St. Vincent de Paul's more regularly than you do the Englander Company, for example. Can you comment on that if you please?

Mr. Waters: My name is Earl Waters, Chief of the Division of Investigation. You are asking about the samples. We pick up about 150 samples a month at random. They are obtained from two sources, principally: at the manufacturer's level and the production line, and at the retailer's level. There are also some samples taken from the sterilizers.

The Chairman: Thank you. How big is your staff of investigators?

Mr. Waters: In the division there are approximately 125 people, but there are about 20-some that work regularly on the furniture and bedding.

The Chairman: They send the samples from San Diego, San Francisco, Los Angeles and—where else?

Mr. Waters: All over the state. They make routine inspections throughout the state.

The Chairman: Do you know what the percentage is of those that come from manufacturing concerns and those that come from retail outlets?

Mr. Waters: No, sir, I don't.

The Chairman: Is there anybody on your staff who does?

Mr. Waters: Well, I have two of the supervisors here who can give you an approximate estimate. I don't know that they have records of that type.

Mr. Freer: We can get this out of our log, I think.

The Chairman: Mr. Montgomery has given me some forms here, furniture and bedding reports. It lists the firm names, street addresses and so forth, and what they have done in the way of filling out this form. If you have the gentlemen here I would like to ask them to—

Mr. Freer: There is Mr. Ed Veady, who is supervising inspector, and Charles Cadlon, inspector in Los Angeles. Can you answer the question, Mr. Veady, the chairman has asked about the approximate percentages of manufacturers against the retailers.

Mr. Veady: It would have to be a guess but it will be a close guess. I would say 60 percent or 70 percent would come from the manufacturer, and possibly 30 percent from the retailers. But from the retail stores we are on the alert for the out-of-state. That's the only place we can find it.

The Chairman: So roughly speaking 70-30?

Mr. Veady: That would be a good guess.

The Chairman: Thank you. How do you go about taking a sample from a manufacturer's plant?

Mr. Veady: In going into a manufacturing plant you go into the—

The Chairman: Do you tell them you are coming?

Mr. Veady: No. We make a routine inspection.

The Chairman: You say routine. Do you call at regular times?

Mr. Veady: At regular times?

Mr. Waters: No.

Mr. Veady: Oh, no.

Mr. Waters: It is random.

Mr. Veady: At random. And it is left up to the inspector in the field. If he has not been there according to his card file he goes from the last date on this IBM card file record that he keeps. In going through the plant he may see a shipment of cotton, for example, that may look speckled or a little too dirty as to his opinion. He will take a sample and then get an analysis.

The Chairman: Is this before or after it is stuffed into something.

Mr. Veady: Before. And we do watch the assembling. The inspector goes along the assembly line and watches the employees filling the mattress from this filling material. If it looks so bad that it would warrant maybe holding that item—well, it is practically completed—all it needs is to be sewn up—he will hold that for evidence in case they are using secondhand cotton and mislabeling it and calling it all new.

The Chairman: Do you ever get any reports back to you as to the results of the laboratory tests?

Mr. Veady: Oh, yes. And it is given to the men so they can carry through and inform the retailer or the manufacturer as to the outcome of the analysis.

The Chairman: These are all violations of the law, aren't they?

Mr. Veady: Some would be violations and sometimes the inspector will pick up a sample that is all right and it will come back passed. So then we let the retailer or the manufacturer know that the item is as labeled correct.

The Chairman: Are there varying costs in a particular grade of stuffing?

Mr. Veady: There is. And that is another thing to be on the alert for.

The Chairman: So if they mislabel and say they are putting in first-class stuffing, whatever it may be—cotton or wool, or what have you—maybe Mr. Winslow could tell us about some of the other stuffing, like feathers, fur, or what have you—then the manufacturer, if it should cost him \$100 per lot and he is putting in \$50 per lot, and he mislabels it, this is money in his pocket, isn't it?

Mr. Veady: That's right.

The Chairman: And fraudulently so.

Mr. Veady: Fraudulently so, yes.

The Chairman: You see the number we got this year. It was over 50 percent mislabeled and unfit for use. That indicates something, doesn't it?

Mr. Veady: It does, yes.

The Chairman: That may be widespread in this industry.

Mr. Veady: True, Senator. There is one point I could bring out. If a manufacturer makes 100,000 items a year and he saves 50 cents on the cost of cotton by mislabeling it, like a 70-30 blend as against a 85-15, or something like that, you can imagine what they would make on the side.

The Chairman: I see. All right. Tell us about this out-of-state stuff. Most of it is new, I presume.

Mr. Veady: Oh, yes. It is new merchandise.

The Chairman: How do you go about this? Say you got a sofa and you want to find out what is inside. You stick a knife in it or—

Mr. Veady: No, we don't take a knife. We have to open it. We have tools to open the item as carefully as possible so that it could be put back together after we are through with it.

The Chairman: That is kind of a big job?

Mr. Veady: It is a big job. You have to be practically an upholsterer to do that. You have to know something about it.

The Chairman: Some of them you really can't do it to, can you?

Mr. Veady: Oh, yes.

The Chairman: Anything that comes in you can take apart?

Mr. Veady: Yes. Sometimes we ruin it but—Senator, the plastic type of material is where you have your problem. When you try to take the tacks out you will rip it and tear it. It isn't as tough. It is not real good covering.

The Chairman: Thank you. Do you have any funds to reimburse the retailer when you do this, if you damage an article?

Mr. Veady: The division doesn't have, as far as I know.

The Chairman: Doesn't that make for a reluctance on your part to do this?

Mr. Veady: It isn't any of our concern actually to see that they are refunded. The law says we have the right to open and submit samples that are under suspicion and so on.

The Chairman: How can you tell if it is suspicious?

Mr. Veady: Well, we go deeply into it.

The Chairman: Do you have someone feeding you information?

Mr. Veady: Several ways of doing it. Geographically is one, out-of-state.

The Chairman: You suspect some states more than others?

Mr. Veady: Yes.

The Chairman: I won't ask you for a list.

Mr. Veady: Another thing, you carry a little knitting needle with you or a crochet hook and you pull out a little. If it looks dark it is an indication.

The Chairman: And any shoddy filling—

Mr. Veady: Shoddy or waste material or too greasy or oily or dirty to be used.

The Chairman: And has this happened?

Mr. Veady: Oh, yes. And other thing too, if it is mislabeled, if it doesn't comply with our labeling. For example, if it says "cotton felt" that is not acceptable in California. It should say "cotton felt" with a breakdown. So if it says "cotton felt" we always open it and take a sample of it. And generally from the East it comes back "shoddy," "waste," "too much grease," "unfit for use."

The Chairman: You find this frequently?

Mr. Veady: Frequently.

The Chairman: And they are mislabeled?

Mr. Veady: Yes.

The Chairman: How long have you been doing this kind of work?

Mr. Veady: About 19 years.

The Chairman: So you are well experienced?

Mr. Veady: Yes.

The Chairman: I think we can assume that. Now, do you find that some particular manufacturers in other states are frequent violators over the years?

Mr. Veady: Yes. They continue to violate.

The Chairman: And they are still doing business?

Mr. Veady: Well, eventually they straighten up. If they don't they quit shipping into California.

The Chairman: Well, I asked you in regard to over the years. Do you know for example, any particular companies, without naming them, that continue to ship mislabeled items into this state?

Mr. Veady: I couldn't say that they are now. I couldn't say.

The Chairman: What you mean by "now"? You mean this month or this year?

Mr. Veady: No. I have been out of the field. I have been in the supervisory capacity. These pass my desk but I don't pay too particular attention to these outside manufacturers.

The Chairman: Well, what happened to the outside manufacturer who puts shoddy and greasy material and mislabels it? What happens to that manufacturer? What do you do to him?

Mr. Veady: The bureau handles it from there on and it is out of the division's hands.

The Chairman: And you lose sight of it?

Mr. Veady: No. We are made aware of what happens. But then it is out of our hands.

The Chairman: Is anybody fined or anybody taken to court?

Mr. Veady: No.

The Chairman: Or anybody suspended?

Mr. Veady: Not out-of-state that I know of. Mr. Freer would have that knowledge.

The Chairman: But as far as you know nothing has happened to these people.

Mr. Veady: Not to these outsiders. But here is what does happen as a penalty, is that the retailer here will quit buying. That is a big penalty. He will refuse to buy because he is having trouble continuously. So they lose their West Coast sales. Their representatives will even quit handling their merchandise. Might give it to another outlet. But it gets around and they refuse to handle the merchandise.

The Chairman: But the fact is that you are finding frequent samples of out-of-state furniture that have been mislabeled, isn't that correct?

Mr. Veady: It is not too frequent.

The Chairman: Well, what is the frequency?

Mr. Veady: I have to make a guess at that.

The Chairman: Everything intrastate and interstate to date over 50 percent is mislabeled or unfit for use. That means something, doesn't it?

Mr. Veady: The out-of-state, if it is picked up, would be pretty near, I will have to say, nearly 100 percent.

The Chairman: 100 percent what?

Mr. Veady: It would be wrong. Because the man hesitates in opening something that somebody paid for, and the contact is back East and perhaps he wouldn't get any remuneration because he has already paid for the item. So we make sure there is something wrong with this out-of-state.

The Chairman: I want to know how they are punished. This is a fraud on the public.

Mr. Veady: Yes.

The Chairman: You are here to protect the public, aren't you?

Mr. Veady: That's right.

The Chairman: The housewife that buys the furniture could tell a little story about that. Anyone that goes in has a right to depend on that label.

Mr. Veady: That's right, to prevent fraud and deception.

The Chairman: If 50 percent of the cases this year on a random sampling have been mislabeled or unfit for human use then something is drastically wrong. Wouldn't you say that?

Mr. Veady: Yes, I would say that.

The Chairman: Now, what can we do with these out-of-state manufacturers?

Mr. Veady: I have the answer to that now.

The Chairman: All right. Give me the answer.

Mr. Veady: The answer is the chief of the bureau issues an off-sale order which goes throughout the entire state. Then the inspectors will hold this merchandise off-sale and it will be sold so everyone is alerted to this firm, that this out-of-state firm is shipping in illegal merchandise.

The Chairman: All right. Well, does that mean they can't buy from this out-of-state firm?

Mr. Veady: No, no. They can buy all they want. But if it is illegal, when we come back again it will be—

The Chairman: Well, that is kind of a toothless order, isn't it?

Mr. Veady: No, I don't think so. The thing is, we have an off-sale order. We work on that.

The Chairman: Do you have a list of your off-sale orders now? Do you keep a list?

Mr. Veady: Yes.

The Chairman: Do you, Mr. Freer?

Mr. Freer: Yes.

The Chairman: Will you make them available to Mr. Montgomery?

Mr. Freer: Yes.

The Chairman: Now, we have forms 401, Furniture and Bedding Inspection Report. I have a sample record. Do you keep books on this?

Mr. Veady: Yes, records are kept on it.

The Chairman: Are they available on all inspections that you make?

Mr. Veady: Yes. We have the carbon copies and the bureau has the original copies.

The Chairman: Who has the carbon copies?

Mr. Veady: It would be in San Francisco.

Mr. Freer: The original is in our office.

The Chairman: Do you mind if Mr. Montgomery goes over these records?

Mr. Waters: No, sir.

The Chairman: Thank you. Now, in the information that I have here from the department it indicates that their records show that as far as enforcement results are concerned that in 1958-1959 there were three licenses suspended and none revoked. In 1959-1960 there were six licenses suspended and one revoked. In 1961-1962 there were two licenses suspended and none revoked. In 1962-1963 there were three licenses suspended and none revoked. Now, the number of inspections from 1958 through 1963 to date indicates—

Mr. Waters: About 25,000 a year, Senator.

The Chairman: 25,000 a year? The information I have on this is not correct then. It indicates certainly to me that the number of violations that you are having—and I think they are serious—they are clearly cheating the public and are evidently deliberately cheating the public. I think they ought to go to jail for it, frankly. I mean, it is just

like writing a bum check. It is like looting your pocket in any form. That is illegal. Now, are there any criminal penalties for this that you know of?

Mr. Veady: It is a misdemeanor, \$50 or \$500 fine.

The Chairman: Has anybody been jailed for this in this 1958 period to the current time that you know of?

Mr. Veady: 1958?

The Chairman: From 1958 to 1963.

Mr. Veady: Yes. We have had several arrests and fines levied.

The Chairman: Well, here is what I have. Prosecutions, 1958-1959, 19, and convictions, 12. 1959-1960, 33 prosecutions and 14 convictions. In 1961 we had a perfect batting record with 7 prosecutions and 7 convictions. In 1962-1963, 20 prosecutions and 8 convictions. During the period 1958-1959 there were 6 administrative hearings. In 1959 to 1960 there were 7. In 1961-1962 there were 2 administrative hearings. In 1962 to date of this report there were 3. Now, any time you have mislabeling and it appears to be a deliberate—especially when it appears to be a deliberate policy, you have a right to go to an administrative hearing and suspend or revoke licenses to manufacturers to sell or renovate, don't you?

Mr. Veady: That's right. But there is a policy from the bureau that you give them a chance to correct the error of mislabeling, and then it is a record. When the record fills up in the bureau's office then the signal is given that this person has been warned on several occasions, twice, say twice, and then action is taken either in criminal or disciplinary action.

The Chairman: Well, it would appear to me from the number of violations that we have a most compassionate bureau. Mr. Freer, how do you go about—

Do you have any questions, members of the committee?

Senator Stiern: I have some.

The Chairman: Go ahead.

Senator Stiern: My questions are rather varied and I don't care who answers them. First I would like to ask the chemist as to your office. What is your definition of cleanliness as it pertains to what you are doing? You use the word "cleanliness." What do you define cleanliness to be as it relates to this type of operation?

Mr. Winslow: As far as we are concerned in the laboratory it would only be those sections set down in the regulations and the law that we would be checking for that define cleanliness.

Senator Stiern: What does it say?

Mr. Winslow: Within our regulations there are several sections, one that puts a tolerance on the amount of oil and grease permissible, one on the sludge, trash, and also the oxygen number, which would be the main points we would be testing for; except that any of the materials that do contain pathogenic materials would automatically be rejected.

Senator Stiern: From what I understand I assume you are doing both organic and inorganic chemistry.

Mr. Winslow: Yes.

Senator Stiern: You are running biological testing as well as straight chemical testing?

Mr. Winslow: We don't sir.

Senator Stiern: Now, you mentioned the pathogens. How do you determine whether these are from animal origin as you think of livestock, or maybe it is from a rodent origin? Do you do warehouse inspection and do you intercept this between the manufacturer and the retailer, or is it taken right from the manufacturer? And how do you know whether it is rodent produced or whether it comes from the animals themselves?

Mr. Winslow: We don't, sir.

Senator Stiern: On imported products I want to ask you what checks you have on imported products, things that come from Mexico or things that come from the Orient? How do you control those products coming into the United States?

Mr. Winslow: I don't know, sir, because I don't know where the samples come from, where the source is.

Senator Stiern: Does anybody know? The reason I ask this question is because there are diseases in foreign countries that we don't have here, both of animals and humans. Mention was made of anthrax, which is a spore-producing disease. There are others. How do you control this?

Mr. Veady: May I answer part of that. The inspectors in the field, when they find down shipped from China, make a mention on the sample record so that the laboratory is made aware of what the bureau is made aware of, what locality it comes from. There is something in the very poor stock from China and then Mexico. When that sample is sent in the bureau is made aware of it. In fact, it is a must to tell where it is shipped from or brought from.

Senator Stiern: Is your laboratory able to detect anthrax?

Mr. Winslow: No, sir, I don't think so.

Senator Stiern: How do you determine it then?

Mr. Winslow: Well, we don't have any wools coming in lately, Senator, so we have not had a test for it.

Senator Stiern: What should you do if you wanted to test for it? Use the Public Health lab in Berkeley?

Mr. Winslow: We would probably, if it became a problem. If it is rare we would sent it to the Public Health. If it was something that was coming in on a routine basis, if we started to get a lot of wool in, we would set up our own procedure.

Senator Stiern: But you can't presently determine anthrax in your lab?

Mr. Winslow: No.

Senator Stiern: In other words, you can't check out for that disease?

Mr. Winslow: No.

Senator Stiern: How do you know whether the products come from slaughterhouses or tallow works or anything else as far as hide and hair and things like that are concerned? Do you have any way of determining these things?

Mr. Winslow: I have no knowledge of the source of the samples.

Senator Stiern: The reason I asked that question is because of what comes out of a tallow company and stuff that comes out of slaughter-houses, you have no way of knowing these things.

Mr. Winslow: No.

Senator Stiern: We were talking about cotton and wool. Do you inspect other things, like leather and bamboo and jute and burlap and this type of thing?

Mr. Winslow: Only as it would relate to a concealed filling material.

Senator Stiern: I assume you are doing tests of wool, of things that are put on animal wool to kill insects, ticks, and things. Are you able to determine whether there are chemicals in cotton and other products of this type that might be injurious to people on skin contact?

Mr. Winslow: Yes, sir. Especially your organic mercuries that they spray as a defoliant.

Senator Stiern: Are you able to test for these things?

Mr. Winslow: Yes.

Senator Stiern: Do you test for these things?

Mr. Winslow: Yes.

Senator Stiern: This is done on spot testing or random sampling?

Mr. Winslow: Random sampling.

Senator Stiern: I don't know whether you are the person to answer this or not. It seems to me that sometimes we lean way over backwards on some of these tests and other places we actually do very little. For example, if a mattress is sold from one part or the other we are very strict about sterilization and that type of thing so that the buyer isn't going to pick up something that is contaminated. Isn't that right? What I have a hard time reconciling myself is motels and hotels that have mattresses with hundreds of people sleeping on them every night and nobody does anything there. You sell automobiles in which the upholstery is shifted from one family to the other, or campers that have beds in them and all this type of thing. Do you do anything in this relation, or is that kind of an odd thing where we go so severely on one thing and are so lax on another? Would you discuss that?

Mr. Veady: The only thing we follow is the Furniture and Bedding Inspection Act, the law and what it covers. And that is not covered.

Senator Stiern: Why do you feel that the retailers should not be exempt if they are handling only products which carry proper labels from manufacturers and wholesalers? Why do you feel the retailer should not be exempt? What are the reasons?

Mr. Veady: That isn't for us.

The Chairman: What was the question?

Senator Stiern: The question is, why do you feel that retailers should not be exempted if they buy and sell merchandise that comes from manufacturers and wholesalers that carry proper labeling?

The Chairman: Will you answer that, Mr. Freer?

Mr. Freer: I can answer that by referring to several sections in the law.

The Chairman: We are talking about—

Mr. Freer: I would say that the law requires any person before they offer or expose for sale any article of bedding to be licensed in the category set up in the law, and each classification is defined. The retailer does have a responsibility insofar as when he begins to handle secondhand articles of upholstered furniture and bedding. I don't think I understood Senator Stiern. As I understood the question—The bulk of the sampling program in California is done at the manufacturing level. However, some is done at retail levels. The only place at the moment that we can check out the merchandise made by factories in other states or other countries is at these firms' distributing points in California, wholesale outlets, or at the retail level. The law provides that not only is the manufacturer responsible for the truthful labeling of articles, but anyone who has any articles of furniture and bedding in his possession contrary to the labeling provisions of the law. And I have been only following the law the way it is written. And these are the reasons I would say that the retailer's license—

Senator Stiern: I still don't understand why a small retailer, like variety stores, selling cushions, why he should have to be licensed and stand behind what that product is if the cushion has been labeled and is defined what it is and that it comes from a clean source, if the manufacturer or the wholesaler has so labeled that product. Why does the retailer have to be licensed and why does he have to verify—He couldn't verify anyway. He doesn't know what he is looking at. He isn't even trained like your inspectors are trained. What I want to know is what is lost where the retailer is exempted?

Mr. Winslow: Well, this law was here before I became the administrator of it and I don't know why this classification was included as a licensed classification. I know that the advisory board, since they have been a body of the bureau, have talked about this very thing at their meetings. Currently they are studying this problem also. Not only that, but maybe there should be a difference in fees if it is continued, a small retailer and a large retailer.

Mr. Montgomery: You could still make inspections whether they were licensed or not.

Senator Stiern: Do you do any work in the automotive field in this respect? The reason I ask this question, I know a man in my district who has an automobile upholstery shop setup. He can do anything he wants to cushions of cars. He can make them into—so that they break down into beds and campers. He can do anything he wants to a car that is a camper. But if he puts a piece of foam rubber into a footstool and puts a piece of naugahyde over it, you are on him like that. Do you do anything in the automotive field?

Mr. Winslow: We have not done anything in the automotive field. When I first came to the bureau I think there was a National Automotive Fiber Company in Oakland who not only furnished filling materials for auto seat cushions but also sold this material to the furniture and bedding trade. We did regulate that type of material that went into the furniture and bedding field.

Mr. Montgomery: Not as a supplier?

Mr. Winslow: As a supply dealer, yes.

The Chairman: I understand that Englander pays the state \$240 in biennial fees and here you have Thrifty Drugs with their outlets paying \$8,480 merely to merchandise it. He takes it as it comes in. I would suggest that one of the reasons is you probably get a real rise from the manufacturing end because they are not paying their fair share to support this bureau.

Senator Stiern: Is there a heavy traffic in these things across the Mexican border that you might consider illegal? I know in the automobile upholstering business there is a growing business. You drive the car across the border and have it reupholstered in Mexico and you drive back in and it costs you one-third what it costs to have it done here. Is this being done? Do people go down there and do people in San Diego go down there and buy mattresses and haul them back in the country without any inspection?

Mr. Winslow: This has happened. A couple of years ago there was a store in San Diego, I forgot who it was but I think they bought some mattresses—I don't remember the complete particulars—but I think that they were either sent back or they had to be relabeled. But I think they are pretty well out of control in that area.

Senator Stiern: This is a question I am just asking from a medical standpoint because it interests me. There are many diseases in animals which are called medically spore-form diseases. This is where the bacteria dies and the spore remains. How can you possibly kill them? You are concerned with things like pathogens but how can you possibly kill things like anthrax and some of the gangrene and that type of thing? How can you do this and still have a product left?

Mr. Winslow: You are referring to your sterilization clause?

Senator Stiern: Yes.

Mr. Winslow: The sterilization program was set down by the Department of Public Health and we just administrate their procedure. These procedures that they have set forth are now ours. They belong to the Department of Public Health.

Senator Stiern: Well, as a chemist, if you are familiar with what it takes to kill these things, you don't have—if you have a product that is a plastic or a naugahyde you don't have much left in the way of a product if you actually do this.

Mr. Winslow: That is true.

Senator Stiern: Then is this done?

Mr. Winslow: No. In the sterilization program actually to my knowledge all we are doing is killing the insects, the bugs that might be present. I don't think that we are killing all the germs.

Senator Stiern: I won't get fleas, but I will get anthrax?

Mr. Winslow: Yes.

The Chairman: We will take a five-minute recess.

(Thereupon a brief recess was taken.)

The Chairman: We will proceed.

I might say that this subject is broadening out to such an extent that I think maybe we better have another hearing on the matter. There are some things that our committee consultants should look into. It is my

understanding, for example, that one of the large furniture outlets has numerous stores in the State of California and that they have advertised sofas and mattresses that they were selling as damaged in shipment, whereas, in fact, they knew that they were secondhand. They had facilities to sterilize and they had a license to do so but it had not been in operation for 18 months. This is a rather flagrant violation. Apparently nothing was done to these people. Now, I think the committee consultants should get together with Mr. Freer and Mr. Waters and Mr. Winslow and do some more digging and find out why something wasn't done, whether people have been sending in samples that have been tested without paying for the testing, people that aren't ordinarily inspected by the State of California. Now, rather than to go into these things exhaustively this morning I would defer these and ask Mr. Montgomery to check these matters out and to continue compiling information. When we have sufficient information we will have another hearing on this matter. Because of the limited time and because there are witnesses here who have traveled long distances to testify in this matter I think we as members of this committee should allow them to go ahead without asking too many questions so that we can make our noon recess and then we will reschedule this whole matter at an agreeable date for further hearing. Is that all right?

Senator Backstrand: That's fine, Mr. Chairman. I do have a couple of questions that will be very brief.

The Chairman: Go ahead.

Senator Backstrand: They might be productive in our next hearing. I am going to preface this by saying if the factfinding committee and interim committee are going to justify their existence we should think seriously about what we are going to do in the way of—if legislation is necessary what are we going to do in this field at the next opportunity. Now, with that preface, Senator Stiern asked some questions about penalties. This is something that interests me greatly. I am not asking for an immediate answer right now, but what if anything is being done in checking our own state laws? I am interested in protecting our manufacturers and our retailers against anything that is unfair, anything that would hinder them. I think we should see what other state laws are. If there is no such thing as reciprocity you might have a focal point where articles might be manufactured that you would look into when they came into the state. Maybe we can do something in this connection that would not injure to the apparent extent that it has our local retailers and where our local manufacturers, California manufacturers, would not have unfair competition. There is another field that I suspect is not covered. In fairly recent years we have had synthetic materials that have been used and are being used. However, many of them are quite inflammable. I think possibly the Fire Marshal or somebody maybe should be incorporated in our laws because this can get to be a sort of a disastrous situation if a fire ensues and some of this inflammable material is used and at certain temperatures it practically explodes as you undoubtedly know. I don't expect that is covered in our present law. If it isn't I think it should be.

The Chairman: Thank you. Is Mr. Feldman here?

Mr. Feldman: Yes, sir.

The Chairman: I have a card from Mr. Feldman, who is the managing director of the Los Angeles Home Furnishings Mart. It is evidently a large one, judging from the picture of the mart on your card.

Mr. Feldman: It is, Senator. Thank you. I normally might not be expected to testify on this particular type of legislation, managing a home-furnishings mart which is simply a large building which rents space out to manufacturers and wholesalers, and where they use wholesalers and consumers and manufacturers, from the entire country and the world, not formally concerned with this kind of legislation. Prior to my present position I was secretary to the Furniture Manufacturers Association of California and have been rather closely associated with the legislation that we are considering this morning and also with some of the legislative changes in past years and with its administration. And so I would like to take a few minutes of your time especially to consider the ramifications of Senate Bill 797 and the nature of that proposed legislation as such that it spills over into these other areas that you have brought out so well, Mr. Chairman, this morning.

I might find myself repeating areas. Your questioning has been so comprehensive and the information so fine that there is very little for me really to say in addition.

The Chairman: I might say we just scratched the surface. Voluminous notes have been given us by our committee consultants so that if it may seem that we have broadly covered the subject, I think there is much more we can develop maybe in Los Angeles.

Mr. Feldman: I think there is. I might say the reason for my introduction here is that if one thinks of Senate Bill 797 by itself it is a fairly limited line of inquiry. If we are talking about the entire administration of furniture and bedding inspection in the State of California, then we do open an interesting series of matters that should be considered by the committee.

I am not only representing myself in terms of the interests, my own interests in this legislation by the interest of the association with it, but also the Furniture Manufacturers' Association of California which has about 200 furniture and bedding manufacturers in this state. I believe a wire was sent from some official of this organization to this committee indicating I might be testifying on their behalf.

The Chairman: Yes. We received telegrams indicating opposition to this bill and from the drycleaners in opposition to the bill that we will hear this afternoon. I assume they will have representatives here to personally testify. But generally that is something the legislative advocates representing these groups do during the session. Nevertheless, we will file the communications and see that they are given appropriate attention.

Mr. Feldman: Thank you. Speaking of Senate Bill 797 primarily here, which with a rather heavy hand wipes out all of the licensing of retailers in the state, I would like to say the following. Of course, in this last session of the Legislature the Legislature broadened the duties of the Bureau of Furniture and Bedding Inspection by adding the whole area of stuffed toys to its responsibilities. Stuffed toys, I might say, are only incidentally my interest. We do have wholesalers and manufacturers of stuffed toys who exhibit in our building, but the primary volume of that business comes from out of the state into the State of

California. As has been testified to here earlier, it is difficult to see how our laws will be complied with except through the retailer. The manufacturers of stuffed toys are rather negligible in California. The point of enforcement will have to be at a retail level. Enforcement through licensing at the retail level would be a little difficult for administration of the statute.

Your questioning and your introduction to the questions, Senator Short, brought out the problem of what seemed to be great inequities in the kind of fees that are being paid by retailers by way of manufacturers of this state. And there I think you have touched upon an interesting kind of problem. I would think that judging from the names of the stores that you have mentioned, like J. C. Penney and Sears—if you did not mention Sears that would be a case surely. What you have there is simply the number of outlets multiplied by the fee as prescribed in the statute. So consequently it looks quite large. Englander is just one manufacturer. And I might say to you it is a local branch of an out-of-state manufacturer, the ownership being elsewhere in the country—probably in the Middle West.

The Chairman: We weren't picking them out.

Mr. Feldman: But it was a good example and you were trying to demonstrate what appears to be an inequity. But it isn't the inequity it appears to be because it simply attaches a license fee on these particular outlets. The individual outlets may be buying through a coordinating buyer or they may be buying in each particular store under its own manufacturing manager, so the licensing is probably needed at those ends.

But let me go on and take another inference that I would draw from that. If we assume that the budget here, which has come in to some discussion is an appropriate budget—and I assume we are not really discussing the size of the budget in this department—but if we assume the half-million dollars which has been mentioned as a necessary amount to run this particular program as you have described—and you described a few things we don't seem to be doing—we are not worried about hotel bedding and theater seating and things like this which are of a great concern to some of us—if we assume that a half-million dollars is important it has got to be raised from someplace. And if you take that burden—wipe out the retailers as an illustration from licensing—I would gather that you probably would be wiping out half of the budget or at least half of the revenue. The revenue is going to have to come from someplace. And you said why don't the manufacturers pick it up, or something. You indicated it was a free ride for somebody. And we take that, we will say, \$250,000 and say okay, manufacturers, pick up your share of the burden. Then I think you are doing something to California industry which California industry or the manufacturers or producers can rather ill afford in the state. The retailers or dealers or people who are bringing in this merchandise from out of the state are bringing it in for a reason. There is a favorable economic reason for bringing it in. But whatever they bring in, Senator, means it isn't going to be purchased from local producers. They are buying it because it is cheaper elsewhere. Now, you say that revenue which retailers would normally be paying in license fees—put it on the manufacturers in California.

The Chairman: They pay a license fee too, don't they, out-of-state manufacturers?

Mr. Feldman: If you can find them, yes.

The Chairman: The same fee?

Mr. Feldman: It is a nominal fee. I am not complaining about the manufacturers in other states carrying a burden. You are going to load this on manufacturing. Numerically all manufacturers are smaller than all retailers. Take the furniture business alone. There are 6 thousand manufacturers in the United States and maybe 150-200 thousand retailers. I am probably small on retailers. But in any event the burden of the license—half of the budget will be saddled on a group of manufacturers, some of whom are out-of-state and the majority of which are in California. I am not prepared to give you the amount of money we are talking about but it would be a burden to producers in the state who are already paying the highest labor cost in the United States, paying a very good tax burden in the State of California with the finest social welfare program in the State of California. And to take this additional tax burden and put it on manufacturers is going to be another nail in a rather rapidly built coffin. I understand we are going to be talking about funeral directors. I would hate to provide them with any more business of this kind.

It has already been pointed out, Mr. Chairman, that when I said heavy-handed strokes in 797, if you were going to eliminate them the bill should be more carefully worded. I will give you one illustration. 19150 of the bill itself provides for something you discussed earlier, the enforcement of fraudulent advertising. 19150 embodies other sections of the B. and P. Code which relates to fraudulent advertising and misrepresentation and gives the chief, Mr. Freer, the power to go in and revoke a license by having embodied those other provisions of the B. and P. Code into our own furniture and bedding act. He now has the power to revoke a license for fraudulent advertising which otherwise they would have to be proceeded against criminally. And I think you are well aware how difficult criminal prosecution is in this field historically in this state.

The Chairman: I don't agree with your premise at all, but go ahead.

Mr. Feldman: It certainly has not been very effective in furniture and bedding.

Mr. Montgomery: You haven't tried.

Mr. Feldman: It has been pointed out the sterilization program, which is a part of the statute, is enforceable by this department. But again if you wipe out the retailer, this is the retailer who is receiving merchandise which has to be sterilized. Again the retailer has a function here and a function which should be supported. And as I am suggesting, of course, the retailer should and is not at all, as I understand it, unwilling to bear his particular burden of this kind of legislation and its administration.

I would think that your questioning revealed something lacking in the bureau's program. One of them was your expression of astonishment of the lack of knowledge we have about out-of-state merchandise coming into the State of California. You wanted to know properly the

volume of merchandise coming into the state. We can only tell you it must be increasing. I can tell you as an operator of a building who rents space to international producers that it must be quite good and must be expanding quite rapidly because we sell lots of space, increasing quantities of space, to those people as against our California manufacturers and exhibitors. I would say the department's problem should have an economist or somebody who is calculating or gathering data on these matters, and this might very well commend itself to your study and, I would trust, recommendation.

In conclusion it appears to me after watching this program for many years that to remove the retailers from the licensing provisions would handicap greatly the enforcement program of the problem and at the same time make it more difficult for local producers who would have to pick up the additional expense, make it more difficult for them to stay in business in this state under a wide variety of adverse circumstances. So in terms of Senate Bill 797 alone and asking for a recommendation on that one I would say that we would hope that a report on that piece of legislation as it is presently written would not be favorable.

The Chairman: Thank you. May I ask that you analyze the bill for amendments that you think would make it a good bill?

Mr. Feldman: Thank you. I would be pleased to.

The Chairman: Thank you.

Is Mr. Matthews present? This is Mr. C. L. Matthews, a member of the California Advisory Board of Furniture and Bedding.

Mr. Matthews: Members of the committee, I am a retailer representative on the board and I think that this law is a great threat to the retailer in the manner of protection. We have our people administer the law and help us to select our merchandise and offer to the public those things that we think are good to sell. And we are not thieves. We are people that would like to sell people merchandise that we think will stand up. If we don't do that the consequences are later when the lady comes back and says she wouldn't like to pay for that piece of merchandise because it is not what it was represented to be. Unfortunately the labeling of merchandise I don't think is very well understood by the buying public. I think the dealer has to more or less emphasize—

The Chairman: Apparently not by some of the manufacturers and retailers either.

Mr. Matthews: That's right. And I do think it would be rather difficult and probably beyond my scope of imagination to see as to how we would be able to control the people who are selling used merchandise and also those people that stoop to the level of changing labels. And we have had some of this happen in the past. It has been caught by either the manufacturer or the inspector.

The Chairman: Including one of the members on the Advisory Board.

Mr. Matthews: I am not cognizant of that so I wouldn't want to be condemning him. I think that one of the biggest items that we have and that I don't offer as being a complete correction is the misleading advertising. I think we have corrected some. I don't think we have been able to offer to the public a complete corrected agenda of adver-

tising. We find some lack in some of the district attorneys in the area. I find they are not always willing—as Senator Stiern mentioned, on the hotel mattresses—that they are not so willing to judge against one and not the other.

Are there any questions that you would like to ask me as a retailer? I think that I am paying for a real protection when I pay \$20 a store for my license.

The Chairman: How many stores do you have?

Mr. Matthews: I have three.

The Chairman: So \$60 every two years?

Mr. Matthews: Yes.

The Chairman: Do you represent all retailers?

Mr. Matthews: Well, I can't say that, Senator Short. I talked to Ralph Brown, the manager-director, and I believe you have a wire from him—of the Retail Furniture Association of California.

Mr. Freer: I think we have Mr. Fay here, their managing director. Is Mr. Fay here?

Mr. Fay: Yes.

The Chairman: All right. Thank you very much. Les Fay.

Mr. Fay: I am Les Fay, managing director of the Furniture Retailers Association of Southern California. At our last count at the last board meeting we had 748 members. I would like to say that in as many of my members as I was able to poll before I came here we sort of resent being protected to such an extent as to take our licenses away from us. Believe me, I don't know anyone that wants to hold on to a buck any more than our dealers do and they don't like inspectors in their stores, but this is one time that they certainly agree with the law because we have so many people in our industry, especially in southern California, that have little tiny stores, the man and the wife and the son and the daughter will run the store. So many of them are upholsterers themselves. And what would happen would be—

The Chairman: I gather they are not members that you represent.

Mr. Fay: Well, maybe they are and maybe they aren't. Anyhow, they can easily take it in the back room and shoddy, filthy materials could be put into it and there would be no way of catching them. I happen to have had experience for six years as a manager of our subsidiary and over the years we became the largest distributor of Eastern merchandise. We only handle furniture. And let me tell you something. There are more overstuffed chairs sold from the East than from California manufacturers. There is no regulation except through the retailer. Now, we are selfish. We know we are selfish. But we don't want these retailers—some of these people we call animals that don't care whether my little granddaughter could get into an overstuffed piece and catch some horrible disease. We want to be protected from those people and we want our dealers protected. And they are perfectly willing to pay the fees and to have the license. Now, the only thing we objected to when this new change came was against the principle of paying for two years—not the fee itself. But that is another question that is not appropriate here. So I would say that the great majority of our people in southern California in the furniture business definitely

do not want 797 passed in the Senate or in the House either. We just would like to keep the law as it is because it is working very effectively with our people.

The Chairman: Thank you very much.

Senator Stiern: Mr. Fay, you mentioned that you wanted your granddaughter protected against the horrible diseases. You heard a while ago the comment that we can't protect you against the horrible diseases, that they can't detect this. You realize this?

Mr. Fay: Well, I realize it, yes. But I think that in most cases the strict sterilization requirements would take care of most diseases, not entirely all of them possibly, but most of them.

Senator Stiern: Not the horrible ones. That's the words you used.

Mr. Fay: Maybe I was being overdramatic on that point.

Senator Stiern: Thank you.

The Chairman: We are all through with furniture and bedding today. This will be continued to another date.

LICENSE FEE STRUCTURE IN CALIFORNIA

It might be well to examine the fee schedule of the bureau in connection with the report which is attached as an appendix to the report of the committee. The bureau has 10 license categories with the fee ranging from \$20 to \$120 per biennium. The retail furniture dealer and the retail bedding dealer each pays the minimum fee of \$20; the furniture repairer, the bedding renovator and the sterilizer each pays a biennial fee of \$80. The furniture manufacturer, the wholesale furniture dealer, the bedding manufacturer, and the wholesale bedding dealer, as well as the supply dealer, pays a biennial fee of \$120.

In-state Licensees

By far the largest category and the major share of revenue is paid by the retail outlets. Seventy-two percent of the licensees, or 14,226, were either retail furniture dealers or retail bedding dealers. Twelve percent or 2,318 were sterilizers, renovators, and furniture repairers. Sixteen percent or 3,244 were manufacturers, wholesale furniture dealers, wholesale bedding dealers, or supply dealers. It might be noted that the small neighborhood upholstery shop owner, who occasionally may make a footstool or a small item for a customer, invariably pays the full manufacturer's license. The fee schedule and the apparent disparity in the application of fees, as shown in the exhibit and made an appendix hereto, are patently unfair and lopsided, which no doubt was the contributing factor in the introduction of SB 797. Concern with the fee schedule is perhaps best expressed by Chairman Short at the public hearing held in Sacramento on October 30, 1963.

Chairman Short: "I note here . . . that the Englander Company, bed manufacturer, pays a license fee of \$240, Sealy Mattress \$120, Simmons Mattress \$240. A complaint was made that Penney's . . . had a fee charge of \$6,780. . . . Some other examples are the Goodwill Industries—charged fees of \$3,980, the Salvation Army \$1,920, and St. Vincent de Paul Society, \$1,660—who license various places and recondition furniture and sell it. You have big manufacturing companies currently getting off almost scot-free . . ."

A cross-sampling was made of the amounts paid by various licensees engaged in the furniture and bedding business in the State of California pursuant to the regulations covering these operations. Attached as an appendix is the most interesting result of this selected survey. The Simmons Mattress Company, probably the largest manufacturer of sleeping equipment in the United States, which undoubtedly makes more mattresses in California than any firm, has one plant in California located in the San Francisco Bay area. Its licenses for furniture manufacturing and for bedding manufacturing total \$240.

The Kroehler Manufacturing Company, one of the largest manufacturers of upholstered furniture in the country, has two plants in California and pays biennial license fees of \$240 for these two plants.

The Englander Company, a large mattress concern with nationwide distribution, has two plants in California and pays total license fees of \$240.

The Sealy Mattress Company, which is a franchise of a national organization, has one plant in northern California and one in southern California. Each plant pays a license fee of \$120 as bedding manufacturers. These are probably the largest manufacturers of furniture and bedding in the State of California.

The real paradox occurs when we examine the licensees contributing the largest amount to the support of the Bureau of Furniture and Bedding Inspection. The committee learned that Thrifty Drug Stores, which paid \$8,480 for the licensing of its 212 retail outlets as a combination furniture and bedding retailer at \$40 per store, was the largest single contributor to the income of the Bureau of Furniture and Bedding Inspection.

Next in line was J. C. Penney Company, a retail dry-goods chain which specializes in white goods, workmen's clothing, and inexpensive general articles of clothing. It is hard to assume that a great deal of furniture is sold by this chain. Its biennial license total was \$6,780.

Safeway Stores, a food chain, pays \$6,440 biennially to the bureau for the retail bedding license it has for its California stores. F. W. Woolworth, the well-known five-and-dime chain, pays a total of \$6,240 in license fees.

It would appear from the foregoing that the supermarkets, the drug chains, and the charitable organizations which rehabilitate used items of furniture, pay by far the largest sums into the bureau.

Those firms that are in the furniture business and derive their income from this business obviously pay a disproportionate share of the license fees.

With the possible exception of Montgomery Ward and Sears, which pay biennial fees of \$4,320 and \$6,720 respectively, it is impossible to correlate fees and justify the inequities that now exist. The furniture chains in California are Breuners, Barker Bros., Jackson Furniture Company—department stores like the May Company and Macy's. The fees paid by these organizations as examined in the tax schedule are ludicrous.

It would appear that those stores selling decorative pillows and items of that kind are bearing a disproportionate share of the revenue derived and needed to support the Bureau of Furniture and Bedding Inspection.

Licensing of Out-of-state Manufacturers

One of the great problems, and one that will be touched upon later, is the licensing of out-of-state manufacturers. The tremendous growth of this state and the construction of hotels, motels, and apartments, has resulted in huge amounts of furniture being shipped directly to such

establishments within this state. It is almost impossible to police this operation to ascertain whether the manufacturer is licensed to do business in the State of California, if the wholesaler or broker is properly licensed, and if the items themselves are in conformity with the minimum standards established by the state.

In a further discussion of the license fees, to be conducted later in this report together with a comparison of the various laws and licensing procedures in other states, it would be well to consider the other methods toward the possibility of reevaluating the fee schedule in order to place the burden in its proper perspective.

Inspection of Licensees

Enforcement of the furniture and bedding laws and regulations in the State of California is manifold. The inspection bureau ascertains that those engaged in the industry are properly licensed; samples are referred to its laboratory for analysis; labels attached to various articles are checked to determine if they are in conformity with the laws; a final phase is the checking of advertisements to see that items advertised for sale and on display are not false and misleading.

With respect to articles manufactured in the State of California, the bureau makes calls on factories at frequent intervals and takes random samplings of filling material and the finished product for inspection by its laboratory. These inspections are a deterrent to mislabeling and to the manufacture of items not in conformity with state law.

Out-of-state merchandise obviously must be inspected at retail outlets. This method of inspection creates a hardship on the retailer, as there is no fund available to pay a retailer for an item removed from his store for inspection by the laboratory, and for the small retailer this is a hardship. It has created serious problems in the enforcement of the state furniture and bedding laws.

Quite obviously, an inspector is going to be extremely reluctant to appropriate a mattress costing over a hundred dollars or a day sofa costing four or five hundred dollars, for inspection. Insofar as out-of-state merchandise is concerned, this must be done.

What has resulted is a disproportionate share of small items such as pillows getting a great deal of attention, and supply dealers being inspected rigidly. It also means that the out-of-state manufacturers are in a much better position to gamble on evading regulations, for the odds of being inspected are obviously much less than for a manufacturer within the state.

Committee Uncovers Rampant Abuse

The most effective arm of the bureau is the laboratory. This laboratory, located in Sacramento, is of recent construction and is one of the most modernly equipped laboratories in the United States. The laboratory analyzes from 1,400 to 2,500 samples per year.

A great deal of consternation was created at the October hearing when it was revealed that for the three-month period prior to the hearing, over 50 percent of samples analyzed by the laboratory, at

the request of the committee, were found to be mislabeled and unfit for use by the public. Attached as an appendix is a breakdown of the laboratory reports for the years 1957 through 1963. This shows that the samples analyzed by the laboratory range from a low of 33 percent to a high of almost 57 percent found to be mislabeled and unfit for use.

One of the major problems in the enforcement of the bedding laws was the time lapse between the time the inspector sent the samples to the laboratory for checking, and the date he received the results with instructions from the bureau chief as to how to proceed. In many instances, there was a time lag of five weeks. This resulted in a complete breakdown of protection to the public.

In one instance, a dealer in chicken feathers, a sideline to his poultry business, was marketing feathers that were unfit for use. When the reports from the laboratory came back, the stock was gone and impossible to be traced.

In another instance, one of the large chains had advertised overstuffed chairs for sale at such a reasonable price that the bureau was suspicious; upon examination of one of the chairs, it was found that the product was improperly labeled. The advertised foam rubber cushions were actually filled with synthetic polyurethane foam. The difference in cost and quality of these two paddings was considerable. By the time the bureau had completed its analysis, all the chairs had been sold to the public.

It appeared to the committee at its hearings in October of 1963, that the laws of the state were good, but that there had been a breakdown in enforcement and, consequently, it must be assumed that the public has not had adequate protection for a number of years. There was no way to track merchandise that was improperly labeled. The public that had purchased items in good faith, assuming they were as labeled, was never advised that the products purchased were not as represented.

The committee received an avalanche of letters subsequent to its hearings because of the publicity that was generated. It was interesting to note that the large retail furniture stores, who paid the smallest fees, did the most complaining. The small dealer and those who did not derive their major income from furniture sales did not complain at all.

One letter indicated that there was previous knowledge of when the inspector would be coming to town. Others advised that the inspectors apparently were interested solely in ascertaining whether or not the licensee had secured his license for the ensuing year.

The staff of the committee was advised by a member of the Legislature, who is a licensee of the bureau, that his partner had been contacted by one of the bureau inspectors and treated rather abruptly when the inspector made his call. The purpose of the call was to ascertain why their license had not been renewed for the ensuing period. In checking, the partner of the legislator discovered that the renewal notice had been misfiled and, through an oversight, the biennial fee had not been paid. In all the years he had been in the business, that was the first time he had ever been visited by an inspector; he indicated that if he had paid his fee on time, he probably would not have

seen the inspector then. The legislator and his partner, who are in the office furniture business, stated that they have never had an item that is covered by the California regulations checked by anyone from the bureau.

The reaction to the public hearings of the interim committee was interesting. The industry was offended and so was the public, but for two different reasons. Letters from the public reported instances where they were unable to secure redress. These were forwarded to the bureau and, we are pleased to say, were handled with dispatch; in almost every instance the public was satisfied with the results. In some instances exchanges were made and in others adjustments were made.

As a result of the public hearings, a new enforcement program went into effect, resulting in a crackdown on violators and further speed on the part of the bureau. When inspectors in the field now find a violation of state regulations, the article is sent to the laboratory for analysis and all articles of the same style are withheld from sale. The laboratory procedure has been streamlined to get much faster results. In the past, a small sample was analyzed; now the entire article is analyzed. The inspectors now pick up and check large items such as mattresses, chairs, and sofas, rather than the former heavy concentration on pillows. Considering that a family's third largest item of expense is household furniture, it is logical to assume that these larger items, which represent a substantial investment by the retailer, are those deserving the closest scrutiny. Should a pillow be improperly labeled, the consumer might be out 10 or 15 dollars; however, if he bought what he felt was the best mattress or the best chesterfield set, and this was not the case, he could be out several hundred dollars. The results of the new procedure have not only been most heartening but indicate that it is working.

Since the new enforcement program went into effect, over 25,235 articles of furniture and bedding have been shipped out of the state instead of being destroyed by the bureau. About one-half million dollars worth of chairs and sofas from out-of-state was held at one off-sale early last year. This is the first time in the history of the bureau that such effective enforcement was established, but not without a storm of protests from eastern manufacturers. Some governors called on behalf of those manufacturers and the authority of the state was questioned. The bureau explained the legal basis for the inspection program and mailed letters to each of the manufacturers advising the type of violation and what was necessary to correct such violation.

As a result of the stepped-up activities on the part of the bureau, trade papers all over the United States publicized the new enforcement program in California. There was chain reaction. Supply dealers complained because manufacturers to whom they sold were holding them accountable for materials they had supplied. Some indicated that they felt California was discriminating against out-of-state manufacturers. When one considers the total number of manufacturers in the United States, there actually was not a disproportionate share of in-state and out-of-state inspections, and inasmuch as the California manufacturer is checked at his factory with closer control maintained, it

would seem obvious that more concentration at the retail level should be made on out-of-state merchandise. The new enforcement program of the bureau provides for the checking of each manufacturer's products at least once in a three-year period. This will be done by random selection.

Coordination Meetings Held

As a result of the enforcement program, there have been meetings of the committee staff and the Department of Professional and Vocational Standards officials with leading retailers and manufacturers in the United States. The bureau had discovered last year that, for technical reasons, almost every mattress for sale in California was not in full compliance with the state's regulations. Obviously, it would be impossible to withhold all of these items from sale. A meeting was arranged with the suppliers of material to the manufacturers and the manufacturers themselves. It was pointed out that the component parts were improperly listed and that the pads used were misquoted as to size, weight, etc. The group met with a committee staff member sitting in as an observer. As a result of this meeting, the manufacturers are now in full compliance with the California law and, where there had been complaints in the past, they are in full agreement that the high standards set must be maintained.

Guarantees that many manufacturers use in connection with the sale of their mattresses were questioned. As a result, new advertising language will be adopted with further protection of the public. The state officials have been advised that the quality of filling materials has been improved considerably since the stepped-up enforcement program. Manufacturers are insisting on materials that will meet California's requirements and the supply dealers must comply or lose their business. In order to comply, they are giving more than the minimum in order to insure that the items will pass inspection. This has resulted in the California consumer getting not only value received, but in some instances more value.

The consultant to the factfinding staff attended a meeting of bedding law enforcement officials and national bedding manufacturers in Chicago in early 1964 along with officials of the Department of Professional and Vocational Standards, and it was interesting to note that they were sought out by the out-of-state manufacturers to ascertain what was going on in California. It was apparent that the enforcement of the law and new procedure had shaken them up considerably. One of the manufacturers indicated that he was having a laboratory pre-test his supplies before he used them. This bodes well and good for the consuming public.

The Feather Merchants

The one area that has created the most trouble, strangely enough, is that area which has had the most service, that is, among the pillow manufacturers. Earlier in the report, it was stated that there has been more activity in this field than any other because of the low unit cost and the lack of reluctancy on the part of the inspector in checking pillows for possible violations.

The committee staff checked the inspection reports and ascertained that this was one area where the public was not getting value received. The greatest mislabeling was in this area. As a result of information received by the staff of the committee, and working in close cooperation with the Bureau of Furniture and Bedding Inspection, the bureau was able to throw out a number of pillows placed on sale that were not sized as set forth on the label and, almost without exception, all manufacturers were violating state regulations in one way or another.

At one time in 1964 there was not a down pillow for sale in California in any of the major outlets because of the inspection program. As a result, the large retail stores, the pillow manufacturers, and the suppliers met with state officials in Sacramento to see what could be done to rectify this matter. The manufacturers requested three months to get their houses in order, and stated that they would comply with the regulations if given the opportunity. This hope for a solution did not work out, and at the time this report is written, every major manufacturer of pillows doing business in California has an accusation filed against him by the bureau. Administrative hearings will be held setting forth the nature of the complaints and violations.

It would appear that the big problem lies with the manufacturers themselves. There is an outraged cry on their part that the regulations set forth by the bureau are unfair. They indicate that it is impossible to operate within these regulations. (Further on in this report, the various administrative regulations in California will be compared with those of other states.) The big problem lies in down stocks. The manufacturers are required to label their pillows accordingly. If a pillow contains roughly 80 percent "down" in fiber, it may be labeled "all down." This is because when the stock is cleaned and goes through processing, there is difficulty in maintaining a given level, and the bureau and the state have decided that this is a fit tolerance. In checking with other states, we have ascertained that over 90 percent of the more expensive-type down pillows, when checked, are found to be in compliance with state regulations. It is when there is a competitive situation that the problem becomes aggravated. It is further aggravated by the fact that laws are not enforced equally in each state. As a result of the stepped-up activity and the manufacturers being called to task in California, it was hoped that the problems would diminish. Such was not the case. While the federal regulations promulgated by the Federal Trade Commission are as stringent as, if not more so than, the California regulations, it was quite obvious that pillows are being shipped via interstate commerce that are in obvious violation of the Federal Trade Commission regulations. At the meeting in Sacramento earlier this year, FTC inspectors were present.

Discussion was made of the fact that used down was in new pillows shipped into California by an out-of-state manufacturer. While it is true the bureau could hold them off-sale at the request of the manufacturer, the bureau was forced to ship these pillows back to the manufacturer. As far as we can determine, no followup was made by FTC nor was any federal action taken against the violators of the federal regulations. Unless there is closer cooperation with the bureau and the federal government, California manufacturers are going to be

placed at a severe disadvantage and the California consumer cannot be assured of 100 percent protection. The manufacturers themselves will admit off the record that items that they ship out of state, or within a state that has little or no enforcement program, fail to meet not only the California specifications, although manufactured here, but federal specifications. One manufacturer admitted shipping pillows into a neighboring state that were labeled "all down" but had little or no down in them. This was to meet a competitive situation where a competitor was selling pillows to the same retail outlet labeling them as down and filling them with kapok. This could happen in California when federal regulations are being ignored, and the federal government is certainly not offering the protection that the public should expect. The chairman of the factfinding committee attended the meeting of the California manufacturers and suppliers in late 1964 and pointed out to them that they were being placed at a competitive disadvantage since federal controls are not being enforced.

NATIONWIDE SURVEY OF REGULATIONS

Subsequent to the hearings held in October of 1963, the staff of the committee surveyed the other states and the federal government to ascertain the types of controls used. The states were asked to forward to the committee a copy of their regulations and a breakdown of the types of licenses required, if any. The committee received replies from 26 states and also received a reply from the Federal Trade Commission with a copy of the regulations enforced by the federal government. In addition to the information received from those states replying, the committee understands that five other states have regulations but they failed to reply to our letter of inquiry. The District of Columbia and the City of Detroit also have regulations covering the furniture and bedding industry in their respective areas.

With the exception of the State of Nevada, there is a marked similarity with the type of state regulations enacted and the type of protection offered to the public. All of the larger states have laws covering furniture and bedding, with the exception of the States of Illinois and Michigan. All of the states replying required that all items subject to the licensing laws have a label setting forth the type of filling material. With one exception, all of them covered bedding such as mattresses and pillows. Upholstered furniture was covered by very few states. In all but one of the states reporting, the penalty for mislabeling any item was a misdemeanor and subject to prosecution.

Insofar as revenues are concerned, all of the states do not require a license, and only 12 of the states reporting had any licensing regulations of any kind. Five of the states, in addition to a license, raise revenue to support the enforcing agency by charging a stamp tax on the items subject to regulation. This ranges from 1 cent in the State of Texas to 5 cents in the State of Oklahoma. While the full amounts of monies received have not been reported, we understand that in the State of Indiana the taxes paid by furniture manufacturers and dealers are an important source of revenue to that state.

There are possibly six states in the United States that have a realistic enforcement program. The reports from the enforcement bodies, upon solicitation, indicate that little or no active enforcement takes place by the regulatory body. Those states that have no licensing requirements also have no enforcement. Attached hereto, and made a part of this report, is a comparison of the laws pertaining to furniture and bedding in the State of California, followed by applicable laws in those states and areas for which information has been received.

The only report that the committee was able to secure was that dealing with nomenclature which had been reduced to writing and submitted to the delegates for discussion. This report was adopted by the delegates and accepted as submitted. For information purposes, the committee consultant questioned a chemist in charge of the California laboratory relative to the terms, definitions, and rules which were spelled out in the nomenclature report. He was advised that these

were not only unacceptable to California but some actually were illegal. It appeared that a questionnaire was sent to California and no definite answer was received. It seems that such reports, while helpful, should be for advisory purposes only.

The second day of the ABFLO conference was interesting in that representatives from the feather and down industry met with a committee from ABFLO in an effort to work out a revision of state standards. The report that was presented orally to the delegates provided for a contract between the feather and down industry and ABFLO. This contract was to set forth a series of tests throughout the country to provide the basis for standards. It was pointed out that California could not obligate itself as a result of any vote of the delegates or by their acceptance of the report of the committee. It was further explained to those present that California probably had the best laboratory of any state and obviously was willing to cooperate, but that any contract that the feather and down industry would care to initiate would have to be between it and the State of California, and that such a contract would necessarily have to be approved by its Attorney General's office. An interesting sidelight to this report by the feather and down industry and the ABFLO committee is the fact that a member of the New York state enforcement board was the executive secretary of the feather and down industry.

There were interesting facets gleaned from the meeting of the officials from other states. The caliber of officials varied from state to state. The off-the-record discussions between those present led one to believe that there was rigid regulation for covering items for home consumption, but that manufacturers shipping products to other states could operate almost *carte blanche*, as there was either no enforcement or enforcement was extremely lax in this regard. It was reported that one New England state which prided itself on its enforcement of the furniture and bedding laws had a reputation as being the largest single source of used upholstering material in the United States. In talking to the various state officials, it was apparent that in most states furniture and bedding regulation enforcement was a part-time activity, and that the officials charged with this regulation had many other functions to perform.

As a result of some of the stepped-up activities of enforcement in California, the three Californians present at this meeting were sought out by manufacturers and suppliers as well as other state enforcement officials to ascertain what was happening in California. It became quite apparent to those talking with these people that the filling material used for merchandise being shipped into California was of vastly improved quality because of the change in enforcement.

Insofar as meetings of this kind are concerned, the committee consultant has ambivalent feelings. Quite obviously such meetings are beneficial and will be a useful source of information. It is doubtful that the best results will be obtained unless the reports and recommendations are reduced to writing for presentation and study by the various states a week or two before the meetings take place. It would also seem more appropriate that meetings of these law enforcement officials should be at a different time and place than when the manufacturers, whom they regulate, are meeting.

CALIFORNIA FURNITURE AND BEDDING ACT

DEFINITION

The California Furniture and Bedding Act covers all upholstered furniture (including bedding, mattresses, studio couches, pillows, cushions, etc.) irrespective of the exterior covering, and the types of filling material used therein. In addition to manufactured items, the regulations stipulated by the act cover all secondhand upholstered furniture and materials. The regulations apply to the manufacturer of such items, the wholesaler, the supply dealer, the repairer or renovator, and the sterilizer. All persons engaged in these activities require a license to operate within the State of California.

ADMINISTRATION

In addition to the laws embodied in the Furniture and Bedding Inspection Act, which is part of the Business and Professions Code of the State of California, a comprehensive set of administrative regulations has been adopted by the chief of the Bureau of Furniture and Bedding Inspection with the advice of the licensees, the advisory board, and with the approval of the director of the department.

Enforcement of the act is vested in the bureau chief, who makes use of the field staff of the Division of Investigation within the department for routine checking and for specific investigation of possible violations by licensees. The enforcement program is provided by the administrative rules and regulations adopted by the bureau, which spell out in detail the legislative intent and require all licensees to live up to these rules for the protection and benefit of the public.

REGULATIONS

Labeling

All items covered by the act must have a label attached. The label must be not less than two inches by three inches in size, and must be attached to all articles containing concealed filling materials, such as chairs, couches, davenports, and other seating pieces, under the cushion on the front edge of the material. Those furniture items which do not have loose cushions must have the label attached at the front under the seat rail.

New items must have a white label, which must include the phrase: "*Do not remove this label under penalty of law.*" It is also mandatory that the type of filling material, the factory registry number, and the name and address of the manufacturer be included on the label. The vendor's name is sometimes included but this is not mandatory. If loose cushions or pillows are part of the piece of furniture, the material in the body of the item must be indicated as well as that contained in the cushions and/or pillows. The same type of tag provided for

studio couches, mattresses, pads, comforters, and quilts, must state the finished size and the net weight of the filling material in the object. The finished size of the cushion must also be included.

Secondhand items must have a bright red label attached, and in large letters be designated: "SECONDHAND MATERIAL"; the basic information stipulated for the white label must also be included as well as a statement that the material therein has been sterilized in accordance with state law.

Sterilized items must have the yellow sterilization label attached, stating the item is secondhand and that it has been sterilized.

Filling material labels must be affixed to all filling material sold to manufacturers and dealers. This is done either with a printed label gummed to the covering, by tag, or by rubber stamp. The bureau has adopted minimum requirements for all filling materials used in articles covered by the regulations. Basically, these provide for a minimum amount of sludge; any amount in excess of three millimeters per 20-gram sample is considered unfit for use and cannot be used in items sold in the State of California. Items containing more than 5 percent of oil, grease, or fat, are classified as waste and are regarded as unfit for use in the State of California. When vegetable fibers are used for filling material, if the combination of shells, leaves, or pulp is in excess of 10 percent, this is considered as waste and must be so indicated on the label.

Size Requirements

All pads used in upholstered furniture and bedding must be of the same size as the object and this must be stated on the label. As a further protection to the public, the bureau has standardized pillow sizes. No feather or down pillow less than 20 x 26 inches in size may be sold as a standard-size pillow within the State of California. In addition, the bureau has set forth the minimum net weight of the down content of various pillow sizes: For instance, the standard-size pillow of 20 x 26 inches must contain no less than 13 ounces of down, and at 21- x 27-inch pillow must contain no less than 15 ounces of down. With respect to bedding, the bureau requires that the size of the item, meaning the length and breadth of same, be indicated on labels for comforters, sleeping bags, and mattresses.

Filling Material Specifications

Specific rules are set forth by the state covering the use of cotton fillers, the terminology to be used, and the quality to be used. Other types of filling material also are covered. The feather and down regulations are comprehensive. Any items using feather and down must spell out the type of fowl from which the feathers are derived, the type of feathers used, and, insofar as down stock is concerned, the label must state the percentage of down. In addition, a cleanliness standard has been drawn up by the state which prohibits the use of feathers in down where the oxygen content exceeds a specified amount.

Any filling material of animal origin that contains trash, burrs, stickers, seeds, sticks, epidermis, etc., in excess of 10 percent is considered as waste. Filling material may be regarded as unfit for use if the

combination exceeds 10 percent. These basic regulations are for the protection of the public and to prevent unscrupulous manufacturers from labeling such things as gin flues, combers, and strips from cotton gins as spun cotton or stapled cotton. It also assures that the type of filling material is of a quality set forth on the label and not waste, or shoddy, as the case may be. In order to give the manufacturers and the suppliers a fair rule to work on, a 5-percent deviation is permitted before an actual violation is considered.

Other filling material specifications pertain to the use of hair filling in upholstered items of furniture and require the type of hair to be indicated on the label. There are also regulations to cover the use of wool, its cleanliness, and the types of wool used.

Miscellaneous additional filling regulations are for the information and protection of the public and are an outgrowth from the advances in synthetic fibers and materials. In addition, these cover cocoa fiber, excelsior, kapok, moss, palm fibers, etc. The foam rubber regulations have been broken down into five grades, from latex foam rubber, which is the first quality, through imperfect latex foam rubber, shredded latex foam rubber, scrap latex foam rubber, and remolded latex foam rubber; sponge rubber is categorized similarly to latex foam rubber. It should be pointed out that the foam rubbers and their regulations are most important. The advent of polyurethane foam has made these take on greater significance. There has been an interchange of use of these products by manufacturers for mattress and cushion padding. The public has been misled by the use of the term "foam," and in many instances the bureau has withheld items for sale as being mislabeled when polyurethane foam was not spelled out.

Sterilization Regulations

Sterilization regulations of the bureau are comprehensive and provide that all articles of secondhand upholstered furniture and bedding must be sterilized before being offered or exposed for sale. They include box springs, mattresses, chesterfields, couches, etc. The method of sterilization is spelled out in the administrative regulations, and the process has been adopted and approved by the State Department of Public Health.

Advertising Limitations

The administrative regulations of the bureau go into great length in the field of false or misleading advertising and prohibit the use of the terms "former price," "regularly sold at," "reduced from," etc. These terms may not be used unless the article has been sold at that price within three months prior to the advertisement setting forth a special sale. It prohibits fictitious markups to provide for a base of advertised former prices. It prohibits special sales unless the items being offered for sale are special. It prohibits offering items for sale which have been added to the stock of the merchant for said sale. Pre-ticketing is also prohibited. No article which is imperfect, irregular, or a second, shall be advertised for sale unless it is indicated to the public that they are buying from a factory outlet, etc., unless the adver-

tiser is licensed by the state as a manufacturer, and the savings that he is representing to the public are true and in connection with his manufacturing business. It restricts use of the term "free labor" unless this is an actual fact. Guarantees, recommendations, and health properties are severely restricted in any advertising.

MISREPRESENTATION

The act covers advertising and representation by licensees of all articles required to be labeled. In the State of California every person who either falsely advertises or misrepresents in any way any of the merchandise covered by this act, by either making false statements or improperly labeling any such item, is guilty of violation of the Furniture and Bedding Act of the State of California and is subject to prosecution by being guilty of a misdemeanor.

EXEMPTIONS

The only exemptions to items that normally would be covered by the furniture and bedding regulations of the state are automobile seat cushions, baby strollers, bar stools, lawn chairs, the cushions one rents at baseball games, etc., doll mattresses, life preservers, quilted bedspreads, and items of this general nature. In order to be certain of exemptions, a manufacturer must submit either an item or a photograph to the bureau, where coverage is determined.

FEDERAL TRADE COMMISSION RULES AND REGULATIONS COVERING THE FURNITURE AND BEDDING INDUSTRY IN THE UNITED STATES

The FTC regulations covering the furniture and bedding industry and the feather and down products of the United States are embodied in three sets of FTC trade practice rules. These are the trade practice rules for the bedding manufacturing and wholesale distributing industry, the trade practice rules for the feather and down industry, and the trade practice rules for the household furniture industry.

1. BEDDING MANUFACTURER AND WHOLESALE DISTRIBUTING INDUSTRY RULES

Original FTC rules for the bedding manufacturer and the wholesale distributing industry were adopted in November 1950 and amended in January 1955. Insofar as the committee has been able to ascertain, there have been no changes since then. The rules were adopted after lengthy meetings with the industry under the trade practice conference procedure adopted by the FTC. Coverage included those persons and firms engaged in the manufacturing and selling of mattresses, box springs, bed pads, studio couches, sofa beds, and similar sleeping equipment. It also includes metal beds, metal cots, and metal bed springs. At the time of the adoption of the rules by the FTC, the sale of these products in the United States wholesaled at approximately 350 million dollars per year. The rules embody 11 points and are designed to promote fair competition and protect both the industry and the public. They are designed to eliminate illegal practices, unfair and deceptive acts, and unfair competition. The heading of each category, in most instances, is self-explanatory.

- (1) Covers deception as to used materials and parts.
- (2) Deception through misrepresentation or concealment.
- (3) Misuse of the terms "felt," "felting," and "felted."
- (4) Misuse of the terms "posture," "orthopedic," "germproof," and "waterproof."
- (5) Misuse of the terms "latex," "foam rubber," "latex foam rubber," etc.
- (6) Deceptive pricing.
- (7) Guarantees and warranties.
- (8) Failure to differentiate between the terms "wholesale" and "retail."
- (9) Misuse of the word "free."
- (10) False invoicing.
- (11) Commercial bribery.
- (12) Defamation of a competitor or his products.
- (13) Use of lottery schemes.
- (14) Misrepresentation as to character or type of his business.
- (15) Discriminatory returns.
- (16) Discriminatory prices, rebates, refunds, discounts, and credits, etc.

- (17) Restraint of trade, suppression of competition, and price-fixing.
- (18) Imitating trademarks and trade names, etc.
- (19) Aiding, abetting, or the use of unfair trade practices.
- (20) The use of push money to promote the sale of products.

Most of these rules are embodied in the California regulations. The FTC includes items not covered by the California regulations, in that metal beds, metal cots, and metal bedsprings are covered.

2. HOUSEHOLD FURNITURE INDUSTRY RULES

The FTC rules for the household furniture industry were adopted in December of 1963. These were, and are, the latest rules covering furniture items not previously included in federal rules and regulations. They are an outgrowth of hearings by the FTC in principal points of manufacturing in the United States, namely, Los Angeles, California; Chicago, Illinois; and High Point, North Carolina. The previous rules covering this industry were adopted in May of 1932, with numerous changes being incorporated in the latest regulations. The items covered by these FTC rules are those items necessary as furniture or decorations in a house, apartment, or similar type of dwelling place. They include, but are not limited to, chairs, tables, cabinets, desks, bedsteads, bureaus, chesterfields, etc. Excluded from the rules are major appliances, pictures, lamps, clocks, rugs, draperies, etc. The rules cover 19 basic points and in the main are self-explanatory. They differ from the California regulations in that the types of woods in furniture construction are covered, as well as the outer coverings used in the manufacturing of furniture.

- (1) Covers deception in general.
- (2) Wood and wood imitations. This pertains to the spelling out of the type of wood used and prohibition of using misleading terms; for example, it would be false to describe maple furniture as maple if it were actually constructed of birch. The term "solid mahogany" could not be used if in effect it was a mahogany veneer, etc.
- (3) Deceptive use of wood names. This would cover such items as using mahogany when, in effect, it was not mahogany. Woods from the Philippine Islands, such as luan, may use mahogany only in connection with the prefix *Philippine*, such as *Philippine mahogany* or *Philippine luan*, etc.
- (4) Pertains to leather and leather imitations and prohibits the use of misleading trade names, coin names, etc.
- (5) Pertains to outer coverings.
- (6) Stuffings.
- (7) Deception as to origin; for example, furniture manufacturers in the United States shall not be described as Danish, Swedish modern, etc.
- (8) Deception as to being new.
- (9) Misuse of the terms "floor samples," "discontinued models," etc.
- (10) Deceptive pricing.
- (11) Date advertising.
- (12) Guarantees and warranties.

- (13) Passing off through imitation or simulation of trademarks and trade names.
- (14) Misrepresentation as to character or business.
- (15) Push money.
- (16) Commercial bribery.
- (17) Exclusive dealings.
- (18) Unlawful price fixing and trade restraints.
- (19) Prohibited discrimination, incorporating, prices, rebates, discounts, etc.

3. FEATHER AND DOWN PRODUCTS INDUSTRY RULES

The third set of federal regulations contains the FTC trade practice rules for the feather and down products industry. These FTC rules, which were adopted in April of 1951, cover the manufacturing, processing, distribution, and sale of pillows, cushions, comforters, sleeping bags, and similar products which are wholly or partially filled with feathers or down. The regulations, with the exception of those dealing with rebates, price fixing, etc., are quite similar to the California regulations. Eighteen rules have been drafted with the effective law.

- (1) Misrepresentation and deception in general.
- (2) Deceptive pictures assembled.
- (3) Identification and disclosure of the kind and type of filling material and industry products. This spells out the terms "down," "down fiber," "crushed feathers," "waterfowl feathers," etc. It was interesting to note that federal regulations require down to have 85 percent of the weight therein to be pure down.
- (4) Disclosure as to covering materials. (California does not have such a regulation.)
- (5) Secondhand feathers, down, and other components.
- (6) Cleanliness of feathers, down, and other components.
- (7) Disclosure as to size.
- (8) Guarantees and warranties, etc.
- (9) Fictitious price lists.
- (10) Use of lottery schemes.
- (11) Misrepresentation as to character of business.
- (12) False invoicing.
- (13) Corrosion of fixed prices, suppressed competition, or trade restraint.
- (14) Prohibited discrimination.
- (15) Discriminatory returns.
- (16) Commercial bribery.
- (17) Defamation of competitors.
- (18) Abetting or aiding in the use of unfair trade practices.

In going over the FTC rules covering the furniture and bedding industry in the United States, it is quite apparent that these are very comprehensive. There would be little need for state regulations if the FTC rules were abided by and enforced. It is also apparent in checking over the violations uncovered by the Bureau of Furniture and Bedding Inspection in the State of California on out-of-state merchandise that the FTC rules are honored in the breach.

INDIVIDUAL STATE FURNITURE AND/OR BEDDING REGULATIONS

Arkansas

The regulations in the State of Arkansas are confined to mattresses, comforters, upholstered springs, pillows, or any similar item made for sleeping, and require the use of a label on each of the items covered by the state statutes. Said label shall designate whether it is made of new material. Used materials are not prohibited, providing that the label specifically spells out same. Any renovated bedding article to be re-used must be sterilized according to the state statute. Reuse of mattresses from hospitals or hotels, except after sterilization, is prohibited. The Arkansas regulations are enforced by its Bureau of Sanitation under the supervision and jurisdiction of the State Board of Health. Apparently there are no licensing provisions in the Arkansas regulations and no fees are required.

Violation of the regulations shall be subject to a fine of not less than \$25 nor more than \$250, or not less than 30 nor more than 90 days in jail, or both.

Colorado

The Colorado statute is known as the Colorado Mattress and Bedding Law and covers items used for sleeping and reclining purposes such as mattresses, comforters, quilts, pillows, studio couches, sleeping bags, etc. It provides for the regulation and enforcement by the State Department of Public Health. An annual license in the amount of \$25 is required to do business. In addition, all items covered by the Colorado statute must be labeled, spelling out the contents of the filling material used in the manufacturing of the items. Used material is permissible providing the label so designates. Any items containing used material must be sterilized before being sold or remanufactured. A revenue measure provides for affixing a stamp to each item covered. Each stamp has a unit value of two cents and the stamps are sold in blocks of one thousand upon the payment of \$20. The Board of Health has adopted regulations providing for the sterilization of items covered by the Colorado statute.

Violation of the statute is a misdemeanor, punishable by a fine of not more than \$300 and/or imprisonment of six months.

Connecticut

Connecticut has adopted regulations which are comprehensive and cover articles of bedding and upholstered furniture. These regulations are similar to those of the State of California. Enforcement of the Connecticut regulations is by its Labor Commissioner. In order to do business in that state, an annual license is required. Connecticut differs from California in that retailers of bedding and upholstered furniture may be exempted from the licensing procedure providing the articles that they offer for sale are properly labeled

and tagged, and that the manufacturer or supply dealer has paid the required license fee to do business within that state. Manufacturers, supply dealers, renovators, and secondhand dealers are covered by the statutes. All items of furniture covered by the statute must have the usual 2-inch by 3-inch label attached indicating the type of filling material contained in the articles of furniture or bedding. As in California, secondhand material requires a yellow label. The regulations covering terminology for the filling materials, while not as extensive or detailed as California, are more so than most states having furniture and bedding regulations. This state has set up terminology for cotton, wool, feathers and down, hair, rubber, synthetic fibers, and miscellaneous cleaning materials. It spells out the proper use of terms to be used in labels and the quality of the filling for items covered by the state regulations. In addition, Connecticut has regulations covering sterilization and provides for various acceptable methods of sterilizing products covered.

Violation of the Connecticut statutes constitutes a misdemeanor and is punishable by a fine and/or jail sentence.

Delaware

The statutes in the State of Delaware pertain to mattresses, pillows, and bedding and do not include upholstered* furniture. Sterilization of used or any other secondhand material is required prior to sale. Enforcement is embodied in the State Department of Public Health. The state statutes provide that no person shall sell, lease, or consign any items covered by the statutes unless those items are properly labeled. The usual label, as required by most states, sets forth the filling material and indicates the sterilization of secondhand or used items. There is no annual license fee, but all items covered by the Delaware statutes must be labeled and have an adhesive inspection stamp affixed thereto. These are sold in boxes of 1,000 and cost \$15 per box. There is one unique provision in the Delaware statutes which provides for the inspection of products and plants of out-of-state manufacturers. In the event the State Board of Public Health, which is the regulatory board, deems it necessary to inspect an out-of-state factory, the owner of said factory must pay the travel expenses necessary for the inspection. Failure to do so will result in a revocation of any permit to do business within that state.

Violation of the statutes is subject to a fine, for each offense, of not less than \$10 nor more than \$50. Default of such payment results in imprisonment for not less than 10 days for each separate offense, not to exceed 10 months.

Florida

The Florida Bedding Law covers any item containing filling material used or intended for use for sleeping purposes. The State Board of Health is charged with the administration and enforcement of this law. All items must be labeled, with information to include the name of the material or materials used to fill such article of bedding; the name and address of the manufacturer, jobber, distributor, or vendor of the article. New articles bear white labels; composite items, one-half yellow

and one-half blue; used items, yellow labels; and if renovated, reprocessed or rebuilt for the owner, green labels.

Registration is required for manufacturers, distributors (annual fee \$25), renovators (\$10), and retailers (\$5). A separate registration is required for each branch. Adhesive inspection stamps are furnished by the Board of Health in quantities of not less than 500. One type is used on articles of bedding, for which the applicant pays \$10 for each 500; the other is used only on pillows, cushions, and comforters, for which the applicant pays \$5 per 500. Filling materials must be labeled and affixed with a 2-cent bedding inspection stamp. The statute applies to all bedding made or remade within the state or brought within the state for sale, but does not apply to bedding intended for export to points outside the state, provided such bedding is labeled "for export only."

Violation carries with it the penalty of a misdemeanor, with the resultant fine of not more than \$500 or a jail sentence of not more than 90 days for each offense, or by both such fine and imprisonment.

Georgia

Georgia's regulations cover any type of bedding article intended for use by any human being for sleeping purposes, which is filled in whole or in part with concealed material. Enforcement is vested in the Department of Health. An annual registration fee of \$100 for manufacturers and \$25 for renovators and reupholsterers is required to do business in that state; blind persons and local government and state agencies are exempt. Labeling is required for all bedding articles, which incorporate the name of the material or materials used therein, the name and address of the manufacturer, renovator, upholsterer or vendor of such article, the registration number, and whether such item is new, used, or secondhand. All suppliers of material must submit an itemized invoice to bedding manufacturers, which must be retained by such manufacturer for one year, subject to inspection by the Department of Health.

Violation of the provisions is considered a misdemeanor and is punishable as such.

Indiana

The Indiana statutes are entitled Indiana Bedding Law and cover all articles manufactured for use in connection with sleeping or reclining purposes: mattresses, mattress pads, protectors, box springs, davenports, day beds, sofa beds, pillows, sleeping bags, etc. A license is required of all those engaged in the stated businesses and include manufacturers, renovators, supply dealers, retailers, wholesalers, etc. In many respects the Indiana regulations are similar to those within the State of California. Enforcement of the Indiana regulations lies with the State Health Commissioner. All items covered by the Indiana statutes must have the legal label, which seems to be universal in all states having furniture and bedding regulations. The label requires that the type of material be spelled out on the label and, where size statements are required, those, too, must be included. Provision is made for sterilization of used and secondhand materials. In addition, admin-

istrative regulations have been adopted to enforce the regulations set forth in the Indiana statutes. Basically, they include the same type of information that most large industrial states have in their laws pertaining to sanitation, quality of filling material, and labeling. They also contain basic definitions covering the types of filling materials used by manufacturers and processors. The Indiana regulations spell out the types and methods to be used in sterilization processes. The one unique feature in the Indiana statutes is in connection with the licensing. The annual license fee in Indiana is \$25 for all covered categories. In addition, however, each licensee must file a quarterly report, made under oath, which details the exact number of articles of bedding or filling material sold in Indiana during the three-month period, with the Furniture or Bedding Advisory Board. Along with the report, the licensee remits a sum of money which is computed on the following basis: for all articles and filling material except pillows, comforters, and bolsters, $1\frac{1}{2}$ cents per piece. Pillows, cushions, comforters, and bolsters are taxed at the rate of $\frac{3}{4}$ cent per article. The committee staff has been given to understand that this is a large source of revenue to the state.

Violation of the statutes is deemed a misdemeanor, punishable by a fine of not less than \$10 nor more than \$500 for each offense and/or imprisonment for a period not to exceed six months.

Iowa

Iowa's law relates to the manufacture and sale of mattresses and comforts only, and it is administered by the Department of Agriculture. Labeling is required for every mattress and comfort offered for sale and must include the information: official statement, manufactured of new material (and description), and the manufacturer's name, address, and factory number. Registration is required of manufacturers, who are inspected at least once each year, for which inspection a fee of \$10 must be paid. All secondhand materials except sterilized feathers are prohibited from use in the manufacture of such articles, unless for an individual's personal use. Manufactured articles that do not comply with the state's standards may be kept by the manufacturer for sale in other states.

Violation of the regulations is subject to a fine of not less than \$10 nor more than \$100, or by jail not to exceed 30 days. A third conviction of the same offense may result in a restraint-from-doing-business order.

Maine

The Maine statutes cover all items of bedding and upholstered furniture, in addition to stuffed toys. Enforcement of furniture and bedding regulations is with the Department of Labor and Industry. The Maine statutes provide that all items and articles so covered must have the usual white cloth tag attached thereto setting forth the type of material contained in the filling. It also provides that any secondhand furniture must have a yellow label affixed thereto and that secondhand furniture or items made of secondhand material must have been cleansed and sterilized by a process approved by the department.

The bedding statutes cover mattresses, pillows, comforters, box springs, etc. The upholstered furniture section covers chairs, sofas, studio couches, and all items of furniture which have concealed stuffing, whether or not the cushions are attached to the sofa or chair. The stuffed toy statute covers all playthings, whether filled with chemical or synthetic stuffing, fibers, cotton, or otherwise. As is usual in most states, the Maine statutes require that all articles covered by these statutes be labeled: new items with a white cloth tag, printed in English, and showing the types of materials used in the filling, with the percentages of each contained thereon; used items which have been sterilized must have a yellow tag attached thereto. The revenue to enforce these statutes is derived from the stamp tax which is prevalent in many of the states. Anyone doing business in Maine must register with its Department of Labor and Industry which administers the furniture and bedding regulations; the department sells 500 stamps for \$5, and each article must have one stamp affixed to each label.

Violation of the Maine statutes is a misdemeanor, punishable by a fine of no less than \$10 nor more than \$100 for each offense. In lieu of a fine, 10 days' imprisonment is provided.

Minnesota

Regulation of the furniture and bedding industry in Minnesota is covered by the general statutes of that state, which pertain to false advertising, consumer fraud, etc. With particular reference to furniture and bedding, the state has a labeling law which requires that all articles of bedding must be labeled and must have the standard white tag attached thereto, designating the contents. There is a prohibition against the sale of any bedding used in hospitals and against the use of second-hand material in the manufacture of bedding. Any materials used in remaking or renovating bedding must be thoroughly sterilized in accordance with methods approved by the Minnesota Industrial Commission. The consumer fraud statutes are very strong and are an effective deterrent against false labeling. There is a prohibition against sales below cost, and it would appear that many of the consumer fraud and trade statutes were adopted from federal regulations.

Violation of the statutes covering any furniture and bedding is a misdemeanor, punishable by a fine of not less than \$25 nor more than \$100 and/or imprisonment for a period of from 30 to 90 days.

Missouri

The statutes of the State of Missouri cover bedding only and under their construction mean mattresses, box springs, comforters, pads, cushions, or pillows, which are used for sleeping or reclining purposes. Manufacturers within that state must have a permit and pay a \$20 fee for such permit. The head of the Department of Industrial Inspection inspects factories as to sanitation, etc. The supervision over the manufacturers in Missouri is unique in that, when an inspection is made and an unsanitary condition is found to exist, the inspector gives the manufacturer a reasonable length of time, not to exceed 60 days, to correct the unsanitary condition. It is only when he fails to correct such condition(s) within the time allowed by the head of the Industrial Inspection that his permit to operate is revoked. The Missouri statutes

prohibit the use of shoddy in any bedding articles and also provide that all items manufactured for sale in that state must have the usual label, which must contain the type of filling material, the name of the manufacturer, etc., and the filling contents indicating the percentage of each type used. As is customary in most states, all used items must be sterilized and disinfected before sale. The one difference in the Missouri statutes, which is not found in other states, gives the Director of the Division of Industrial Inspection the right to purchase articles for inspection for violation of the Missouri statutes. This has created quite a problem in California, where items sent to the laboratory for inspection have been at a direct cost to the retailer if picked up in a retail store, or to the manufacturer if picked up in a California manufacturing plant.

Violation of the bedding statutes is a misdemeanor, punishable by the penalty set forth in the Missouri statutes covering misdemeanors.

Nebraska

The regulations in the State of Nebraska cover articles of bedding only. Upholstered furniture is not covered. Bedding within its statutes means mattresses, mattress pads, comforters, or quilted pads designed for use in sleeping. All items of bedding offered for sale must have a label which shall designate the contents of the filling material as well as the name of the manufacturer. Any misleading language on the label is a violation of its statutes and a misdemeanor. All factories within the State of Nebraska are subject to inspection by the Department of Public Health and each pays an annual fee of \$10 for the inspection. The statutes prohibit the sale of any bedding that has been used by a person who has had an infectious or contagious disease. Any other bedding or material which has been used and is to be reused must be inspected or disinfected before its reuse. The Nebraska statutes do not prohibit used material in the manufacturing of bedding products but do require that the product be properly labeled. Enforcement of the statutes is within the State Department of Public Health.

A violation is a misdemeanor punishable by the usual fine and/or imprisonment.

Nevada

The State of Nevada has regulations which pertain only to the sale of used bedding. The statutes provide that any used mattress, bed covering, sheet, pillow, etc., must be sterilized before being offered for sale, and that each must be labeled "sterilized," "secondhand," with the usual cloth tag which is affixed to every item for sale of a furniture and bedding nature.

The Nevada statutes are enforced by the State Board of Health, and a violation of the statutes is a misdemeanor.

New Hampshire

The State of New Hampshire regulations cover all items of furniture and bedding, mattresses, pillows, cushions, quilts, upholstered furniture, or any article having a filling of hair, down, feathers, wool, cotton, or kapok. All items sold in the state must have a label attached thereto which shows the name of the manufacturer and the content of the

material. Used material is prohibited if used in a hospital or by a person who has had a contagious disease. Any used materials not so specifically prohibited must be disinfected before being reused. Any manufactured items containing used materials must be so designated on the label. The enforcement is vested in the State Board of Public Health. The sale of any item labeled "new" when it is not is covered by a special statute dealing with false representation.

Violation of the statutes shall be punishable by a fine of not more than \$500 and/or imprisonment not to exceed six months.

New York

New York, aside from California, probably has the most detailed set of statutes dealing with furniture and bedding of any state. The enforcement of these statutes was vested in the Department of Labor of the state until 1960. In 1960, the enforcement was transferred to the Department of State, and the Secretary of State became the chief enforcement officer. There is a great deal of similarity between the California law and the New York law. The statutes cover all items of furniture and bedding without exception. The labeling act is similar. White labels are designated for new items, yellow labels for used items and sterilized items, and also for a category not found in California: old furniture. Old furniture is not necessarily "used," but pertains to an item which, because of its age, has lost its natural qualities and probably has become faded. New York labeling requires a blue tag to be used by the enforcement bureau when items are removed from sale as being in violation of the New York statutes. The red tag is used to designate material that had been exposed to contagious and infectious disease. There are five licensing categories: a manufacturer who sells at wholesale, a manufacturer who sells at retail, a supply dealer, repairers and renovators, and retailers of secondhand items. The wholesale manufacturer and the supply dealer pay an annual license fee of \$50; the other licensees pay a \$10 annual license fee. Another similarity to the California statutes is the provision for an advisory board. The board has the authority to adopt rules, subject to the approval of the commissioner. They have one extra power granted to them, wherein they may make exceptions to the rules where undue hardship or practical difficulties make observing such rules an impossibility. In that instance, the board may make a variation by resolution and vote.

The administrative rules of the furniture and bedding bureau in New York are extensive. They define all types of materials in much the same manner as those in California. The filling materials are designated in lengthy fashion. The testing methods are spelled out in the administrative regulations. For instance, when an inspector is sampling feathers and down, he takes samples from three different parts of the article being examined; he divides the sample into two parts, places each part in a clean envelope, and seals it in the presence of the person observing how he has taken the material. One envelope is immediately transmitted to the laboratory of the department and the other is given to the owner of the object being sampled, if he so desires. This is quite unique.

The administrative regulations spell out in great detail the content, size, and label which must be affixed to all items covered by the statutes and offered for sale in the State of New York. These are almost identical with those used in the State of California. They require either the name of the manufacturer or his license number and in some instances, the name of the retailer selling the product. All tags must indicate the type of material and the percentages contained therein. There is one difference in the New York statutes in that secondhand material which has not been remade or renovated need not be sterilized unless it has been exposed to infectious or contagious disease. All the label requires on items such as this is that it be designated "all secondhand material," "contents unknown," with the designation "not sterilized."

Violation of the New York statutes is a misdemeanor subject to a fine not to exceed \$500 or imprisonment not to exceed six months, or both.

North Carolina

North Carolina is one of the largest furniture manufacturing states. Strangely enough, its regulations pertain only to bedding and not to upholstered furniture, with the exception of such items as studio couches and sofa beds which are used for sleeping purposes. Basically, the North Carolina laws are similar to the laws of most states which cover bedding only. They prohibit the sale of used materials in the manufacture of bedding, and prohibit the renovating of any mattress unless said used material has been sanitized. It is interesting to note that the term "sterilized" is not used in North Carolina statutes. The procedures outlined in the rules and regulations set forth by the State Board of Health of North Carolina for sanitizing are very similar to the processes set forth by the State of California. All items of bedding sold in the state must be labeled with the usual 2-inch by 3-inch label which contains the name of the article, the type of filling material contained therein, and the name and address of the vendor or the manufacturer. For all new items the white label is used, and for all items containing used material or used items, a yellow label is used. There is a provision in the statutes against false and misleading statements appearing on the tag. In addition to the label requirement, all manufacturers and sanitizers of bedding must secure a license from the State Board of Health. The charge is \$25 per year. Out-of-state manufacturers selling within the state also must secure a license. In addition to the license fee, stamps must be affixed to each label. These are sold by the Board of Health at the rate of 500 stamps for \$8. Large users of stamps may secure an exemption permit from the Board of Health by submitting to the board records showing the number of items manufactured and sold within the state and, in lieu of securing stamps, pay an additional fee in an amount not to exceed \$400. This is predicated on the number of sales made within the state. The Board of Health is the enforcement body, and it may adopt administrative regulations in carrying out enforcement of the statutes. It is interesting to note that in the North Carolina regulations the State Board of Health is authorized to require a greater amount of proof through the presentation of additional records from out-of-state manufacturers than from in-state manufacturers.

Violation of the North Carolina statutes is a misdemeanor subject to punishment by fine or imprisonment, the fine not to exceed \$50, nor the jail term 30 days.

Ohio

The Ohio statutes are fairly comprehensive and cover all items of furniture and bedding sold in that state. Enforcement is vested in the Department of Industrial Relations and the Division of Bedding and Upholstered Furniture Inspection. All items covered by the Ohio statutes and offered for sale are required to have the usual label affixed thereto. The white label for new items must have black printing, must contain the usual designation, and must have a clear description of the filling material. In addition, the Ohio registration number must be included as well as the name of the manufacturer, distributor, vendor and his address. Items containing used or secondhand material and used furniture offered for sale only must have a label affixed also. This label is white cloth, and the difference is that the printing is in red and the label must have a $\frac{3}{8}$ -inch red border. In addition to these two labels, the renovator or sterilizer also must have a label. A bright red label is required for secondhand furniture which is to be sold without any renovating being done to it. This label is designated "second-hand," "previously used," "contents unknown."

All persons offering upholstered furniture and bedding for sale in the State of Ohio must be registered with the Department of Industrial Relations, and must secure revenue stamps to be affixed to the labels attached to items offered for sale in that state. Cushions, pillows, comforters, headboards, mattress pads, and infant accessories must have stamps, sold at the rate of \$10 per thousand, affixed to those labels.

All other items require a different kind of stamp, available at \$20 per thousand. In lieu of securing stamps, a registrant with the department may secure a license from the director. Upon the issuance of such a license, the licensee must make a quarterly return to the director of the department, showing the number of articles manufactured for sale in the State of Ohio and remitting 1 cent per item for pillows, comforters, etc., and 2 cents for all other items. There is a state advisory board which is part of the Bedding and Upholstered Furniture Inspection Bureau. The board has the authority to adopt rules and regulations to carry out the functions of the act, and is also empowered to grant variances from the rules in cases of hardship.

As part of its enforcement practices and authority, the Ohio authorities enter into contracts with local laboratories to inspect items suspected to be not in compliance with the Ohio statutes. The administrative regulations deal with the definitions of filling materials and are quite similar to those contained in the larger states that have an active enforcement policy. The contents must be indicated on the label affixed to items sold in the state with respect to this filling material. The requirements for cotton, down feathers, hair, wool, synthetics, foams, and the foam rubber filling materials, are spelled out in detail. Ohio has issued a booklet for the benefit of the public with information as to the furniture and bedding requirements and what to look for on each label affixed to the furniture when purchasing items of furniture and bedding in that state.

Violation of the statutes is punishable by a fine of not less than \$25 nor more than \$500 or imprisonment for not more than six months, or both.

Oklahoma

The Oklahoma statutes apply to items of bedding only and not to upholstered furniture. All bedding items offered for sale must be labeled with the usual cloth label affixed to each item. Secondhand material and items must be so labeled. Any secondhand material must be germicidally treated, and this information so stated on the label. In addition to the label, a 5-cent revenue stamp must be affixed to each item offered for sale that is covered by Oklahoma regulations. The stamps are issued to manufacturers in that state and to anyone offering for sale items within the state, and are sold in quantities of 100. In addition to the usual regulations, administrative rules have been adopted which cover enforcement of the act and are promulgated by the State Board of Health. They deal with items covered by the statutes and are quite similar to those in other states, wherein they designate mattresses, box springs, mattress pads, mattress protectors, quilts, comforters, pillows, bolsters, feather beds, sofa beds, chair beds, day beds, studio couches, convertible lounges, and any other upholstered item used for sleeping purposes. The rules also spell out requirements of what shall be contained on the label with respect to filling materials, and provide for standard definitions thereof. The usual materials such as cotton, wool, felt, feather and down, hair, synthetics, rubber, and foam are covered. Interestingly enough, the Oklahoma regulations provide that if the terms "100%," "all," or "pure" are used, the items so labeled must be so designated without variation or tolerance. Failure to do so would be misrepresentation.

Violation of the Oklahoma statutes is a misdemeanor, subject to a fine of \$50 to \$100.

Oregon

The Oregon statutes cover all items of furniture and bedding, from mattresses through upholstered furniture. The enforcement is vested in the State Board of Health, and, in addition, there is a Furniture and Bedding Advisory Council which may propose rules and regulations and advise the board on its enforcement policy. The usual requirements are in effect in Oregon in that all items covered by the statutes must have a label affixed thereto, and any used items must be properly labeled. There are 15 different types of operations covered by the Oregon statutes: branch factories, branch renovator shops, branch repair shops, fumigators, manufacturers, repairers, renovators, residence dealers, retailers, retail branch stores, sterilizers, supply dealers, supply depots, transit repairers or renovators, wholesale branch houses, and wholesalers. There are but seven categories insofar as license fees are concerned. A manufacturer of furniture and bedding, the furniture and bedding wholesaler, the supply dealer, and the supply depot each pays a fee of \$60; the renovator, the sterilizer or fumigator, \$25; and the furniture or bedding retailer, \$15. Comprehensive rules and regulations have been adopted by the Board of Health to carry out the enforcement of the state furniture and bedding laws.

They spell out the definitions of the various filling materials and the terminology to be used. Cotton is covered quite extensively. Feather and down regulations are very similar to the California regulations. The basic difference between the California and the Oregon regulations is that the latter permits the use of the term "100% down" in its feather regulations when the down stock contains 90 percent down and 10 percent feathers. As in California, sterilization and fumigation labels are issued by the state. Comprehensive fumigation and sterilization methods are spelled out in the rules and regulations and, in addition, they detail the types of signs to be used, the type of construction to be used in sterilizing and fumigating equipment, and the types of safety clothing and apparatus that the workers must wear in connection with this equipment. Regulations provide that all previously used articles of upholstered furniture and bedding must be fumigated or sterilized before being offered for sale to the public. The labeling requirements are quite similar to those in use in other states: the usual warning relative to not removing the tag is required, the size is standard, the name of the manufacturer or vendor with his address must be contained therein, and a definitive description of the material used for filling must be clearly imprinted. The label must be of cloth or fabric comparable to white vellum. Vanity benches or padded stools may use a rubber stamp on the smooth bottom panel in lieu of affixing a cloth label. In addition to the usual regulations covering cotton, wool, and synthetics, Oregon has spelled out a great deal and details the many miscellaneous materials which may be used.

Violation of the Oregon statutes is a misdemeanor, punishable by a fine not to exceed \$500, or jail sentence not to exceed six months, or both.

Pennsylvania

The Pennsylvania law is known as the Bedding and Upholstery Law. It is under the jurisdiction of the Department of Labor and Industry and covers all items of bedding and upholstered furniture as well as the bulk materials which are used in said products. The statutes require the use of a label on all items covered by the law. The labels are white for new items and yellow for used items. Any used or second-hand items offered for sale must be sterilized and disinfected before being offered to the public, and that process must be approved by the department. No secondhand material may be used in any newly manufactured item, even if sterilized or fumigated. Sterilizers and fumigators must secure a special permit from the department with an initial fee of \$25 and a \$5 annual renewal fee. The revenue derived by the state is mainly from the sale of stamps which are affixed to items covered by the Pennsylvania regulations. These are sold by the department at the rate of \$15 per thousand. Exemption to these statutes is similar to that in other states, whereby a manufacturer may secure a license and registration number and make his report to the state quarterly, indicating the number of items sold by said licensee and including therein payment of 1½ cents for each item. These reports are subject to audit by the state; failure to pay or failure to make a report results in forfeiture of license and registration. A comprehensive set of administrative rules has been adopted by the Department

of Labor and Industry. The rules and regulations also define terms to be used on the labels with respect to filling material and are quite similar to those in most of the other states. The type of label is similar to the requirements of most states, and is a cloth tag listing the registration and permit number, the contents of the filling material by percentage and weight, a place for the stamp if necessary, and the name of the manufacturer and his address.

Violation of the Pennsylvania statutes is a misdemeanor, subject to a fine not to exceed \$100 or a jail sentence not to exceed six months.

South Carolina

The South Carolina statutes cover bedding only. The enforcement is vested within the State Board of Health. The board has the authority to adopt rules and regulations and has done so. The statutes are similar to most states in that all items covered by the state laws must have the usual cloth label affixed thereto, setting forth a description of the contents, the name and address of the manufacturer or vendor, and a place for the revenue stamp. The regulations adopted by the board spell out in detail the types of filling material and how they must be labeled. The statutes require that no shoddy or millsweps be used in the manufacture of any articles of bedding; no other filling materials are covered by the South Carolina statutes. There is an absolute prohibition of the use of any material that has had previous use by a person with a contagious or an infectious disease. All used materials must be sterilized or disinfected for reuse in the renovation or manufacture of bedding articles. The one unique regulation in the South Carolina statutes provides that any supply dealer supplying material to a manufacturer must provide an itemized invoice to him. It further provides that the manufacturer must keep these invoices on file for a period of one year for inspection by the State Board of Health. The state does not require any licensing and derives its revenue from the sale of stamps, which must be affixed to each item covered by its regulations. The stamps are \$5 for 250 stamps.

Violation of the South Carolina statutes is a misdemeanor subject to a \$100 fine or 30 days in jail.

Texas

The Texas statutes cover bedding and allied products only. Upholstered furniture is not covered. Enforcement of the Texas statutes is vested in the Department of Health, which has a bedding division for enforcement of the act. All persons engaged in the manufacturing, sale, renovation, or sterilization of products covered by the Texas statutes require a license fee in the amount of \$15. In addition, all items covered by the statutes must have a revenue stamp affixed to each label. These stamps are for sale by the Department of Health in units of 500 at a cost of \$5 per unit. The Department of Health has adopted extensive administrative regulations dealing with the types of filling material used in the items covered by the Texas statutes. It also defines those materials and spells out the terminology to be used. It is interesting to note that the State of Texas permits the use of filling materials such as clay and only requires that, if there is an excess of 5 percent in the

filling, it be so labeled on the white tag affixed to the bedding. A tolerance of 10 percent is allowed on filling materials with respect to the label. Contrary to California statutes, Texas permits the use of filling material which contains oil, stipulating that if the oil content is over 5 percent, the designation "oily" be affixed to the label. The label requirements on Texas items are the same as those used throughout the country; new or used material must be indicated, the type of filling material, a place provided for the stamp, the name of the manufacturer and vendor, and the permit number issued by the state. Secondhand material must have a special tag, and the only requirement is that the printing be in red ink on a white background.

Violation of the statutes is a misdemeanor and is punishable for each offense by a fine of not less than \$50 and not more than \$200.

Utah

The regulations in the State of Utah are incorporated in the Bedding and Upholstered Furniture Inspection Act, enacted by the state in 1959 and amended in 1961. The regulations cover all items of furniture and bedding as well as the supply dealers and the materials they sell for the manufacture of such. Enforcement is with the Utah State Board of Agriculture, which has an advisory board consisting of one member of the State Board of Agriculture and four members from the furniture and bedding industry in the state. The Utah regulations are similar to California's and require a license fee by all engaged in the sale, manufacture, or renovation of furniture within the state. The manufacturer, wholesale dealer, and supply dealer each pays an annual license fee of \$20 to \$45; a repair dealer, \$10 to \$25; and an employed upholsterer or repairer with no employees, \$5. The license monies collected by the Department of Agriculture are kept in a separate fund and are used exclusively for the administration of the Furniture and Bedding Inspection Act. All items sold in the state must have a label designating the type of material contained in the product for sale. There are three types of labels: those covering items of all new material, those of secondhand material, and those with owner's material.

Labels of new material must be on white cloth, used products or secondhand material on red, and those for the owner's material on green. The only exception to the cloth tag being affixed to any item sold pertains to slip seat covers or to raw material in bales, which must be imprinted with an indelible stamp. There is a provision for payment of damages for any item picked up for inspection that is not resalable or is damaged. As with most state statutes, the Utah regulations provide for holding articles off-sale that are not in compliance with the Utah statutes. In addition to the laws, the Board of Agriculture and the Advisory Board have adopted rules and regulations to carry out the regulations.

Anyone who violates any of the state provisions shall be guilty of a misdemeanor.

Vermont

Bedding, mattresses, and upholstered furniture are covered in Vermont's regulations promulgated by the State Board of Health, which prohibit used materials in such manufacture. The tagging of bedding

and furniture is required, which must indicate a description of the material used for filling, the name of the manufacturer or vendor, and a statement that such article contains all new material.

Effacing a tag is punishable by a fine of not more than \$50, and violation of the statutes may result in imprisonment for not more than six months or a fine of not more than \$500, or both.

Virginia

Virginia's Bedding and Upholstered Furniture Law regulates the manufacture and sale of bedding and upholstered furniture articles and the supplier of filling materials used therein, including renovating, reupholstering, sterilizing, licensing, and tagging, for which a six-square-inch label is required, which must include the name and address of the manufacturer or vendor, description of the material, and the manufacturer's registration number. White labels are used for new items and yellow for secondhand items. On all labels is the statement: "Certification is made that the materials in this article are described in accordance with law." All manufacturers, renovators, or supply dealers are licensed yearly at the rate of \$40, \$40, and \$10, respectively.

Violation of the regulations is subject to a fine of not less than \$25 nor more than \$100, or by a six-month jail sentence, or both.

Washington

The director of the Department of Health administers Washington's laws relating to its upholstered furniture and bedding industry. Labeling is required, which must include a complete description of the item; the manufacturer's name, address, and registration number; and a description of the filling material. Stamping may be used instead of labeling on furniture having a wood or metal bottom. Registration is required of furniture and bedding manufacturers, wholesalers, supply dealers, and supply depots at an annual fee of \$35; repairers, renovators, and sterilizers at a fee of \$25; and retailers, dealers, and auctioneers at a fee of \$10. An advisory council of seven members, four from the industry and three from the public, advises the director regarding enforcement policy.

A violation of the act is punishable by a fine of not less than \$50 nor more than \$500, or by a jail sentence of not less than 30 days nor more than six months, or by both such fine and imprisonment.

Wisconsin

The Wisconsin statute is included in its "Miscellaneous Health Provisions" under the section "Mattresses and Upholstering," and requires such to be properly labeled, which label must contain a statement of the materials used in the filling and in the covering, whether new or secondhand, and whether, if secondhand, they have been thoroughly cleaned and disinfected.

There is no provision for enforcement, but authority for prosecution is vested in the Industrial Commission. Violation of the regulations is subject to a fine of not less than \$25 nor more than \$500, or not less than six months in jail, or both.

BUREAU OF FURNITURE AND BEDDING INSPECTION

Bulletin No. 10

January, 1962

Furniture and Bedding Inspection Act

DIVISION 8

CHAPTER 3. BUSINESS AND PROFESSIONS CODE RELATING TO FURNITURE AND BEDDING

Article 1. General Provisions

19000. This chapter may be cited as the Furniture and Bedding Inspection Act. Short title

19001. Unless the context otherwise requires, the general provisions hereinafter set forth govern the construction of this chapter. Construction

19002. "Person" includes individual, copartnership, association, firm, auctioneer, trust, and corporation, and the agents, servants and employees of any of them. Person

19003. "Sell," or any of its variants, includes any of, or any combination of, the following: Sell, offer or expose for sale, barter, trade, deliver, give away, rent, consign, lease, possess with an intent to sell or dispose of in any other commercial manner. Sell

19004. (a) "Bureau" refers to the Bureau of Furniture and Bedding Inspection. Definitions

(b) "Chief" refers to the chief of the bureau.

(c) "Inspector" refers to an inspector of the bureau.

(d) "Director" refers to the Director of Professional and Vocational Standards.

(e) "Department" refers to the Department of Professional and Vocational Standards.

(f) "Board" refers to the California Advisory Board of Furniture and Bedding.

19006. "Upholstered furniture" means any furniture, including children's furniture, movable or stationary, which is made or sold with cushions or pillows, loose or attached, or is itself stuffed or filled in whole or in part with any material, hidden or concealed by fabric or any other covering, including cushions or pillows belonging to or forming a part thereof, together with the structural units, the filling material and its container and its covering which can be used as a support for the body of a human being, or his limbs and feet when sitting or resting in an upright or reclining position. Upholstered furniture

19007. "Bedding" means any quilted pad, packing pad, mattress pad, hammock pad, mattress, comforter, quilt, sleeping bag, box spring, studio couch, pillow or cushion made of leather, cloth or any other material, which is stuffed or filled in whole or in part with concealed material, which can be used by any human being for sleeping or reclining purposes. Bedding

19007.5. "Filling material" means cotton, wool, kapok, feathers, downs, hair, or any other material, or any combination thereof, loose or in batting, pads, or any other prefabricated form, concealed or not concealed to be used or that could be used in articles of bedding or upholstered furniture. Filling material

- Secondhand** 19008. "Secondhand" means any materials or articles which have been previously used for any purpose, and shall include "sweepings" which are wastes recovered from gins, furniture and bedding factories, textile plants, or establishments using fibres or other materials. Manufacturing processes shall not be considered previous use, and new materials which are free from dirt or other contamination shall not be classified as sweepings.
- Secondhand article** 19008.5. Any article of upholstered furniture or bedding is secondhand if it contains any secondhand material in whole or in part.
- Same** 19008.6. Any article of upholstered furniture or bedding on sales floors in a private residence or room, which is not separated from living quarters, is secondhand.
- Retailer** 19009. "Retailer" means a person who sells any article of upholstered furniture or bedding or filling materials to a consumer or user of the article as purchased.
- Repairer** 19010. "Repairer" or "renovator" means a person who repairs, makes over, recovers, restores, renovates or renews upholstered furniture or bedding.
- Wholesaler** 19010.5. "Wholesaler" means a person who, on his own account, sells any article of upholstered furniture or bedding or filling materials to another for the purpose of resale, but shall not include an affiliate or a subsidiary where the ownership and name are identical, and which is the exclusive sales outlet of a manufacturer.
- Manufacturer** 19011. "Manufacturer" means a person who, either by himself or through employees or agents, makes any article of upholstered furniture or bedding in whole or in part, or who does the upholstery or covering of any unit thereof, using either new or secondhand material.
- Supply dealer** 19012. "Supply Dealer" means a person who manufactures, processes or sells any felt, batting, pads, or loose material in bags or containers, concealed or not concealed, to be used or that could be used in articles of upholstered furniture or bedding.
- Sterilizer** 19012.5. "Sterilizer" means a person who sterilizes articles of upholstered furniture or bedding or filling materials.
- Branch** 19014. "Branch" means any subordinate establishment situated apart from the parent house, maintaining a separate service to the trade.
- Members** **19035.1.** One member of the board shall be a bedding manufacturer, one member shall be an upholstered-furniture manufacturer, two members shall be retailers, one member shall be a supply dealer, one member shall be a sterilizer, and one member shall represent the public at large. All of the members, except the member representing the public at large, shall have been actively engaged and licensed as a manufacturer, retailer, supply dealer, or sterilizer, as the case may be, for a period of not less than five years immediately preceding the date of their appointment and shall continue to be so engaged and licensed during the term of their office.

19035.2. Each member of the board shall have been a citizen and a resident of the State of California for at least five years immediately preceding his appointment, and shall be at least 30 years of age and of good character. Qualifications

Each member of the board, other than the member representing the public at large, shall be of recognized standing in his branch of the furniture and bedding industry in the State of California.

19035.3. Members of the board shall be appointed for a term of four years and they shall hold office until the appointment and qualification of their successors. Terms

The terms of the members first appointed to the board shall expire as follows: the sterilizer, June 30, 1956; the supply dealer and the member representing the public at large, June 30, 1957; one manufacturer and one retailer, June 30, 1958; and one manufacturer and one retailer, June 30, 1959.

The Governor shall appoint the upholstered-furniture manufacturer authorized by the amendment made to Section 19035.1 at the 1961 Regular Session of the Legislature to the vacancy occurring on the board on June 30, 1962 in the membership of a manufacturer. Vacancies

Vacancies occurring in the membership of the board for any cause shall be filled by appointment for the balance of the unexpired term.

Each member appointed to the board, except the member appointed to represent the public at large, shall be from the same branch of the furniture and bedding industry as his predecessor.

No member shall serve more than two consecutive terms of office. Limitation on terms

19035.4. The Governor may remove any member of the board for misconduct, incompetency, or neglect of duty. Removal

19035.5. The board shall meet at least once in each calendar quarter of each year. Meetings

Four members shall constitute a quorum for the transaction of business. Quorum

The board shall elect from its members, each for a term of one year, a chairman and a vice chairman, and may appoint such committees as it deems necessary to carry out its duties. Chairman, etc.

19035.6. The chief shall serve ex officio as the secretary of the board, but shall not be a member of the board. Secretary

19035.7. Each member of the board shall receive a per diem and expenses as provided in Section 103. No compensation

19015. "Slip Seat" means the separate padded seat unit consisting of a plywood or similar base with its filling material and attached cover, which is used on chairs, benches, stools or similar articles, attached with screws or in any other manner. Slip seat

19016. "Slip Cover" means any casing or cover without filling material which is to be placed, on or over any completely manufactured article of upholstered furniture or bedding, and which is not permanently attached by tacking, sewing, or in any other manner. Slip cover

Exemption 19016.5. A person engaged exclusively in the manufacture of slip covers shall not be required to have a license under the provisions of this chapter.

Owner's material defined 19017. "Owner's material" means any article or material belonging to a person for his own, or tenant's use, that is sent to any manufacturer, repairer or renovator to be repaired or renovated, or used in repairing or renovating.

Article 2. Administration

**Adminis-
tration** 19030. There is in the Department of Professional and Vocational Standards a Bureau of Furniture and Bedding Inspection under the supervision and control of the Chief of the Bureau of Furniture and Bedding Inspection.

**Chief
Stats. 1937,
p. 2085** 19031. The chief shall be appointed by the Governor and shall serve at his pleasure. His compensation shall be fixed by the Director of Professional and Vocational Standards in accordance with law.

The duty of enforcing and administering this chapter is vested in the chief and he is responsible to the director therefor.

Personnel 19032. In accordance with the State Civil Service Act, the director may appoint and fix the compensation of such inspectors, investigators and other personnel as may be necessary for the administration of this chapter.

Powers 19033. Except as qualified by this chapter the chief has all the powers and duties of a head of a department under Chapter 2 of Part 1 of Division 3 of Title 2 of the Government Code.

**Rules and
regulations** 19034. With the approval of the director, the chief may adopt rules and regulations necessary for the administration of this chapter and declaring the policy of the bureau, and shall determine when any article, not otherwise clearly defined, is "upholstered furniture" or "bedding" under the provisions of this chapter.

**Same: When
effective** 19034.5. All rules and regulations shall become effective not earlier than 30 days after approval by the director, and upon compliance with the procedure provided in Chapter 4 of Part 1 of Division 3 of Title 2 of the Government Code.

**California
Advisory
Board of
Furniture
and Bedding:** 19035. There is in the Bureau of Furniture and Bedding Inspection a California Advisory Board of Furniture and Bedding, which consists of seven members appointed by the Governor.

**Powers and
duties** 19035.8. The board shall:

(a) Inquire into the needs of the furniture and bedding industry, the functions of the bureau and the matter of the policy thereof, and make such recommendations with respect thereto as, after consideration, may be deemed important and necessary for the welfare of the State, the health of the public, and welfare and progress of the furniture and bedding industry.

(b) Confer and advise with the director as to how the bureau may best serve the State, the public and the furniture and bedding industry.

(c) Consider and make appropriate recommendations on its own initiative as to changes in, or additions to or deletions of rules and regulations which the chief has adopted as, after consideration, may be deemed important and necessary.

(d) Consider and make appropriate recommendations in all matters submitted to it by the director or the chief.

(e) Confer and advise with the chief in the preparation of any rules and regulations to be adopted, amended or repealed.

(f) Assist the chief in the collection of such necessary information and data as the chief may deem necessary to the proper administration of this chapter.

19035.9. All meetings of the board shall be open and public, and all persons shall be permitted to attend any meetings of the board.

19035.10. Except as otherwise provided by law, all records of the board shall be open to inspection by the public during regular office hours.

Article 3. Licensing

19049. It shall be unlawful for any person to engage in a business regulated by this chapter unless, at the time of so doing, he holds a valid, unexpired license to engage in such business, in compliance with the provisions of this chapter. License

19051. Every upholstered furniture retailer, unless he holds a furniture manufacturer's license, a wholesale furniture dealer's license or a furniture repairer's license, shall hold a retail furniture dealer's license. Furniture
licenses:
Retail
dealers

19052. Every upholstered furniture repairer, unless he holds a furniture manufacturer's license, shall hold a furniture repairer's license bearing a registry number assigned by the bureau. Repairer

19053. Every upholstered furniture wholesaler, unless he holds a furniture manufacturer's license, shall hold a wholesale furniture dealer's license. Wholesale
dealer

19054. Every upholstered furniture manufacturer shall hold a furniture manufacturer's license, bearing a registry number assigned or approved by the bureau. Manufacturer

19055. Every bedding retailer, unless he holds a bedding manufacturer's license, a wholesale bedding dealer's license or a bedding renovator's license shall hold a retail bedding dealer's license. Bedding
licenses:
Retail
dealer

19056. Every bedding renovator, unless he holds a bedding manufacturer's license, shall hold a bedding renovator's license, bearing a registry number assigned by the bureau. Renovator

19057. Every bedding wholesaler, unless he holds a bedding manufacturer's license, shall hold a wholesale bedding dealer's license. Wholesale
dealer

Manufacturer **19058.** Every bedding manufacturer shall hold a bedding manufacturer's license, bearing a registry number assigned or approved by the bureau.

Supply dealer **19059.** Every supply dealer, unless he holds an upholstered furniture manufacturer's license or a bedding manufacturer's license, shall hold a supply dealer's license bearing a registry number assigned or approved by the bureau.

Sterilizer **19059.5.** Every sterilizer shall hold a sterilizer's license bearing a registry number assigned by the bureau.

Branches **19060.** Every person in any class shall obtain a separate license for each branch house; but one whose manufacturing plant is located in another state or foreign country, and who is licensed to manufacture upholstered furniture or bedding or filling materials for sale in California, may have one wholesale outlet operated in the same name in California, covered by the license issued to the factory.

Salesman, etc. **19060.5.** Every person who, on his own account, sells either directly or indirectly to any person either at wholesale or retail any merchandise subject to this chapter by means of a car, catalog, office or in any other manner, shall obtain the proper license for each such method of sale or distribution.

Solicitor, etc. **19060.6.** Every person who, on his own account, advertises, solicits or contracts to manufacture, repair or renovate upholstered furniture or bedding, and who either does the work himself or has others do it for him, shall obtain the particular license required by this chapter for the particular type of work that he solicits or advertises that he will do, regardless of whether he has a shop or factory.

Name **19061.** Every person doing business at the same address under more than one firm name is subject to the license provisions for each firm name.

Procedure re license, etc. **19061.5.** The chief shall prescribe the procedure relative to:
(a) Assignment or reassignment of serial or registry numbers.

(b) Transfer of licenses between persons, where such transfer is effected through rent, lease or sale of the business.

(c) Change in name, ownership, address, or of license classification.

Display **19062.** The license shall be posted in a conspicuous place in the main office or principal place of business of the licensee.

Furniture and bedding licenses: Denial of issuance to individual **19063.** The bureau may refuse to issue any license provided for in this chapter to any individual:

(a) Who has had any license issued to him revoked, or whose license is under suspension, or who has failed to renew his license while it was under suspension.

(b) If any license of a partnership of which he is or was a member, or of a corporation of which he is or was an officer or director, or of a firm or association of which he is or was an officer or of which he is or was acting in a managerial capacity, has had any license issued to it revoked or suspended, and while acting as such member, officer, director, or in such

managerial capacity he participated in any of the prohibited acts for which any such license was revoked or suspended.

19064. The bureau may refuse to issue any license provided for in this chapter to any partnership, corporation, firm, or association:

Denial of
issuance to
partnership,
corporation,
etc.

(a) Who has had any license issued to it revoked, or whose license is under suspension, or who has failed to renew its license while it was under suspension.

(b) If any member of any such partnership, or any officer or director of any such corporation, or any officer or person acting in a managerial capacity of any such firm or association has had any license issued to him revoked, or whose license is under suspension, or who has failed to renew his license while it was under suspension.

(c) If any member of the partnership, or any officer or director of the corporation, or any officer or person acting in a managerial capacity of the firm or association, was either a member of any partnership, or an officer or director of any corporation, or an officer or person acting in a managerial capacity of any firm or association, whose license has been revoked, or whose license is under suspension, or who failed to renew a license while it was under suspension, and while acting as such member, officer, director, or person acting in a managerial capacity participated in any of the prohibited acts for which any such license was revoked or suspended.

Article 4. Application of the Chapter

19070. This chapter shall apply to upholstered furniture and bedding and filling materials sold in California regardless of its point of origin.

Application
of chapter

19071. Secondhand upholstered furniture or bedding, or secondhand filling to be used or that could be used in upholstered furniture or bedding, received from outside of this State shall comply with all the sterilization provisions of this chapter before it is accepted, sold or delivered, either directly or indirectly by any person.

Sterilization
of second-
hand
material

19072. Responsibility for compliance with this chapter rests not only with the manufacturer but also with the wholesaler, and/or any person having in his possession any article of upholstered furniture or bedding or filling materials contrary to the provisions of this chapter.

Responsi-
bility for
compliance

19072.5. Responsibility for labeling of unlabeled foreign-made upholstered furniture or bedding in compliance with the requirements of this chapter, shall rest with the person selling such merchandise in California.

Responsi-
bility for
labeling

19072.6. The manufacturer of chairs and benches and similar articles, using slip seats which are manufactured by himself or purchased from another, is responsible for the labeling of such articles.

Same

19073. This chapter shall not apply to upholstered furniture or bedding which is manufactured and sold at wholesale in California for delivery outside the borders of this State.

Exemption

Article 5. Labeling

- Labeling** 19080. A person shall not, at wholesale, retail, or otherwise, directly or indirectly, make, repair, renovate, process, prepare, sell, offer for sale, display, or deliver any article of upholstered furniture or bedding or any filling materials in prefabricated form or loose in bags or containers, unless such article or material is plainly and indelibly labeled.
- Labels: Approval** 19081. The form and size of labels, the fabric of which they are made and the wording and statements thereon necessary to carry out the provisions of this chapter, shall be approved by the chief.
- Rubber stamp** 19082. A rubber stamp may be used in lieu of a label, on articles with slip seats having a smooth backing on which the imprint can be legibly and indelibly stamped.
- Attachment** 19083. Labels shall be securely attached to the article or filling material at the factory, in a position where they can be conveniently examined.
- Required information** 19084. The information required by this chapter shall be printed on one side of the label only.
- No advertising, etc.** 19085. Labels shall contain no advertising matter nor anything that detracts, or is likely to detract from the required statements.
- Statements must show** 19086. No mark, tag, sticker or any other device shall be placed upon labels by any dealer or any other person in such a way as to cover the required statements.
- Removal unlawful** 19087. It is unlawful for any person, except the purchaser for his own use, to attempt to, or to remove, deface, alter or cause to be removed, defaced or altered, the label or any mark or statement thereon, placed upon any article of upholstered furniture, bedding, or filling material under the provisions of this chapter.
- Misleading terms** 19088. It is unlawful to use, in the description of filling material, or in the statement on any label, any misleading term or designation or any term or designation likely to mislead.
- Grades, etc., of material** 19089. The bureau may establish grades, specifications and tolerances for the kinds and qualities of materials which are used or intended to be used in the manufacture, repair or renovation of upholstered furniture, bedding or filling materials, and may approve or adopt designations and rules which are not in conflict with any provisions of this chapter, for the labeling of articles filled with these materials.
- Secondhand material** 19092. The repairer or renovator of any secondhand upholstered furniture or bedding which is subsequently sold, shall affix the "Secondhand Material" label.
- Owner's material** 19093. Any person who repairs or renovates upholstered furniture or bedding for the owner for his own or a tenant's use, shall affix the "Owner's Material" label, which shall be attached to the article before delivery to the owner.

Article 6. Sterilization

19120. The enforcement of all sterilization regulations approved by the California State Department of Public Health pertaining to any article subject to the provisions of this chapter is vested in the bureau. Sterilization

19121. Filthy or soiled articles of new or used upholstered furniture or bedding cannot be sold, offered or exposed for sale unless the fabric covering them is either properly cleaned or replaced by a new covering and then subjected to sterilization when so provided for in this chapter. Dirt

19122. A person shall not engage in the business of sterilizing any article of upholstered furniture or bedding or filling material, provided for in this chapter, without first having his sterilization equipment tested and approved by the bureau. Sterilization:
Equipment

19122.5. Periodic tests and inspections shall be made by an authorized representative of the bureau, to determine whether or not the equipment and procedures used, comply with the requirements of the Sterilization Regulations. Inspections

19123. The provisions of this article apply only to persons subject to the license provisions of this chapter. Application
of article

19123.4. Newly manufactured articles of upholstered furniture and bedding which contain any secondhand filling material shall be sterilized before they are offered or exposed for sale, except feather and down filled articles. Feathers and down must be sterilized loose. Secondhand
filling
material

19123.5. Every article of upholstered furniture and bedding and all filling material, repaired or renovated for resale or repaired or renovated for an owner but subsequently offered for sale shall be sterilized before being offered or exposed for sale. Repaired and
renovated
articles

19123.6. Every article of upholstered furniture or bedding to which any secondhand material has been added in the process of repairing, shall be sterilized in accordance with the provisions of the Sterilization Regulations. Same

19124. Every person who receives for sterilization any upholstered furniture or bedding or filling material, shall sterilize all such articles and material in accordance with the Sterilization Regulations. Regulations

19124.5. Every person who sterilizes any upholstered furniture or bedding or filling material shall affix a sterilization label to the article or material immediately after the sterilization has been completed. The label shall be securely attached in a position where it may be conveniently examined. Label

19127. The form, size and color of sterilization labels, and the paper of which they are made shall be approved by the chief and as provided in the Label Regulations. Sterilization
label

19127.5. Sterilization labels shall be sold only to sterilizers licensed under this chapter. Illegal possession of any sterilization label is a violation of this chapter. Void or mutilated labels shall be returned to the bureau. Possession,
etc.

Records 19127.6. The sterilizer shall keep a record of all data and show the disposition of every label as required in the Sterilization Regulations. The record shall be accessible at all reasonable times to the chief and the inspectors.

Articles to be sterilized 19129. Articles of secondhand upholstered furniture and bedding listed in the Sterilization Regulations, and any second-hand article that can be used for sleeping or reclining purposes, shall be sterilized under the provisions of this chapter before being sold.

Diseases 19131. Every article of upholstered furniture or bedding from any private or public hospital, jail or other institution, or which has been used by any person, suffering from an infectious or contagious disease, shall be sterilized before it is repaired or renovated.

Articles to be kept separate 19132. New or sterilized articles of upholstered furniture or bedding or materials shall at all times be kept separate from any secondhand articles or materials that are unsterilized.

Article 7. Regulations

False advertising 19150. Every person who falsely advertises or misrepresents in any way any merchandise coming under the provisions of this chapter either directly or indirectly by any medium of advertising, including false statements made on the recognized California State labels or any other label or tag attached to the merchandise in question, is guilty of a violation of this chapter.

Affixing tags 19158. Every person, upon receiving upholstered furniture or bedding for repairing or renovating shall securely affix, immediately, a tag of identification showing the owner's or dealer's name, address and the date upon which it was received. The tag shall remain affixed until the article is in the process of repair or renovation.

Cleanliness 19160. The premises, delivery equipment, machinery, appliances and devices of all persons licensed under this chapter shall at all times be kept free from refuse, dirt contamination, insects or vermin.

Article 8. Fees

Fee schedule 19170. (a) The fee imposed for the issuance and for the renewal of each license granted under this chapter shall be set by the chief, with the approval of the director, at a sum not more nor less than that shown in the following table:

	Maximum fee	Minimum fee
Furniture manufacturer's license-----	\$120	\$40
Wholesale furniture dealer's license-----	120	40
Bedding manufacturer's license-----	120	40
Wholesale bedding dealer's license-----	120	40
Supply dealer's license-----	120	40
Furniture repairer's license-----	80	20
Bedding renovator's license-----	80	20
Sterilizer's license-----	80	20
Retail furniture dealer's license-----	20	4
Retail bedding dealer's license-----	20	4

(b) A person who has paid the required fee and who is duly licensed as a furniture manufacturer, a furniture repairer, a bedding manufacturer or a bedding renovator under this chapter shall not be required to pay, in addition, the fee prescribed herein for a sterilizer's license.

19170.5. Licenses issued under this chapter expire at 12 p.m. on August 31, 1962, and thereafter, at 12 p.m. on August 31 of each even-numbered year, if not, in each instance renewed. To renew his license, a licensee shall, on or before the date on which it would otherwise expire, apply for renewal on a form prescribed by the chief, and pay the fee prescribed by Section 19170. If the licensee fails to renew his license before its expiration, a delinquency fee of twenty percent (20%) shall be added to the renewal fee. If the renewal fee and delinquency fee are not paid within 30 days after expiration of the license, the licensee shall be subject to such penalties as are provided elsewhere in this chapter. License expiration date

19171. Prorated license fees shall be on a quarterly basis beginning as of September 1st, December 1st, March 1st and June 1st. Prorating

19171.5. A person who applies for a license before September 1, 1962, and who did not hold such license during the last preceding license period may obtain the license on a prorated basis by payment of an amount equal to one fourth of the license fee in effect on July 1, 1961 for each quarter, or fraction thereof, remaining in the license period in which he applies. Same

A person who applies for a license after August 31, 1962, and who did not hold such license during the last preceding license period may obtain the license on a prorated basis by payment of an amount equal to one-eighth of the license fee in effect on the last preceding regular renewal date before the date on which he applies for each quarter, or fraction thereof, remaining in the license period in which he applies.

19171.6. The chief shall prescribe the procedure for licensing of any applicants for proration not clearly defined elsewhere in this chapter. Same: Procedure

19172. A person may not obtain a new license of the same class as a license held by him during the last preceding license period, but may renew the license previously held by him on payment of the renewal fee and delinquency fee in effect on the last regular renewal date before the date on which he applies for renewal. Reclassification

19173.5. Section 1034 of the Government Code authorizes the use of the United States postal cancellation on the envelope in which the fee is mailed, as the date of payment. Date of payment

19174. All fees collected under this chapter shall be reported to the State Controller and paid to the State Treasurer and credited to the Bureau of Furniture and Bedding Inspection Fund, to be expended only in carrying out this chapter. Special fund

Article 9. Enforcement

- Inspections** 19200. The chief or any inspector shall have access to the premises, equipment, materials, partly finished and finished articles and records of any person subject to the provisions of this chapter.
- Same: concealed material** 19200.5. The chief or any inspector may open any articles of upholstered furniture or bedding, including pillows or cushions belonging to or forming a part thereof, for the purpose of inspecting concealed filling material and may take either the entire article, or samples of filling material in such quantities as may be necessary for analysis.
- Same; fitness for sale** 19201. The chief or any inspector may determine the fitness of any secondhand or damaged article of upholstered furniture or bedding or filling material, for sterilization and sale.
- Unfit material** 19202. The bureau may condemn, withhold from sale, seize or destroy any upholstered furniture or bedding or any filling material which is found to be in violation of this chapter.
- Tag on condemned article** 19203. The tag to be affixed to any article of condemned upholstered furniture or bedding, or any material by an inspector shall be a red tag and shall contain such information as may be required by the chief.
- Removals** 19204. Every person who removes, or causes to be removed any tag or device placed upon any upholstered furniture or bedding or any material, by an inspector is guilty of a violation of this chapter.
- Production** 19205. The failure of any person to produce upon demand of an inspector any article that has been condemned and ordered held on an inspection notice signed by such person, or an inspection notice that the person has refused to sign, is a violation of this chapter.
- Interference** 19206. No person shall interfere with, obstruct or otherwise hinder any inspector of the bureau in the performance of his duties. The chief, his deputies, and assistants, and all inspectors in the performance of their official duties, shall have the same powers as are possessed by peace officers of this State.
- Notification of violations** 19207. Any inspector having knowledge of a violation of any of the provisions of this chapter shall notify the chief of the violation.
- Citations; hearing, etc.** 19208. The chief or any inspector may cite any person subject to the provisions of this chapter to a hearing before the chief or the inspector to show cause why he should not be subject to disciplinary action or prosecution for any act or omission in violation of this chapter.
- Proceedings; Administrative Procedure Act** 19209. Except as otherwise required to comply with the provisions of Article 9.5 of this chapter, the proceedings in any hearing or disciplinary action under this chapter shall be conducted in accordance with Chapter 5 of Part 1 of Division 3 of Title 2 of the Government Code.
- Suspension of license** 19210. After a hearing, the bureau may suspend a license for a period not to exceed six months for a violation of any of the provisions of this chapter or of the rules and regulations

of the bureau, or for a violation of Article 1, Chapter 1 of Part 3 of Division 7 of the Business and Professions Code, relating to false or misleading advertising; provided, however, that the license of a wholesaler or retailer shall not be suspended in the absence of a finding that the wholesaler or retailer knowingly offered for sale or sold articles not conforming to the requirements of this chapter or the rules and regulations of the bureau.

(a) In lieu of a third suspension, the bureau may revoke a license.

(b) In any order of suspension or revocation, the bureau may impose conditions relative to the disposition of articles not conforming to the requirements of this chapter or the rules and regulations of the bureau, or may impose conditions relative to the completion or fulfillment of any orders or contracts entered into prior to the date of the hearing.

19211. Any person who has been denied a license, or who has had his license revoked, or whose license is under suspension, or who has failed to renew his license while it was under suspension, or any person who has been a member of any partnership, or an officer or director of any corporation, or an officer or person acting in a managerial capacity of any firm or association, whose license has been revoked, or whose license is under suspension, or who has failed to renew a license while it was under suspension, and while acting as such member, officer, director, or person acting in a managerial capacity, participated in any of the prohibited acts for which any such license was suspended, or revoked, shall be prohibited from serving as a member of any licensed partnership, or as an officer or director of any licensed corporation, or as an officer or person acting in a managerial capacity of any licensed firm or association, and the employment, election, or association of such person in any such capacity by any such licensee shall constitute grounds for disciplinary action against the licensee.

Individual under discipline prohibited from serving as partner, director, etc.

19212. The performance by any partnership, corporation, firm, or association of any act or omission constituting a cause for disciplinary action, likewise constitutes a cause for disciplinary action against any licensee who is a member of any such partnership, or an officer or director of any such corporation, or an officer or person acting in a managerial capacity of any such firm or association, if such licensee participated in such prohibited act or omission.

Participation by individual in prohibited act of partnership, etc.

Article 9.5. Disciplinary Proceedings Against Nonresidents

19215. As used in this article, unless otherwise indicated, "chief" means the Chief of the Division of Administrative Procedure.

Chief

19215.1. The acceptance by a nonresident licensee of any of the rights and privileges conferred upon him by this chapter, as evidenced by his engaging within this State, either

Service on nonresident licensee

personally or through an agent or employee, in a business subject to license under this chapter, is equivalent to the appointment by such licensee of the chief as his true and lawful attorney upon whom may be served all lawful process in any disciplinary proceeding conducted against him under this chapter.

Effect of
service
on chief

19215.2. The acceptance of such rights and privileges as so evidenced shall signify the agreement of the licensee that any such process which is served against him in the manner provided in this article shall be of the same legal force and validity as if served upon him personally in this State.

Method of
service, fee

19215.3. Service shall be made by leaving a copy of the accusation, together with a notice of defense and statement to respondent as described in Section 11505 of the Government Code, with a fee of two dollars (\$2) for each licensee to be served, in the hands of the chief or in his office in Sacramento. Such service shall be sufficient service on the licensee subject to compliance with Section 19215.4 of this code.

Mailing of
notice

19215.4. A notice of such service and a copy of the accusation, together with the notice of defense and statement to respondent, shall forthwith be sent by registered mail by the chief to the licensee at his last known address as furnished by the bureau. Personal service of such notice, copy of the accusation, notice of defense, and statement to respondent upon the licensee wherever found outside this State shall be the equivalent of such mailing.

Proof of
compliance

19215.5. Proof of compliance with Section 19215.4 of this code shall be made in the event of service by mail by affidavit of the chief or his authorized employee showing such service by mailing, together with the return receipt of the United States post office bearing the signature of the licensee or his agent. Such affidavit and receipt shall be appended to the original accusation on file with the bureau. In the event of personal service outside this State such compliance may be proved by the return of any duly constituted public officer qualified to serve process in civil actions in the state or jurisdiction where the licensee is found, showing such service to have been made. Such return shall be appended to the original accusation on file with the bureau.

Continuance,
etc.

19215.6. The bureau, or if the proceeding has been assigned to a hearing officer of the Division of Administrative Procedure, such hearing officer, may order such postponements or continuances and grant such extensions of time as may be necessary to afford the licensee reasonable opportunity to defend the proceedings. In no event shall the licensee have less than 30 days after the date of mailing or delivery to him of the copy of the accusation in which to file a notice of defense, nor shall the notice of hearing provided for in Section 11509 of the Government Code or the notice and copy of affidavit referred to in Section 11514 of said code be mailed or delivered less than 20 days prior to the date of hearing, and the

time for making a request to cross-examine under said Section 11514 shall be not less than 15 days.

19215.7. The chief shall keep a record of all process served Records upon him pursuant to this article which shall show the day and hour of service.

19215.8. As used in this article "nonresident" means a Nonresident person who is not a resident of this State at the time he engages in business in the State as described in Section 19215.1 of this code.

Article 10. Penalties

19220. Every person who violates any of the provisions of Penalty this chapter is guilty of a misdemeanor and punishable for each offense by a fine of not less than fifty dollars (\$50) nor more than five hundred dollars (\$500) or by imprisonment for not less than three nor more than six months or by both such fine and imprisonment.

19221. The unit for a separate and distinct offense in viola- Unit of offense tion of this chapter is each and every article of improperly labeled, or not labeled, upholstered furniture or bedding or filling material made, repaired, recovered, renovated, sterilized, sold, exposed or offered for sale, delivered, consigned, rented, or possessed with intent to sell contrary to the provisions of this chapter.

False Advertising in General

Article 1, Chapter 1 of Part 3 of Division 7 of the Business and Professions Code

17500. It is unlawful for any person, firm, corporation or association, or any employee thereof with intent directly or indirectly to dispose of real or personal property or to perform services, professional or otherwise, or anything of any nature whatsoever or to induce the public to enter into any obligation relating thereto, to make or disseminate or cause to be made or disseminated before the public in this State, in any newspaper or other publication, or any advertising device, or by public outcry or proclamation, or in any other manner or means whatever, any statement, concerning such real or personal property or services, professional or otherwise, or concerning any circumstance or matter of fact connected with the proposed performance or disposition thereof, which is untrue or misleading, and which is known, or which by the exercise of reasonable care should be known, to be untrue or misleading, or for any such person, firm, or corporation to so make or disseminate or cause to be so made or disseminated any such statement as part of a plan or scheme with the intent not to sell such personal property or services, professional or otherwise, so advertised at the price stated therein, or as so advertised.

Restrictions
on adver-
tising

17500.1. No state board or commission within the Department of Professional and Vocational Standards shall enact any rule or regulation which shall restrict or prohibit advertising by any commercial or professional person, firm, partnership or corporation which does not violate the provisions of Section 17500 of the Business and Professions Code. Any existing rules or regulations conflicting with this section are hereby repealed.

The provisions of this section do not apply to any rules or regulations heretofore or hereafter formulated pursuant to Section 6076 of this code.

Price
statements

17501. For the purpose of this article the worth or value of any thing advertised is the prevailing market price, wholesale if the offer is at wholesale, retail if the offer is at retail, at the time of publication of such advertisement in the locality wherein the advertisement is published.

Exception

No price shall be advertised as a former price of any advertised thing, unless the alleged former price was the prevailing market price as above defined within three months next immediately preceding the publication of the advertisement or unless the date when the alleged former price did prevail is clearly, exactly and conspicuously stated in the advertisement.

Good faith

17502. This article does not apply to any visual or sound radio broadcasting station or to any publisher of a newspaper, magazine, or other publication, who broadcasts or publishes an advertisement in good faith, without knowledge of its false, deceptive, or misleading character.

Article 1. General Provisions

1100. Location of Offices. The principal office of the Bureau of Furniture and Bedding Inspection is located at:

530 Business and Professions Bldg., 1020 N Street,
Sacramento 14, California,

and branch offices of the bureau are located in San Francisco, Los Angeles, San Diego, Fresno, Chico, San Jose.

NOTE: Authority cited for §§ 1100 through 1265: Sections 19034, 19034.5, 19170 (c) (Stats. 1950, Ch. 3), and 19089, Business and Professions Code.

History: 1. Originally published 3-22-45 (Title 4).

2. Revision filed 9-18-47 as an emergency; effective upon filing (Register 9).

3. Revision filed 5-23-50; designated to be effective 7-1-50 (Register 20, No. 5).

4. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1101. Correspondence. All general correspondence shall be directed to the principal office of the bureau at Sacramento.

1102. Tenses, Gender and Number. For the purposes of these rules and regulations, the present tense includes the past and the future tenses, and the future includes the present; the masculine gender includes the feminine, and the feminine includes the masculine; and the singular includes the plural, and the plural includes the singular.

1103. Definitions of Bureau and Act. For the purposes of these rules and regulations, the term "bureau" means the Bureau of Furniture and Bedding Inspection, and the term "act" means Chapter 3 of Division 8 of the Business and Professions Code, which chapter is also cited as the Furniture and Bedding Inspection Act.

1104. Scope. The purpose of these regulations, and it is hereby declared to be the policy, intent and direction to employ the terms, definitions and nomenclature as are commonly used, and as recognized in the manufacture, sale and distribution of furniture and bedding products. Classifications of materials in these regulations are intended to have understandable meaning to the ultimate consumer.

1105. "Separate service to the trade" as used in Section 19014 of the act, includes any of the following services rendered by the parent house, when rendered by a subsidiary establishment, viz.:

(a) **Sale of Goods.** Except that a display and sale of goods in an established furniture mart or exchange is not included unless it is the principal place of business of the wholesaler maintaining the display and service.

(b) **Delivery of goods** sold in the subsidiary establishment from a local stock independent of the parent house.

(c) **Entire or partial billing and/or collection** for goods so sold and delivered.

1106. The term "on his own account" as used in Sections 19060.5 and 19060.6 of the act, is intended to limit the requirement for a license to the person who is obligated as a principal in contracts to sell or contracts to render services. The requirement for a license does not extend to salesmen, brokers, factors, agents, solicitors, factory representatives or those who act only in a representative capacity for others.

1107. Exemptions. Articles which are not clearly upholstered furniture or bedding, as described in the act, may be declared exempt from the provisions of the act and these regulations, except that when exempted articles are labeled they become subject to the act and the regulations and must be labeled in conformity therewith. No questionable articles shall be considered as exempt, however, until the articles or photographs thereof, have been submitted to the bureau for inspection and final authority for exemption has been granted.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1108. License Fees. The following schedule of license fees is hereby adopted:

Furniture manufacturer's license	\$45.00
Wholesale furniture dealer's license	45.00
Bedding manufacturer's license	45.00
Wholesale bedding dealer's license	45.00
Supply dealer's license	45.00
Furniture repairer's license	30.00
Bedding renovator's license	30.00
Sterilizer's license	30.00
Retail furniture dealer's license	7.50
Retail bedding dealer's license	7.50

Such schedule of fees shall be effective July 1, 1958, and shall be continued in force until this rule is amended or repealed.

History: 1. Amendment filed 4-4-58; designated effective July 1, 1958 (Register 58, No. 6).

Article 2. Labels for Upholstered Furniture and Bedding

1120. Attachment of Labels. Chairs, davenports, chaise longues, studio couches, and other seating pieces having loose cushions shall have the labels attached under the cushion on top and in the center of the front edge of the platform. Seating pieces without loose cushions shall have labels attached at the front under the seat rail.

1121. Label Fabric. (a) Labels shall be made of a fabric or other approved material of good quality which cannot readily be torn or will not flake when abraded (except sterilization labels—refer to Section 1129).

(b) Cloth backed paper labels will not be approved.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1122. Color of Labels and Ink. (a) Labels on articles manufactured wholly of new material shall be white in color.

(b) Labels on articles manufactured in whole or in part of second-hand material shall be red in color.

(c) Color of ink on labels shall be black.

1123. Size of Labels and Type in Printing. (a) The minimum size of labels shall be 2 x 3 inches. Labels shall be larger when the required size of type and statements make it necessary.

(b) Size of type in printing of labels shall be that specified in these regulations.

1124. Statements on labels shall be as follows:

(a) "Do not remove this label under penalty of law."

(b) Headings shall read "ALL NEW MATERIAL" when only new materials are used, "SECONDHAND MATERIAL" when the material is in whole or in part secondhand.

(c) Labeling Examples:

Cotton batting (or felt)	Blown cotton
Linters -----75%	Linters -----50%
Staple -----25%	Waste -----30%
	Picker -----20%
Batting (or felt)	
Cotton linters -----85%	
Synthetic fiber -----15%	

(1) When two or more kinds of materials are combined in batting, felt, pads or loose material, they shall be shown in the order of their predominance, the largest component first, followed by the percentage of each component. Any cotton, wool or other components, except shoddy, shall show grades as provided in Section 1158.1(c).

Labeling Examples:

Batting (or felt)	Batting (or felt)
Cotton -----75%	Staple cotton -----60%
Linters -----70%	Virgin wool -----40%
Picker -----30%	Pad
Wool waste -----25%	Curled hog hair -----85%
	Sisal fiber -----15%

(2) The percentages of batting or felt or pad or any other prefabricated materials used in any article, when combined with other prefabricated or loose materials shall be shown on the label in the order of their predominance, the largest component first.

Labeling Examples:

Cotton batting (or felt) -----60%
Linters -----75%
Waste -----25%
Curled hair pad -----40%
Hog -----85%
Cattle tail -----15%

(d) The size of articles of bedding, showing the width and length expressed in inches. Boudoir, decorative or fancy cushions need not show size. (See 1164 and 1165 of these regulations.)

(e) The net weight of filling material which shall be the minimum weight in articles of bedding, except in feather and down filled pillows and boudoir, decorative or fancy cushions. (See Sec. 1163 of these regulations.)

(f) The registry number assigned or approved by the bureau.

(g) "Certification is made that the materials in this article are described in accordance with law."

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

3. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1125. Forms of Labels for New Upholstered Furniture and Bedding shall be substantially as follows:

Type No. 1. For: Seat cushions (for household use)
Decorative or boudoir cushions
Occasional chairs without loose cushions
Cloth bottom slip seat chairs and benches
Similar items.

Article 3. Labels for Bulk Filling Materials

1140. Labels on Bulk Filling Material may be printed on the sleeves, wrappers, bags, cartons, or containers in which such material is sold, or may have such a label imprinted thereon with a rubber stamp or may be gummed stickers or tags, in compliance with the following specifications.

1141. Label Material. (a) Sleeves, wrappers, bags, cartons, and other containers shall be of material sufficiently strong to remain intact when delivered to the purchaser.

(b) Gummed stickers shall be made of reasonably strong material and the adhesive shall hold the sticker securely and permanently in place.

(c) Tags shall be made of material which will not tear easily and from which the attaching cord or wire will not tear out.

1142. Color of Labels. (a) Labels on material which is wholly new shall be of one color sufficiently light for the imprint to be plain and legible. When sleeves, wrappers, bags, etc. are varicolored or dark in color, a white space of sufficient size to imprint the label may be provided or a white gummed sticker attached.

(b) Labels in the form of stickers or tags shall be red in color, when attached to material which is in whole or in part secondhand.

1143. Color of Ink. (a) Labels on filling material which is wholly new, shall be printed in black ink.

(b) Labels on filling material which is in whole or in part second-hand, shall be printed:

(1) Black ink on a red background.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1144. Size of Labels. The minimum permissible size of labels is six square inches. They shall be larger when the required size of type and statements make it necessary. This shall not include the space required for statements of packing practices.

1145. Statements on Labels shall be as follows:

(a) "Do not remove this label under penalty of law."

(b) Headings shall read "ALL NEW MATERIAL" when the material is wholly new; "SECONDHAND MATERIAL" when the material is in whole or in part secondhand.

(c) Description of filling material:

(1) The kinds, grades and percentages of filling materials used, as provided in these regulations.

(d) The registry number assigned or approved by the bureau.

(e) "Certification is made that this material is described in accordance with law."

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1146. Forms of Labels for Prefabricated or Bulk Filling Materials shall be substantially as follows:

Type "A"—For: Batt sleeve or wrapper label. Entire label printed on wrapper.

DO NOT REMOVE THIS LABEL under penalty of law		
ALL NEW MATERIAL		← Minimum type size one-eighth inch in height, in capital letters.
		← Insert description of filling materials by clearly imprinting in English, using capital letters not less than one-eighth inch high.

← This space optional.

Type "F"—For: Bulk material tag or cloth label for cloth bags or containers.

The diagram shows a rectangular tag with a pointed top. At the top center is a circle representing a hole. The tag is divided into several sections:

- Top Section:** A small rectangular area at the top, below the hole.
- Warning Section:** A rectangular area containing the text "DO NOT REMOVE THIS LABEL under penalty of law".
- Title Section:** A rectangular area containing the text "ALL NEW MATERIAL".
- Description Section:** A large rectangular area for describing the filling materials.
- Weight Section:** A line with the text "Net Wt." followed by a dashed line for writing.
- Certification Section:** A rectangular area containing the text "Certification is made that this material is described in accordance with law."
- Registry Section:** A rectangular area containing the text "REGISTRY NO." inside a smaller box.
- Vendor Section:** A rectangular area at the bottom containing the text "Name and address of vendor or manufacturer".

Annotations with arrows point to specific parts of the tag:

- An arrow points to the top section: "Space for stitching or tying. (Method optional)".
- An arrow points to the "ALL NEW MATERIAL" section: "Minimum type size one-eighth inch in height, in capital letters."
- An arrow points to the large description section: "Insert description of filling materials by clearly imprinting in English, using capital letters not less than one-eighth inch high."
- An arrow points to the bottom section: "This space optional."

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

Article 4. Universal Filling Material Requirements

1149. Application of This Article. The provisions of this article apply to all filling materials which are or are intended to be used in upholstered furniture or bedding.

History: 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1150. Cleanliness of Filling Materials. All filling materials shall be reasonably clean and free from extraneous material, dirt, dust, filth, epidermis, excreta, disagreeable odors, or contamination.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1150.1. Sludge Limitation. When any filling material contains sludge in excess of .3 milliliters per 20 gram sample, it is unfit for use. As used in this section "sludge" means any material which will settle out of a solution which has been passed through a 40 mesh sieve.

History: 1. New section filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1150.2. Oil and Grease Limitations. When any filling material contains more than 2 percent but not more than 5 percent of oil, grease, or fat or a combination thereof, it shall be classified as "Waste." Material which contains more than 5 percent of oil, grease, or fat or a combination thereof is unfit for use.

History: 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Re filed 7-31-56 (Register 56, No. 15).

1150.3. Trash Limitations. (a) **Vegetable Fibers.** When any batting, felt, pad, or any other prefabricated material of vegetable origin contains more than 7 percent but not more than 10 percent of trash, shell, shale, leaf, stem, pulp, undecorticated fibers, etc., it shall be classified as "Waste," and the word "Waste" shall be incorporated in its labeling term. When the trash, shell, shale, leaf, stem, pulp, etc., exceeds 10 percent, but does not exceed 20 percent, such extraneous material shall be stated on the label as "Trash" and the material itself shall be designated as "Waste." Any batting, felt, pad, or any other prefabricated material in which the trash exceeds 20 percent is unfit for use.

(b) **Animal Fibers.** When any product of animal origin contains more than 2 percent but not more than 10 percent of trash, burrs, stickers, seeds, sticks, epidermis, kemp, etc., it shall be classified as "Waste," and the word "Waste" shall be incorporated in its labeling term. When the trash, burrs, stickers, seeds, etc., exceed 10 percent, the material is unfit for use.

(c) When any filling material, not covered by (a) and (b) above, contains more than 10 percent of a combination of trash, debris, seeds, sticks, etc., and/or foreign material, it is unfit for use.

History: 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

3. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1150.4. Thread Limitation. Any material which contains more than 2 percent but not more than 5 percent of hard spun thread, yarn or roving shall be classified as "Waste." When hard spun thread, yarn or roving exceeds 5 percent, the percentage shall be stated on the label as "Thread," and the material itself shall be designated as "Waste."

History: 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Re filed 7-31-56 (Register 56, No. 15).

1151. Secondhand Filling Material. (Refer Section 19008 of the act.)

- History:* 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).
2. New section filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1151.3. By-products. "By-products" shall mean new fibers that are the by-products removed from the various machine operations in the preparation and manufacture of yarn up to and including the process of spinning, spun fibers being subsequently reduced to individual fibers, together with the cotton known as gin flues, and shall include only the following materials:

- | | |
|------------------------|--------------------|
| (a) Comber | (f) Gin flues |
| (b) Strips | (g) Noils |
| (c) Fly | (h) Tanners wool |
| (d) Picker | (i) Napper flocks |
| (e) Textile spun fiber | (j) Fulling flocks |

The name of the kind and class of fiber shall be stated on the label, except that with respect to "Picker," "Fly," and "Gin Flues," any of such designations may be used interchangeably to describe any of such materials.

- History:* 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).
2. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1151.4. Waste. Any new material classified as "Waste" under Sections 1150.2, 1150.3, or 1150.4, and any other new material which is the by-product or waste of the various machines in any process of manufacture employing only new materials, except as provided in Section 1151.3, and fibers recovered from clean fabric clips and similar scraps made in whole of new materials, and which are subsequently completely defabricated, and cotton linter motes, pills and shank and tag wools, etc., shall be designated on the label as "Waste" in addition to the name of the kind of fiber used.

- History:* 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).
2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1152. Shoddy. (a) Any material which has been knit or woven into fabric which has been used by the ultimate consumer and subsequently defabricated, together with fibrous material from used clips and scraps which contain any undefabricated cloth fragments, shall be designated on the red "Secondhand Material" label as "Shoddy."

(b) Any material which has been knit or woven into fabric which has not been used by the ultimate consumer and which subsequently has been defabricated, together with fibrous material from new clips

and scraps which contain any undefabricated cloth fragments, shall be designated on the white "All New Material" label as "Shoddy."

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 5-1-59; designated effective June 1, 1959 (Register 59, No. 7).

1153. Manufacturing Processes are hereby defined as those operations necessary to produce finished goods, but shall not include the defabrication, shredding, blending or mixing of any clippings or scraps preparatory to re-use.

1154. Damaged Filling Materials, Upholstered Furniture, and Bedding. Filling materials and articles of upholstered furniture and bedding which have been damaged by fire, water, or otherwise shall be designated on the label as "Damaged."

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 5-1-59; designated effective June 1, 1959 (Register 59, No. 7).

1154.5. Imperfect Materials. Filling materials which have been improperly prepared for use or are defective or of a type classified as "Seconds" by their producers shall bear the word "Imperfect" on the label in a position preceding other required terms.

History: 1. New section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1155. Dyed Materials. Any filling materials that have been dyed shall be designated by the word "Dyed" or the word "Colored" immediately preceding other required terms or designations.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1156. Names of Filling Materials. Filling materials shall be designated on the labels as provided in the following regulations. Any kinds or grades of materials that are not named or defined in these regulations will be assigned names for labeling purposes, when samples are submitted to the bureau.

1157. Additional Terms Not Prohibited. These regulations shall not be construed as prohibiting the use, in conjunction with the prescribed names or descriptive terms, of additional words or phrases that correctly designate and more fully describe any filling material, when such additional words or phrases are required or approved by the bureau.

1158. Blends. When two or more kinds of material are used in a blend, the materials shall be labeled as provided in these regulations. (See Article 2, Section 1124.)

1158.1. Description of Filling Materials. (a) The kinds, grades and percentages of filling materials used in articles of upholstered furniture and bedding shall be stated on the approved law label. Percentages shall be computed on the basis of the avoirdupois weight of

such filling materials only. Any deviation from percentages stated shall not exceed 10 percent of the smaller component.

(b) When the filling material consists of one kind and grade only, the percentage need not be stated, except as required in Article 6 of these regulations (Feather and Down Regulations).

(c) When batting or felt or loose material consists of different grades of any one kind of material, the grades shall be shown in the order of their predominance, the largest component first, followed by the percentage of each component, except that the percentages are not required to be shown in shoddies.

(d) In wastes or shoddies which contain more than one type of synthetic fiber, the quantity of the different types shall be combined and shall be designated on the label as "Synthetic Fiber."

History: 1. New section filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1158.5. Deviation From Percentage Stated. No deviation from percentages stated on labels in excess of 5 percent is permitted in blends, except as provided in Article 6 of these regulations.

History: 1. New §§ 1158.5, 1158.6, 1158.7, filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendments to §§ 1158.5, 1158.6, 1158.7 filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1158.6. Other Materials. A material represented as consisting of one kind and grade of material may not contain more than 5 percent of other materials. When other materials than that specified exceeds 5 percent it must be designated on the label, except as provided in Section 1201.

History: 1. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1158.7. Incidental Admixtures. New fibers or other kinds of new materials which constitute less than 5 percent of a blend or of the total filling material in an article are not required to be stated on the label except as provided in Article 6 of these regulations.

1158.8. Naming Mixtures.

History: 1. New section filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

2. Repealer filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1159. "Batting" or "Felt." Either of these terms shall be used only when fibers are garnetted or carded and used in layer form. They may not be used when batting or felt scraps or clippings are stuffed or blown in the same manner as unfelted materials. These terms must be followed by a listing of the component kinds and grades of materials and their respective percentages. (See Article 2, Section 1124 of these regulations.)

1160. Pads. Any material or fiber which is interwoven or punched on burlap or any other woven material, or otherwise fabricated into a pad, including the application of latex or synthetic rubber as a

component and as a factor in the molding process, shall be labeled "Pad." The word "Pad" shall precede a description of the component materials.

History: 1. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1161. Pad Size. Any pad used in upholstered furniture or bedding made of sisal fiber, curled hair, or any other material, is assumed to cover the entire top and bottom surfaces of the upholstered furniture seat cushions or bedding and the entire usable surface of non-reversible seat cushions and other parts or areas wherever used. This does not apply to upholstered furniture arms. If a pad smaller than the size of a mattress, cushion, or other article is used, the size of the pad must be stated on the label.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1162. "Standard Size" Feather and Down Pillows. A "Standard Size" pillow is hereby defined as a:

(a) Goose and/or duck feather and/or down pillow whose finished size is 20" x 26" or 21" x 27".

(b) No feather and/or down pillow whose finished size is less than 20" x 26" may be advertised or sold as a "Standard Size" pillow.

1163. Size and Weight Limitations. Pillows filled and labeled as 100 percent down, shall contain not less than the net weight of down specified in the following schedule of sizes and weights (weights are not required on labels). Sizes of pillows other than those set forth herein shall contain a proportionate weight of down.

<i>Finished pillow size</i>	<i>Minimum net weight of down</i>
21" x 27" -----	15 oz.
20" x 26" -----	13 oz.
19" x 26" -----	12 oz.
18" x 25" -----	11 oz.
17" x 24" -----	10 oz.

There shall be no requirement for weights of filling materials of pillows which contain blends or mixtures of goose and/or duck feathers and/or down or chicken or turkey feathers.

The provisions of this section shall not be applicable to articles manufactured and in stock prior to July 1, 1950, nor to articles ordered from a manufacturer or wholesaler prior to that date, but shall be applicable to all articles, orders for which are received by the manufacturer on or subsequent to July 1, 1950.

1164. Cut Size of Comforters and Sleeping Bags. The size stated on labels of comforters and sleeping bags shall be the "Cut Size" which shall be the length and breadth of the covering before the top and bottom are sewed together and before quilting or tufting. A tolerance of 3 percent is permissible only in the direction in which

widths of cloth are joined to make the cover. (Example: Comforter labeled 72" x 84"—When fabric is of 36" width, tolerance is in the 72" dimension only. When fabric is of 42" width, tolerance is in the 84" dimension only.)

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1165. Finished Size of Bedding. The size stated on labels of articles of bedding other than comforters and sleeping bags shall be the minimum finished size.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

Article 5. Cotton Regulations

(Also see Article 4)

1180. "Staple cotton" shall mean the staple fibrous growth as removed from cottonseed in the usual process of ginning (first cut from seed), free from excessive foreign material.

History: 1. Amendment filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1181. "Cotton By-products."

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1182. "Textile Spun Cotton."

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1183. "Cotton linters" shall mean the lint or fibrous growth removed from the cottonseed subsequent to the usual first process of ginning. For labeling purposes cotton linters are divided into two grades and the name of the grade used shall be designated on the label, as follows:

(a) "Cotton linters" shall be equal to or higher in quality than grades 1, 2, 3, 4, 5, 6 or 7 of the official standards of the United States for Grades of American Cotton Linters.

(b) "Second cut cotton linters" shall be equal to chemical grade of the official standards of the United States for Grades of American Cotton Linters.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1184. "Cotton Waste."

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1185. Oil Limitation.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1186. Trash Limitation.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

Article 6. Feather and Down Regulations

(Also see Article 4)

1190. "Down" shall mean the undercoating of waterfowl, consisting of the light fluffy filaments growing from one quill point but without any quill shaft.

1191. "Feathers" shall mean the feathers of any fowl which are whole in structure and which have not been processed in any manner other than dusting, washing and sterilizing.

1192. "Body feathers" shall mean the feathers of any fowl other than wing and tail feathers. The term "SMALL BODY FEATHERS" will be permitted on the label, provided the overall length of the feathers used, does not exceed $3\frac{1}{2}$ inches.

1193. "Quill feathers" shall mean the wing and tail feathers commonly known as quills.

1194. "Crushed feathers" shall mean feathers which have been processed by a curling or crushing machine and includes the feather fiber resulting from such processing. Such feathers shall be designated on the label as "Crushed Feathers" or "Crushed Quill Feathers." (See Section 1198 of these regulations.)

1195. "Free fiber" shall mean the detached barbs from down plumes or detached barbs from the basal end of feathers and undistinguishable from the barbs of down plumes.

1196. "Feather fiber" shall mean the detached barbs and stripings of waterfowl, chicken and turkey feathers.

1197. "Damaged feathers" shall mean feathers which have been broken, injured by insects, or depreciated from the original value in any manner; provided, however, that this shall not apply to "crushed feathers" as defined in Section 1194 of these regulations.

"Damaged feathers" in excess of 5 percent of any stock shall be stated on the label.

1198. "Residue" shall mean quill pith, quill fragments, trash or any foreign matter and shall not exceed 2 percent of any feather and down stock. When residue exceeds 2 percent, the percentage shall be stated on the label as "Residue."

1199. Name of Fowl. (a) When feathers and down are derived from geese, ducks or eider ducks, the name of the fowl shall precede other required designations.

(b) Stocks composed entirely of turkey feathers or chicken feathers shall show the name of the fowl on the label. Stocks of mixed chicken and turkey feathers may be labeled as "Colored Chicken and Turkey Feathers" without showing the percentage of each.

History: 1. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1200. Color. (a) The color of waterfowl feathers and down shall be designated as "White" or "Gray."

(b) The color of chicken feathers shall be designated as "White" or "Colored." No statement of color is required for turkey feathers.

1201. Percentages. Percentages shall be shown on the label for each component heretofore defined.

(a) Down stocks containing not over 10 percent small natural body feathers of the same fowl as that from which the down is derived may be labeled as down.

(b) **Blends.** In a mixture of feathers and down, a tolerance not to exceed 10 percent of the down content is permitted.

(c) The "goose down" portion of any stock shall not contain in excess of 10 percent of duck down.

(d) The "goose feathers" portion of any stock shall not contain in excess of 10 percent of duck feathers.

(e) The "goose feathers" portion of any feather stock shall not contain in excess of 5 percent chicken and/or turkey feathers. Such chicken and/or turkey feather content shall reduce the permissible duck feather content in like amount.

(f) The "duck feathers" portion of any stock shall not contain in excess of 5 percent chicken and/or turkey feathers.

(g) "Free fiber" in excess of 5 percent shall be so indicated on the label or combined with excessive quantities of "feather fiber" and be designated as "fiber."

(h) "Feather fiber" from waterfowl feathers in excess of 5 percent shall be so indicated on the label or combined with excessive quantities of "free fiber" and be designated as "fiber." This does not apply to feathers defined in Section 1194 of these regulations.

(i) There shall be no tolerance for chicken or turkey feather fiber in down stocks.

(j) "Chicken feather fiber" or "turkey feather fiber" in excess of 5 percent of the chicken or turkey feathers in any stock shall be so designated. This does not apply to feathers defined in Section 1194 of these regulations.

(k) "Chicken feather fiber" or "turkey feather fiber" in stocks otherwise consisting wholly of waterfowl plumage, shall be so designated.

History: 1. Amendment filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

1202. Cleanliness. (a) The oxygen number of any filling material consisting of whole feathers or down or a combination thereof, and the oxygen number of any filling material consisting of an admixture of feathers and down which contains 5 percent or less of crushed feathers, shall not exceed 25 grams of oxygen per 100,000 grams of sample.

(b) The oxygen number of any filling material which contains more than 5 percent of crushed feathers shall not exceed 40 grams of oxygen per 100,000 grams of sample.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

2. Repealer and new section filed 1-26-61; effective thirtieth day thereafter (Register 61, No. 2).

Article 7. Hair Regulations

(Also see Article 4)

1210. "Hair" shall mean the coarse filamentous epidermal outgrowth of such mammals as horses, cattle, hogs and goats. When used in the manufacture of upholstered furniture, bedding or filling material, it shall be clean, properly cured, free from epidermis, excreta, or foreign or objectionable substances or odors.

1211. Classification of Hair. Hair shall be classified and labeled as follows:

- "Horse Tail Hair"
- "Horse Mane Hair"
- "Hog Hair"
- "Cattle Tail Hair"
- "Cattle Hide Hair"
- "Goat Hair"

1212. Single Grades of Hair.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1213. Hair Percentages.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1214. Hair and Fiber Mixtures.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1215. Color of Hair. Hair may be identified as to color, and if so described on the label, it shall be as represented in all respects.

1216. Curled Hair. When any hair set forth in Section 1211 of this regulation has been curled, the appropriate designation shall appear on the label, preceded by the word "Curled."

1217. Uncurled Hair. When any hair has not passed through a curling process, the appropriate designation shall appear on the label, preceded by the word "Uncurled."

1218. Labeling Examples.

(a) Curled gray horse tail hair.

(b) Curled hair: { Hog ----- 85%
 { Cattle ----- 15%

(c) Latex rubberized curled hair pad: { Horse mane ----- 35%
 { Hog ----- 65%

(d) Curled hair and fiber: { Hog hair ----- 75%
 { Sisal ----- 25%

(e) Curled hair pad: { Hog ----- 85%
 { Cattle ----- 15%

Article 8. Wool Regulations

(Also see Article 4)

1230. "Virgin wool" shall mean the fleece of the sheep or lamb, which has been scoured, or scoured and carbonized. It shall not be the by-product of any process of manufacture nor shall it have sustained prior use. The fibers shall be reasonably uniform in length, viz: it shall not contain a mixture of long and short fibers. It shall be free from kemp and vegetable matter.

1231. Choice Virgin Wool. (Optional for those manufacturers who want to use, and get credit for using a finer quality of wool:)

"Choice virgin wool" shall mean wool as defined above that is " $\frac{1}{4}$ blood" (48s) or finer in grade, according to the United States standards for grades of wool, and shall be natural or bleached white in color. The fibers shall be reasonably uniform in length, viz: it shall not contain a mixture of long and short fibers. The term "choice virgin wool" may not be used in describing the component parts of wool blends or mixtures.

1232. "Wool Noil."

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1233. "Wool Waste."

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1234. Oil and Grease Limitation.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1235. Trash Limitation.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

Article 9. Miscellaneous Regulations

(Also see Article 4)

1240. "Fiber" shall mean any threadlike tissue. This term shall be preceded by a designation which will disclose the true source of the fiber. Examples: "Hemp fiber," "flax tow fiber."

1241. Trash.

History: 1. Repealer filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

1242. Label Terms: Definition of. Label terms shown in quotation marks in the following definitions shall be the proper names for labeling purposes:

(a) "Acetate fiber" shall mean fibers composed principally of cellulose acetate and containing amounts of other fiber-forming material.

(b) "Acrylic fiber" shall mean any long chain synthetic polymer containing acrylic acid, or its derivatives, and which is formed into a filament.

(c) "Cellulose fiber" shall mean wood or other vegetable growth reduced to a fibrous state.

(d) "Coco or coir fiber" shall mean the stiff elastic fiber obtained from the outer husk of the coconut.

(e) "Corrugated fiber board" shall mean a thick coarse paper, corrugated to give it elasticity.

(f) "Excelsior" shall mean shredded threadlike wood fibers, but shall not include waste products such as shavings, sawdust, or similar waste.

(g) "Flax tow" shall mean the coarse, broken and refuse parts of flax separated from the fine fibrous parts in preparing the flax for spinning.

(h) "Glass fiber" shall mean the very fine filaments or fibers made of glass.

(i) "Jute fiber" shall mean the bast fiber derived from several species of the *Corchorus* plant.

(j) "Kapok" shall mean the mass of fibers investing the seed of the kapok tree (*Ceiba pentandra*).

(k) "Milkweed fiber" shall mean the surface fiber from the inside of the seed pods of milkweed plants (*Asclepias*).

(l) "Moss" shall mean the processed fibers of epephytic plants forming pendant tufts from trees.

(m) "Nylon" shall mean any long-chain synthetic polymeric amide which is formed into a filament.

(n) "Palm fiber" shall mean the fibrous material obtained from the leaf of a palm, palmetto, or palmyra tree.

(o) "Polyester fiber" shall mean a synthetic filament or fiber made from polyesters.

(p) "Polyurethane foam" shall mean a synthetic product made entirely of foam containing urethane chemical linkage.

(q) "Rayon" shall mean regenerated cellulose fibers containing amounts of nonregenerated cellulose fiber-forming material.

(r) "Latex foam rubber" shall mean the product made from rubber latex to which compounding ingredients are added in dissolved form and the mixture usually agitated to a foam and vulcanized in this state. It has interconnecting cells.

For labeling purposes, the following five grades are hereby established:

(1) "Latex foam rubber" shall mean first quality latex foam rubber products.

(2) "Imperfect latex foam rubber" shall mean any foam rubber product which shows major manufacturing imperfections and which the producer sells as other than first quality material.

(3) "Shredded latex foam rubber" shall mean shredded waste or trimmings from cutting sheets or shapes, shredded imperfect products or shredded overflow from molds known as flashings and similar material.

(4) "Latex foam rubber scrap" shall mean unshredded waste from production and similar unshredded material.

(5) "Remolded shredded latex foam rubber" shall mean the material described in (3) above, remolded into a predetermined stable shape.

(s) "Sponge rubber" shall mean the product made from solid rubber into which the compounding ingredients are milled or mechanically worked and a blowing agent, usually sodium bicarbonate, is added which expands during vulcanization. It has interconnecting cells. For labeling purposes, the following five grades are hereby established:

(1) "Sponge rubber" shall mean first quality sponge rubber products.

(2) "Imperfect sponge rubber" shall mean any sponge rubber product which shows major manufacturing imperfections and which the producer sells as other than first quality material.

(3) "Shredded sponge rubber" shall mean shredded waste or trimmings from cutting sheets or shapes, shredded imperfect products or shredded overflow from molds known as flashings and similar material.

(4) "Sponge rubber scrap" shall mean unshredded waste from production and similar unshredded material.

(5) "Remolded sponge rubber scrap" shall mean the material described in (3) above remolded into a predetermined stable shape.

(t) "Sisal fiber" shall mean the leaf fiber derived from the Agave sisalana and similar species of Agaves.

(u) "Tula fiber" shall mean the leaf fiber derived from the Tula Istle and similar species of Agaves.

(v) "Vinyon fiber" shall mean a synthetic filament or fiber which is vinyl resin prepared by the conjoint polymerization of vinyl chloride and vinyl acetate.

(w) Synthetic fibers or man-made fibers not specifically provided for elsewhere in this article, shall be designated on the label as "Synthetic Fiber."

History: 1. Repealer and new section filed 4-20-54; effective thirtieth day thereafter (Register 54, No. 9).

2. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

Article 10. Sterilization Regulations

1250. Secondhand Articles to be Sterilized. (a) The following articles of secondhand upholstered furniture and bedding shall be sterilized before being offered or exposed for sale:

Bed davenport	Feather beds
Box springs	Gliders
Chairs (with completely upholstered back and arms)	Lounges
Chairs (adjustable for sleeping)	Mattresses
Chesterfields	Mattress pads
Comforts	Packing pads
Couches	Pillows
Cushions (other than chair pads)	Quilts
Davenport	Quilted pads
Duofolds	Settees
	Sleeping bags
	Studio couches
	Upholstered baby carriages

(b) In addition to the foregoing articles, any other secondhand upholstered furniture or bedding that could be used for sleeping or reclining purposes, or any contaminated article of upholstered furniture or bedding shall be sterilized under the provisions of this section.

(c) Red tags affixed to articles which are withheld from sale for sterilization, may be removed, after sterilization, by the bureau or by a licensed sterilizer operator only. Tags removed may be mailed by the operator to the bureau district office or held by him for inspection and destruction by the bureau representatives.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1251. Application. Every applicant for permission to operate any type of sterilizing equipment shall furnish with his application, detailed plans in duplicate (2 copies) of the proposed equipment. Tentative approval of the plans may be given if they are in substantial compliance with requirements.

1252. Tests and Inspections. All sterilizing facilities shall be subject to tests for proficiency of operation, and the premises, equipment, books and records kept in connection therewith shall be subject to inspection at all reasonable times.

1253. Chamber Identification. When more than one sterilization chamber is operated on any premises by the same person, each chamber shall be permanently identified by a letter, beginning with "A" and proceeding in alphabetical order.

1254. Lot. A "lot" consists of all of the articles sterilized in one chamber during one operation. Lots shall be numbered consecutively.

1255. Charts. Vacuum-time recording charts on vacuum chemical chambers and heat-time recording charts on dry heat chambers shall have noted on the face thereof the date of the operation, the chamber letter if any and the lot number used in connection with each operation.

The following is an example of the correct form of keeping charts:

<i>Date</i>	<i>Chamber</i>	<i>Lot No.</i>
2/23/50	B	224
2/24/50		225

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

1256. Records. Records shall be kept in a bound book and shall show the date of sterilization, the chamber letter if any, the lot numbers and label numbers in consecutive order, the names of the articles together with the number of unattached cushions, pillows, etc., belonging to and forming a part thereof, and the name of the person for whom sterilized.

(a) Unattached cushions, pillows, mattresses, and pads that belong to and form a part of chesterfields, davenports, studio couches and the like shall be recorded only when actually received by the sterilizer and sterilized.

(b) Mattresses and pads with duofolds or divans shall be removed from such articles and sterilized and recorded separately.

(c) The following is a sample of the correct form of keeping records:

<i>Date</i>	<i>Chamber</i>	<i>Lot No.</i>	<i>Label Nos.</i>	<i>Articles</i>	<i>Private Individual or Firm Names:</i>
2/23/50		224	19440-19444 19445 19446-19447 19448	5 mattresses 1 divan 2 pads 1 chesterfield (with three cushions)	Jim's Furniture Store Hilmar Furniture Store Ace Furniture Store Ace Furniture Store

Los Angeles Furniture Co. Los Angeles Furniture Co. Mr. O. K. Smith Mrs. A. F. Wood Antique Shop

(d) Records shall be kept of:

- (1) The kind of chemicals purchased
- (2) The quantity of chemicals purchased
- (3) The date of purchase
- (4) From whom purchased.

1257. Storage of Formaldehyde. Formaldehyde shall be stored in air tight containers which shall be kept tightly closed. Storage under other conditions may permit the crystalization of the formaldehyde in the solution.

1258. Method of Sterilization. Unless otherwise specifically provided for, the chief of the bureau or any inspector may determine the method to be employed in the sterilization of any article or material subject to the provisions of the act and these regulations.

(a) **Feathers and Down** shall be sterilized only by the methods provided therefor in Section 1261 of these regulations.

(b) **Secondhand Material** which is filthy or stained or has a disagreeable odor, or is otherwise contaminated shall be sterilized by the wet method as set forth in Section 1262 of these regulations.

(c) **Baled Filling Materials** shall not be sterilized while still in the bale.

1259. Vacuum Chemical Method. (a) The vacuum chamber shall be placed under 29-inch vacuum. For a chamber having a capacity of 500 cubic feet, 3 quarts of formaldehyde 40 percent solution and 3 pounds of potassium permanganate shall be placed in a water jacketed auxiliary tank previously heated to 120 degrees F. and the formalin

vapors introduced slowly into the chamber. This will cause the vacuum to drop to about 26 inches. A dosage of carbon dioxide gas shall then be introduced into the chamber until the vacuum drops to 24 inches. One-half gallon of carbon disulphide shall then be introduced into the chamber after running it through not less than 3 feet of coil in another water jacketed auxiliary tank previously heated to 180 degrees F. This process will reduce the vacuum to about 22 inches. Another dosage of carbon dioxide shall then be passed into the chamber until the vacuum is reduced to about 20 inches. After all gases have been admitted into the chamber, the vacuum shall be dropped to a point between 15 inches and 12 inches, after which all valves shall be tightly closed and the chamber held at this vacuum for a minimum of 2 hours. At the end of this time, air shall be admitted until the gauge reads 0. The chamber shall then be pumped out to 25 inches of vacuum not less than twice to remove the fumes, and then opened. If the capacity of the vacuum chamber is more or less than 500 cubic feet, the dosages of the respective gases shall be increased or decreased proportionately.

(b) A suitable recording device approved by the bureau shall be installed and maintained to record on a chart the time and vacuum factors prevailing during the entire operation.

1260. Dry Heat Method. (a) In sterilizing by the dry heat method a temperature of 230 degrees F. shall be maintained in all parts of an approved chamber for such period of time as may be necessary for sterilization, which shall in no case be less than one hour and 15 minutes, and thirty-two ounces of a 40 percent solution of formaldehyde shall be vaporized and liberated within the chamber for every 1,000 cubic feet of chamber and circulating ducts displacement. The formaldehyde solution shall be introduced into the chamber from an approved outside receptacle after the chamber has been sealed and immediately before the above-described temperature is reached and shall be vaporized in an approved receptacle within the chamber. All chambers shall be equipped with racks or devices and the articles to be sterilized shall be so placed therein that complete circulation of heat and gases around every article being sterilized shall be attained. All chambers shall be insulated sufficiently to insure maintenance of temperature and shall be tightly sealed to prevent any leakage of gases. A thermostat shall be connected with the heating device to provide and maintain a reasonably uniform temperature at 230 degrees F. \pm 5 degrees.

(b) A suitable recording device approved by the bureau shall be installed and maintained to record on a chart the time and temperature prevailing during the entire operation.

(c) Each chamber in which the dry heat method of sterilization is performed shall be equipped with a fresh air inlet and an exhaust fan

and duct discharging to the outside air. To clear the chamber of dangerous gases and fumes upon completion of the sterilization cycle, the fresh air inlet to the chamber shall be opened and the exhaust fan operated for 30 minutes or until all dangerous fumes have been exhausted through the discharge duct. The sterilized articles may then be removed from the chamber.

History: 1. Amendment filed 7-31-56; effective thirtieth day thereafter (Register 56, No. 15).

2. Amendment filed 5-1-59; designated effective June 1, 1959 (Register 59, No. 7).

1261. Feather and Down Method. In sterilizing secondhand feathers and down, the feathers and down of each customer shall be separately treated and not combined with feathers and down from other sources.

(a) In sterilizing feather and down filled pillows or other articles, the contents shall be removed from ticks and covers or containers, and the feathers and down sterilized loose or they may be placed in coarse mesh bags, loosely filled, and then sterilized.

(b) Ticking must be dry-cleaned or laundered in water of a temperature of not less than 212 degrees F. or new ticking shall be used.

(c) All feathers and down, loose or in mesh bags, shall be placed in a closed receptacle and subjected to streaming live steam out of jets not less than one-quarter inch in diameter. One jet shall be installed in the receptacle for every 50 cubic feet of displacement or fraction thereof.

(1) When feathers and down are sterilized in mesh bags, the material shall be inserted in the bags sufficiently loose to permit the steam and heat to penetrate to all of the material.

(2) Bags shall be inserted in the receptacle so that they can tumble freely and not restrict the penetration of the steam and heat into the feathers and down.

(d) The streaming steam shall be injected while the mesh bags or loose feathers and down are in motion to bring about complete sterilization, after which the steam shall be forced out of the chamber and the feathers and down subjected to sufficient heat for the period of time necessary to thoroughly dry them.

(e) The Muroza or kindred types of feather and/or down sterilizers may be used, provided the following requirements are complied with:

(1) A steam pressure of 100 pounds shall first be developed.

(2) The sterilizing chamber shall then be heated to 290 degrees F.

(3) The feathers and/or down shall then be drawn into the sterilizing chamber and subjected to streaming live steam for a period of at least one minute.

(4) The feathers and/or down shall then be subjected to heat at not less than 290 degrees F. for a period of at least 7½ minutes.

1262. Wet Method. In sterilizing by the wet method, the material to be sterilized shall be immersed in water, maintained at a temperature of 212 degrees F. for at least 10 minutes with proper arrangements for agitation of the material while in the vat, after which any portion of the material shall pass through a hole 1½ inches in diameter.

1263. Steam Under Pressure Method. In sterilizing by this method, the material to be sterilized shall be subjected to steam under pressure for a period of 30 minutes, the pressure of the steam to be a minimum of 15 pounds per square inch, the temperature of the steam to be a minimum of 248 degrees F. A properly checked steam pressure gauge and a thermometer, both visible from the outside of the chamber, shall be provided.

1264. Other Methods of Sterilization. Any method of sterilization not provided for herein shall be submitted to the bureau for test and shall have the approval of the State Department of Public Health before adoption or use.

1265. Methyl Bromide. Tests made by the bureau in vacuum chemical sterilizing chambers approved by the bureau, indicate that methyl bromide, when used as a fumigant only, will effect a satisfactory "kill."

Persons have been poisoned when exposed to concentrations of more than 32 parts per million of methyl bromide over an extended period of time. It is considered toxic and must be used carefully in well ventilated premises. Its use in a sterilizing plant is wholly the responsibility of the user.

Article 11. False or Misleading Advertising

1300. Application of Article. For the purposes of Sections 19150 and 19210 of the act, false or misleading advertising includes but is not limited to advertising, within the meaning of Section 17500 of the Business and Professions Code, which violates any provision of this article.

NOTE: Authority cited: Section 19034, Business and Professions Code. Additional authority cited for Article 11 (Sections 1300 through 1318): Section 19089, Business and Professions Code.

History: 1. New section filed 12-8-52; effective thirtieth day thereafter (Register 30, No. 5).

2. Repealer of Article 11 and new Article 11 (Sections 1300 through 1318) filed 5-1-59; designated effective June 1, 1959 (Register 59, No. 7).

1301. Former Price, Defined. The term "former price" as used in Section 17501 of the Business and Professions Code and in this article includes but is not limited to the following words and phrases

when used in connection with advertised prices: "formerly—", "regularly—", "usually—", "originally—", "reduced from ————", "was ———— now ————", "———% off".

1302. Former Price of Same Article. (a) No price, whether expressed in words, phrases, price figures, symbols, fractions, percentages, or otherwise, shall be advertised as the former price of an article unless such advertised former price applies to the specific article advertised, as distinguished from similar or comparable articles, and, except as provided in subdivision (b) of this section, such advertised former price was, (1) within the three months immediately preceding the publication of the advertisement, the prevailing market price of the article, as defined in Section 17501 of the Business and Professions Code, in the locality wherein the advertisement is published, or (2) the date when such advertised former price did prevail is clearly, exactly, and conspicuously stated in the advertisement.

(b) Subdivision (a) of this section shall not be considered as prohibiting an advertisement of the advertiser's own former price of an article if (1) such advertised former price was in fact and within the three months immediately preceding the publication of the advertisement the advertiser's price for the article in the locality in which the advertisement is published, or (2) the date when such advertised former price did prevail is clearly, exactly, and conspicuously stated in the advertisement, and (3) if the fact that the advertised former price is the advertiser's own former price is clearly and conspicuously stated in the advertisement.

1303. Fictitious Markup. No fictitious markup shall be used to provide the basis for an advertised former price.

1304. Comparison With Prices of Other Merchandise. Nothing in this article shall be considered as prohibiting an advertiser from comparing his selling price for an article with the selling price of similar and comparable merchandise if: (1) the grade and quality of the merchandise with which the advertised article is compared are at least equal to those of the advertised article in all material respects, (2) the advertisement clearly and fairly discloses that the price comparison is between the advertised article and similar and comparable merchandise, rather than between the advertised price and a former price of the advertised article, (3) the advertisement is not false or misleading in respect to the time at which and the area in which the comparative price prevailed, and (4) the advertisement is not false or misleading in any other respect.

1305. Special Sale. No advertisement shall represent that because of an unusual event in the course of business or an unusual manner of doing business or for any other reason an article is offered for sale at a saving in price unless such advertisement is in all respects true and not misleading and unless, if the advertisement refers to a comparative price as described in Sections 1302 and 1304 of these

regulations, it complies with the provisions of whichever of such sections is applicable, or both of them, as the case may be.

1306. Purchase of Additional Merchandise. No advertisement shall represent that an article is offered for sale at a saving when the offer is conditioned upon the purchase of additional merchandise unless: (1) the terms and conditions imposed are clearly and correctly disclosed in immediate conjunction with the offer, (2) if the advertisement refers to a comparative price as described in Sections 1302 and 1304 of these regulations, it complies with the provisions of whichever of such sections is applicable, or both of them, as the case may be, and (3) the price charged for the additional merchandise required to be purchased is the price charged for such merchandise by the advertiser in the recent and regular course of his business, or if not, such price is not artificially fixed in order to permit the advertiser to represent an apparent saving.

1307. Pre-ticketing. No article shall be advertised by means of a "pre-ticketed" price, whether such price is used alone or in conjunction with descriptive terminology and whether such price appears on tags or labels affixed to the article, or in material such as display cards which are used with the article at the point of sale, or otherwise. A "pre-ticketed price", as used in this section, is a price which is in excess of the price at which the advertiser intends to sell or offer for sale the article to which it refers and which is artificially fixed in order to permit the advertiser to represent an apparent saving or price reduction.

1308. Imperfects, Irregulars or Seconds. No article which is imperfect, irregular, or a second shall be advertised in any manner, whether by means of comparative prices or otherwise, which represents or implies that such article is free from defects or is of the same grade or quality of the article as usually and customarily offered for sale in the normal course of business.

1309. Factory Outlet. No advertisement shall represent or imply, by the use of the terms "factory outlet," "factory to you," "factory to consumer," "manufacturer to you," or any term of similar import, that an article is offered for sale by the manufacturer at a saving from the usual and customary retail price of the article in the locality in which the advertisement is published, unless the person so advertising is licensed under the act as a manufacturer and the representation of savings is true, and except in connection with the sale of articles by the manufacturer thereof from his manufacturing premises.

1310. Custom Made. No article shall be advertised by means of the terms "custom made," "custom-built," "custom-grade," "made-to-order," or any term of similar import, unless the article has been or will be made to the order and specifications of a particular ultimate user. An article does not meet the requirements of this section merely because the customer has a choice of coverings.

1311. Labor Free. No advertisement shall represent or imply by means of the term "labor free" or any term of similar import that services with respect to an article will be performed without charge when a charge is made for such services in any manner whatever, including but not limited to an increase in the charge for the article or any material used therein.

1312. Liquidation. No advertisement shall represent or imply, by means of the term "going out of business," "selling out," "closing out," "liquidating," or any term of similar import, that the advertiser is going out of business, or is disposing of all or a portion of a stock of merchandise, unless such representation is true and is not in any respect misleading as to the advertiser's discontinuing business or as to the types and quantity of merchandise intended to be included, or otherwise. A mere change of business location, business name, or type of business entity does not constitute going out of business within the meaning of this section.

1313. Health Properties. No advertising shall contain any false or misleading representation concerning the special qualities of an article to prevent defects in posture, develop or encourage good posture, in any manner materially affect posture, or materially affect health generally.

1314. Recommendations. No advertising shall contain any false or misleading representation concerning the sponsorship, approval, or recommendation of an article by any person or organization or concerning the professional qualification or status or other special competence of such person or organization.

1315. Guarantees. No advertising shall contain any false or misleading representation concerning the nature, extent, duration, terms, or cost of a guarantee of an article or of any services performed under a guarantee.

1316. Secondhand Merchandise. No article which is secondhand, as defined in the act, shall be advertised in any manner which represents or implies that the article is new.

1317. Misleading, Defined. In determining whether advertising is false or misleading it shall be considered in its entirety and as it would be read by the persons to whom it is designed to appeal. It shall be considered to be misleading if it tends to deceive the public or impose upon credulous or ignorant persons.

1318. Knowledge. Nothing in this article shall be considered as applying to advertising which was not known, or should not in the exercise of reasonable care have been known, to be untrue or misleading.

Federal Trade Commission

TRADE PRACTICE RULES

For The

**BEDDING MANUFACTURING AND
WHOLESALE DISTRIBUTING INDUSTRY**

**As Promulgated November 14, 1950
Amended January 14, 1955 to include Rule 20**

FEDERAL TRADE COMMISSION

FEDERAL TRADE COMMISSION
Washington

Trade Practice Rules

For The

**BEDDING MANUFACTURING AND
WHOLESALE DISTRIBUTING INDUSTRY**

As Promulgated November 14, 1950

STATEMENT BY THE COMMISSION:

Trade practice rules for the Bedding Manufacturing and Wholesale Distributing Industry, as hereinafter set forth, are promulgated by the Federal Trade Commission under the trade practice conference procedure.

Members of the industry are the persons, firms, corporations and organizations engaged in manufacturing and selling in commerce mattresses (including baby crib mattresses), bed pads, bedsprings, box springs, metal cots, metal beds, studio couches, sofa beds, or similar sleeping equipment; also, all persons, firms, corporations and organizations engaged in selling in commerce as wholesalers or jobbers any of the products or equipment mentioned. Sales at wholesale of such products and equipment are estimated to approximate \$350,000,000 per annum.

The rules are directed to the elimination and prevention of unfair trade practices to the end that the industry, the trade, and the public may be protected from the harmful effects of such competitive methods, and of providing guidance and assistance to business in the maintenance of free and fair competition.

Proceedings leading to the establishment of rules were instituted upon application made on behalf of industry members. A general industry conference was held in Chicago, Illinois, at which proposals for rules were submitted for the consideration of the Commission. Thereafter, a draft of proposed rules were made available by the Commission and public notice given whereby all interested or affected parties were afforded opportunity to present their views, suggestions, or objections at a public hearing held in Washington, D. C.

Following such hearing, and upon consideration of the entire matter, final action was taken by the Commission whereby it approved and received, respectively, the trade practice rules hereinafter appearing in Group I and Group II.

Such rules become operative thirty (30) days from the date of promulgation.

THE RULES

These rules promulgated by the Commission are designed to foster and promote the maintenance of fair competitive conditions in the interest of protecting industry, trade, and the public. It is to this end, and to the exclusion of any act or practice which suppresses competition, restrains trade, fixes or controls price through combination or agreement, or which otherwise injures, destroys, or prevents competition, that the rules are to be applied.

DEFINITION

Bedding Products: As used in these rules the term "bedding products" shall embrace mattresses of all kinds (including baby crib mattresses), bed pads, bedsprings, box springs, metal beds, metal cots, studio couches, sofa beds, and similar sleeping equipment.

GROUP I

The unfair trade practices embraced in the Group I rules herein are considered to be unfair methods of competition, unfair or deceptive acts or practices, or other illegal practices, prohibited under laws administered by the Federal Trade Commission; and appropriate proceedings in the public interest will be taken by the Commission to prevent the use, by any person, partnership, corporation, or other organization subject to its jurisdiction, of such unlawful practices in commerce.

RULE 1 - DECEPTION AS TO USED MATERIALS AND PARTS.

(a) It is an unfair trade practice to manufacture for sale, sell, offer for sale, advertise, or otherwise represent, directly or indirectly, any bedding product as being new when such product is not in fact new and is not composed wholly of unused materials and parts.

(b) In the marketing of bedding products containing, in whole or in part, second-hand materials or parts, it is an unfair trade practice to fail or refuse to make full and nondeceptive disclosure, by tag or label attached to the products and in all advertising and trade promotional literature, of the fact that such products are not new but consist, in whole or in part, of second-hand materials or parts, such failure or refusal to disclose having the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public.

(c) Nothing in this rule shall be construed as permitting the sale or distribution of bedding products which contain any unsanitary material.

RULE 2 - OTHER DECEPTION THROUGH MISREPRESENTATION OR CONCEALMENT.

(a) It is an unfair trade practice for any industry member to sell, offer for sale, or distribute any mattress or other bedding product, or to promote the sale or distribution thereof, by any method, or under any

circumstance or condition, which has the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public as to the material content, composition, construction, manufacture, design, utility, durability, resilience, sag resistance, or health or therapeutic properties, of any mattress or other bedding product, or which is false, misleading, or deceptive in any other material respect.

(b) The provisions of this rule shall apply to advertising representations, labeling, or selling promotions which are misleading or deceptive to the purchasing or consuming public by reason of the concealment or nondisclosure of a material fact, as well as to representations, advertisements, or sales promotional methods which are false, misleading, or deceptive for any other reason.

(c) The inhibitions of this rule shall apply specifically to the deceptive concealment or nondisclosure of the kind or kinds of materials used in the filling and cover of mattresses or other bedding products.

(d) Nothing in this rule shall be construed as relieving any member of the industry of the necessity of complying with other applicable provisions of laws or regulations relating to mattresses or other bedding products, including fiber content disclosure or identification.

RULE 3 - MISUSE OF THE TERMS "FELT," "FELTING," AND "FELTED."

It is an unfair trade practice to use the term "Felt," "Felting," or "Felted" as descriptive of the filling of a mattress or other bedding product unless such filling is a compact layer of fibers which have been specially processed and interlaced to form a mat of substantially uniform thickness suitable for use as a filling for a mattress or other bedding product; provided, that when the filling is of other than cotton or wool fibers, the term shall be immediately accompanied by the fiber identification (as, for example, "Felted Kapok," "Sisal Felting," etc.)

RULE 4 - MISUSE OF THE TERMS "LATEX," "FOAM RUBBER," "LATEX FOAM RUBBER," ETC.

(a) It is an unfair trade practice to use the term "Latex," "Foam Rubber," "Latex Foam Rubber," or any term of similar import, as descriptive of a bedding product or of any filling thereof, under any circumstance or condition having the capacity and tendency or effect of misleading or deceiving purchasers, prospective purchasers, or the consuming public.

(b) Under the foregoing paragraph (a), the terms "Latex," "Foam Rubber," "Latex Foam Rubber," or other terms of similar import, shall not be used to describe a bedding product unless the filling material thereof is of latex which has been foamed and molded into one homogeneous pad; provided, however, that when the filling of any bedding product is in part a homogeneous layer of latex which is of substantial thickness, such terms may be used as descriptive thereof if in conjunction

therewith nondeceptive disclosure is made of the fact that only a part of such filling consists of latex; and provided further, that when the filling is composed, in whole or in part, of latex which has been shredded flaked, or ground, full and nondeceptive disclosure is made of such fact, irrespective of whether the pieces or shreds are in loose form or are held together by glue or other adhesive agent.

RULE 5 - MISUSE OF TERMS "Rx", "POSTURE," "POSTURIZED," "POSTURITE," "CUSTOM BUILT," "ORTHOPEDIC," "GERMPROOF," AND "WATERPROOF."

In the sale, offering for sale, or distribution of bedding products, it is an unfair trade practice:

(a) To use the term "Rx", or any term of similar import, as descriptive of any bedding product which has not been specially designed and constructed to meet the requirements of a prescription by a member of the medical profession for the use of a particular individual;

(b) To use the term "Posture," "Posturized," or "Posturite," or any term of similar import, as descriptive of any bedding product which has not been specially designed and constructed to afford correct posture during sleep, or which, although so designed and constructed for such purpose, is not in fact capable of affording correct posture during sleep, or which is not capable of preventing or correcting, or of contributing materially to the prevention or correction of, posture defects;

(c) To use the term "Custom Built," or any term of similar import, as descriptive of any bedding product which has not in fact been made in accordance with specifications furnished prior to manufacture by the individual purchaser and user of such product;

(d) To use the term "Orthopedic," or any term of similar import, as descriptive of any bedding product unless such product has been specially designed and constructed so as to prevent, correct, or afford substantial relief with respect to a specific body deformity or deformities and accords with recommendations of orthopedic authorities respecting design and construction for such deformity or deformities; provided, that the term shall in all cases be accompanied by specification of the kind or kinds of body deformities for which the product has been so designed and constructed;

(e) To use the term "Germproof," or any term of similar import, as descriptive of any bedding product, unless such product is, and will remain throughout its expected life, entirely free of germs; provided, that nothing herein shall be construed as prohibiting a representation that a bedding product is sterile if the product at the time of consumer purchase is completely free of living germs and is packaged in such manner as to assure maintenance of its sterile condition until after delivery of the product to the ultimate consumer-purchaser; and provided further, that the representation is not

supplemented or made in any manner which implies that the sterile condition will continue after removal of the product from its packaging and regardless of its use and exposure;

(f) To use the term "Waterproof," or any term of similar import, as descriptive of any bedding product the outer covering of which is not such as to be impervious to the entry of water or moisture throughout the life of such bedding product; or

(g) To cause any bedding product to be represented, directly or by implication, as being a product which is used in any hospital or clinic or is recommended by members of the medical profession or by a medical organization when such is not the fact, or as having been designed or made so as to afford special health, orthopedic, or therapeutic values, when such is not the fact.

RULE 6 - DECEPTIVE PRICING.

(a) It is an unfair trade practice for any member of the industry to represent, in advertising or otherwise, that the price of any industry product has been reduced from what is in fact a fictitious price, or that such price is a reduced or a special price when it is in fact the regular selling price of such product, or that the regular price thereof is higher when such is not the fact, or otherwise to falsely or deceptively represent the past or current price of an industry product.

(b) It is an unfair trade practice for any member of the industry, directly or indirectly, to use or to supply to dealers, or to aid or assist in the use of, price tags, labels, or similar devices which are false or fictitious, or which such member has reason to believe are intended to be used or will be used by dealers or salesmen for the purpose of misleading or deceiving the purchasing or consuming public in regard to price, or in any other material respect.

(c) It is an unfair trade practice for any member of the industry to falsely represent that the price of any bedding product is a "wholesale price" or a "factory price."

RULE 7 - GUARANTEES, WARRANTIES, ETC.

(a) It is an unfair trade practice to use, or cause to be used, any guarantee or warranty which is false, misleading, deceptive, or unfair to the purchasing or consuming public, whether in respect to the quality, construction, serviceability, wearing quality, method of manufacture, or in any other respect.

(b) The foregoing inhibitions of this rule are to be considered as applicable with respect to any guarantee or warranty in which the terms and conditions relating to the obligation of the guarantor or warrantor are deceptively minimized or stated, or in which the obligations of the guarantor or warrantor are impractical of fulfillment; and as also applicable to the use of any guarantee or warranty in respect of which the guarantor or warrantor fails or refuses to scrupulously observe his obligations thereunder.

(c) It is also an unfair trade practice to represent any bedding product as being "guaranteed" unless the nature and extent of the undertaking, and the identity of the guarantor, are conjunctively disclosed.

RULE 8 - DECEPTION THROUGH FAILURE TO DIFFERENTIATE BETWEEN WHOLESALE AND RETAIL TRANSACTIONS.

Where bedding products are sold at wholesale and at retail in the same establishment of a member of the industry, the commingling of the two types of business in such a manner as to have the capacity and tendency or effect of misleading or deceiving purchasers or prospective purchasers is an unfair trade practice.

RULE 9 - MISUSE OF THE WORD "FREE."

Use of the word "free," or words of similar import, when employed to describe any product which is not in truth and in fact a gift or gratuity, or which is not given to the recipient thereof without requiring the purchase of other merchandise, or requiring the performance of some service inuring, directly or indirectly, to the benefit of the industry member using such term, is an unfair trade practice.

RULE 10 - FALSE INVOICING.

Withholding from or inserting in invoices or sales tickets any statements or information by reason of which omission or insertion a false record is made, wholly or in part, of the transactions represented on the face of such invoices or sales tickets, with the effect of thereby misleading or deceiving purchasers or prospective purchasers, is an unfair trade practice.

RULE 11 - COMMERCIAL BRIBERY.
